showed the Association to have enjoyed a remarkable growth during the year, 89 new members being secured largely through the efforts of a solicitor whose services were secured by arrangement with the Insurance Company. The total membership in now 279, and as only Association members are eligible to insure in a Hardware Mutual further additions to membership are expected.

OFFICERS FOR 1906.

A change was made in the method of electing officers by which candidates were nominated and voted on by ballot in convention instead of being recommended by a nominating committee as on previous occasions. The following officers were chosen for the ensuing year:

PRESIDENT, Wm. Mendenhall, Montoursville.
VICE-PRESIDENT, A. H. Kaufman, Lock Haven.
SECRETARY-TREASURER, J. E. Digby, McKees Rocks.
MEMBERS OF EXECUTIVE COMMITTEE.—G. V. Thompson, Mt. Jewett; N. D. Cool, Galeton.
REPRESENTATIVES TO THE NATIONAL CONVENTION.—J. M. Selheimer, Lewiston; G. V. Thompson, Mt. Jewett; S. S. Bryan, Titusville; J. E. Digby, McKees Rocks.

CONVENTION COMMITTEES.

The following Committees were appointed by the President.
PRESS.—A. W. Leib, L. Wurster, A. H. Chamberlain of *The Iron Age.*
AUDITING.—L. H. Hoover, J. F. Frye, J. F. Howe.
NEXT PLACE OF MEETING.—G. L. Moore, G. W. Hackett, F. W. Prothero.

Pittsburgh was selected for the next meeting, the report of the committee recommending that city being unanimously adopted. The date for the meeting was left open and it may be decided to hold it at some other season than has been customary in previous years.

RETAILING HARDWARE FOR CASH.

was the subject of an exceedingly interesting address by N. D. Cool of Elmira Hardware Company, Galeton. The business of this Company was recently put on a cash basis to a very large extent and Mr. Cool's account of the experiment, which he describes as entirely successful, was listened to with great attention.

RESOLUTIONS.

In accordance with the report of this Committee, consisting of J. N. Kline, S. S. Bryan and J. E. Bergstresser, the Association adopted the usual Resolutions.

THE QUESTION BOX.

conducted by M. L. Corey, Secretary of the National Retail Hardware Association, was one of the features of the Convention. It was taken up at several sessions and discussions of trade topics and problems were very generally participated in.

M. L. COREY'S ADDRESS.

An address was delivered by M. L. Corey, National Secretary, giving the history and growth of the National Retail Hardware Association, relating to the work of the Joint Catalogue House Committee, and discussing the best methods of meeting catalogue house competition.

PARCELS POST.

The question of Parcels Post was thoroughly discussed and in fact was the principal point touched upon by T. James Fernley, Secretary of the National Hardware Association, who was present on the last day of the convention and made an able addresss.

THE INSURANCE COMPANY.

was ably presented by its President, C. H. Miller of Huntingdon, who delivered an effective address on the subject. "The Best Insurance For You." Mr. Miller sketched the history of the Mutual Insurance movement, reviewed its many advantages, especially to the Hardware merchant, and gave figures showing a steady annual growth in amount written of more than $300,000, the grand total now standing at about $1,250,000.

JOBBERS SELLING CONSUMERS.

The discussion of this subject was opened by J. F. Howe, Freedom, who delivered an able and practical address on the subject, "Shall Our Jobbers Sell Our Customers?" He was

Digitized by Google

followed by several other members, whose remarks and experience showed that retailers in all parts of the state suffered from this evil. Mr. Howe said in part:

If the question were, Shall my jobber sell to my customers? It would be a different matter and would require no discussion, as it could be settled individually by each retailer, and it has been settled for myself, for I always refuse to acknowledge any jobber as my jobber who sells to my customers, and right there is where the trouble has been. We have only been interested in

SEEING THAT THE JOBBERS DID NOT SELL OUR TRADE.

and have been indifferent as to whether he sold to our neighbor's customers or not. We must take hold of this matter in a different way if we would accomplish anything. We must consider every jobber who does business in the State as our jobber, and every customer of every retail store in the State just as though he were our individual customer. Nothing of any importance is ever accomplished without some sacrifice. We must expect at least to make some small sacrifice in this matter if we accomplish anything. At a glance it looks easy to prevent the jobber from selling customers. We know if every retail store in Pennsylvania should stop buying from Jobber "A," he would

CEASE TO BE A JOBBER FROM THAT MOMENT.

He might think he was a jobber for a short time, like the snake Pat killed by cutting off its head. But you do not find it so easy to refuse to buy from the jobbers that sell to your customers. If the jobber distrusts you know he has been guilty of this offense in your neighboring town he will likely find some way of overcoming your prejudice. He will make concessions as to terms, or he will cut the price on some things, and thus you do not stand by your brother retailer, who has been robbed by this jobber. No matter how favorable it may be for us to buy from him, we must not do it. We must keep in mind the interest of the retail trade. If you had an own brother in business in another town, would you patronize a jobber who sold direct to your own brother's trade? Then you must consider every dealer as your brother, and every retail store as though you were a partner in it. Ah! but there is the rub. It is so hard for us to consider our neighbor's welfare. Why should we interest ourselves in helping our competitor? We have sad recollections of instances where our competitor across the street did not seem to be especially interested in trying to help us get along. Well, that is another subject. That is

LEGITIMATE COMPETITION.

But if some of our competitors have erroneous ideas of ways to get business, and cut prices too low, that would be a matter that likely should be talked over in our local associations, and there are any of us here from communities having no local organization, we should go home and organize one at once. But

THIS JOBBER QUESTION IS OUR COMMON ENEMY.

We retailers must understand that it is a mutual affair, and while we are looking out for the welfare of our competitors we are doing the very best thing possible for ourselves. Now, the jobber knows perfectly well that we have this situation entirely in our own hands.

The jobbers have an association that establishes rules which the manufacturers respect. But the jobber knows the frailties of human nature, and he knows the retailers will not stick together, or at least they never have. But we have come to a point where we must take hold of this subject. If the jobber does not encroach on you now, he very soon will.

Before we had a Retail Hardware Association we had no redress. At the most

WE COULD ONLY REFUSE TO BUY FROM SUCH JOBBERS.

But with this organization, with 300 members, we not only have redress, but absolute prevention If we only stand by each other we can wipe out this evil that is doing more to demoralize the retail Hardware trade than any other one thing. Perhaps some here think I am exaggerating this matter, that the jobbers are not really doing us much harm. Any one who says this is ignorant of the facts. Any one who has looked into this question knows they are. They are doing a great deal more harm than many of us realize. Every time a jobber sells a consumer an article at a wholesale price he is doing us an injustice by taking that much trade away, and he is doing many times more injury by the demoralizing and disturbing influence it has on our trade. For all the neighbors and friends of this customer would know about it, and many of them would think they had been charged too much by the retail dealer. Many people cannot understand that the expense of conducting a business necessitates our selling goods at a considerable advance over jobbers' prices. Every time a jobber sells one of your customers an article at a wholesale price he is surely

FORCING YOU TO CUT DOWN YOUR LEGITIMATE PRICE,

whether you realize it or not.

I beg of you not to become passive about this, and accept it as one of the conditions that must be borne. It is not a "survival of the fittest." It is not a natural state of affairs that has come about in a legitimate way. I am the last man to protest against anything that makes for progress, and by progress I mean conditions that tend to make the mass of people more comfortable and happy. If any retail store can legitimately supply my customers with what they want, can serve their needs better and furnish them with the comforts and luxuries of life for less money than I can (continuously, I mean, not spasmodically,) then I will get out of the way and let them do it, and I will not whine about it, either. But I will protest against helping to build up, and equip, and arm, any piratical jobber craft that will turn their guns on me and my friends. This thing is illegitimate, and will eventually work to the undoing of the jobber as well as of us, for their prosperity depends upon our prosperity. If we cannot sell goods at a profit, we will soon cease to be their customers. By their cutting in and taking the cream of our trade they are lessening our ability to buy from them. They are

KILLING THE GOOSE THAT LAYS THE GOLDEN EGG.

We have given the jobber our trade, and built up for him a position that gives him an unfair advantage when it comes to retailing. You can all see why this is so.

We all know he could not afford to come 25, or 50, or 100 miles from his house to get a few small orders from the consumer alone, at wholesale prices, and he would not think of doing it. If the retailer would not buy from him, and he was sent out after this consumer's trade, he could not afford to do it unless he got a price approximately what any other retailer, local, or otherwise, would have to ask for the same goods. But you see he is already here, he is on the spot. The trade your retail stores have given him has paid all his expenses, so it doesn't cost him anything to sell that bill to the consumer. Of course he can undersell you under such circumstances as these. Right here is where he has turned traitor. Up to this time he, the jobber, and you have been honest partners. He furnishes you the goods at a certain price, you invest your money, stack the goods up on the shelves, and retail them out as wanted, at a certain advance. Now he sees a chance to get a part of your profits as well as his own. And

HE IS DOING MORALLY AN ILLEGAL THING,

just as much as if he were violating a written contract, for there is always the implied agreement that if the jobber solicits the dealer's trade he will not sell to the consumer. The fact that he sells to consumers only in towns where he fails to get an order from a dealer is no excuse for him. Some dealers have bought and continue to buy from him or he would not be here at all. This particular jobber robs your trade, and another robs mine. What we must do is to exterminate this mongrel breed.

Every one, jobber and retailer, knows the facts exist as I have stated. Both sides know it is not fair. To whom should we look to correct it? To the jobbers? Certainly not. They are satisfied, as they are getting the best of it. Then it is from the retailers themselves that the remedy must come.

THE REMEDY IS SIMPLE AND EFFECTIVE.

If every member of this association will only buy from jobbers who do not sell to consumers, neither in his own town nor in any other town, then one serious trouble of the retailer will be ended. We ask nothing unreasonable, we only ask the jobber to play the game according to the rules.

EXHIBITORS.

Representatives of a number of manufacturing houses were exhibitors and entertained the members of the organization at their rooms or in the hotel parlors, where they had installed exhibits of their products.

Among those who gave exhibits are the following:

E. C. ATKINS & Co., Indianapolis, Ind.
CRANDALL CUTLERY COMPANY, Bradford, Pa.
BRADFORD UNION MFG. COMPANY, Bradford, Pa.
PITTSBURGH STEEL COMPANY, Pittsburgh, Pa.
SIMONS MFG. COMPANY, Fitchburg, Mass.
PITTSBURGH STOVE & RANGE COMPANY, Pittsburgh, Pa.
YALE & TOWNE MFG. COMPANY, Stamford, Conn.
WHITMAN & BARNES MFG. COMPANY, Chicago.
J. H. DOWNS, 235 Broadway, New York.
PIKE MFG. COMPANY, Pike, N. H.
GEO. BARCUS & Co., Wabash, Ind.
AMERICAN STEEL & WIRE COMPANY, New York.
LILY WHITE WASHER COMPANY, Davenport, Iowa.
OHIO VARNISH COMPANY, Cleveland, Ohio.
MALLEABLE STEEL RANGE MFG. COMPANY, South Bend, Ind.
ONE MINUTE WASHER COMPANY, Sandusky, Ohio.
WILLIAM PETER ESTATE, Toledo, Ohio.
MAJESTIC MFG. COMPANY, St. Louis, Mo.
DOVER MFG. COMPANY, Canal Dover, Ohio.
SUMMIT FOUNDRY COMPANY, Geneva, N. Y.
JAMES H. MANN, Lewistown, Pa.
PETERS CARTRIDGE COMPANY, Cincinnati, Ohio.

DEATH OF GEORGE KRAUSE.

George Krause died at his home in Lebanon, Pa., February 16, after a long and painful illness, in his seventy-fourth year. For over half a century Mr. Krause was in the Hardware business in Lebanon, where he was born, and at his decease was president of the corporation bearing his name. Mr. Krause was born October 5, 1832, and entered his father's store in his eighteenth year. In 1870 John D. Krause, the father, retired, and Mr. Krause and his brother Joseph succeeded under the firm name of George Krause & Co. On September 24, Mr. Krause and his wife celebrated their golden wedding anniversary. He is survived by a widow, four sons and one daughter.

INDIANA RETAIL HARDWARE ASSOCIATION

The Seventh Annual Convention of the Indiana Retail Hardware Association was held at Tomlinson Hall, Indianapolis, on February 14, 15 and 16, and the attendance of delegates and others was large and enthusiastic.

WEDNESDAY AFTERNOON SESSION.

The Convention was called to order at 3 P. M., a little behind time, and the proceedings were opened by the singing of "America."

THE PRESIDENT'S ANNUAL ADDRESS.

The address of the President, A. N. Shidler of South Bend, was delivered as follows:

Fellow-members, traveling salesmen and other members of the convention, we bid you welcome. It gives me great pleasure to address you in this, our Seventh Annual Convention, and note that each year Indiana has forged to the front, not only in numbers, but in strength of character and importance.

A. N. SHIDLER, PRESIDENT.

We have gathered here to learn the Hardware business from one another and from our friends, the manufacturers, jobbers and their representatives, together with their elaborate displays. We are busy men, have left our business for a short vacation, to renew acquaintances and shake the hand of the brother from the other end of the state, to interchange ideas, pick up new thoughts and carry them home to apply them in our own business.

With this end in view, your officers have eliminated, as much as possible, long papers, which are always full of facts and golden thoughts, but sometimes tedious. Ample time is left open to give each an opportunity for a thought, and now, gentlemen, it is up to you whether this convention is a success.

Come, let us learn one from the other. You have some methods of principle which you have applied successfully in your business. Now, don't be selfish. Out with it and help your brother to success! We have in our midst displays and representatives from all of the leading jobbers and manufacturers in the United States, an opportunity of education never afforded you before. I hope none of you will neglect to take advantage of it, and visit every display in this auditorium.

Parcels post and catalogue houses are the two great evils confronting every retail Hardware merchant. We, in our association work, have been constantly discussing ways and means among ourselves, with not only the catalogue house and farmer as our opponents, but probably our greatest obstacles, and those who have done more to foster these movements, are those who should be our best friends, the jobber and manufacturer.

First the jobber nursed the cataloguer and supplied his wants so long as they could do it at a profit and keep the facts from the retailer, then the manufacturer whose goods had not already been supplied began to get uneasy because his name did not appear between the covers of such an immense catalogue, and he sought their patronage, until now nearly every well-known brand of Hardware is listed.

Only too late did these good friends of ours discover that there were Hardware retailers and that their requests ought to be given ear, when, about two years ago, one of the leading jobbers, through a letter to the *Iron Age*, ignited the fuse and the bomb exploded, the result of which was the appointment of the joint catalogue house committee, a report of which we shall hear.

Now the manufacturer says the jobber is responsible for the present condition, and the jobber holds it up against the manufacturer. The president of the American Hardware Manufacturers' Association, J. C. Birge, in his annual address at Washington in November, in speaking of special brands, said: "While it is not the purpose of the manufacturers with which the president of this association is connected

TO CHANGE THE POLICY IN MARKETING THEIR GOODS,

it is absolutely certain that unless there can be some friendly compromise of these questions in the near future, there will, with many factories, be a realingnment of forces, a readjustment of methods in many lines. Some manufacturers will rush into the arms of the catalogue and department houses, fearing it will soon be too late. Others will reach for direct trade through other methods."

We regret that such thoughts should come to even a single manufacturer. We hope, however, that the forces will continue to work hand in hand with us, to our mutual benefit.

M. L. COREY, SECRETARY.

During the year just closed

SOME IMPORTANT POSTAL DECISIONS AFFECTING CATALOGUE HOUSES

have been made. In April it was decided that nothing but mail, and that properly stamped, should be placed in United States mail boxes. This prevented the distribution of catalogues by rural free delivery men after they had been shipped by freight to the home of the government employee.

October 4th Assistant Postmaster General Mr. DeGraw ordered that the delivery of mail on rural routes should be by box number only and that the postmaster issue without charge, lists of numbers of all persons receiving mail on routes issuing from his office. A little later, when Postmaster General Cortelyou reached Washington, 500 protests, by mail and telegram, from Hardware merchants and organizations principally, were awaiting him. The order was promptly held up.

At the present time, however, the danger is in consolidating third and fourth class matter at a rate of 8 cents per pound. The only excuse for this seems to be the inability of the postmasters to distinguish between third and fourth class matter, and to overcome this annoyance the officials would increase the already immense deficit of $22,000,000, build up the catalogue house and eliminate the country merchant.

Now, brother Hardware men, it behooves us to keep our eyes on the Hardware reports, and should such dangerous rulings again take place, be "Johnny on the spot" with your protest; and next time remind the officials that the Hoosier state is awake and, in place of being 500, let there be 1,000 to protest against such injustice.

We hail with open arms the proposition at the southern jobbers' convention to adopt one standard size for all catalogues of jobbers and manufacturers. In ten years hence to glance back at our catalogue cases would be as to compare the Hardware shop of 20 years ago to the modern store of the present.

If some other philanthropist now should suggest, and the suggestion be heeded, that manufacturers put up their product in boxes properly glued together, with a cover to lift off without the end breaking out, the Hardware man's troubles would be fewer. This is too good to hope for, however, and we shall content ourselves and receive Pope's farriers' knives and Philadelphia casters tied up in cheap paper packs, just as they have been as many years as my experience is old.

Digitized by Google

. I would suggest here that by refusing, as much as it is advisable, to buy such articles as are put in ungainly packages, when just as good may be had of other brands, will assist largely in improving the condition.

In every convention which I have ever attended in Indianapolis

WE HAVE DICUSSED THE MUTUAL INSURANCE QUESTION,

and two years ago we went so far as to investigate thoroughly the advisability of organizing such a company; but you will all remember that we found the laws of such a character that we deemed it advisable to abandon the idea for the present, and advised every member to take insurance in other state companies and the National Hardware Dealers' Mutual. Many of you have followed this advice, and many have not. Those who have have found it thoroughly satisfactory and a money-saver. Why more of you have not taken advantage of the opportunity, we do not understand.

Statistics show that Hardware merchants in this state carry insurance to the amount of $7,000,000. Of this, $350,000 is now carried in mutuals. The amount ought to be ten times $350,000 or $3,000,000.

There are now five mutual fire insurance companies the safety of which is not questioned. In these each merchant can carry $15,000 insurance, which, at the average rate of $1.50, the premium would be $225; and if only 30 per cent. were refunded, it would be a saving of $67.50. On $1,000 there would be a saving of $4.50. Think of it, and how many of you are permitting this to go into the hands of old line companies to pay fat salaries.

Wake up, brother Hardware men, and if you are not carrying mutual insurance, do it when your first policy expires. I know whereof I speak, for our firm last year carried $9,000 in mutuals and received by return premiums $43.91. We couldn't attend conventions on the refunds the stock companies paid us.

The year 1905 was one of great activity in Hardware circles, few sudden changes in prices have taken place; and, so far as we know, our members have succeeded in doing a

CLEANER, EASIER AND MORE SATISFACTORY BUSINESS

than years previous. Some business changes have been reported, but with pleasure we report no deaths or failures, and with sincere regret we are compelled to report not even a birth. At this rate, boys, who will sell the Hardware to the next generation?

CONVENTION COMMITTEES.

The following committees were appointed by the president:

GRIEVANCE—W. M. Hunter, Versailles; W. L. Kiger, Bluffton; M. H. Coates, Kokomo; W. L. Hubbard, Scottsburg; C. F. Boonshot, Petersburg.

EXHIBTS—C. B. Frame, North Manchester; Albert Duprez, Shelbyville; Charles E. Hall, Indianapolis.

ADMISSION AND RECEPTION—C. A. Ellis, Carlisle; M. L. Lewis, Marion; W. B. Creed, New Albany; W. H. Hatfield, Washington; George Stalger, Michigan City; Mr. Weinhart, Terre Haute; T. J. Lindley, Jeffersonville.

NEW GOODS—S. L. Ocker, Roann; N. R. Stoner, Rochester; A. W. Smith, New Ross.

RESOLUTION:—J. L. Fulton, Portland; A. L. Baughman, Wolf Lake; Ed. Gardner, Monticello.

PRESS—E. M. Bush, Evansville; C. A. Ellis, Carlisle; S. L. Ocker, Roann.

AUDITING—John Stune, Breman; H. P. Smith, Auro; G. L. Finner, Terre Haute.

NOMINATIONS—W. L. Hubbard, Scottsburg; M. Hamilton, Brownstown; O. S. Tarbet, Columbia.

WEDNESDAY EVENING.

At 8 P. M., when the Convention assembled, it was to find prepared for them some stereopticon views, reproducing actual pages taken from the catalogue of the retail mail order house. During the display of these views, Secretary Corey explained why retail merchants were unable to compete with some of the prices offered by some of the larger metropolitan houses. Reproduction of these pages was followed by stereopticon views shown in color, portraying picturesque scenes gleaned from this and other countries. Immediately following, the band was called into action and a Smoker was held, extending far into the evening.

THURSDAY MORNING.

SECRETARY COREY'S REPORT.

The Thursday Morning Session was opened when Secretary-Treasurer M. L. Corey submitted his report, which was as follows, in part:

There have been few complaints sent us during the past year. Those we received were mostly in the line of information as to policies of certain firms and this knowledge has been very useful. In several cases, by following this up, we have succeeded in securing better conditions. Several canvassers have gone over the State selling articles of little or no merit to Hardware stores and merchants in other lines. One of them had a powder that was claimed to make gasoline non-explosive. We are told on good authority that anything that would produce this would so affect the fluid that it would not be gasoline—that gasoline is only safe so long as it is known and treated as dangerous. If this be true we should be very careful in dealing with our customers, and not mislead them by recommending an article that might lead them to carelessly endanger life and home.

Another party had a patent buggy paint for which wonders were claimed, but it really proved little better than the cheap tar roof paints so generally used.

The general prosperity has started out a large number of these quacks, and as more of them are coming our way from other States we think it well to sound the note of warning. Any person exploiting some new fangled wonder, who persists in selling a quantity and delivers it and collects on the spot may well be regarded with suspicion. One thing that often obtains an audience and favorable consideration for them is their practice in obtaining, on some pretext, one of your letter heads, which they produce in some other store with the statement that they have already sold to you, and even in some instances claim that you have been their agent for years. When you turn these fellows down don't give them your stationery that they may influence others who may have confidence in your business ability. Report them to us, and if possible send a sample of what they sell. We can help and protect each other in this way.

MEMBERSHIP.

Our honorary and associate members numbered, in 1905, 117. We have never included them in our actual membership count. If this were done, Indiana would to-day be very close to the head of the column. We have gained about 100 new members since our last meeting and have lost a few old ones who have sold out or from other causes. During the last five years only four firms have requested that their names be dropped from the membership roll. Some have not paid their dues and for this reason are out, but we believe that this has been mainly the result of carelessness and not through any dissatisfaction or discouragement. The State Hardware Associations are doing good work and they are here to stay; we have gained the confidence of the entire trade and we are growing stronger and more closely united with each succeeding year.

EXHIBITS.

Any one who will look over the displays that are exhibited here will readily realize that no one hotel could accommodate our crowd. In attempting to handle this combination on such a large scale we expecced to make some mistakes and receive some criticism. We know this hall is not entirely suited or sufficiently well-arranged to accommodate such a crowd and still afford a suitable meeting place. We can only do our best, having in mind at all times that the success of this convention is the paramount question. Those exhibitors who give us the most consideration and co-operation will be the highest on the list for future favors.

THURSDAY AFTERNOON.

The Association took up the question of Mutual Fire Insurance. It is a question that appeals to all Hardwaremen, although the Association as a specific organization does not possess such a company organized under Indiana laws. The principal speaker on Insurance was A. T. Stebbins, President of the Minnesota Hardware Association. He said that a mutual company had been in existence in Minnesota for six years. It takes risks on Hardware stores and dwellings owned by members of the Hardware Dealers' Associations in any city, the maximum risk for one firm being $3,000.

QUESTION BOX.

Secretary Corey then took up the question box and announced as the first problem to be dealt with, "Buying and Selling," which is the more important for the retailer, and which can be better eliminated so far as the retailer's personal attention is concerned. President Shidler declared that the selling end was by far the more important, inasmuch as the selling end could not be neglected without personal loss to the dealer.

On a call for a vote, Secretary Corey discovered that, while almost all the dealers bought the goods themselves, only about 50 per cent. asked the opinion of their clerks before purchasing and only about 25 per cent required their clerks to remain at hand while a salesman was discussing the relative points of advantage between his and other goods.

THURSDAY EVENING

was devoted to a vaudeville entertainment which occupied the attention of the delegates and consisted of instrumental music, illustrated songs, monologue turns, dancing, magic and biograph pictures.

FRIDAY MORNING.

Honesty and the conviction that the goods one is selling are the best on earth. These are the prime qualifications for success in making sales, according to the addresses made by traveling salesmen at this morning's session of the Association. The various speakers could not tell the best methods of selling goods as that, they said, must be left to the individuality of the salesman and various other circumstances, and would depend to a great extent on the characteristics of the buyer. Honesty and conviction as to the value of the goods to be sold were agreed upon by all of the speakers, however, as being the great essentials. The speakers were Charles B. Frame on "How I Sell Paint," with suggestions by E. L. Shuey; Irving L. Sibley on "How I Sell a Stove," with suggestions by W. T. Leekie; W. H. Weed on "How I Sell a Pocket Knife," with suggestions by E. H. Sutton; E. M. Bush, on "How I Sell Holiday Goods," with suggestions by W. H. Beegle; Sharon E. Jones on "How I School My Helpers." The suggestions were in the form of supplementary remarks that in the majority of cases were more extended than the original addresses. The election of officers, the reports of committees and the transaction of new and unfinished business usually completes the programme for the closing session of the Convention.

ELECTION OF OFFICERS.

Officers of last year were re-elected as follows: President, A. M. Shidler, South Bend; Vice-President, C. B. Frame, North Manchester; Second Vice-President, W. D. Creed, New Albany; Secretary, M. L. Corey, Argus.

The Executive Committee remained unchanged as follows: C. A. Ellis, New Carlisle; S. L. Ocker, Roann; Edward M. Bush, Evansville.

While many of the delegates stayed to examine the exhibits in the Hall, the Convention ended formally with the election.

RECENT TRADE PUBLICATIONS.

MAINE MANUFACTURING COMPANY, Nashua, N. H., have recently mailed us a copy of their 1906 "White Mountain" Refrigerator catalogue, which is a very handsome production of 56 pages, measuring 10 by 7 inches, and containing a large number of exceedingly artistic illustrations. In introducing the book to the trade they state as follows: "We enter the new season with increased enthusiasm and with determination to lift the "White Mountain" refrigeraters, both in quality and sales, to even a higher notch than that attained in our record breaking season of 1905." Particular attention is called to the beautiful "Stone White" Refrigerators which they claim are unapproached by any other Refrigerator on the market. The views shown of these "Stone White" Refrigerators are beautifully colored in the catalogue, giving a very accurate idea of how they actually look, and the open doors reveal the "gleaming, white, smoothly polished, cold-retaining, 'Stone White' lining" which "meets with the instant approval of womankind, the world over." The catalogue will be gladly sent to those interested in this line of goods.

THE J. STEVENS ARMS & TOOL COMPANY, Chicopee Falls, Mass., have sent us a very interesting and artistic little pamphlet of eight pages entitled, "The Story of the Stevens, Tersely Told." They urge the pushing of the Stevens Arms by dealers in the following words: Our broadcast advertising means an active demand and ready sales. Our popular line is as well known as gunpowder and practically sells itself. The innumerable hosts of enthusiastic Stevens shooters, the world over, are living illustrations why our brands always stay sold." Special attention is called to the new Stevens Double-Barrel Shotgun No. 225 and also the "Favorite No. 17," illustrations of both of which are given in the pamphlet. The Company shows its readiness to help dealers in the selling of their goods by offering to supply them with their Abridged Catalogues (imprinted with the firm name and address,) Electrotyped Advertisements, Part Envelopes (imprinted with firm name and address,) Aluminum Hangers, Cuts of Models, etc., on receipt of specifications. Send for catalogue for further information regarding the Stevens products; it will be gladly and promptly sent upon request.

AMERICAN MFG. & NOVELTY CO., Erie, Pa., have mailed us a very interesting and instructive little booklet of 55 pages entitled; "Good Wood Goods." By way of announcement they state: In presenting this booklet to the trade we endeavor to clearly represent our line of Extension, Sectional and Common Ladders together with fixtures and attachments for the same; Step Ladders, a general line of Household Woodenware, Lawn Swings and Settees. We are enabled to maintain the highest standard of quality and workmanship owing to our extended experience, modern equipment and trained and experienced workmen. We take pleasure in assuring you that our goods are second to none produced, in which we are sustained by the trade generally. The same high standard that has been established will continue to exist and we trust that we may be able to add many more merchants to our list of satisfied dealers in "Good Wood Goods." Send for catalogue.

NORVELL-SHAPLEIGH HARDWARE COMPANY, St. Louis, Mo., have favored us with a copy of their new Want Book, which is hand stitched with linen thread, cloth bound, and made small enough to make it convenient to carry in the coat pocket. They state: "We have used only about fifteen pages for advertisements; on these we have shown some of our specialties." In the back of the book are given the postal laws of the United States, all the standard weights and measures, and a table of comparative discounts, which they claim is something new and has never before been shown in a Hardware book; also a great many tables and other matters of information, as well as standard lists and discounts on most goods in the Hardware line that are sold at a discount. A standard axe list is also included, which they state is something that has not previously been shown in a Want Book. Another feature which they claim has never before been used on a Want Book is a pocket placed on the side of the book to hold a pencil, and one of the Norvell-Shapleigh High Grade pencils has been sent along with the book, making the outfit most complete for the use of merchants. The Company will be pleased to send a catalogue of their high class goods to interested parties. requesting same.

NORTHROP-COBURN & DODGE CO., New York, N. Y., have recently published their Catalogue No. 9 and have sent us a copy of same. They state in introducing the catalogue as follows: "The favor with which Northrop's Stamped Steel Ceilings and Walls have been received in this country and abroad, has stimulated us to higher artistic effects than ever before attained, and we know will be appreciated by the fastidious and discriminating class, who desire the most artistic architectural finish for interior decorations. These goods are used extensively in the best buildings of all classes: Hospitals and Institutions, Churches, Schools, Theatres, Lodge Rooms, Halls, Business Buildings, Warehouses, Stores and Private Residences. They meet the demand for a durable, decorative and incombustible interior finish. The illustrations following show the single plates, borders, mouldings, coves, etc., to a uniform scale of 1 inch to the foot; and the groups of patterns shown in combinations to the uniform scale of one-half inch to the foot." The catalogue measures 12 by 9 inches, and contains 44 pages of handsomely illustrated plates and designs, giving the number, size and Code Word of each. A full page is given up to directions for ordering and putting up ceilings, and a Telegraph and Cable Code as well as a carefully arranged Index may be found in the back of the book. For further particulars write for catalogue.

THE RANNEY REFRIGERATOR COMPANY, Greenville, Mich., are presenting to the trade an exceedingly interesting and attractive catalogue of their "Charter Oak" and "Radium" Refrigerators. They state in regard to the "Charter Oak" Refrigerators as follows: "The 'Charter Oak' refrigerator is made of carefully selected, klin dried Ash lumber, finished 'Golden Oak,' lined with galvanized iron; insulated with mineral wool, non conducting sheathing and dead air space. The trimmings are genuine brass, Antique finish. The ice chambers are all removable, and all shelves are adjustable, and can be raised or lowered to suit the conveience of the user." They state that the "Radium" Refrigerator is a good, substantial, well-made refrigerator. The outer case is made chiefly of ash, finished golden oak, raised carvings on all front panels. It is lined with galvanized iron. The insulation is dead air space and non-conducting sheathing. Hinges and locks are strong and durable; are genuine brass, Roman gold finish. These hinges have no springs such as are used on the "Charter Oak. "The catalogue contains an insert of four pages which is a Price List of the two above named refrigerators, and the last few pages of the book are devoted to descriptions and illustrations of the "Hardwood" Ice Chests and Improved Kitchen Cabinets. The catalogue will prove of value to parties interested in this line of goods.

SARGENT & CO., New Haven, Conn., New York offices at 149-153 Leonard Street, have mailed us a copy of their 1906 Catalogue of Wire Screen Hardware and other Spring and Summer Goods. The catalogue is in large book form, measuring 12 by 9 inches, and contains 120 pages of exceedingly interesting and instructive matter. Within its pages is incorporated everything of importance that appertains to the Screen Door interests, such as Catches in large variety, Screen Door Locks and Mortise Latches, Cupboard and Flat Bolts, Wrought Barrel and Spring Bolts, Etc.; in fact it will become a catalogue frequently consulted in the Spring season for a series of articles in the Shelf Hardware line that will spring from the every day wants of the dealer.

THE WHITE MOUNTAIN FREEZER COMPANY, Nashua, N. H., have recently published an exceedingly attractive and useful illustrated catalogue of Ice Cream Freezers, in regard to which they state as follows: "In this, our latest catalogue, we endeavor to give full and complete information concerning the famous White Mountain Freezer. The introductory on Page 4 anticipates and answers the questions a dealer might wish to ask about the merits and advantages of the White Mountain line, and the descriptions accompanying the cuts of the different machines give a thorough idea of the uses to which they may be put and the features in which they excel. The convenient cost and selling price table printed with each machine is worth attention. It enables the dealer to keep at hand for quick reference detailed information regarding the style, workmanship and cost of the entire line of White Mountain Freezers." The catalogue is well arranged and illustrated throughout and presents in an attractive form information which will be of interest to all dealers in this class of goods. A copy will be gladly sent to interested parties upon request.

NEW GOODS AND SPECIALTIES.

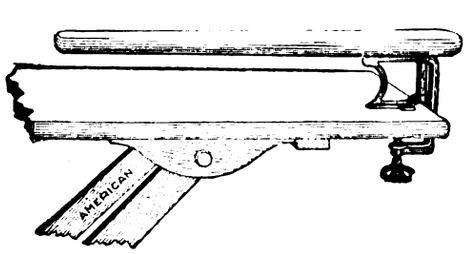
THE PERFECT NAIL SET.

The Ducharmes Company, Shelburne Falls. Mass.. are making every effort to produce this Perfect Nail set that will be noted for its superior quality; we present an illustration of it herewith. Constructed from the finest Sanderson steel they are hammer forged, not machine made, cup pointed and with corrugated grip. Each one of these Perfect Nail Sets is hard-

THE PERFECT NAIL SET.

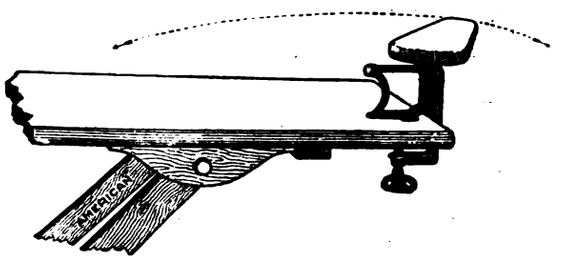
ened and tempered, and they state they may be entirely driven through a piece of steel or iron and will not break or bend; in fact they will stand the abuse usually given a nail set without flinching. As every tool made by The Ducharmes Company is fully warranted they deserve a trial.

"MAN-I-Q" POCKET MANICURE.



The G. P. Coates & Co., Norwich, Conn., are placing before the Hardware and Novelty trades the "Man-I-Q" Pocket Manicure which we illustrate herewith. It is made so that it may be carried upon a key ring, or carried in the pocket without any necessity existing for placing it in a case, there being no danger

of tearing the clothes as the end for pushing back the cuticle projects beyond the nail cleaning point. The Man-I-Q is mounted one dozen on a handsome patented easel display card. Packed one gross in a box.



THE YANKEE NOTION SLEEVE BOARD.

The American Mfg. & Novelty Co., Erie, Pa., is placing upon the market the Yankee Notion Sleeve Board which we illustrate

THE YANKEE NOTION SLEEVE BOARD.

herewith. It is referred to as being the most convenient article of the kind ever brought to the attention of the trade. The clamp and entire support is made of malleable iron, giving it durability and strength and less liability to breakage by careless handling. The thread on the screw clamp is machine cut and not rough cast iron as is too often the case with similar articles,

SHOWING ITS ADAPTABILITY.

it therefore works freely and smoothly. By reference to the cut it will be seen that when not in use it can be as readily replaced.

DIAMOND EXPANSION SHIELD.

The use of reinforced concrete in building construction has increased very rapidly and with it a growing demand for an expansion bolt that can be used for attaching fixtures, etc., to floors

DIAMOND EXPANSION SHIELD.

which are often times not more than 2 inches in thickness. To meet this demand the Diamond Expansion Bolt Company of 9 and 15 Murray Street, New York, are making three new sizes of their Diamond Expansion Bolts as follows; for ⅜, ½ and ⅝ diameter bolt the shields of which are only 1½ inches in length. The Diamond Expansion Shields are now made in sizes ranging from ⅛ to 2 inches diameter of screw. The small sizes are used with regular wood screws and the larger sizes with the common lag screws. The Diamond Expansion Bolt Company will be pleased to furnish further information to any one interested.

YANKEE DRILL CHUCK.

North Bros., Mfg. Company, Philadelphia, Pa., have added to the very efficient tools for the manufacture of which they are especially noted, the Yankee Drill Chuck, of which we present cuts that illustrate the exterior and interior of a drill chuck the body of which is made of the best grade of machinery steel and the jaws of the best rod drill steel and not liable to break. It is designed for the hardest service and is referred to as holding drills tightly after long and continued use as well as when new, with the simple tightening by hand. It is especially adapted to light and rapid drilling where accuracy and tight or sure grip is required. The chuck is not affected, it is explained, by

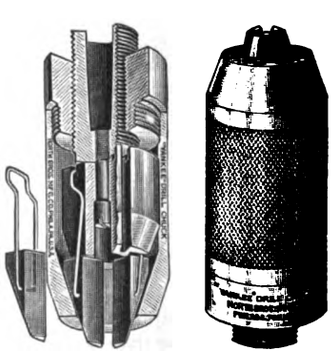


FIG. I.—YANKEE DRILL CHUCK.

dirt nor is it liable to get out of order through carlessness. The chuck is designed to meet the requirements in shops for a tool that will hold drills firmly and release them readily by hand

Digitized by Google

and without the use of a key, spanner, &c. Arbors with ½-inch diameter shanks, as shown in Fig. 2, can be furnished to fit the chucks. The chucks are compact and small in diameter for their capacity and are made in three sizes. No. 1 is 15-16 inch in

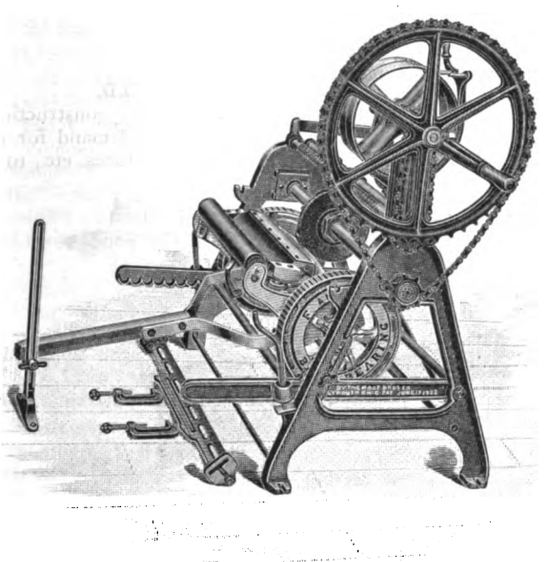

FIG. 2.—ARBOR FOR YANKEE CHUCK.

diameter, 2⅞ inches extreme length, weighs 5½ ounces and holds 0-3-16 inch drills; No. 2 is 15-16 inches in diameter, 3 7-16 inches extreme length, weighs 13½ ounces and holds 0-5-16-inch drills; No. 3 is 1 9-16 inches in diameter, 4 inches extreme length, weighs 22½ ounces and holds 0-⅜-inch drills.

THE IDEAL LAWN MOWER GRINDER.

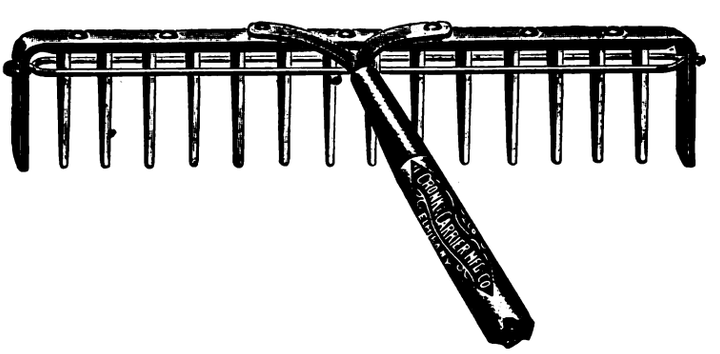
ROOT BROS., Plymouth, Ohio, are placing before the Hardware trade the greatly improved Ideal Lawn Mower Grinder for 1906, of which we give a graphic illustration, showing clearly the method of its operation. The machines built under the old patterns, although far ahead of anything then on the market, were found to lack some essential details which have since been added and the new model now shown contains these improvements which make the present machine thoroughly practical and complete. By its use it saves the labor that would necessitate

THE IDEAL LAWN MOWER GRINDER.

the employment of four or five men sharpening by hand, and the work connected with its operation is but little more than pushing an empty wheelbarrow. By the use of the Ideal Grinder every inequality is removed from the cutting surfaces, the blades being ground to an acute angle, and thus the life of the mower is extended far beyond what it would be under the old system. It can be employed in the grinding of all kinds of Lawn Mowers of any and every size while it is adapted for either hand or power use. The capabilities of the machine are easily comprehended, while as a money maker for the repair man it will be found the most profit creating article that has been brought to his attention. Full directions accompany each grinder, and those interested will do well to send to the manufacturers for circulars giving a full description of its many purposes.

MODEL 1905 NON-EJECTING SINGLE GUN, .44 CALIBER.

Harrington & Richardson Arms Co., Worcester, Mass., are introducing to the trade their Model 1905 Non-ejecting Single Guns which are 28 gauge and 44 caliber with small frame and of exceedingly light weight; the specifications of which are as follows: 28 gauge, barrel 28 inches, plain steel, weight about 4 lbs; 44 caliber, barrel 26 inch, plain steel, weight about 4¾ lbs.; adapted to the .44 W. C. F. shot cartridge or the X. L. .44 shot cartridge. To dismount the gun the directions are to unhinge barrel by giving the hinge pin a quarter turn to the left and remove butt plate and stock in the usual manner. Drive out the trigger pin, when guard and trigger can be removed. While holding the hammer at full cock insert a small pin in the main spring guide at the rear end of the spring, release hammer, and the spring and guide can be readily taken out. Drive out the hammer pin and the hammer is free to be taken out. To assemble the same, place the hammer in position and hammer at full cock, remove the small pin and hold the hammer down. It is necessary to use a pin not longer than the thickness of the guard to hold the trigger in position in the guard. Insert the front end of guard, and while holding the trigger back, com-

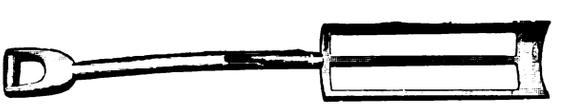


MODEL 1905 NON-EJECTING SINGLE GUN, .44 CALIBER.

plete the placing of the guard in position, then drive in the trigger pin. Replace stock, butt plate and barrel in the usual way. The gun is new throughout, built on modern sporting lines, and is not a small bored gun on a large frame, nor a rifle bored smooth for shot; it being well proportioned and very attractive and symmetrical. It is especially suited for a ladies' gun or for boys' use, as well as appropriate for taxidermists' or collectors' use.

"ANTICLOG" LAWN RAKE.

The Cronk & Carrier Mfg. Co., Elmira, N. Y., are now placing before the trade the "Anticlog" Lawn Rake, which we illustrate. This tool has 16 teeth, the end being a continuation of the ⅝-inch channel steel head bent to form the teeth and grooved so as to contain the ends of the wire cleaning bar. The remaining teeth are made of polished wrought steel in pairs and solidly riveted to the channel steel head. The Rake can be used as a garden Rake by simply fastening the cleaning bar up close to

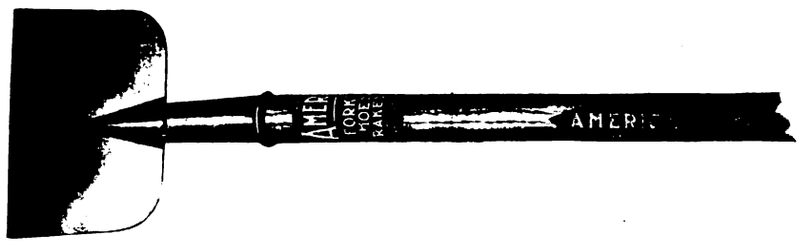


"ANTICLOG" LAWN RAKE.

the head by slipping it over the small projection which is made for this special purpose on one of the teeth, or the cleaning bar may be removed entirely from the Rake. When the cleaning bar is removed, the Rake is practically the same as the company's "Champion" Garden Rake. When in use the weight of the cleaning bar is sufficient to remove all leaves and small grass from the teeth, thus making it an easy matter to keep the Rake always clean. The Rake is made in but one size, 16 inch, with a wrought steel braced tang which makes it very strong and durable. Only high grade handles are used with this Rake.

BOSS TILING SPADE.

Belknap Bros., Anamosa, Iowa, are the manufacturers of the Boss Garden Spade, especially adapted for tiling purposes, and of which we give an illustration herewith. It is made of Crucible, Fork Steel in two sizes of width, 4½ and 6½ inches



BOSS TILING SPADE.

and of several lengths from 14 to 22 inches. It is claimed to be the only successful spade of the kind made, having been before the trade for a number of years establishing its great utility. There is no necessity to carry paddles with which to scrape the blade, it being open in the back there is no suction to cause the clay to stick to the spade, and having less surface there is little or no friction, making it easier to operate.

IMPROVED SIDEWALK CLEANER.

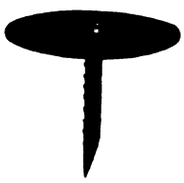
Sidewalk cleaners of the Hoe character, are not new to the Hardware trade, yet an improved article of this class, manufactured by the American Fork & Hoe Co., of Cleveland, Ohio, that has recently come into the market, is fast gaining a very favorable reputation.

IMPROVED SIDEWALK CLEANER.

The particular advantages of this sidewalk cleaner lie in its peculiar adaptability to the purpose for which it is intended. It has the requisite strength and weight to do its work thoroughly and easily. The blade and shank are forged from one piece of steel. The ferrule and handle are extraordinarily heavy and strong, and the ferrule and half the blade are bronze-finished. Most sidewalk cleaners are too light in weight. This one has the proper weight to enable the operator to knock off the ice and packed snow with comparative ease.

HAMILTON RIFLE, MODEL 19.

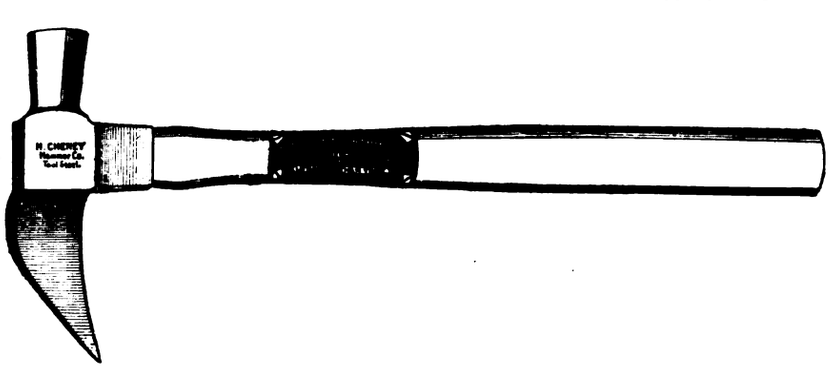
The Hamilton Rifle Co., Plymouth, Mich., make a line of Rifles in which in each Model every part has been designed and constructed to do its particular work in the best possible manner, and everything which would tend to a complicated mechanism has been avoided. All working parts are interchangeable, every part is hardened where any liability of wear exists, and every rifle is carefully tested and adjusted before leaving the factory.



HAMILTON RIFLE, MODEL 19.

We illustrate herewith the No. 19 "Hamilton." Frame and working parts are of steel, beautifully finished in a Blue-Black, the stock of handsome walnut, with simple and convenient "take-down" features. A forward motion of the lever exposes the opening for loading, and after the cartridge has been inserted, a reverse motion closes and locks the action securely, after which the milled thumb-piece is drawn back and the Rifle is ready to fire. This construction removes the element of danger inseparable from some rifles of the usual hammer type. After firing, another forward motion of the lever extracts and throws out the exploded shell and the loading process is quickly repeated. Fitted with rear peep sight with adjustment both ways. Lever action with automatic shell extractor.

SHERMAN ROOFING NAIL.



H. P. Sherman Mfg. Co., Battle Creek, Mich., is manufacturing a Roofing Nail that possesses original features enough to bring it forcibly before the trade who need it. We give an illustration of it herewith. It is practically constructed to form a one piece nail, for a large heavy disc is securely fastened to it in such a way they cannot become separated. Among the many advantages claimed for this nail the following are enumerated: There is no time wasted in assembling the tins or nails, as attached to each nail there is an individual head already in place. That the nails are convenient to handle even on a steep roof; there is but small chance for a leak between head and nail, nor are the heads liable to rush through or curl up when the nails are driven. This nail is destined to become popular for the purposes to which they can be applied and should become more thoroughly known.

SHERMAN ROOFING NAIL.

HENRY CHENEY HAMMER COMPANY.

The Crucible Cast Steel Hammers made by Henry Cheney Hammer Co., Little Falls, N. Y. from the finest line of these goods possible to produce, consisting as they do in artistic excellence and perfect finish of all the patterns known to the trade. The variety manufactured includes among others,—Adze Eye Nail Hammers, Plain, Octagon, Bellface, Octagon Head, Pat. Nail Holder, Bellface, Nickel Plated; Boxing Hammer with Octagon head and improved claw; Wire Fencing Hammer, the best made; "Wire Staple Puller," the Waterman Pattern; Farriers, Octagon and Round Head and the Boston Pattern, of improved design. While among the Plain Eye goods the following variety is noticeable: Riveting, Blacksmith's Hand, Machinists' Ball Pein, Engineers Ball Pein, Machinists' Chipping, and Cross Pein; Tinners' Roofing and Paneing, Tinners' Bench and Seaming and Engineers' Double faced. These Crucible Cast Steel Hammers are stamped "H. Cheney Hammer, Co;" the steel being manufactured expressly for them, they are fully warranted. Some few of the Hammers are put up ½ dozen in a box, such as the Chipping, Engineers', Machinists' and Blacksmiths': the remainder in ½ dozen. The special Hammer, No. 150 and 151, is made for the purpose of a "Wire Staple Puller" for which it has no equal as a hammer and staple puller. To draw the staple, insert the point between the post and the staple, by a sharp, quick hand stroke. Should the point mar or break off by use, it can easily be repointed, with handle in, by drawing point down and tempering. The Henry Cheney Hammer Company also make a line of Plain Nail Hammers from the same quality of steel, which includes: Plain Nail with Round or Octagon Heads, Plain Farrier's Octagon Head and Plain Brad Hammers.

WIRE STAPLE PULLER NO. 150.

(Continued from page 26.)

and very often at a saving of telephone and express charges. Again, when one is long on goods the others could help out.

The matter of contractors' bonds is a very annoying problem in many towns. This can be handled through a local association. A saving can be made, I believe, under organization in unprofitable advertising, such as Score Cards, Hotel Registers, Programmes, City Write Ups and such things that we are continually spending money on every year, simply because our competitor does it, knowing that we get no returns, and it is dead expense.

The catalogue house proposition, I think, can be reduced a little by co-operation through local association. I think if a local association manages to get the names of people in the neighborhood tributary to the town and looks them over they will find that a great many people that are sending to the catalogue house for goods are owing the local man, some of them a long time. In that case this merchant should write the customer, telling him he wants his money and making it plain to him. If this thing is followed up, I believe, it will have a good effect. When people in the community understand that they are jeopardizing their credit by buying outside and that the home merchant knows that they are doing it, they are likely to feel more inclined to buy at home.

LOYALTY.

Former President H. L. McNamara, of Janesville, read an interesting paper on "Loyalty," which we give as follows:

Mr. President and Gentlemen of the Convention:

It is presumed that when a man joins an organization or society, he does so with the idea and purpose of thereby benefitting himself. It may be an honorary organization or it may be one through membership in which the new member will gain material benefits, but whatever kind of organization it may be some benefits should be derived from membership, or the purpose of the organization is lost. If then, the organization confers benefits upon the member from the mere fact that he is such, what is the reciprocal duty of the member to the organization? To me there is but one answer;

LOYALTY TO THE ORGANIZATION.

This is the very cornerstone of the structure of voluntary organizations, and without it the structure will crumble and fall into the deep, dark ruins of failure. It is required of every member, from the head officer to the private in the rear rank. With it, we present an active, energetic solid army composed of every member; without it, our ranks are straggling and full of penetrable places.

The members of the Wisconsin Retail Hardware Dealers' Association have been loyal. Because of this fact we are growing stronger every day and present one of the best State organizations in the country. Out of the 800 retail Hardware dealers in the State of Wisconsin we have over 500 enrolled as members of this organization; over 60 per cent. This is certainly a showing of which we may well be proud, and for it I give credit to every member of this organization.

YOUR PAST LOYALTY HAS BEEN APPRECIATED AND HAS BORNE ITS FRUIT,

and I am confident that you will not let your zeal and enthusiasm wane the least bit during the coming year. Increased loyalty would I urge and that we make redoubled efforts to get those dealers who are not yet in our organization, to join. Let us try to make our per cent. 100 by the time of our next meeting.

The benefits of our organization are apparent to every member. We are banded together for mutual protection and co-operation. Our interests are the same and you may be sure that the organization as such will not do anything to harm or hurt any individual's business. In fact, the reverse is true; that the organization will go a long ways to help and benefit any individual member. A protest from this organization to a manufacturer as to unfair competition will receive great deal quicker attention and have much more weight than from an individual. The organization can carry on its fight until heard and the matter adjusted, while an individual, because of the expense and the time involved, might often be forced to give up the fight. Then again,

MEMBERSHIP IN THIS ASSOCIATION GIVES US GREATER STRENGTH

in the National organization, and also gives the National organization greater power. But before speaking of loyalty to the National Association, I desire to briefly call your attention to our mutual fire insurance company.

As the offspring of this association the Wisconsin Hardware Dealers' Mutual Fire Insurance Company is entitled to at least your consideration. This company is now firmly established. We have had no large losses during the year and what few losses there have been have been quickly and satisfactorily adjusted and paid. We have no outstanding indebtedness and the receipts have been large enough to justify us in declaring a dividend of 33⅓ per cent.

OUR INSURANCE IS THEREFORE CHEAPER THAN ANY OTHER.

That it is just as good as any will be borne out by the careful examination of our plans, articles of organization, and the official acts since its organization. As an officer of the company and fully conversant with its affairs, I can conscientiously recommend that you join such and lend to it your aid and support. That the company was organized for your benefit is sufficient reason for your support. We can not go outside of yourselves for business and if we do not get yours we must cease to exist. It does not seek to make money except to pay it back to you. The McCurdy family are not its officers, and no expensive legislative lobby is maintained. It is an organization of Hardwaremen for the mutual protection and benefit of Hardwaremen, and as such I earnestly ask that you remain as true and loyal to it as you have to this organization.

Loyalty to the National Hardware Association is as imperative as to this association. While the majority of us do not come in active contact with its officers and members in convention assembled as we do here yet you have all gained through its influence. You have received the benefits of its fight against the unfair competition of the catalogue houses, and to-day you can credit the National Association with having fixed the selling price of some 600 staple articles of Hardware. By its influence and protest manufacturers have refused to sell their products to certain large catalogue houses who were willing to sell them less than cost, merely as a means of advertising, unless such houses would agree to sell them at a fair price.

THE RIGHT OF A MANUFACTURER TO DICTATE THE RETAIL PRICE

of his article of manufacture has recently been upheld by the supreme court of the State of Rhode Island. That its wise decision will be followed by the other courts of the country when the question arises should certainly be our most earnest wish and hope. The National organization is doing much for your benefit and mine in this way, and I can but repeat the entreaty I made to you last year that we increase our own membership in order to increase our representation in the National, that its power may thereby be greatly increased.

The National is growing daily and soon it will extend from ocean to ocean and from Canada to Mexico and become one of the greatest trade organizations in the world. While in attendance at its meeting in Minneapolis last Spring, a telegram was received from the New England Association stating that they had that day decided to join the National, thus adding four more States to its membership. Thus it will continue to grow but only through the loyalty of every individual dealer in the country can it gain the position and prominence to which it is entitled.

Thus are the Hardwaremen of the country becoming organized. First in State organizations and then in a National organization composed of States. To each of these organizations we owe the duty of loyalty. Let us then to the glory of ourselves perform our full duty in these respects and be loyal, earnest, active workers to the end that right may prevail in all business dealings and prosperity bless the Hardwaremen of Wisconsin.

The Committee on Resolutions reported the results of their labors, which were adopted as read.

WISCONSIN IMPLEMENT MEN.

The question of admitting the Wisconsin Implement dealers to membership in the Association was discussed at length and it was decided that it would be advisable that they form an organization of their own. An effort to bring this about will be attempted during the present year.

NEW OFFICERS.

PRESIDENT, Emil Teitgen, Manitowoc.

VICE-PRESIDENT, J. Kornely, Milwaukee.

SECRETARY-TREASURER, C. A. Peck, Berlin.

NEW MEMBERS OF THE EXECUTIVE COMMITTEE.—E. H. Ramm, New London, and A. H. Kleberg, Nekoosa.

The members of the Executive Committee, including the officers of the Association, were chosen as delegates to the Convention of the National body.

Notwithstanding many invitations were received to hold the next meeting at Madison, the Constitution provides that Milwaukee shall be the next meeting place of the organization. So next year's convention will be held there during the first week in February, 1907.

The Turn Hall and Republican House contained a remarkable display of goods of the manufacturers and jobbers who made exhibits. The majority of them were in the main hall of the convention building. They undoubtedly profited by the opportunity to a large extent.

NEBRASKA RETAIL HARDWARE ASSOCIATION

The Ninth Annual Convention of the Nebraska Retail Hardware Association was held at Lincoln, Nebraska, on February 13, 14 and 15. The sessions of the convention were held in the Convention Hall of the Lindell Hotel.

The meeting was called to order by the President, Max Uhlig, of Holdrege, promptly at 2 o'clock P. M., who introduced the Reverend H. C. Swearingen, D. D., pastor of First Presbyterian Church of Lincoln, who invoked the divine blessing. The president then introduced the Hon. F. W. Brown, Mayor of Lincoln, who delivered an address of welcome which was happily responded to by Nathan Roberts, president of the Dunning Hardware Co., Omaha.

The President, Max Uhlig, of Holdrege, then delivered his annual address as follows:

MAX UHLIG, EX-PRESIDENT.

Brother Hardware Men:

We are upon the threshold of the sixth year of our organization, and with heartfelt pleasure I extend greetings of welcome and express my appreciation of the importance of our united effort.

To the weary traveler, each distant milestone seems more formidable than the last. Having passed them, they sink into insignificance, but not so in this instance, for, looking backward to our meeting of last year, it stands out bright and gleaming with the rays of success. So let us assume that the meeting of Nineteen Hundred Six will ring with the joyous notes of fraternity and progress which have given zest to our past year's effort, and cheer us on our forward march during the coming year.

Our grand old state of Nebraska has been a commercial study at different intervals during the last quarter of a century. During these years it has been my privilege to grapple with the retail hardware trade; and while the last number of years have been marked with great success, the year just closed has exceeded any of those past in

THE VOLUME OF PROSPERITY THROUGHOUT OUR STATE.

During this period, the climatic conditions have undergone great change, and a new method of farming has created a revolution in home industry. So great has the faith of capital become, that investments are made on farming lands at $65 to $85 per acre, that only five years ago sold at $15.

So, my brother hardware men, this convention has indeed good cause for rejoicing, and for a continuance of the future development of our Retal Hardware Association.

The prosperity of Nebraska in Nineteen Hundred Five has been further celebrated by the election of a Nebraska Hardware man to the presidency of the National Hardware Jobbers Association—the Honorable W. S. Wright of Omaha—and so we Nebraskans should prove ourselves worthy of our association with so distinguished a statesman in the Hardware world.

It is with great pleasure I can report that we have the confidence and respect of the National Manufacturers and Jobbers Associations, which we must

RETAIN WITH PRIDE, AS AN INVALUABLE AID

in the accomplishment of the objects for which we are seeking.

Only five years ago, a handful of dealers, feeling the need of a more harmonious working among their common interests, met at the Bostwick hotel at Hastings to discuss the advisability of a state organization; from that has grown the mighty power of the Nebraska Retail Hardware Dealers Association, of more than Three Hundred members, the strength of which should be felt in the breast of each member as he contemplates his share in making this convention the banner meeting of our history.

Gentlemen, this is a business meeting for business men— to exchange practical and tried plans and ideas.

THERE ARE MANY VITAL MATTERS TO BE DISCUSSED BY THE ASSOCIATION during this session. Let me beg each member to be prompt in attendance upon each of the meetings, giving us the benefit of his advice and the encouragement of his presence.

One of the most important subjects for consideration is

THE PARCELS POST BILL

—which will come up at the present term of Congress for very serious debate and perhaps final action. And I wish to admonish each

FRANK K. BARR, SECRETARY.

and every one of you to do your full duty to defeat this menance to our interests.

In this connection may be mentioned the recent order of the Postoffice department to Number the rural mail boxes, which was suspended through the influence of this and allied organizations, and pressure should be brought to bear that it may be finally rescinded.

A great deal has been accomplished by our organization in combating catalogue house competition, primarily through our affiliation with the National Association; most of our

LARGE AND REPUTABLE MANUFACTURERS AND JOBBERS

absolutely refusing the patronage of these concerns. There still remains much to do along this line, and only by a united pull can we attain the desired end.

The freight question should receive thorough consideration by a proper committee, to adjust the slow and tardy transportation, the overcrowding of freight cars, resulting in much damage and breakage, and the impossibility of getting shipments unloaded in a complete manner at local points throughout the state.

Another stumbling block in the path of the retail Hardware dealer which is becoming more prevalent every day is the

DISTRIBUTION OF STANDARD HARDWARE LINES

by jobbing grocer houses to the general stores and corner groceries throughout the country, thereby greatly demoralizing prices and creating objectionable competition to the regular hardware dealer. This is one of the hardest forms of competition we have to meet, and can only be abated by forceful and persistent representations to the manufacturers themselves, and I would urge the association to adopt resolutions tending toward this end.

The old time nuisance of the traveling stove peddler has again been attracted to our state by the prevailing prosperity, much to the detriment of the legitimate dealers. Gentlemen, we ourselves are to blame for this condition, as the question has been agitated before without having received proper attention on our part. I trust you will see the necessity of a legislative committee to take this matter in firm hands and either abolish it by a proper enforcement of existing laws, or see that such measures are passed as will effectually do away with the nuisance.

Special Brands have been the subject of a great deal of discussion in trade papers during this past year, and it might be well to ascertain the feeling of the Nebraska hardware men upon this question before the close of our sessions.

Digitized by Google

ALL THESE MATTERS SHOULD BE DISCUSSED

and acted upon in their proper order, and I would urge upon every member the importance of taking an active part in these discussions, as well as bringing before the convention any new ideas or suggestions "for the good of the order" which may occur to him.

It gives me pleasure to report that our mutual fire insurance association has made wonderful progress in the past year, and is offering you sound protection at a great deal less cost than the established board rates of the old line companies.

To our brother members, the "Knights of the Grip" who may be present; I would not have you spirit away any member during the hours of session but would ask you to join us in the meetings and bestow upon us your helpful counsel.

There is an old saying "All work and no play makes Jack a dull boy;" and for your pleasure and your profit the executive officers have arranged social hours, which I trust you will enjoy to the utmost.

In closing, I desire to say that

WE CANNOT GIVE OUR SECRETARY TOO MUCH PRAISE

for the successful work he has done. He has met the demands upon his time and energy in a manner which deserves our admiration.

Gentlemen, it is up to us to show how thoroughly we appreciate the conditions of those things needful for future success. That future has much in store for those who study the interests of the work—the perfecting of our state organization by bringing in all the hardware men; by the awakening of the sleepy ones; by promoting the idea that we are in business for a living; and by promulgating a spirit of good will. Let us then enter upon the coming year's work with a thorough realization of the benefits of united effort, and by our own worth make our association a still greater power in our chosen field, that we may look back upon the meeting of Nineteen Hundred Six as one of the brighest and strongest examples of harmonious co-operation in the history of the association.

Following the delivery of the President's Address was a long and interesting report of the Secretary, J. Frank Barr, from which we make extracts:

SECRETARY'S ANNUAL REPORT.

Another year has again rolled around since we have met together in Convention, and I trust that the year has been a success financially and otherwise with all of you. We have had our ups and downs in many ways and it's hoped that the ups have so overwhelmed the downs that you are all feeling in the best of humor and are ready to take advantage of and profit by the good things that we have in store for you in the literary part of the programme and the renewal of old acquaintances and friends with kindred ideas and thoughts, may quicken a responsive chord in your hearts and make you feel that the good things obtained by attending the Convention are far in excess of the expense and time taken in coming.

* * *

During the months of March, April and May when your Secretary was able to travel he

VISITED NEARLY EVERY HARDWARE MERCHANT SOUTH OF THE PLATTE

and West of Lincoln as far as Oxford, and in this territory a large portion of the increase in membership comes. To recount some of the experience in soliciting new members would take up too much of our valuable time, but I cannot refrain from giving a few of the excuses for not desiring to join the Association. One excuse was that since he was not at the last Convention he thought he would drop out this year and come to Lincoln at the time of the next Convention and join again, evidently the nickel in front of his eye hid the five dollars worth of a years benefit behind it. Another said that "When you fellows stop allowing these Catalogue House fellows to ship goods in here from Chicago cheaper to the farmers than we can buy them then I will join the Association." No comments are necessary on such a flimsy excuse as this.

In a few of the Southern Counties your Secretary was requested to agitate the subject of a district convention comprising 8 or 10 counties, to be held for a day or two about midsummer, at a time when trade was a little slack and get the Hardware merchants to get together at some centrally located town easily accessible by railroad and consult and advise with each other as to the best methods of counteracting some of the evils that were then affecting them. In taking up the project with the officers who could be quickly reached I was advised to discourage such an idea as much as possible and in place of that, urge the

DEALERS TO ORGANIZE COUNTY ASSOCIATIONS

and get together at least once a month for a half day, or an evening and talk these matters over in a very energetic though informal way, and arrive at conclusions that would be best suited to their individual cases. Acting on this suggestion your Secretary induced the various members to get together in their own counties and organize for protection as well as prosperity.

* * *

These are only a few samples of the complaints that the Nebraska Retail Hardware Association has successfully adjusted to the satisfaction of a number of very much pleased members, and only a few weeks ago one of the members who was so well pleased with the settlement of the grievance that he had, wrote the Secretary that on account of illness in his family he would possibly not be able to get to the Convention but that he enclosed Draft for $5.00 to pay his dues to Feb. 1907, as he was convinced more than ever that the State Association was a most valuable power for good, and as long as he was in business he would be found a member, and would induce as far as possible all the other dealers who were not members to get into an organization that was doing the most valuable service to the Hardware trade.

* * *

Each member of the State Association becomes an affiliated member of the National Retail Hardware Association which is an enormous power for good and the National officers are using every effort to forward the interests of the members. The National Bulletin which comes to you quarterly without cost is a most valuable journal and should come weekly instead of quarterly, for it contains information that fits into the case, or needs of some member every time you read it. Nearly every merchant your Secretary called on was a reader of one or more Hardware journals but several were subscribers to none. This is a mistake. Every up to date Hardware man should

TAKE EITHER A WEEKLY OR MONTHLY JOURNAL

and keep in touch with affairs that affect his business in one way or another.

We trust that you will have a profitable and very enjoyable meeting at this Convention and that when you go home, if there are any of you competitors who are still without the fold of Association benefits, you will use your best endeavors to have him be a "jiner" for once and join the Association.

* * *

Upon suggestion of Mr. Roberts of Omaha the President appointed Messrs. Hall and Garroutte of Lincoln as a Committee who escorted W. P. Bogardus of Mount Vernon, Ohio, President of the National Retail Hardware Association, to the platform.

Treasurer H. C. Hall presented his report which was received and referred to the Auditing Committee.

CONVENTION COMMITTEES.

The President then announced the following Committees:

FINANCES.—J. H. McGrath, Hastings; Victor Fried, Oakland; Frank Hacker, Friend.

CONSTITUTION AND BY-LAWS.—J. W. Amstrong, Auburn; J. F. Hanlin, Holdredge; L. Pattingale, Omaha.

RESOLUTIONS.—Ernest Hoppe, Lincoln; August Lubeley, Harlington; Roy Bodinson, Kearney.

PRESS.—H. Vieth, Lincoln; A. E. Small, Crete; M. Hussie, Omaha.

LEGISLATION.—F. J. Hoerger, Sutton; Alexander Meyer, Falls City; Frank E. Lahr, Lincoln.

NOMINATIONS.—J. C. Cornell, Ord; A. G. Hunt, Campbell; C. K. Lawson, Hastings.

F. C. Harrington, Pawnee City, was appointed sergeant-at-arms.

The president then said he had with him a gentleman who had travelled 1800 miles to be with the delegates and give them a few words of greeting, C. W. Asbury, of the Enterprise Manufacturing Company of Philadelphia, who was then introduced and addressed the Convention as follows:

C. W. ASBURY'S ADDRESS.

Mr. President, and fellow members: First let me thank you Mr. President for the courtesy of your time this evening, and I promised your president to make it very short.

I represent the American Hardware Manufacturing Association. That association, as you probably know, is an association of between 200 and 300 of the manufacturers of Hardware in the United States, and includes among its membership all of the important manufacturers. I don't propose for a moment to take your time in undertaking to present the reasons why an association is of valu . You no doubt have had your own experiences as we have. I do want to say, however, that our association brings to you fraternal greetings. It is the desire that the manufacturers as a class, do everything possible

FOR THE PROTECTION OF THE RETAIL TRADE.

We naturally have our close personal friends, personal friends by reason of periodical contact, frequent contact with the jobber, and we naturally appreciate the jobbers efforts in distributing our goods. But we appreciate beyond that, that you gentlemen are the bulwarks of our business, and you are the gentlemen who come in direct contact with the consumer, and it is the consumer naturally whom we are after. You are therefore of the first assistance to us in distributing our goods. Let me say a word for one moment, however, regarding the association work, that I think is a very good sign of better times coming and we find such growth among the retail dealers associations. We have now in this country a great association representing the retailer, an association representing the jobbers, as well as association representing the manufacturers. It is quite proper that questions of immediate concern

SHOULD BE DISCUSSED BY EACH INDIVIDUAL AND SEPARATELY.

But after all the aims of each branch are nearly coincident; our interests are always parallel, we certainly have interests in common. And during the past two years there has been two immensely important questions considered by these various associations, questions of interest to all of those who are interested in the handling of Hardware or in the making of it. Probably one of the greatest misfortunes we suffered in the handling of those great questions, in my judgment, has been a spirit of enmity which has been engendered through a desire to place the blame for the *evil*. Such a feeling is not only necessary but highly injurious to our common cause. What difference does it make who is to blame. The great question is

HOW CAN WE REMEDY THE EVILS.

That should engage our attention. I look forward to a time when these three interests—the retailer, jobber and manufacturer—can be brought together in harmony. Surely a spirit of fairness, of frankness and square dealing will hasten that day. And when that day comes we will find a power which can deal with these great questions in the way in which they should be dealt with.

I promised your president that I would not consume more than five minutes. I think I have about taken that time now. (Voices: Go ahead. Go on.) But gentlemen I want to thank you all most sincerely for the courtesy extended to me as representing the manufacturers' association, and to express the hope from the said associa-

Digitized by Google

tion that your body will prosper, and that each individual member will prosper. Applause.)

The president announced the next number on the programme would be an address by J. H. McGrath of Hastings on the subject,

THE HARDWARE STORE; ITS PAST, PRESENT AND FUTURE.

By J. H. McGRATH, Hastings, Neb.

In dealing with this subject, "THE PAST, PRESENT AND FUTURE OF THE HARDWARE STORE," I shall say very little of the past, but deal more with the present and future, as they are of the vital importance to us.

The "Pioneer" hardware merchant and his store are, indeed, a thing of the past, as new conditions have arisen in almost every phase of the business.

Dealing with the present Hardware store is of the most interest to us, and this is

CERTAINLY A RESOURCEFUL SUBJECT.

The present day hardware business, is, in my estimation, the best and most comprehensive of retail trades. The present day Hardware man must be the keenest, broadest, and most diligent of business men. Competition has grown so keen in certain channels, especially illegitimate ones, that he must indeed, be a merchant of great ability, if he would succeed. It is of the abuses and wrongs that exist to-day, that I wish to speak of at more length, and, especially among these, in the continual raising of prices by some manufacturers. (This is working the greatest hardship on the retail dealer.) It is the stove manufacturer, that in my opinion, has grown most greedy, and, it would seem, under present conditions, he would be the slowest to raise his prices. I mean by present conditions, not prices on pig iron, coke and steel, but the competition that is arising.

There are to-day, more big concerns selling pretty good stoves direct to the consumer than ever before, and selling them at as low or even lower prices than the retail merchant can buy the same grade of goods. A short time ago, one of the largest mail order houses purchased a very extensive stove works in Chicago. This means these people will be at the mercy of the manufacturer and in all probability, will sell better stoves in the future for less money than they have in the past. Take, for instance, the recent advance in stoves was wholly in my opinion unwarranted. You ask the manufacturer why he advances the price on his stoves and he will tell you he is giving you a better stove than any one else on earth, at less money, also that "pig iron" has gone up, yet in the same breath, he will tell you that the raw material, used in making stoves, is but a fraction of the cost of the stove. I am told by good authority that the "Blood raw" cost of stoves to the manufacturer, is less than one third, yes one fourth the selling price to the retailer, and this is why I say the manufacturer is working the greatest of hardships on his agents, the retailers. It is quite true, he is giving us a better stove to-day than ever, but we are paying a great deal more for it, also, the hardest part of this continual price raising, is for the retailer to make his customer believe stoves are worth 5 per cent. more to-day than yesterday, besides, it constantly grows harder for us to make him believe that our stove is worth 2 or more times in value than a mail order house stove or a "Kalamazoo direct to you."

This seems to be an Era of Price Raising. Other manufacturers in fact, nearly all have given us a raise in prices about as fast as new discounts could be printed, but none of them affected us, in my estimation, as much as the one just mentioned.

In dealing with the present, there is much being said and agitated just now about the

MAIL ORDER SUPPLY HOUSES,

and in reading these arguments in the different trade journals, one finds, sometimes a good deal that is amusing along with the serious part of it. In recent issues of the different Hardware journals, there has been a great deal of discussion on this subject, especially among the manufacturers, and in most cases, you find the manufacturer lays most of the blame on the jobbers and retailers, ecpecially on the retailers, says he is inconsistent and asleep.

I was greatly amused at a certain manufacturer's discussion on this subject in a recent issue of the Hardware Dealers Magazine. In speaking of the evils of the mail order houses, he deplores the conditions of things, but goes on to say that the retailer, in most cases is fast asleep and does not hustle as he should. This same writer, also says he cannot understand why retailers wish to handle jobbers brands of goods in preference to the old STAND BYS. This writer that cannot understand these conditions had best wake up himself, as he is the one FAST ASLEEP, for out of a dozen popular magazines and periodicals examined, I could not find an advertisement of any of his goods, while I found several jobbers brands of goods extensively advertised. The manufacturers, to my mind, with a few exceptions, have done very little towards helping the retailer fight the monster catalogue houses, while the jobber has been our good friend and helped us at all times, leastwise, I have never called on him to help me out and been refused. The past year has been a good and fruitful one for the mass of Hardware dealers, prices have been good, demand has also exceeded the supply. There has been a great deal of money in circulation and collections in most localities have been good. This one phase of the business must be watched very closely as when business is good and times are good, merchants as a rule are inclined to be a little too lenient with credits. In dealing with the future, prospects, as a whole, are bright. There is a demand for better class of goods than ever.

THE FUTURE HARDWARE MAN MUST ADAPT HIMSELF TO FUTURE CONDITIONS,

as my prophecy is that his store will become a store of specialities more and more, and that is if he would succeed, he must, himself, become a specialist in every phase of the business.

The present demand is for much better goods than ever before, which gives the merchant a chance for better profits, also, enables him to add new lines of goods, especially profitable ones. These are the ones to be on the look out for. I have found that a mighty good investment was store fixtures of the first class order, nice show cases, wall cases etc. which makes your store attractive. These things ore good, silent and profitable partners. Summing up this article, I would suggest that we stick closer to the profitable lines, do more business for profit and less for glory. Be a good friend to your home competitors, have more confidence in him and, bye and bye, he will have more in you. As I have said, to place the future Hardware store second to none, we must keep in very close touch with one another and I know of no better and successful way than through our present Hardware Dealers Association.

This paper was discussed by several members, the sentiment being in the nature of an endorsement of the views therein expressed.

The next paper was entitled

BEST METHODS OF GETTING ALL HARDWARE MEN INTO OUR ORGANIZATION.

BY A. G. HUNT, OF CAMPBELL.

There are many means and methods that might be used but I have confined myself to that which in my judgment is the most essential. This is an age of organization, the more extensive and complete the better results obtained. Confidence begets confidence. How best to bring about this desired result and a more complete understanding among the Hardware trade is a matter of great importance to us all. And speaking of organization I wish to call special attention to the loyal manner in which the jobber has at all times responded to the interests of the dealer. But how in many instances have some of the dealers shown their appreciation—by buying part of their goods from some grocery house, that is ever ready to throw you some alluring bait. And when he has done you to a finish steps across the street and places weapons in the hands of every grocery house in your town to help destroy your business, and cut off your legitimate profits.

Stand by your jobber, he who is ever

READY TO HELP PROTECT YOUR BUSINESS,

who has stood by you when sailing was hard. Those times may come again, our interests are so closely allied that they are a unit. Then show your appreciation and loyalty by at all times giving them the support and advantage of your business. Do this and it will not be necessary for them to stamp their invoices: WE DO NOT SELL CATALOG HOUSES.

We all realize the great things it is possible to accomplish by perfect cooperation, to do this it becomes necessary to get our competitors interested in what the association, with the united efforts of the Hardware men of the country is doing for him. This is a matter that should be plainly presented to every dealer in Nebraska.

To

SHOW THEM WHAT THE ASSOCIATION HAS DONE,

can and will do, what the organized efforts of the Hardware dealers of the world, is a question, that should be of interset to any man who still has enough life left in him to transact business. But while the association stands ready to give us all possible assistance they cannot do it all, it is for us to help the good work along. Our organization has grown, we are justly proud of it, but as yet we have not to exceed one third of the dealers of our state enrolled, these are the fellows we are after, we want them, they need us, the association wants us all. How best to present this proposition to them that it shall touch a responsive chord is a matter for our consideration. To get them to join the association is what we all want, for in numbers we get strength and unity, when this can be brought about then it is possible to make our organization more complete by perfecting local organization, which is a matter of great importance and financial benefit to all dealers, especially in the country towns. This will not or cannot be brought about by sitting in your office criticising your competitors and their methods of doing business.

Merchants are generally apt to find fault with their neighbors instead of seeing their own. The broad minded dealer is he who gets around, calls on his competitor, talks over business conditions, at the same time realizing that his neighbor has the same right to do business as himself.

LEARN YOUR BUSINESS.

Extract from it the secrets of success. There is no mistaking the fact, that a reputation for thoroughness gives power and inspires confidence.

How is it with our complaining friends who spend altogether too much of their time in worrying over the galling competition of the catalogue houses and see bad local conditions. In many cases not circumstances but their own lack of confidence is what helps to make them. Do what you can to make these circumstances better. Be thorough, for all slip-shod efforts are fatal to success. Cultivate high ideals, sound, healthy and generous business methods, make money for that is what we are in business for, each trying to make the trade better for his having been in it.

In my opinion, if these same men would devote one half the time they do in worry over existing conditions, to

STUDYING METHODS TO MEET AND BETTER THEM,

and of cultivating more intimate acquaintances and a better business understanding with their neighbors, a great deal of good might be accomplished, better prices maintained, better social relations, more money in the Hardware business, and more pleasure in life.

You are then in a position to go to him and show him the mutual benefits to be obtained by becoming a member of the association. And with it will come better business relations, a more complete understanding, a perfect local organization, which when affiliated with the state and national, we are then lined up to get results and reap the benefits of our labors. And this is along the line of what I should call complete organization.

Digitized by Google

Members broaden out, take time to call on your neighbors, talk over business conditions, and of the best methods of getting prices and maintaining them, tell them what the association is trying to do for them, tell them you need their assistance and they will be benefited by you, and should this question be properly presented they will have to be calloused to the core if you cannot find a spot in them that will respond to common sense, and good business judgment. One great trouble with many of our members is lack of interest. He who is not ready at all times to uphold and defend the principles of his association is not doing his duty. You may choose your most able leaders, they may do all in their power to protect and benefit you, they may secure promises of reform, but they must have true, loyal and energetic support of the individual who composes the organization or their labors are fruitless.

Wake up dealers, show your competitors that the ethics of a successful business is not in the cutting of prices but in getting together and maintaining them. While it has been said that goods well bought are half sold, yet if they be sold without profit it were better they had not been sold at all, impress them with the necessity of joining the association, for in union we get results, but remember that your

ACHIEVEMENTS CANNOT RISE HIGHER THAN YOUR RESOLUTIONS.

To resolve that you will make yourself a committee of one so that when you return home you will go with a firm intention, that you will be the means of adding at least one new member to our list this year.

Think what that will mean for our association in Nebraska. Do this and you will come back next year knowing that you are going to attend one of the greatest family reunions of Hardware men ever held in our state.

This paper was discussed a few minutes, the general sentiments being in accord with the paper as read.

The next was an address by Alex. F. Meyer, of Falls City, on the subject, "Our Competitors; Why We Should Be On friendly Terms," which proved an excellent subject and was well handled.

Next was a paper entitled

ADVERTISING A STORE IN A COUNTRY TOWN.

By J. C. McPherson, of Haigler.

Advertising a store in a country town is a question that has kept us guessing for the past eighteen years.

Our experience has been that a satisfied customer gives the best results, but to get that customer satisfied and to hold his trade is the question we would like to answer in a manner that our fellow Country Hardware Dealers would read with profit by improving on these suggestions.

We will try to illustrate in the first place the Country Hardware Merchant, striving to make a living by selling goods at a profit.

Now any one can *sell* goods, but to sell goods at a *profit*, is the point. We find our sales increase as we bring on new styles of up to date goods that have merit. All we do is to call our customers attention to any article of this kind and in a few weeks his neighbors are asking to see them.

We have already made many sales on sewing machines by writing our lady customers, stating we had the best sewing machine that money and brains could produce

WITH PRICES THE LOWEST, QUALITY CONSIDERED.

We have sold typewriters to parties that never thought of typewriters in particular until we approached them in this manner.

In regard to newspaper advertising, our method is to get our advertisement to call special attention to goods advertised in most of the leading magazines that have established retail prices. We will use the Bread Mixer for example. As soon as a lady finds we carry articles advertised in her magazine, at same price, she becomes interested and in most cases we can place her on our list of customers.

We have sold a Bread Mixer to one of these customers, who liking the machine, and finding it far superior, with less labor to the old mixing process, confided same to her neighbors and friends and the result was one half dozen mixers were sold.

We never fail to approach a catalogue customer and show him some article that has an established *retail* price in his catalogue. We will use for example, the Target Rifle. In this way we get him interested, then we show him a saw or hatchet, of special brand, and let him look them over telling him of their merit. The article speaks for itself. He readily sees the difference between a good article and a poor one.

By displaying a good pair of scissors that had the best of qualities, such scissors that have patent washers, etc., to keep scissors firm and in place, we have the lady interested and she and her friends call again.

We find that

CHEAP MADE GOODS ARE THE POOREST INVESTMENTS,

still they are necessary, for the reason the Catalogue Houses make them a specialty, pricing same at a close margin, they making *their* money on better lines of goods.

We have an alphabetical list of all the residents tributary to our town and we never fail sending this list to the Jobber or Manufacturers who advertise through the mail, stating that we are their local dealers and distributers.

Another method we have of advertising is the display, we plan, from time to time, of goods arranged in front store windows. We find that

ORDERING GOODS IN SMALL QUANTITIES IS A WINNER,

less goods to get shop worn, and less chance to cut prices ,to get quantity reduced and in this manner we move our money quicker and can handle a larger variety of goods.

Another good advertiser is when an article called for is out, we show our customer we have same in our catalogue with price, and order it for him as soon as possible, calling his attention to article when he calls again. We have made an impression on him that he is not afraid to express. We find having goods on hand that is called for makes our customer a winning advertiser for us.

A clerk with ideas, who studies what he sells a customer and is posted on the service an article will give and practically knows the needs of our customers and takes the responsibility of a sale or a settlement is one of the best paying advertisements we have.

The last number of the afternoon programme was an address, "Pushing The Business" by P. A. Krause, of Albion, a subject to which he did full justice.

WEDNESDAY MORNING SESSION.

Meeting called to order by the President at 11 A. M., February 14. The first number on the programme was an address by W. P. Bogardus, of Mt. Vernon, Ohio, President of th National Retail Hardware Association, on the subject "Parcels Post".

This paper was discussed and numerous questions propounded to the author eliciting information on the subject. There were a number who expressed themselves in sympathy with the address.

The rural free delivery carriers were the subject of some ex ended discussion regarding their violations of the postal laws and regulations in soliciting business for the catalogue houses, etc.

WEDNESDAY AFTERNOON SESSION.

The afternoon meeting was called to order by the president at 2:40 P. M. The Secretary made some announcements relative to the banquet, and the validating of their railroad tickets, etc.

The president then announced the next number on the programme would be a paper by Mr. A. L. McDonald, of Eagle, on the subject, "How to Get Our Home People to Patronize Our Local Stores," which he treated in an exceedingly humorous manner.

Following this came the address by Mr. W. P. Lewis, of New Albany, Ind., Treasurer of the National Hardware Mutual Insurance Co., on the subject, "Pointers on Fire Insurance."

This paper was discussed and the sentiment seemed to be pretty generally in favor of encouraging the local mutual insurance companies by patronizing them more generally by the Hardware dealers.

The convention was next favored with a paper by Walter Cabeler, of Winside, Neb., on the subject, "What Good Has Our Association Done Us?"

WHAT IS NECESSARY FOR THE SUCCESSFUL WORKINGS OF YOUR ORGANIZATION.

By William M. Glass,

Secretary of the Lee Glass, Andreesen Hardware Company.

One of the greatest factors for the good of modern American life is the frequent gatherings of business men from all parts of the country. It is through this combined social and business interchange at annual conventions that the people of the north and south have been brought closer together and made to understand each other, and that the factional feeling consequent upon the civil war has been removed. Association leads to closer companionship, co-operation and organization, which broadens and brightens the mind and establishes brotherhood. Our nation stands to-day without a peer, because we are organized right. Association and organization have become a present day necessity. By them and because of their being it is possible to draw together men and minds of vast experience. Self-interest, the strongest of all motives, has impelled you to organize, because you believe organization to be beneficial. So far, so good. You have also elected from your members an efficient corps of officers, and they have performed their duties faithfully and well.

* * *

Let your association stand for progress and against retrogression. By getting together and interchanging ideas, you shall be able to see things as they are, and to cope with conditions that exist. The individual may protest and struggle with all his power, but he is carried along by stronger forces, until he meets others who are in the same conditions, and they join and unite until they become a mighty force in determining what shall and what shall not be. A single individual is like the old time flail, while a well directed organization is like a modern threshing machine. It is presumptuous for an individual to attempt to correct trade abuses single handed or to endeavor to cope with modern trade conditions with the meager knowledge acquired only through the narrow windows of his own individuality. No retail Hardware firm alone can change a single condition, but all combined can make their influence felt on any proposition.

I have been a close observer of the growth of your association and believe through it will come substantial benefits beyond your greatest expectations. Each and every member of your organization should be vitally interested in the success of your organization. It can accomplish for every individual member what it would be impossible for him to accomplish for himself. Each and every member should lend a willing hand toward the discussion of such topics as are of mutual interest to your organization, each and every one from his standpoint, great or small, in order that from the broad knowledge thereby gleaned your organization can do injury to none, but good to all, and which shall enable your organization to champion the cause of right and justice.

The Association adjourned at this time until 8 o'clock in the evening, which after assembling the Convention listened to a very favorable stereopticon lecture on the Catalogue House proposition, which was listened to very intently by the Convention and at the close he favored the audience with a very fine lecture on the subject of Hardware Mutual Insurance, which was appreciated by every one present, the Hall being crowded to the door.

WEDNESDAY EVENING, FEB. 14TH.

The entertainment committee, consisting of the jobbers and retail Hardware merchants gave the visiting Hardware men an excellent banquet at the Lindell Hotel, which to the tunes of an orchestra the officers with their ladies and the visiting members with their ladies marched to the dining room to the number of nearly 300 and sat down to a very excellent banquet. At the conclusion of the banquet, the toast master, R. M. Joyce, Secy. of the Lincoln Hardware Co., was in-

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

A QUESTION OF IDENTITY.

There seems to be a fallacy among some dealers that for them to push an advertised article will cause them to lose their identity in the locality. This is entirely erroneous. If you will take up your morning paper and read the advertisement of any one of your large stores, you will find that they give special prominence to advertised articles.

They do this because they realize that although everybody in their city who might possibly buy goods of them does not know them; they all know of the advertised article. They realize at the same time, that it is of much importance to proclaim the fact that they stock these advertised articles which are so well-known in their community. Whether a woman has ever been in John Smith's or John Jones' store makes no difference. If she wants to buy JAP-A-LAC or some other advertised article, she will go to whichever store keeps it, as soon as she knows they keep it. Neither Jones nor Smith lose identity in a case of this kind; they thus get an opportunity of making a *permanent customer* out of this woman.

Thousands of customers are diverted from one store to another every day in the year because of some particular article they can get in one store and not another. A store that keeps the articles which are most in demand, is therefore the largest gainer of this floating trade. We believe you are sharp enough to not let the trade float, if you once get hold of it. You can lose nothing by the experiment which we now suggest.

JAP-A-LAC is known by almost every magazine reader in your community. Put your JAP-A-LAC in your window, keep it near the front of the store, advertise the fact that you keep JAP-A-LAC, and see what will happen. By doing this you will identify yourself with the best known article of the kind made. You will secure a great many new customers. You will give no excuse to your old customers for going to some other store for JAP-A-LAC, and we think there will be no question of identity after you finish the experiment.

PUSH JAP-A-LAC

THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES

641 ROCKEFELLER BUILDING, CLEVELAND, OHIO.

troduced as toastmaster and in a very affable and pleasing manner introduced the following speakers and announced the subjects of their toasts: R. M. Bushnell, proprietor of the *Lincoln Trade Review* in Lincoln; "Lincoln a Distributing Point", "Shop" Max Uhlig, Holdrege; the *Commoner;* Reminiscences of a traveling man," N. N. Norris, Lincoln; "The Ladies," H. J. Hall, Treas., Lincoln. A number of other impromptu toasts were given by the various members of the Association present, showing their appreciation of the Entertainment furnished them by the Reception Committee, after which the members concluded their feasts of reason and flow of soul by singing "America."

THURSDAY MORNING SESSION.

President Uhlig called the convention to order.

Committee reports were called for and the various committees reported, and reports were received and passed upon favorably.

The usual resolutions were read and passed unanimously.

REPORT OF THE FINANCE COMMITTEE.

Mr. President: We, the finance committee, beg leave to report that we have investigated the records and books of the secretary and treasurer, and find the report made by the treasurer correct.

FRANK HACKER, Chairman.
J. H. MCGRATH,
VICTOR L. FRIEND.

On motion the report of the committee on finance was adopted.

ELECTION OF OFFICERS.

The following officers were duly elected for the ensuing year:

For President—Nathan Roberts, of Omaha.
For 1st. V. Pres.—H. T. Moore, Alma.
For 2nd. V. Pres.—C. L. Kelley, North Bend.
For 3rd. V. Pres.—S. C. Oaks, Seward.

The selection of Secretary and Treasurer, as usual, was referred to the Executive Committee.

The following were elected as members of the Executive Committee:

Dan Kavanaugh, of Fairbury, Chairman.
Frank Hacker, Friend.
J. H. McGrath, Hastings.

The Nominating Committee were as follows:

C. K. Lawson, Hastings.
Frank Lahr, Lincoln.

LOCATION OF CONVENTION.

When the question of the next meeting place came off, Fremont led off with an invitation, followed by Lincoln and Omaha. After some discussion, the association finally decided to hold their next annual convention in the city of Omaha.

Convention adjourned *sine die*.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED FEBRUARY 5, 1906.

397,103. LOCK NUT. D. H. Allen, and M. Loree, Miamisburg, O.
397,190. SPRING HINGE. J. Keene, Chicago, Ill.
397,210. SEAL LOCK. O. T. Welch, Topeka, Kans.
397,211. WASHING MACHINE. E. E. Willis, Decatur, Ill.
397,226. COMBINED LATCH AND KEY. M. E. DeAguero, New York, N. Y.
397,301. ASH OR GARBAGE CAN. T. W. McKeever, Brooklyn, and J. M. Smith, New York, N. Y.
397,349. WASHING MACHINE. I. F. Field, Sandy Lake, Pa.
397,380. DOOR CHECK. B. A. Mitchell, Jr., Philadelphia, Pa.
397,430. WASH BOARD. A. R. Kibbe, New Richmond, Wis.

PATENTS ISSUED FEBRUARY 6, 1906.

811,594. DEVICE FOR SECURING DOORS, &C. C. G. Taylor, Hartford, Conn.
811,601. WASHING MACHINE. Wm. I. Walker, Council Bluffs, Iowa.
811,616. FOLDING STEP LADDER. Geo. W. Buss, Woburn, Mass.
811,629. COMBINED CURTAIN POLE AND SHADE ROLLER SUPPORT. Edson B. French, Helena, Mont.
811,733. WINDOW SCREEN. Ernest E. Morrow, Bluffton, Ind.
811,893. SASH FASTENER. John W. Staton, Brownwood, Tex.
811,830. VALVE FOR DOOR CHECKS. Nathan W. Crandall, New Britain, Conn.
811,880. LATCH. Jas. O. Steensland and Wm. Weaver, Blanchardsville, Wis.
812,011 CLOTHES FRAME. Chas. W. Brode, New Comerstown, Ohio.
812,035. NUT LOCK. Jas. W. Franklin, Boston, Ga.
812,036. SHUTTER BOWER. John L. Guyon, Maud, Pa.
812,091. COMBINED SCAFFOLD AND STEP LADDER. John H. Rose, Shreveport, La.
812,092. DOOR LATCH. Edward H. Roy, Nashville, Tenn.
812,134. SHADE ROLLER. Wm. D. Janes, Saginaw, Mich.
812,138. WASHING MACHINE. Chas. L. Kelly, Grant, Ky.

REVIEW OF THE MARKETS.

WIRE NAILS: The business is reported as being exceedingly good, although deliveries have been handicapped by scarcity of steel, which has a tendency to curtail productions. The market is very firm. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers	$1.85
Carload lots to retail merchants	1.90

New York: The local trade hearing about the scarcity of steel deem it advisable to get in their orders, which has created quite a demand not alone for small lots from store, but also on the larger orders from dealers in territories that look to this city for their regular supplies. We quote on small lots from store a basis of $2.10 per keg.

CUT NAILS: The next meeting of the Cut Nail Association will be held in Philadelphia on February 28. The orders now received are for normal quantities, but the specifications on contracts make the business good. Quotations are as follows: f.o.b. Pittsburgh, for carload lots, $1.80 base; for less than carload lots, $1.85. For carload lots on dock New York, $1.95; for less than carload lots, $2. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 to 10 cents advance on Steel Cut Nails.

New York: The demand while not being an active one is with a firm market and well maintained. Small lots from store are on a basis of $2 per keg.

BARB WIRE: The new business is reported as being comparatively light in character; the furnishing of wire on contracts being the heaviest part of the business of the mills. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.00	$2.30
Retailers, carload lots	2.05	2.35
Retailers, less than carload lots	2.15	2.45

SMOOTH FENCE WIRE: As in the demand for Barb Wire, the new business is reported light, but on old contracts the demands made indicate an active business. Quotations are as follows f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.70
Retailers, carloads	1.75

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

BINDER TWINE: General market quotations f.o.b. Eastern factories may be given as follows:

White Sisal (500 feet to the pound)	9 @ 9½
Standard (500 feet to the pound)	9 @ 9½
Standard Manila (550 feet to the pound)	10 @ 10½
Manila (600 feet to the pound)	11 @ 11½
Pure Manila (650 feet to the pound)	13 @ 13½

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	12½ @ 13
B Quality Manila	11½ @ 12
Pure Sisal, 7-16 and larger	9½ @ 10
No. 2 Sisal, 7-16 and larger	8 @ 8¼

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels	43 cents per gallon.
In lots of 5 barrels or more	42 cents per gallon.

The "American" brand for respective quantities, 2 cents per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than Raw.

Calcutta Oil	65 cents per gallon.

THE PHILADELPHIA TRADE.

Never has a new year brought with it such a volume of business as we see to-day; and this by no means appears to be confined to any one section of the country, or to any particular class of trade. Some departments of the Textile trade are complaining that the mild weather has seriously affected their business for the worse, in preventing the sale of winter goods; but, on the other hand, the open weather has encouraged outdoor work and building, to such an extent that almost all lines of Iron and Steel report an unprecedented trade for this season of the year. The Iron and Steel production for the month of January broke all records, which is all the more unusual for the reason that January is usually an off month, as trade and traffic are apt to be hindered by snow blockades, and extreme cold weather. The papers tell us the production of Iron and Steel is now running at the rate of 25,000,000 tons per year; which represents an almost incredible increase over the production of ten years ago. Up to this time all of this enormous output has been readily absorbed, and the manufacturers tell us that premiums are still being paid for prompt deliveries of certain materials. How long this wonderful demand will last is a very difficult question to answer, but for the present there seems to be no immediate danger of commercial indigestion. The Hardware trade appears to be getting its full share of the volume of business, and it is noticeable that orders coming in from the dealers are very much more liberal than in previous years, as dealers in general seem to look for a large demand this spring, and show their confidence by liberal purchasing. Jobbers are busy, and it is a matter of common report that figures of jobbing trade for both January and February show a large increase over those of previous years.

Prices are steady and while comparatively few changes are announced they are mostly in an upward direction, and the enormous demand is already developing a shortage on some lines. Screen Wire Cloth, for example, is already well sold up by the leading manufacturers, and it is doubtful whether any additional Cloth can be obtained today. The demand for Poultry Netting is also unusually large, but as yet there has never been a shortage on this line. On Wire Cloth, however, the situation is different and an experience of years warns us that an actual scarcity and considerable higher prices may develop before the season closes. During the past week the Axe men have been in session and we understand the axe pool has been abandoned with the result that the market is now an open one, and this will probably cause somewhat lower prices. This, however, is to be about the only weak spot in the market, and it is caused simply by the change from artificial to natural conditions. The demand for Nails and Wire is also quite satisfactory, and it is intimated that slightly higher prices may be expected on these commodities before the season is much older.

BIDDLE HARDWARE CO.
JAMES H. RITTER.

THE CLEVELAND TRADE.

Either increase in population, or increase in wealth, or increased desire for comfort, or altogether keep up prosperity, trade papers perhaps have more influence in creating demand than they have credit for. Everybody seems to be surpassing themselves making new records, that it hardly seems possible to maintain unless the country is making prodigious progress. Consumers are not buying goods for future and retailers stocks are not excessive. There is some confusion in price caused by the custom of forming pools among manufacturers based upon gentlemanly agreements, under the control of a commissioner who promises to make the members of the pool all rich in a year or two, and ends in disaster to any business involved. In the recent ones the commissioner seems to be the only one benefited. Cut-throat competition results when such pools are disbanded and the men who have kept their contracts, feeling they have been tricked, decide to hold their trade at any sacrifice, and make goods. A few lines are badly demoralized just now through such pools causing a decline of 50% when the price should have remained steady or advanced. Fortunately the late ones have proved such failures manufacturers will be likely to avoid them hereafter. January was a banner month, and February is fully keeping up the pace, making a promising outlook for 1906. The effort to excell is an American trait and it develops ingenuity, energy and push. It may tend to os-

lerize, but it promotes vigor and prevents the accumulation of rust. Business life may be shorter in time yet larger in result. Arnold of Rugby, once said, that most of the trouble of this world comes from effort to preserve present conditions, and this does seem to cause a good deal of distress, so that consistency in a changing world is not always commendable, and it is probably true that credulity has caused more harm in the world than scepticism. To make conditions, instead of being victims of them, makes life strenuous, but it makes it successful, and if we can bear the strain it soon ceases to be a drudgery.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURGH TRADE.

Pittsburgh is enjoying prosperous conditions in all departments—all manufacturing interests are being run up to their limit with orders to keep them busy months ahead. Merchants are getting a good trade also, sales running much ahead of last January and February. We are still waiting to see whether the coal operators, and the mines will have a strike April 1st. If it should come the disturbance to general business will be disastrous, but we hope an agreement may yet be reached which will avoid the trouble. LOGAN-GREGG HARDWARE CO.

THE ST. PAUL TRADE.

It is not often that trade conditions are so satisfactory to every one, be he proprietor or clerk, farmer, merchant or banker, but surely the year now confronting us is all any man could wish for. People are rushing to unoccupied lands all over this beautiful country of ours. They are going into Texas as well as North Dakota, into Washington as well as Minnesota. Some like prairies, some the woods, some mountains and some plains. All can get their choice, and seem to be taking it. Many carloads of people are going through our depot and distributing themselves to the land of their desires. Horace Greeley said many years ago, "Go West, young man, and grow up with the country." This advice is still good and many are following it. We have lots of room for men with energy and will-power and they will get their wishes if they attend strictly to their business.

While average values are higher than they were, still every man gets larger returns for the fruit of his labors, so why care?

Business is good and the prospects for a succesful year were never better. St. Paul is building as never before, business houses and dwellings everywhere, all due to the prosperous conditions of our farming community.

HACKETT, WALTHER, GATES HARDWARE CO.

THE DAVENPORT TRADE.

At last we are in style with the rest of the great financiers of the world. We have a merger of our own that will bring in several millions of Eastern capital, and now the question arises what can we do with all the money? The Davenport banks have on deposit over $20,000,000 when the money comes from the sale of the electric car lines, gas and electric light companies, water power company and steam heating company we may have to build bigger banks to hold it. The Davenport Commercial Club have decided to have a home of their own and work will soon commence on their elegant club building. Speaking of building—the large number of new buildings that are being erected here is the marvel of the old settler. The sales in general Hardware are quite satisfactory and an improvement over a year ago. We can see no good reason why there will not be many more goods sold in this line in 1906 than in 1905. There seems to be plenty of money and collections are good. Manufacturers are very independent: seem to have all the orders they care for and some of them ship just when it suits their convenience. In fact, the producer of anything just now seems to have the whiprow on the buyer. Why can we not all be managers of monopolistic mergers? We are becoming very tired of buying goods from people who practically have no competition and be obliged to sell in an open market where the competition is so fierce as to preclude any possibility of making anything like a reasonable profit. Competition may be the life of trade, but no competition seems to be the better way to make money.

SICKELS, PRESTON & NUTTING CO.

THE SAN FRANCISCO TRADE.

As far as this coast is concerned, the passing fortnight is without especial incident. Renewed rains and warm weather have given additional promise of abundant crops in the harvest of 1906. All lines of trade, foreign and domestic, wholesale and retail, continue excellent. San Francisco is showing wonderful industrial and commercial activity. Real estate operations continue large and brisk and the way the city is rushing along with the erection, new buildings, mercantile and residential, has never been exceeded, even in the famous flush days of '49. There are no dull times in San Francisco, nor anywhere else on the coast, for that matter. Since last report the weather has been partly cloudy and warm in all parts of the State. Light rain fell in all sections at short intervals, and heavy rains occurred in portions of South California and the reservoirs of the State are well filled and all streams are running in great volume, insuring abundance of water for irrigation during the season. And what is of great economic importance is the fact that the snow in the mountains of California averages nine feet in depth now, and is

Gillette Safety Razor

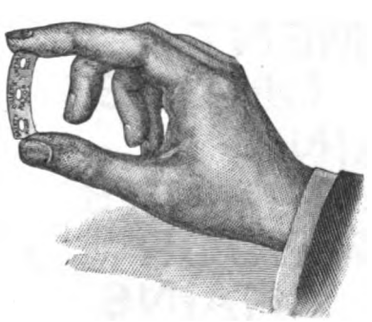
It Pleases Every User.

It Saves $52. and 15 Days of Time Each Year

"THE GILLETTE" gives a **CLOSE SHAVE** without discomfort, without roughening the skin, without irritation, without creating rash, without cuts, and without loss of time.

"THE GILLETTE" is the way to escape from barber shop waiting, wasting and torture.

12 BLADES, 24 SHARP EDGES,



Every blade will give from 20 to 40 close, smooth, comfortable shaves.

Triple silver plated set, with 12 blades,
Quadruple gold plated set with monogram, } **In Velvet-Lined Cases**
Special combination set with brush and soap in silver holders.

10 EXTRA BLADES 50 Cents.

At this new, low price, no blades exchanged.

Science has reached the acme of skill in the fusion, tempering, hardening and sharpening of these blades. The process is one of the wonders of the 20th century. The steel is of a quality as fine as a Damascus sword.

The most simple and durable shaving device in the world. NO HINGES, NO CLASPS, NO SPRINGS, and nothing to learn or adjust. Simply lather and shave in four minutes time.

Our new combination set with razor, including soap and brush in silver holders in the same box is now ready.

Sold by Leading Drug, Cutlery and Hardware Dealers.

We Supply all Dealers with Signs and Booklets.

Ask to see them, and for our booklet, or write us for our special trial offer.

(Concluded from page 43.)

frozen hard. Additions to it may be expected in this month and next. That the snow is deep and frozen means that it will lie until gradually thawed in the Spring and Summer, and then the water released by the sun will give supplies to the streams for irrigation at the time of need, and it will also give the water for electric power and its other uses in mining. Last year, though the rains were abundant and irrigation did not suffer, the lack of plenty of frozen snow abridged the mining season and reduced the year's output of the precious metal.

Everybody in California, especially Hardwaremen, Implement, Stove and Tinware dealers, like to hear of Eastern people coming to this State. When the HARDWARE man called for news early this sixteenth morning of the current month he found in his office, J. H. M. Thayer, the new manager of the Olympic Arms and Hardware Company, recently from the Boston house of Frye, Phipps & Company. Mr. Thayer was reading the morning paper and said: "Here's a good item of interest to the trade," and he read aloud from the paper as follows: "The overland railroads have made great preparations for handling the colonist traffic which begins to-day, February 15, from all Eastern centers, when the reduced one-way rates go into effect, a fare of from $33 to $35 being offered from all central points, including Chicago, St. Louis and New Orleans. This rate will be in effect from February 15 to April 15. Within a fortnight there will have started for this coast not fewer than 20,000 persons. The Southern Pacific expects to carry between 40,000 and 50,000 persons, the Santa Fe between 15,000 and 18,000 and the Salt Lake more than 12,000."

President A. A. Watkins of the Board of Trade of San Francisco, and the very active vice-president of the Hardware house of W. W. Montague & Co., was re-elected president this week and reported at the annual meeting of the Board of Trade that in twenty-nine years the board has handled 14,277 failures, with liabilities in total of $85,174,126; that the recoveries have amounted to the great sum of $40,173,160, or more than 47 per cent. of the liabilities. President Watkins asserted that by no process of law, bankruptcy, attachment or other mode of procedure could so large a share have been recovered. He also said that during the entire period of twenty-nine years since the board was organized there had been no shortage nor the loss of a single dollar through the officials of the board, which is saying a good deal for this graft disgraced State.

For some little time the wholesale Hardware houses of Sacramento have been closing the doors of their stores from 12 noon to 1 o'clock p. m., and now it is noticed that this fashion is spreading to San Francisco. In speaking of the new rule, Frank Kiefer, treasurer of the Schaw-Batcher Company of Sacramento said: In wholesale houses the principal trade is the shipping business carried on with outside towns. Under the old rule of sending employes to their lunch all the way from 11 o'clock until 2, the force was demoralized. Under the new rule all may go between the hours of 12 and 1, and the result is altogetner better. In the aggregate the men accomplished more. The only disadvantage is that it works to the detriment of local trade, but this is light in comparison with the shipping trade, as little business is ever done between the hours of 12 and 1 o'clock.

Travelers report the establishment in Santa Rosa, of the Santa Rosa Hardware and Machine Company; that Brady & Cassidy of Grass Valley, have purchased the Legg & Shaw Hardware Co. in Nevada City; that the A. M. Forbes Hardware Company at Vancouver, B. C., have added to their business can manufacturing and sheet metal works; that the Rainier Hardware Company of Seattle was recently robbed of several hundred dollars' worth of cutlery and revolvers; that the Duffy-Winship Company has bought Louis Delsol's implement and vehicle store at Lewiston, Idaho, and that the Hardware and implement house of the Fogg-Jacobs Company, St. Anthony, Idaho, has increased its capital stock to $50,000.

Address, Pres. Chas. F. Ladner.
Secretary's Report.
Treasurer's Report.
Insurance Methods, Hon. T. D. O'Brien, Insurance Commissioner, Minnesota.
Election of Directors.
Intermission, ten minutes.

10:30 A. M. Manufacturers, Jobbers and Traveling Men have the floor.
"Successful Retail Hardware Merchants from the Jobbers' Point of View," F. W. Hurty, of Hurty-Simmons Co.
"The Practice of Salesmanship," Alex W. Crozier of National School of Salesmanship, Minneapolis.
Question Box.

2 P. M. Open Meeting.
Unfinished business.
Report of Standing Committees.
"The Present Steel Age," A. C. Hatch.
Address, "Credits," A. F. Rock, Secretary of Superior (Wis.) Merchants Ass'n.
Address, Hon. John A. Johnson, Governor of Minnesota.
Report of Nominating Committee.
Distribution of Theatre Tickets.

8 P. M. Orpheum Theatre. All invited.

FRIDAY, MARCH 2ND, 1906.

9 A. M. Executive Session, Members Only.
Report of Delegates to National Convention, C. H. Casey.
"Decadence of Inland Towns," D. H. Evans.
Addresses by Sec'y Corey, Messrs. Tomlinson, Miles, Lader and Others.
Question Box.
Selection of Point for Next Meeting.

2 P. M. Visit to the Works of Minnesota Linseed Oil Paint Co.; A Cordial Invitation to All.

3:30 P. M. Unfinished Business.
Executive Committee Meeting.
Appointment of Delegates to National Convention.
Meeting of Directors of Retail Hardware M. Fire Ins. Co.
Adjournment.

GLASS CUTTING ART.

The transformation of a spadeful of fine white sand into a beautiful piece of cut glass is a most wonderful feat. It is a fact that requires the greatest skill, both of brain and hand, though the tools employed are not those of the artist's studio, as a person might suppose, but rather those used in the machine shop, for the cut glass factory is a rough and workmanlike establishment.

A cut glass factory is a very interesting place to visit, one more so would be hard to find. Here a person can see the sand as, mixed with other material, it is poured into the furnace, drawn out again a molten mass, blown into the desired shape, after which it is sent to the "roughers," who cut and polish until it comes forth a handsome shimmering wine glass, a beautiful punch bowl, or a decanter, as the case may be.

Flint glass was discovered in England nearly three centuries ago, which was the only kind employed for making cut glassware. Glass that would stand cutting had been sought for many years, but up to 1630 only faint engravings could be made. Flint glass has greater density and power of refraction than the ordinary glass, and it is easier to manipulate.

When the art of manufacturing ordinary glass was first discovered no one knows. Its invention dates from the earliest antiquity, and the honor of its discovery has been tested by several nations. As the oldest known specimens are Egyptian, its invention may with great probability be attributed to that people. It is mentioned as early as the fifth and sixth dynasty, and called "bashnu," the "bijni," and the articles made of it are

Digitized by Google

represented in the tombs of the period, while its fabrication is depicted in sepulchres of the twelfth dynesty, about 1000 B. C. Sculptured designs showing glass blowers using long tubes just as they do to-day have been found in the ancient ruins of many Egyptian cities. Glass made centuries ago by the Egyptians and Romans was very beautiful.

In the transformation from sand to glass the first step is the least interesting of all. For the production of glass that can be cut only one kind of sand, chiefly silica, is employed. This sand is only found in Berkshire Hills and in one place in Russia. It is, accordingly, very valuable, as sand goes, and its purchase is one of the large expenses that must necessarily be incurred by the cut glass manufacturer. It is almost as white as snow, and not any coarser than many brands of flour. When a car load arrives from the Berkshire Hills it is unloaded and dumped into the "mixing rooms." Here are very large wooden vats in which the sand is mixed with red lead, potash, saltpetre, and other minerals, the exact composition being known only to the chief mixer or some member of the firm. The entire "batch," as it is called, is then taken to one of the furnaces, located in another part of the building and melted. It requires a temperature of 250 degrees to flux a glass mixture, while the temperature in the furnaces is generally kept at a higher degree, being about 300. When melted the sand mixture is a beautiful rose colored mass, ductile, but not fluid.

In a modern factory many furnaces are in constant use. They are constructed of brick made particularly for the purpose. When the glass mixture is exactly at the right temperature, a "gatherer," as he is termed, runs a long, hollow pipe into the molten mass, some, of course, sticking to the iron. Turning the iron over and over he gathers on the end of the pipe the amount of glass to be blown. This is all the "gatherer" is required to do, for immediately after he collects the material he passes it to the blower. If it happens that the molten mass is not exactly in proper condition when the blower receives it, he will pass it to another helper, who reheats it in a "glory hole," a small furnace.

In the event of a bonbon dish, a punch bowl, or some article without a handle and rather flat is required, the blower, when the heated mass is in just the right condition, mounts a wooden box, places the molten ball in a rough iron mould—the shape of the article wanted—that he holds between his feet, expands his cheeks and begins to blow. A great bubble appears in the molten mass and the glass takes the form required.

Then another helper takes a hand and the "blank," as the article just blown is called, is conveyed on an asbestos covered wooden shovel to an oven, where it is gradually cooled. This oven is hot in the front and cold in the rear, and as the "blanks" slowly cool they are pushed farther and farther back until after several days they are sufficiently tempered to stand an ordinary temperature. And so at last the "blank" is ready for the cutter.

When the article to be blown is a vase or a wine glass, no mould is used, but the blower, by constant turning of the melted ball on the end of the long pipe, alternately rolling the mass on a smooth iron plate and skilfully using a pair of compasses to assure the correct size, produces a perfect "blank," the exact style required.

Next comes the cutting, or more properly speaking, the "roughing." After the "blanks" have been cooled properly they are packed in immense wooden trays, each pattern by itself. The trays are then removed to the cutting room, which is usually long and narrow, but exceedingly light.

On each side of the room is a long row of wheels that give the impression, as a person enters the shop, of an immense number of scissor grinding machines, such as are seen so often in the streets of Pittsburgh and other cities. These wheels are not all alike, save in one particular. Above each is a funnel-shaped receptacle for fine sand and water, the sand being the same as is employed in making flint glass. This mixture trickles down on the wheel against which the "rougher" is pressing the punch bowl or decanter upon which he is at work. The combination of sand and whirling wheel wears away on the glass until the latter is cut in proper depth.

Before the cutter can commence his labor the design that is to be followed must first be marked upon the object that is to be cut. This marking is done with red lead, after a pattern before designed, either by the cutter himself or some fellow workman. Sometimes a firm offers a prize of $25, $50 and $75 to the workman who designs the pattern that proves most popular when placed on the market. These competitions are generally held in March or February, but, of course, the prizes cannot be awarded until several months afterward.

After the pattern has been outlined on the "blank," the workman takes the bowl or vase, and, holding it against the sanded wheel, closely follows the design. He must be exceedingly careful not to cut too deep, for he might send the wheel right through the glass. At the same time too shallow a cut gives the design a rough surface that will not finish properly.

The wheels employed for "roughing" are made of steel, of various styles, some with a sharp edge, and others are almost flat. Long practice is necessary before a "rougher" acquires the necessary skill for his work. Five years must be spent as an apprentice.

After the "rougher" has completed grinding the design into the "blank," he gives it to a "smoother," who is just as much a "cutter" as a "rougher" is, only in his work a stone wheel is used in lieu of a steel one. In "smoothing" the stones employed are all imported from Scotland and England. They are two kinds, a light colored stone and a Yorkshire flay, or blue stone. Both are very expensive.

The "smoother" goes over the design just as the "rougher" did, assuring in his way the smoothness of the grooves. After this is done the cut glass is given to the polisher. This individual uses a wheel, too, which is made of wood. Pumice stone is employed in lieu of sand, and the glass is polished until every tiny spot on its surface is as smooth as a man can make. After this it is given a good bath, rubbed dry, and emerges perfect in its crystal beauty. If the polisher neglects his work the glass is sure to be ruined, for his part of the process is just as important as the blowing or cutting.

It is not frequent, however, that cut glass is ruined through carelessness. The cutters and polishers, as I have stated, must serve as apprentices before they are considered capable.

When, however, the trade, or rather art, for glass cutting certainly should be considered a fine art, is once learned, the workman commands good wages and is almost sure of plenty of work. In fact, the demand for cutters, as I have been informed, now exceeds the supply. A few years ago there were only 250 glass cutters in the United States, but to-day there are 5,000. There is room for many more, but those who have learned the art are careful that the profession is not overcrowded. Never indeed has there been such a demand for cut glass as there is to-day.

The time to finish a punch bowl is about three weeks. When a new pattern is designed a sample is made of it and photographed, then catalogues are sent out to the public, and if orders are received additional articles of the new design are made. Owing to this very little cut glass is kept in stock, the work being done almost entirely on orders, although during a few months before Christmas the manufacturers are obliged to stock up in order to supply the holiday demand. This makes the last of the summer and the early fall the busiest season in a cut glass factory.

Frequently in cutting the design is not wholly worked out in red lead on the "blank." In this case the cutter must execute the design by his eye, just as an artist paints a picture. He must cut the lines exactly correct or the design will be ruined, for the angles and curves must be true or the glass cut will be spoiled. One of the finest pieces of cut glass ever made in the United States was the magnificent punch bowl presented to the late William McKinley. Of this bowl, it is said, two expert glass cutters worked for several weeks executing a pattern of stars, stripes and shields on a superb piece of glassware, weighing seventy-five pounds, which was, perhaps, the most magnificent piece of cut glass ever turned out of a factory.

There is a great demand at present for cut glass wine glasses. Some few years ago plain glasses were all right, but now they must be cut. The day of colored glass is rapidly becoming a thing of the past, and there is to-day very little demand for it.

The layman often wonders why cut glass is so costly, but when it is remembered the time that must be spent on a punch bowl or decanter before it is ready for the market, this surprise over the cost ceases. In addition to this the material of which the glass is made, and the matter employed in roughing and cutting costs quite a sum. In a large shop, where from 100 to 175 cutters are employed, nearly ten tons of sand are used in cutting alone, and remember this sand comes from the Berkshire Hills, hundreds of miles away.

After a piece of glass is washed thoroughly it is sent to a room where a number of girls in clean white aprons are at work. These girls take the cut glass and wrap each article carefully in brown paper, after which it is laid away on the shelves in the stock room to be shipped to some waiting customer. Every article of glass blown and cut, no matter how small, is accounted for. It is very seldom that one gets away.

✤

Pride may be allowed to this or that degree, else a man cannot keep up his dignity. In gluttony there must be eating, in drunkenness there must be drinking; 'tis not the eating, or 'tis not the drinking that must be blamed, but the excess. So in pride.—SELDEN.

COLORADO RETAIL HARDWARE ASSOCIATION

The Fourth Annual Convention of the Colorado Retail Hardware Association was held at the Adams, Denver, on Wednesday and Thursday, February 7 and 8. The attendance was equal to anticipation not alone of members, but was unusually attended by the jobbers and manufacturers, who showed an interest to the fullest extent in all the work that was going on in this young and progressive Association; the list of members having during the year increased to 175. Invitations had been extended to all the dealers and members in the State, many of whom were present, and fifteen new members were enrolled.

The two days' session was full of subjects of vital importance. The Parcels Post Bill, after considerable discussion, was made the subject of a condemnatory resolution, copies of which will of course be sent to the National Legislators of the State. To further testify to the sense of the convention, every member present pledged himself to write a personal letter to his district Representative in Congress. The loyalty of the Association was pledged to manufacturers and jobbers who will keep their goods out of the hands of catalogue houses, being decided

A. B. MESERVEY, PRESIDENT.

to give them preference always when purchasing. Manufacturers and Jobbers were very much in evidence by the numerous exhibits that were suitably displayed at the convention headquarters.

At the opening session, which was presided over by President A. B. Meservey, it was decided to prepare a Question Box for future meetings. The Thursday morning session being almost entirely given over to a discussion of the catalogue house by S. Norvell of St. Louis, Ex-Governor Alva Adams, of Pueblo, and W. A. Gladden of Minneapolis, a manufacturer, also, spoke briefly, and said that he had always taken the position that the retail merchant and not the catalogue house should be the ultimate distributor to the consumer. It was decided that the word "Dealers" should be eliminated from the name of the organization so that hereafter it will be known as the Colorado Retail Hardware Association.

The members were lavishly entertained, attending a Theatre Party on Wednesday evening through the courtesy of the George Tritch Hardware Co., of Denver, and on Thursday evening S. Norvell of the Norvell-Shapleigh Hardware Company, of St. Louis, was the host at a very elaborate and enjoyable banquet given at the Brown Palace Hotel.

NEW OFFICERS.

The election of officers resulted as follows:

President, M. S. Whiteley, Boulder.

Vice-President, John Spriestersbach, Alamosa.

Secretary-Treasurer, Adolph Unfug, Walsenburg.

Executive Committee, George Wilson, Florence; Adolph Unfug, Walsenburg.

Delegate to Meeting of National Association, Adolph Unfug, Walsenburg.

CONVENTION COMMITTEES.

The following committees were appointed by the president:

RESOLUTIONS.—A. L. Branson, Trinidad; George Wilson, Florence; J. T. Clough, Colorado Springs; M. S. Whiteley, Boulder; George Mayer, Denver.

AUDITING.—O. W. Sewell, Idaho Springs; William Jaimeson, Trinidad; A. A. Ferguson, Loveland.

NOMINATING.—T. M. Harding, Canyon City; O. A. Cramer, Monte Vista; C. C. Huddleston, Lamar.

REVISION OF BY-LAWS.—John Spriestersbach, Alamosa; W. D. Carroll, Antonito; F. C. Moys, Boulder.

GRIEVANCE.—Peter Henderson, Fort Collins; Amos Carroll, Ray; J. P. Barnes, Colorado Springs.

LEGISLATIVE.—A. L. Brannon, Trinidad; F. C. Moys, Boulder; George Mayer, Denver.

RAILROAD.—C. W. Kittering, Denver; W. M. Jamelson, Trinidad; A. Unfug, Walsenburg.

W. K. Hurd was appointed sergeant-at-arms.

After the adoption of the resolutions, F. C. Moys, of Boulder, addressed the convention on the subject of Hardware Mutual Insurance. He spoke of the organization of the Insurance Company, and, after showing the difference between the cost of insurance in that of the Association and the old line companies, he stated that the National Company had insurance in effect to December last amounting to $1.126,000.

PRESIDENTIAL ADDRESS.

The President of the Association, Albert B. Meservey, of Colorado Springs, then delivered his annual address, from which we make the following extracts:

It means much when a busy merchant leaves his business to others and goes to these annual gatherings, and I am sure that everyone that has attended these meetings has been benefitted in a great many ways. We get acquainted with the different merchants of the State, and we are enabled to exchange views as to the best methods of doing business. I for one always

LOOK FORWARD TO THESE ANNUAL MEETINGS

with a great deal of pleasure and think the time spent at these conventions is well spent, for there are always points brought out that enable us to improve upon our ways of doing business. What we want in this State is to get every retail Hardware dealer into this Association. We have a great many, but we want them all, and the only way to get them is to invite and show them that there are benefits to be derived by joining an association of this character.

The past year has been a good one for most of us; the trouble in the mining camps has been settled and most of the mines in our State have had the best year in their existence. The beet sugar industry, our coal mines, our sheep raisers, and our fruit districts have had a good year, which means that the Hardware dealer is bound to be benefited.

Our secretary will, no doubt, in this report give us an outline of what has been accomplished by this association in the past year.

WE HAVE HAD OUR GRIEVANCES AS USUAL,

but they have all been settled to the advantage of the Hardware dealer. Some of them, such as the selling of ammunition to a large wholesale grocery house in Denver by the cartridge companies, have been discontinued, simply because we, as an association, comprised of the leading Hardware dealers of the State, requested them to quit selling a house that, in a very short time, would have every "corner grocery" in the State selling Cartridges. Do you think if there had been no Hardware Dealers' Association, the manufacturer would have taken the agency for these goods away from this house?

It was also largely through the efforts of this association that Woods Senate Bill No. 176 was passed and became effective on July 7, of last year, a copy of which was sent to each of our members. We have at last succeeded in getting most of our prominent wholesale houses to refuse to sell catalogue houses, but as yet we have found no way in which to reach the manufacturer, and they still get what goods they want. Would it not be well for us, when we find any of our customers sending to those houses for goods, to have a quiet talk with

WE WILL MEET ANY PRICE QUOTED

by such houses, adding the freight, and in that way get them to leave the money at home instead of sending it out of town. In our city, we have a merchants' association which has done a great deal toward getting people to trade at home. During the holidays they had a lot of cards printed—"Trade at home" printed upon them. These cards were put on all the street cars. They also had slips printed—"Patronize home stores"—and all of the merchants were instructed to put these slips in their letters whenever they had occasion to write to parties living in the city.

In this way we are striving to educate our people to the advantage of trading at home and getting them out of the habit of sending away for goods which in many instances they pay more money for after they have paid the express charges than they would have paid our home merchants for the same article.

SECRETARY'S ADDRESS.

The report of the Secretary, Davis Barkley of Fort Collins, explained the work of the Association during the past year, of which we give the following extracts.

So far as I am able to learn, the majority of the people doing business in this territory are confining their business to the legitimate Hardware channels. Some of them, however, are still selling to the Fair and Racket Stores.

It is my opinion that our constitution and by-laws need quite a little adjusting, and would suggest to the committee on revision of by-laws to give this subject very careful consideration, particularly that section which refers to the time and place of meeting. I would

Digitized by Google

suggest that this section be made to read: That the annual meeting shall be held either in the month of January or February as the Executive Committee may select. My reasons for this suggestion are that quite a number of our members are also members of the Lumber Dealers' Association, and it would be much more convenient for both associations to meet at the same time.

I would recommend that the association send their new secretary over the State some time during the year in the interest of the association; at least

SEND HIM TO THE PRINCIPAL TOWNS TO SOLICIT NEW MEMBERS

and collect dues from those who have neglected to pay. No doubt our membership could be greatly increased by doing this. We need the new members and they need us. I would also recommend that he be sent to the National Association, which meets in Chicago in March. He will no doubt learn a great deal about association matters, and how to carry out his official duties.

Members should remember their privilege of getting insurance with the National Hardware Mutual Fire Insurance Company. Protect yourselves with a cheaper rate of insurance and help build up this worthy

HARDWARE REMINISCENCES.

An interesting address was that of W. S. Wright of the Wright & Wilhelmy Company, Omaha, Neb., who is also President of the National Hardware Association. Mr. Wright, in reference to Hardware business conditions forty years ago, spoke in part as follows:

But the main thing in which you gentlemen are interested and about which I would like to speak to you, is as to how at the present time we can make the greatest success of the Hardware business. That is a practical question, and we are here, I think, to discuss practical questions, to get practical ideas and endeavor to get out of this meeting some results that will benefit our business and make it not only larger but more profitable. Personally, I was thinking of that matter last night, and I don't know of any way in which we can benefit our business more than to get next to our competitor. My opinion is that your competitor is the best asset that you have. If you cultivate him

HE WILL PAY YOU A BETTER MARGIN OF PROFIT

than the best customer you have on your books. The way to cultivate him is to get him to join your association, and that is the first feature of the proposition. Bring him down here: let him meet a bright, capable, intelligent body of business men and get ideas in regard to developing business and making more profit out of his business than he would otherwise do. If you can educate your competitor to the point where he is willing to make money out of his business, the chances are that your chances are very much more favorable than otherwise.

THE MOST SUCCESSFUL MEN IN THE COUNTRY

to-day are not the men who have been born with a silver spoon in their mouths, and who have had their affairs taken care of by somebody else; they have gone out and worked for it. They fought for it, and when they have won it they have appreciated it, and the greatest strength to-day that any of you have in your business is the fact that you have worked to the extent of your ability to build that business up, and in that lies your greatest strength. It is a great deal of pleasure to me to convey to you the glad hand from the National Hardware Association. We feel that we are vitally interested in this work, and we are not only glad but willing to do anything we can to forward the interests of the retail trade. I am willing to admit that we are like the rest of you—we are absolutely selfish, because

THE PROSPERITY OF THE RETAIL TRADE MEANS THE PROSPERITY OF THE JOBBER,

and the prosperity of the jobber means the success of the manufacturer. If we pull in that line earnestly on this proposition there is not any question about the results.

There is another thing that I think should be appreciated, and that is that in very many cases

THE FARMER DOES NOT UNDERSTAND THE SITUATION.

He says: "You are selfish in the matter. All you want is to have me quit buying from catalogue houses so that you can hold me up." On that account anything that will tend to educate the farmer to the advantage of buying in his home market, from his home dealer, is a very material benefit.

EX-PRESIDENT A. L. BRANSON,

of Trinidad, read a paper on the benefits derived from the Colorado Retail Hardware Association.

S. NORVELL'S ADDRESS.

S. Norvell, of the Norvell-Shapleigh Hardware Company, of St. Louis, and Chairman of the Wholesale and Retail Joint Committee, delivered a very entertaining address on the Catalogue House competition. Mr. Norvell had not intended to speak on this subject but did so at the request of President Meservey in the unavoidable absence of another member of the Joint Committee who had been delegated to discuss it. He defended the campaign of publicity which had been followed in dealing with the matter and said that the policy to be pursued was for retailers not by organization but individually to make up their minds not to buy goods that are carried by catalogue houses.

ADDRESS BY G. W. SIMMONS.

An address was made by G. W. Simmons of the Simmons Hardware Company, St. Louis, who touched upon the efforts of his Company to aid the retail Hardware merchants in carrying on their business. After alluding to various means in which the Simmons Hardware Company endeavored to co-operate with the retail Hardware merchants and give them assistance, Mr. Simmons concluded as follows:

We of the younger generation are sticking right to that policy which has brought us success during the last half century; the longer we live and the more we study the situation, the less we are inclined to get away from it. We try to keep up with the times and develop with conditions, but that fundamental principle is the basis of every change and every move we make. I come from a house thoroughly grounded in the belief that in these days of intelligent commercialism the trade is most discriminating and will bestow their favors where there is absolutely the most merit, and that merit consists of the best assortment of good sellers from which to make your selection, prompt and complete execution of orders, low prices, and a salesman who will not only know his business thoroughly and be a fair man, giving each and every one of his customers an absolutely square deal, but who also lives up to one of the favorite mottoes of the founder of our house—that "a good salesman is one who helps his customers to prosper." It is like the motto, also originated by E. S. Simmons, which has become one of our valuable assets and registered trademark: "The recollection of quality remains long after the price is forgotten."

There were a large number of manufacturers and jobbers personally represented by the exhibits which were more numerous than ever before.

HOW SPONGES ARE GROWN.

Perilous Lives of the Natives Who Fish for Them—Profits to Monopoly.

(Continued.)

The clippers become expert in trimming and in deciding just where each sponge belongs, both as to size and kind. The names recognized by the trade are wool, velvet, grass, reef, glove, hardhead and yellow, and describe somewhat the sponges which vary from the carriage cleaners down to the silky ones for baby face washing. The sponges are of brown shades naturally, but are bleached with sulphur or acids to white and light yellow, which process, while it makes them more attractive, also detracts from their durability. From the cribs where the dry sponges are stored they go to powerful hand-turned presses and are made into bales and neatly canvassed for export. The clippers go to work early and have an hour's stop later for breakfast and a lay-off in the afternoon, and then work until toward evening. The women, dawdling, talkative and inconsequent, get a shilling a day, while the men—hustling on account of a family to support—get 3 shillings or something near 75 cents, and make sponge clipping a profession.

When the sponge fleets come in the men often bring their families with them to shop and visit in the town, and the slips where their boats put in are noisy places, especially about meal time. On the deck of each boat is a sheltered box of sand, in which a fire of wood is built, and over this on stones are put the bean kettles, baking skillets and the coffee pot. Near by is the dough board, and as the man or woman cook mixes dough with the hands, a foot is likely to be busily employed fending away the pet pig wandering about the deck or a tethered chicken destined eventually for the pot. The meal is eaten from tin plates or bowls that are washed overside in the harbor, and the surrounding fish get what scraps the pig and chicken refuse.

The sponge clippings are used in the orange orchards about the trees, where they shade the roots and help hold moisture and by eventual decay add nourishment. Good sponges are as expensive in the stores of Nassau as anywhere else, but out on the sponge wharf they may be had reasonably of some independent dredger who owns his own boat, and out there decks may be seen being washed with sponges that would cost a dollar in the States.

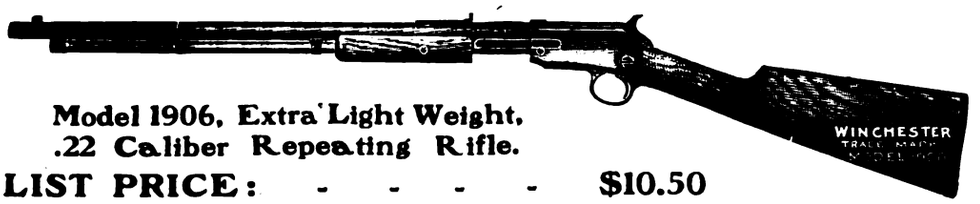
Among dealers may be heard talk of overfished grounds, but no one knows how long a ground should lie idle to recoup itself, as little is known of how fast a sponge grows. It is known that grounds may be renewed by planting pieces of the sponge, but the process has never gone beyond the experimental stage, which consisted of anchoring cuttings in protected waters.

HELPING HIM.

Hubby (desperately)—Give me your clothesline. I'm going to hang myself.

Wifey (sweetly)—Oh, George, I'm so sorry—this clothesline is so rotten it won't hold you. You'll have to buy a new one, dear.

♣



A generous, a brave, a noble deed, performed by an adversary, commands our approbation; while in its consequence it may be acknowledged prejudicial to our particular interest.—*Hume.*

♣

A Central Kansas farmer in doctoring his horse gave it poultry medicine by mistake. Now the horse has scratched up the whole pasture and is showing signs of trying to set.

WINCHESTER NEW GOODS

Model 1906, Extra Light Weight, .22 Caliber Repeating Rifle.

LIST PRICE: - - - - - $10.50

This rifle is made for .22 Short cartridges only—both Smokeless and Black powder. It has a 20-inch round barrel fitted with sporting front sight and adjustable open rear sight; a straight grip stock fitted with a rubber buttplate; and weighs about 5 pounds. The magazine holds 15 cartridges. This rifle can be furnished according to the above specifications only. It is fully up to the Winchester Standard in accuracy, reliability and finish. A Winchester Repeating Rifle at such a low price presents an opportunity to dealers that they will not be slow to take advantage of. Do not be the last to stock them, but order some at once and be prepared for the big demand.

Winchester Supplemental Chamber.

List Price:

$0.60

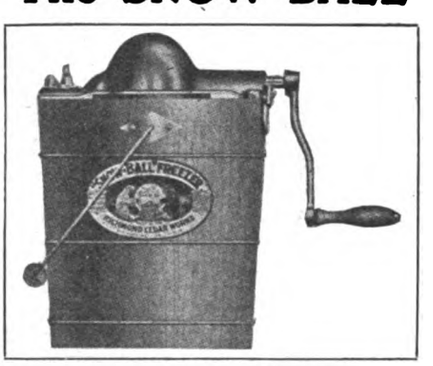
This device is designed to enable the use of popular pistol cartridges in high-power rifles. The value of this is self-evident and there is sure to be a big demand for the chambers. They are made in the following sizes: .30 Winchester ,30 Army, .303 Savage, .303 British, .32-40 and .32 Winchester Special for .32 S. & W. and .32 Short Colt cartridges; .35 Winchester for .38 Colt New Police and .36 S. & W. cartridges; and .405 Winchester for .41 Colt D. A. Short cartridges. Order some at once and be the first to get the trade.

FREE: Send for folders describing the above rifle and chamber.

Winchester Repeating Arms Co., New Haven, Conn.

Two of the World's Winners

The MAJESTIC WASHING MACHINE



We Manufactured and Sold 41,430 MAJESTICS in 1905 beside many other makes.

Does that tell the story?

We will verify these figures if you wish us to.

It is the quickest seller and commands the biggest profit to you of any Washing Machine made. That is why you should sell it. The tub of the **Majestic** is made of selected **Virginia White Cedar,** and will stand the action of water a life time. It is bound with our celebrated **Electric-Welded Wire Hoops,** is steam-tight and easy to operate Two hundred thousand satisfied customers will testify to all we say.

The SNOW BALL

FREEZER

AFTER telling you what we have done with the **Majestic** Washing Machine in seven years, it is easy to introduce to you the **Snow Ball Freezer.** It is as good a freezer as the Majestic is a Washing Machine. The Snow Ball tub is made also of **Virginia White Cedar,** is bound with electric-welded wire hoops which cannot fall off, and is specially varnished so as to make it attractive and easy to sell. The inside parts are heavily plated with pure block tin which makes it thoroughly hygienic. The outside castings are rust proof.

☞ **Whether you are JOBBER or DEALER write us to-day for particulars and prices which will surprise you.**

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Ashland, Ky.—J. S. Ogden & Bros., Hardware dealers, have been incorporated under the firm name of "The Ogden Hardware Co.

Ashland, Ky.—The Henderson Hardware Co. has been incorporated. This is the old firm of The Thomas Henderson & Son Hardware Co.

Bloomfield, Mo.—Williams Hardware and Furniture Co. has been incorporated with $10,000 capital stock. Incorporators: E. J. Williams, Harry Ezzell, A. D. Wilcox and E. F. Reddick.

Boston, Mass.—Hanover Hardware Co. has been incorporated. Capital, $2,000. Directors, B. Willing, Sam Segal and R. Segal.

Boston, Mass.—S. H. Davis Company has been incorporated to deal in Hardware, etc. Capital, $25,000. President, Martha L. Davis; treasurer, E. L. Davis.

Brooklyn, N. Y.—The Brooklyn Park Paint & Hardware Co. has been incorporated. Capital stock, $5,000. Directors: William Simis, Jr., E. G. Raff and Leon Kauffman.

Chandler, Okla.—The Chandler Hardware Company has been incorporated with a capital stock of $15,000.

Charlotte, N. Y.—A. Ferguson Hardware Co. has been incorporated. Capital, $5,000. Incorporators: A. Ferguson, E. E. Ferguson, R. Lester.

Closter, N. J.—Demarest Bros.' Co. has been incorporated to deal in Hardware, foundry, builders, electrical, plumbers, miners, etc., supplies; capital, $10,000. Incorporators, Jacob J. Abraham and George W. Demarest.

Denver, Colo.—Ashton-Hanger Hardware Company has been incorporated; capital stock, $10,000; directors—Frank Ashton, E. E. Hanger and F. V. Ashton.

Dillon, Mont.—The J. W. Morton Co. has been incorporated with a capital stock of $50,000 and succeeds to the Hardware business of J. W. Morton.

Exeter, Mo.—C. R. Eidson has engaged in the Hardware business.

Freeport, Kan.—H. Carringer has engaged in the Hardware business.

Fremont, O.—The Winters' Hardware Co. has been incorporated by Edward F. Winters, C. E. Schepflin and G. P. Winters. Capital, $10,000.

Hanover, Kan.—The Hanover Hardware Co. has been incorporated with a capital stock of $2,000.

Havelock, Neb.—Moran & Spitzer have opened a new Hardware store.

Kansas City, Mo.—Wade Branch Hardware Co. has been incorporated. Capital stock, $10,000. Incorporators: L. R. Wade, W. R. Branch, L. R. Wade, Jr., W. B. Mullins and L. S. Branch.

Kingston, N. C.—H. E. Mosely Hardware Company has been incorporated for $15,000 to $25,000 to do a wholesale and retail Hardware business.

Lawton, Okla.—The J. W. Wolverton Hardware Co. has been incorporated with a capital of $25,000.

Marshalltown, Ia.—The Lawton Hardware Co. has been incorporated with a capital stock of $10,000.

Middletown, Conn.—The Smith & Bishel Co. has been incorporated to deal in Hardware. Capital stock, $25,000. The incorporators are F. H. Smith, Arthur W. Bishel and Joseph Kincald, Jr.

Moline, Ill.—Froyd & Quick Co. has been incorporated for the purpose of conducting a general Hardware store.

Nashville, Tenn.—The Craig & Shoffner Hardware Co. has opened up a wholesale business, the members of the firm being: John F. Craig, Sam. D. Shoffner and Fred D. Craig.

Nashville, Tenn.—The Nashville Hardware Co. has been incorporated to conduct a wholesale and retail Hardware business. The incorporators are D. T. Crocket, Paul O. Couner, L. C. Pryson, A. F. McAdoo and E. F. Langford. The capital stock is $10,000.

North Vancouver, B. C.—The Chambers Hardware Co. has opened a new store.

San Francisco, Cal.—Marshall Ewell Supply Co. has been incorporated with a capital stock of $25,000.

San Pedro, Cal.—Marine Hardware Co. has been incorporated with $25,000 capital stock. Directors: A. H. Maloy, Ray Mitchell, B. Maloy and C. B. Mitchell.

So. Boston, Va.—R. S. Noblin has purchased the business of W. H. Shepperd, proprietor of the Virginia Implement Co., and will add a fine line of Hardware, cutlery, etc., to their already large line of implements and Hardware. The company will carry on both a wholesale and retail business.

Spokane, Wash.—Division Street Hardware Co. has been incorporated with $10,000 capital stock. Directors: John E. Argo and H. A. Steinke.

Troy, Kan.—The Highland Hardware & Furniture Co. is about to open a new store. Co. has been incorporated. Directors, H. I Johnson, George Ehrsam, E. Z. Wright, H. B. Wright and A. J. Lowery. Officers—President, B. H. Wright; vice-president, E. Z. Wright; secretary and treasurer, A. J. Lowery.

White Plains, N. Y.—The Hagiman Hardware Co. has been incorporated with $500,000 capital. J. M. Hagiman and W. W. Banks are the incorporators.

Winchester, Ind.—Winchester Hardware Co. has been incorporated. Capital stock $6,000.

Wichita, Kan.—Ed. Hockaday and L. T. Battin, former stockholders in the Hockaday Hardware Company of this city, who sold their interests to the Simmons Hardware Company of St. Louis, Mo., have established two Hardware houses in Oklahoma. One is at Arapahoe and the other at Custer. Charters have been granted the company, each store being capitalized at $20,000. The house at Arapahoe is owned by Ed. Hockaday, of Edmond, Okla., and E. T. Battin, of this city, and L. B. Haven of Arapahoe. The one at Custer is controlled by Mr. Hockaday, Mr. Battin and J B. Howland, of Custer.

Changes and Improvements.

Asher, Okla.—Pierce Bros. have purchased the business of the I. A. Smith Hardware Co.

Athens, Ga.—By a consolidation of the two large Hardware companies of T. Fleming & Sons and the Dearing Hardware Company, Athens now has one of the largest and best Hardware establishments in the State. The officers of the consolidated company will be as follows: President, J. H. Fleming; Vice-president, Otto Krasslet; Secretary and Treasurer, A. P. Dearing. An amendment to the charter of T. Fleming & Sons will be made, changing the corporate name to the Fleming & Dearing Hardware Company.

Bluffton, O.—Eli Diller, of Columbus Grove has purchased the Hardware store of John Fett.

Clarksville, Tex.—The Hocher Hardware Co. has succeeded to the business of the Marable-Hocher Hardware Co.

Columbus, O.—The capital stock of Smith, Bros. Hardware Co. has been increased from $200,000 to $300,000.

Columbus, O.—The Young Hardware company has increased its capital stock from $50,000 to $100,000.

Des Moines, Ia.—The Brown-Hurley Hardware Co. has increased its capital stock of $300,000.

Dispatch, Kan.—M. Koksma has sold his Hardware store to the Downs Hardware & Improvement Co.

Dundee, Mich.—George Schaefer has sold his Hardware store to Mr. Knapp, of Idaho, who has taken possession.

Edgerton, Kan.—Wm. H. Bemington has sold his Hardware store to F. E. Johnson.

Fahlequali, I. T.—Myers & Dawes have succeeded to the Hardware business of Louis Meyers.

Findlay, O.—Theo. Phillips has disposed of his interest in the Hardware store of Phillips & Thomas, to D. H. Thomas. The firm name will be Thomas & Thomas.

Goff, Kan.—G. A. Figley has sold his Hardware and furniture store to F. L. Glover.

Gretna, Neb.—Sanborn Bros. have been succeeded in the Hardware business by W. B. Sanborn.

Hartington, Neb.—R. M. Hurlbut has purchased the Hardware store of C. M. Olson.

Holton, Kan.—G. W. Kimball has sold his Hardware business to W. H. Thompson & Son.

Horatio, Ark.—The Horatio Hardware Co. has succeeded to the business of J. B. Martin.

Hot Springs, Ark.—The Hamp-Williams Hardware Co. has succeeded to the business of Hamp Williams.

Kellerton, Ia.—Knittle Bros. have sold their Hardware business to Silver & Lockwood.

Kennedy, N. Y.—J. A. Parker has sold his Hardware and general merchandise store to Guy Fargo and L. G. Sands.

Little Rock, Ark.—The Argenta Hardware Co. has sold its stock to R. R. Pinolean.

Louisville, Ky.—The Belknap Hardware Co. are making plans for a nine-story warehouse to occupy a lot about 150x150 feet.

Muncie, Ind.—Wide Range Drill Chuck & Tool Co. has been incorporated. Capital stock, $50,000.

Newark, N. J.—Lewis Parker Building & Construction Co. has been incorporated to deal in Hardware and building materials; capital, $125,000. Incorporators: L. Parker, J. H. Parker, E. C. Levy.

New York, N. Y.—Blue Steel Razor Co. has been incorporated to manufacture cutlery; capital, $5,000. Incorporators—Lawrence P. Howne and William E. Van Nate, Albert J. Perry, Jr.

New York, N. Y.—The Charles Fischer Spring Co. has been incorporated to manufacture metal springs; capital, $2,500. Incorporators: Charles Fischer, J. Timlin, New York City; William Fischer, Brooklyn.

Oswego, N. Y.—The Oswego Flexible Ladder Company, capitalized at $2,000, has been incorporated. The directors are Frederick T. Stickney, William B. Brooks, J. A. Pease, Herbert Ramsden, Robert G. Blackburn and Spencer Brownell.

Pepperell, Mass.—Burkinshaw Knife Co. has been incorporated. Capital, $4,500; directors, Alta A. Shattuck, Susan A. Burkinshaw, Charles H. Baker.

Prague, Okla.—The Wade-Branch Hardware Co. has been incorporated with a capital stock of $10,000. Directors: L. R. Wade, W. R. Branch, L. R. Wade, Jr., W. B. Mullins and E. S. Branch.

Saratoga, N. Y.—The Adirondack Souvenir Co. has been incorporated with a capital of $10,000 to manufacture souvenirs and Hardware novelties.

St. Paul, Minn.—The Seeger-Gallasch Refrigerator Co. has been incorporated; capital stock, $100,000. The company to manufacture refrigerators. The incorporators are John A. Seeger, Adolph Gallasch and H. M. Temple.

White Plains, N. Y.—The Hegeman Hardware Co. has been incorporated for the purpose of manufacturing Hardware and Hardware supplies; capital, $5,000. Incorporators: John M. Hegeman, Brooklyn; William L. Banks, White Plains; William W. Banks, Lizzetta P. Hegeman, Brooklyn; Thurza A. Banks, White Plains.

Changes and Improvements.

Buffalo, N. Y.—The American Radiator Co. has recently completed two new factory buildings.

Cincinnati, O.—The American Hardware Works Company, composed of the Eberhard Brothers Manufacturing Company and other Cleveland capital have purchased for $22,500 the works in Kent, Ohio, formerly known as the Kearney and Foote file plant, now owned by the Nicholson File Trust of Providence, R. I. They will at once convert the same into a plant for the manufacture of harness, buggy and automobile Hardware and malleable iron and brass castings.

Kansas City, Mo.—The Kansas City Bolt & Nut Works is about to erect two new buildings. One will be 100 by 75 feet and the other 125 by 40 feet.

Knoxville, Tenn.—The T. H. Leinart Co. is increasing its sash, door and blind factory to more than double its former capacity. J. O. Leinart has recently been elected president and bookkeeper. Rufus Leinart is general manager of the firm.

Milwaukee, Wis.—Playsted Tool & Die Company has changed the name of the corporation to the Milwaukee Cutting Die Company.

Ottumwa, Iowa.—The American Mining Tool Company of What Cheer has been bought by George B. Simmons and other Ottumwans. It will be capitalized for $100,000 and will be moved to Ottumwa.

Quincy, Ill.—The J. D. Warren Manufacturing Co., extensive manufacturers of Hardware store fixtures, with its plant at Fourth and Oak Streets, and salesrooms and offices in Chicago, has outgrown its present building, and will erect an additional plant in this city in the near future.

Reading, Pa.—The Mount Penn Stove Works Co. have built an addition to their plant recently.

Springfield, Mo.—Woods-Evertz Stove Co. has increased its capital stock from $50,000 to $100,000.

St. Johnsbury, Vt.—E. & T. Fairbanks & Co., the scale makers, have purchased a large scale factory in Moline, Ill. Arrangements are being made to transfer a portion of the works from this city to the western factory.

Toronto, Can.—Henry Disston & Sons, saw manufacturers, have started work on a branch factory here, which will cost about $250,000.

Winnipeg, Man.—Gurney Stove Co. is erecting a large building for a new warehouse.

Worcester, Mass.—The Spencer Wire Co. has occupied its new addition for its tempered steel card and music wire department. The addition was to a mill built only a year ago, but the increase in that department of the company's business is so great as to make additional floor space imperative. The addition is one story in height, 50 by 60 feet, and will be devoted exclusively to the tempered wire department. With this addition the Spencer Wire Co. now occupies something over five and a half acres of floor space.

Monroe, N. C.—The Heath Lee Hardware Co. and the Monroe Hardware Co. have consolidated, and the name of the new firm will be the Heath Hardware Co. The directors are: J. M. Belk, W. H. Belk, R. A. Morrow, W. C. Heath, R. Redfearn, J. A. Stewart and Earl Heath. The officers are W. C. Heath, president; R. Redfearn, vice-president; J. A. Stewart, secretary and treasurer.

Ord, Neb.—Bailey & Detweiler have succeeded to the Hardware and implement business of Russell & Bailey.

Persia, Ia.—P. Zelk has purchased the Hardware department of Mowly & Son, in Persia, Ia.

Shelby, Neb.—C. E. Hasted has purchased the Hardware store of C. B. Jockish.

So. Haven, Kan.—Ruthfauff Bros. have succeeded to the Hardware business of Bonsell & Ruthfauff.

Sparta, Tenn.—W. W. Hull has sold his Hardware business to E. H. Hull.

Springfield, Mo.—The Woods-Fevertz Stove Co. has increased its capital stock from $50,000 to $100,000.

Fires.

Ensley, Ala.—The Southern Steel Co. sustained a loss of about $125,000 (with partial insurance) recently, when their nail mill was destroyed by fire. The building which was burned to the ground was a structure about 200 feet long by 100 feet wide and the woodwork was all of fine timbers.

Digitized by Google

The three great features in Pierce constructions for 1906, which makes them distinctively in a class by themselves, is the Cushion Frame, absorbing all vibration,–the Spring Fork, a natural evolution of the advanced ideas of the Pierce Company, to be used in conjunction with the Cushion Frame, and the Pierce Brake, made under the New Departure patent. These three combined make up the principal features of the "Tried & True" Pierce Cycles.

If you stopped handling bicycles when the craze stopped, you cut off a profitable source of revenue. Cheap, claptrap, thrown-together wheels disappeared with the boom. The well-made, serviceable, high-grade, profit-bringing bicycles are still demanded by thousands. Somebody is going to supply the demand and it might as well be you.

Pierce Cycles

have outlived the craze. They survived because they were built to appeal to wheelmen, not to fad chasers. They have always been all that discriminating riders desired. They are better to-day than ever. Pierce 1906 models are now ready. Why not a Pierce Agency for next year?

The Geo. N. Pierce Company
Buffalo, N. Y.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

El Paso, Tex.—R. E. Allen has opened up a general sporting goods business, including bicycles.

Hackettstown, N. J.—The Sims-Kent Manufacturing Co. has been incorporated to manufacture lightweight castings for automobiles and small machinery. The erection of the first building, 40 by 160 feet, which is to be for foundry work only, will be begun immediately. Orders for machinery to equip the plant have been placed.

Highlandville, Mass.—George E. Wye Co. has been incorporated to deal in sporting goods. Capital, $25,000.

Jersey City, N. J.—The Prime Smokeless Gunpowder Co. has been incorporated with $1,000,000 capital stock. The incorporators are Eugene S. Emson, Edward L. Nicoll, and Fred C. Wolbert.

New York, N. Y.—The U. J. Ulery Co. has recently been incorporated with $30,000 capital. Directors: U. J. Ulery, New York; E. G. Kaufman, Yonkers; W. R. Green, Brooklyn.

Norwalk, Conn.—The Federal Cartridge Co. has been incorporated with $2,000,000 capital. Among the incorporators and directors are F. J. Kingsbury, Jr., of New Haven, Judge R. Jay Walsh, of Greenwich, H. S. Thompson and L. E. Warren, of New York, C. O. Baker, of Newark, N. J.; Frank Z. Maguire, of England, and C. M. Dailey, of New Haven.

Philadelphia, Pa.—George W. Nock Co. has been incorporated.

Pittsfield, Mass.—Alden Sampson, who recently rebuilt on the site of the Pomeroy Catinet mill, an automobile plant, is equipping it with machinery, and by March 1 will begin building automobiles of his own model, employing about 100 workmen.

Wallingford, Conn.—Jacob Burstein has opened a bicycle and automobile repair store.

Changes and Improvements.

Bangor, Me.—Chas. E. Phinney has removed his business to a new store.

Bradford, Pa.—William Demler, who has successfully conducted a phonograph store and bicycle repair shop, and J. Antico, have purchased the stock of the MacAlpin Arms Co., and will carry on the business under the firm name of Demler & Antico at the same location.

Lawrence, Mass.—Joseph E. Ferland is enlarging his repair shop.

Lititz, Pa.—The J. M. Mast Manufacturing Co., making a line of fishing floats which is handled by the trade everywhere, is about to commence construction of a large factory building.

New York, N. Y.—Rapp & Lloyd plan to add a small line of Hardware that can be carried in connection with their sporting goods.

Stoughton, Mass.—James Lehan, owing to lack of accommodations for his large business, is enlarging his repair shop and making necessary improvements.

Toronto, Can.—Fred C. Licence, formerly manager of the Starke Sporting Supply Co., is now managing the sporting goods department of Messrs. Rice, Lewis & Son, their jobbing and retail business showing a steady increase during the past year.

Toronto Junction, Can.—The Canada Cycle and Motor Co. have had their quarter enlarged to allow them to go into the manufacture of sporting goods more extensively. In addition to enlarging their factory, they are remodeling their retail quarters in Toronto.

Victoria, B. C.—Hutchinson Bros., automobile agents, are having a new garage built for them, the show room to have a floor space of 60 by 30 feet.

Winnipeg, Man.—The Miller-Morse Hardware Co. has opened a sporting goods department of its jobbing house, J. E. Algie being appointed manager.

Fires.

Boston, Mass.—The Boston Cycle & Sundry Co. was recently burned out; loss not fully estimated.

Camden, N. Y.—George Stewart's repair shop has been destroyed by fire; fully insured.

Cortland, N. Y.—The City Cycle Co. recently sustained a slight loss by fire.

Tampa, Fla.—Ned Place's repair shop was recently destroyed by fire; partially insured.

Miscellaneous.

At the annual election the Albany Bicycle Club, Albany, N. Y., the following officers were chosen: President, Frank E. Snyder; vice-president, Richard O'Connor; treasurer, Carroll F. Smith; recording secretary, William Lamb; financial secretary, Frank Y. Russo; assistant financial secretary, Albert G. Taaffe; sergeant-at-arms, Charles H. Gehnrich; trustees, Frank Leland, Jay Kniskern, John R. Taylor, Chas. H. Smith, Jr., and George B. Powers; time officers, William Dick, George W. Oliver, Frank H. Havens and Charles H. Gehnrich.

✤

F. H. Ayres, Ltd., has been registered with a capital of £100,000 in £10 shares to acquire the well-known business of sports manufacturers carried on by F. H. Ayres, in London, and elsewhere. The new company also acquires the business of C. M. Ayres & Co., of Nuneaton. The purposes are to deal in and manufacture sports appliances generally.

✤

In addition to the officers recently chosen by the newly-formed Retail Bicycle Dealers' Association of Northern California, this board of directors has been elected: B. B. Sharp, of Bakersville; F. A. Homan, of Fresno; A. Wright, of Stockton; L. S. Upson, of Sacramento; A. C. Hulbert, of Santa Rosa; F. H. Smith, of Chico; C. W. Williams, of Oakland; A. G. Ebman, of Fresno; G. W. Peyton and C. C. Hopkins, of San Francisco. The officers who will aid in the management are: President, J. A. Desimone, of San Jose; vice-president, Joseph Holle, of San Francisco; secretary, A. C. Banta, of San Jose; treasurer, E. A. Doanhoo, of Fresno.

✤

Leavitt & Bill, of San Francisco and Los Angeles, Cal., leading jobbers in sporting goods lines have dissolved partnership. The senior partner of the firm, J. W. Leavitt, will retain the San Francisco business, while J. T. Bill will remove to Los Angeles and take charge of the house there.

✤

The Military and Naval Co., Ltd., has been formed with £3,500 capital in £1 shares to acquire the business carried on by B. S. Grenville at 24 Jermyn Street, London, S. W., as the Military Equipment Co., to adopt an agreement with the said vendor, and to manufacture, let on hire, and deal in tents, wagons, camping appliances, mining requisites, arms ammunition, ambulance material, and equipment of all kinds for military and naval men, sportsmen, travelers and others, etc.

✤

The South American market is reported as flooded with imitations of American revolvers, made in Germany. At Buenos Ayres it is not uncommon to find the genuine and "fake" articles displayed side by side in the same showcase. For instance, a Smith & Wesson revolver will be tagged $18 or $20, while another arm identically the same in every outward particular is priced at $6 or $8. Other leading arms are also counterfeited.

✤

W. A. Power, formerly of the Canada Cycle and Motor Co., has been appointed Winnipeg manager of the New Dominion Automobile Company.

✤

R. Goodman, senior member of the Goodman Cycle Co., of Union, S. C., died at his home in that place on the 20th ult., after a long illness. The business will be continued by his son E. F. Goodman, who has been active partner for some time.

✤

Syracuse, N. Y.—The Syracuse Chilled Plow Co. is about to build an addition to its factory which will be about 55x75 feet and three stories high. The addition will be largely utilized for foundry purposes, the present foundry having proved inadequate.

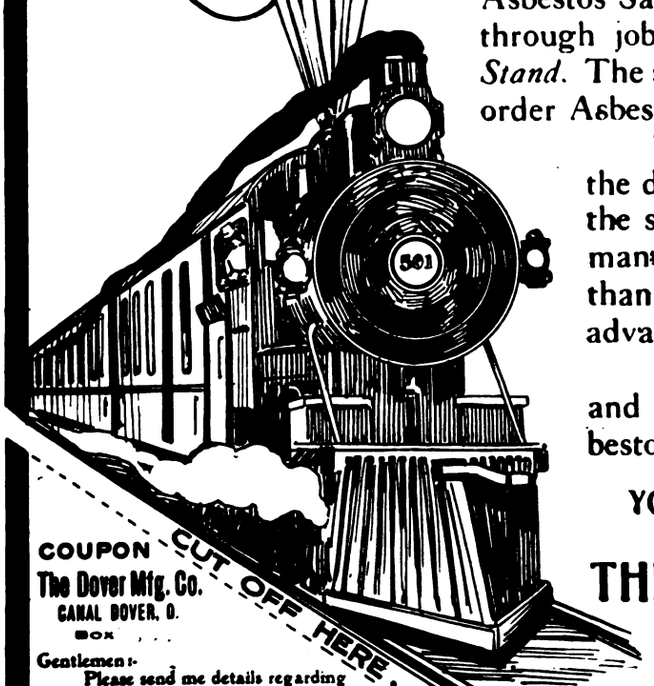
ASBESTOS SAD IRONS



AN IRON FOR EVERY PURPOSE

A LITTLE MORE STEAM

It pays to put *a little extra effort* on *Asbestos Sad Irons.* The dealers who entered our Advertising and Window Display Contests report results in the way of increased sales that are *surprising even to us.*

Don't let the fire under your boilers die out. Get up a special head of steam every once in a while.

How much time will it take to put an assortment of Asbestos Sad Irons and a few show cards into your window? One dealer in a small town sold *fourteen Laundry Sets* and a *large number* of our other styles in *two days* as the result of a window display—at regular minimum retail prices. Did it pay?

In order to assist the dealer in pushing Asbestos Sad Irons, we are ready to furnish through jobbers a handsome steel *Display Stand.* The stand is given free to dealers who order Asbestos Sad Iron Assortment No. 5.

There is no better method for the dealer to increase his sales and at the same time to co-operate with the manufacturer in creating demand than by displaying goods to the best advantage.

Return the adjoining coupon and get details concerning the Asbestos Display Stand.

No. 7 SCREW DRIVER

Is made from best Screw Driver Steel. Every blade is highly finished, hand-forged and tested to break a screw head.
Send for circular and prices. THE DUCHARMES & CO., Shelburne Falls, Mass.

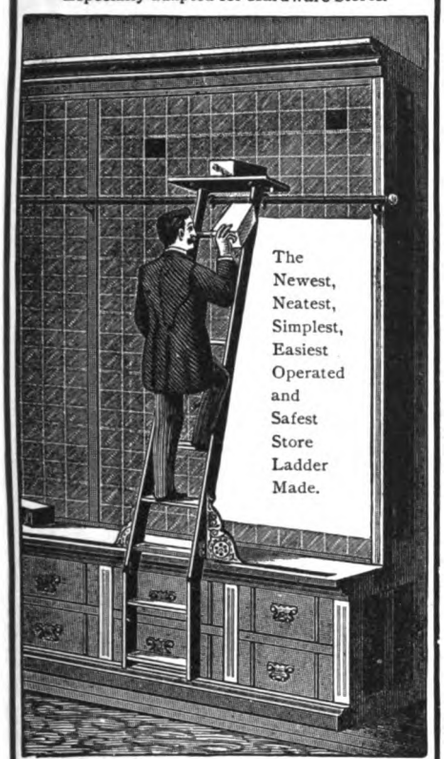
THE NINETEEN HUNDRED AND SIX MODEL OF THE IDEAL LAWN-MOWER GRINDER

Embraces some important improvements on the machine as heretofore made. We have perfected, and are now offering a Lawn-Mower Grinder that is Pre-eminently at the head of all similar devices. In fact, there is nothing at all like it.

With this Grinder the Repair man alone can make more money in less time than he could by the work of five men under the old regime. A boy can manipulate it. This is worth careful attention. It simply turns drudgery into pleasure.

By its use every cutting surface is rendered absolutely accurate, and thus a much longer lease of life is given every mower, and this feature will make permanent patrons of your customers, who will have no more sharpening done by hand.

An investment in this Grinder will give you better returns for your money than any other you can make.



Our circular gives all the details, prices, etc. Send for it to-day.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

PLAIN PATTERN CITY HEAD.

"DAN PATCH" SHOD WITH CAPEWELL HORSE NAILS WHICH ARE "THE BEST IN THE WORLD."

CORRUGATED PATTERN.

PLATE PATTERN.

ALLENTOWN, PA., Sept. 21, 1905.

THE CAPEWELL HORSE NAIL CO.,

Gentlemen: I shod **DAN PATCH** this morning, for his record breaking performance, with No. 4½ Plate nails, Capewell. He reduced the world's record on a half mile track from 2:03 to 2:01; also from 2:11 to 2:05 for wagon I have driven Capewell nails for years on the Grand Circuit. I think them the only nail in the world for race horses. With best wishes, Yours truly, J. F. HANSON.

Made By

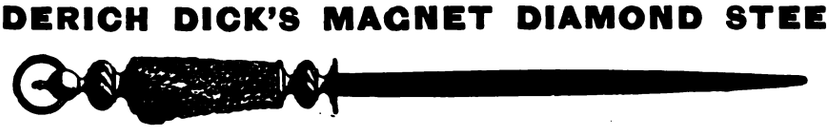
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

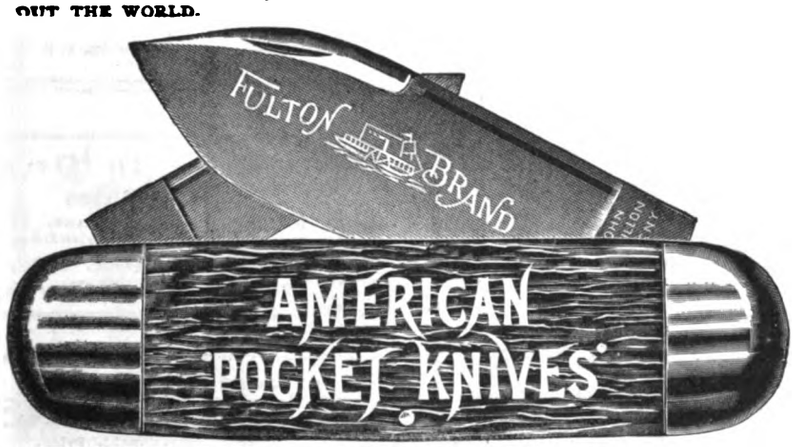
has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.



and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

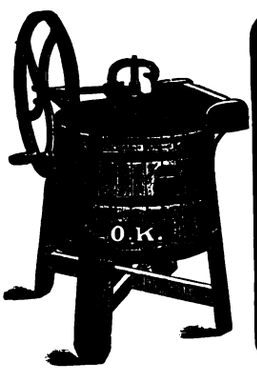
FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.



Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

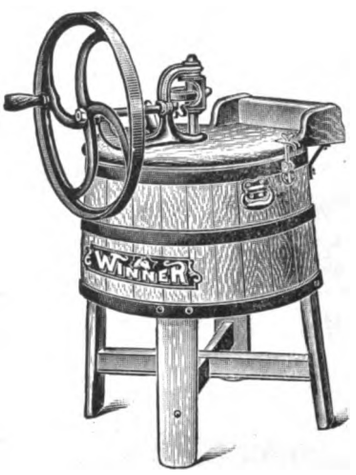
WAYNE WASHERS SOLD Up to the Present Time



And increasing at the rate of 300 per day.—What more evidence do you want to convince you that Wayne Washers are the best to sell?

WE Know it's a "WINNER"

Because it possesses everything to make it a "WINNER"

FIRST — It has fewer parts in its construction than any other rotary, and Every one knows the fewer parts there are in the construction of any machine the easier it will work and the less liability there is to wear and get out of order.

The appearance of the "WINNER" is different than any other machine upon the market. The tub is finished in the natural wood, with green bronze hoops, green enamel hand wheel, and the gearing in gold bronze; the combination making the most beautiful appearing machine upon the market. We are also using a special preparation in connection with the finishing of our tub—which holds the varnish to the surface and retains the lustre for all time. You will not find this finish on any other washing machine made.

WAYNE WASHERS
Klean Klothes

We also use the detachable stave leg, which does away with the necessity of throwing away the entire machine in case the leg becomes broken.

Simplicity—Quality—Appearance—Good Value for your money, are all possessions of the "WINNER." Order a sample from our jobber or direct from us, and we will leave the rest to you and the

"WINNER."

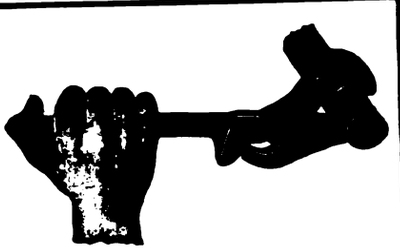
WAYNE MANUFACTURING CO., St. Louis, Mo.

Every Hardware Dealer

recognizes that an advertised article i four times easier to sell than an unadvertised one.

We have appropriated this season a good many thousand dollars for advertising our products in the large papers and magazines of national reputation. You are certain to have calls for:

The Hartmann Stockade Wire Fence
The Hartmann Steel Picket Fence
The Glen Steel Folding Mat



If y ur stock on these goods is low just drop us a line. You can't help selling them and run no risk in stocking up.

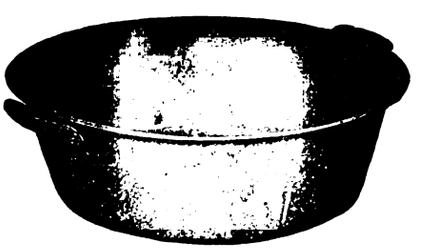
"Every Cloud Has Its Silver Lining"

If the cloud of "Dull Business" has been hovering over your store you can easily dispel it by putting in a complete line of

Flintstone Enameled Steel Ware

It is the Ware women most talk about because there is no other Three-Coated Enamel Steel Ware like The Flintstone.



It is light in weight, and artistic in design. Its gray, silken finish is most pleasing to the eye.

Best of all: It is as durable as Flint and will not scale nor rust out.

FLINTSTONE INCOMPARABLE AS A SELLER

Our output of Flintstone has more than trebled the past year so great has been the demand for it.

The Flintstone is the best moderate priced Enamel Ware made.

"Fall in line," Mr. Dealer—this is the time to stock up with, and sell, Flintstone.

OUR TEN YEARS' GUARANTEE WITH EVERY PIECE

Send at once for "Flintstone Booklet" with prices and discounts.

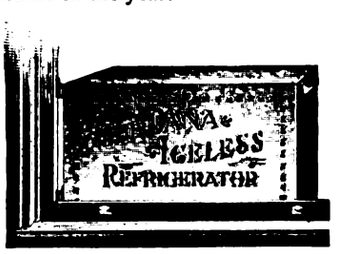
The best equipped factory, the best advertised product.

We make a few articles, in large quantities, make them better than any one else does, and we tell everybody about them.

We *know* we have the right principle in our "one-motion" Peerless Iceland Freezer and we've put up a new factory adequately equipped for turning out this freezer in great numbers.



Peerless Iceland Freezer

Our advertising—covering *every bit of freezer-selling territory* in the United States—gives an impulse, as strong as it is steady, to Peerless Iceland sales.

Every woman in the country interested in her home knows about the Peerless Iceland and believes in it. It's "the freezer the cook likes"—the freezer the *housekeeper* wants when she goes into your store.

Dana Iceless Refrigerator

For the window. No ice bill. A refrigerator that takes up no floor space and is run without ice eight months in the year.

Dana Mop Wringer

wrings the mop dry in five seconds. You stand in a natural position—both feet rest firmly on the floor.

Tub is well made, very strong and extra braced with heavy, flat iron, rust proof hoops. The rollers are of solid maple and never stick. The latest, the simplest and the best mop wringer on the market.

The Dana plant is fire-proof; we can *guarantee* delivery as promised. *Everything* about it is *modern*—selling organization and all.

Both jobber and dealer make a good profit on the Dana line.

Your jobber will be around soon. *Ask him.*

10 Warren Street, New York. **The Dana Mfg. Co.** Cincinnati.

More Than Forty-Four Screen Factories

have quit business in the last 12 or 15 years, not to mention hundreds of local mills and dozens of big sash and door concerns, whom it did not pay to continue making Screen Doors and Window Screens.

But for the organization of The Continental Co., probably not one of the four small concerns competing with that company would be making screens this year.

The factories represented by The Continental Co. prove the doctrine of "Survival of the fittest." They survived because they were the strongest. They made the best goods. They had the trade. They had the capital and the experience. From these factories have come practically every screen device of any value. It was a battle between these big concerns, and a crisis had been reached. Co-operation, so far as the law permitted, was the only salvation. Some think we are trying to save ourselves "with a vengeance," and it is indeed unfortunate that circumstances combine this year to force such an advance in prices. It is a fact, however, that prices are high only as compared with the ruinous prices of the past;—the prices that put these forty-four factories out of business. They are not high as compared with other goods made from wood.

Some Retailers have hesitated to place their orders, thinking that a lack of orders might force the Continental Co. to reduce its prices. Orders have come in as well as expected however.

They also thought that new factories, of considerable manufacturing capacity and ignorance of cost, might arise and cut prices. This has been done, but only to an extent not exceeding five per cent. of the ordinary consumption of the country. These new or rejuvenated factories are, of course, having the "time of their life." Still, most buyers, if satisfied that prices are firm, will prefer to order goods of known value and certainty of supply.

To enable Jobbers to reassure the Retail trade **The Continental Co. Guarantees Prices** against its own decline up to July 1st.

And to accommodate late buyers, the most of the **Distribution Cars will be held open till March 15th,** after which date it will be impossible to hold the cars and serve the trade in time for the season.

The recent burning of one of the largest Screen factories in the south tends toward decreasing the supply.

The Exclusive Agency

for the sale of our IMPROVED ACME WASHER is offered to live progressive dealers in territory where we don't have agents. The details of

OUR PLAN OF SALE

will be sent you upon request. Its principal features are 1, a liberal margin of profit; 2, no competition and therefore no unfair price cutting; 3, a positive binding guarantee that the machine will do all we claim; 4, a complete plan for co-operating with our agents in making sales to the consumer; and 5, an expensive and elaborate national advertising campaign. (See below.)

(NOTE—In writing for our Plan of Sale, we shall appreciate it if you will state whether you sell any other washers, and if so, what make, and also about how many machines you may be able to dispose of per year.)

Read the Advertisement Shown Here

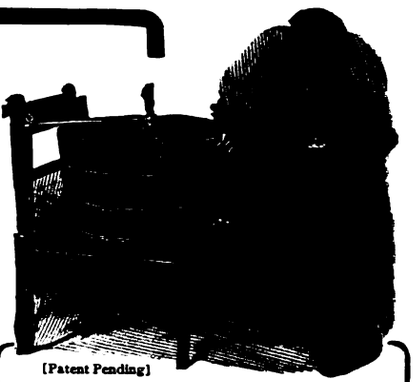
particularly the offer in the lower part. It is not only extremely fair and liberal to the consumer, but it also shows clearly that we are spending money to create a demand for our machine, and we shall fill this demand through the legitimate channels of trade, that is, through the store of the retail dealer. This advertisement, measuring 7 inches, is the smallest we are using. Our space runs from this size up to 19 inches in most of the higher priced magazines. In fact, we are spending upwards of

$50,000 IN ADVERTISING

At the present time we are using the February, March and April issues of the following leading publications:

Ladies' Home Journal	Delineator
McCall's Magazine	Woman's Home Companion
Ladies' World	Saturday Evening Post
Collier's Weekly	Everybody's Magazine
Harper's Bazar	Good Housekeeping

Men and Women



and 16 others, with a circulation of

Over 10,000,000 Copies Per Issue

WRITE TO-DAY FOR OUR PLAN

If you are not interested in Washing Machines, you can doubtless handle our line of Wringers and our Acme Wringer Mop Prices and terms on application. Write to-day.

ACME WASHING MACHINE COMPANY
COLUMBUS, OHIO

[Patent Pending]

The Improved
Acme Washer

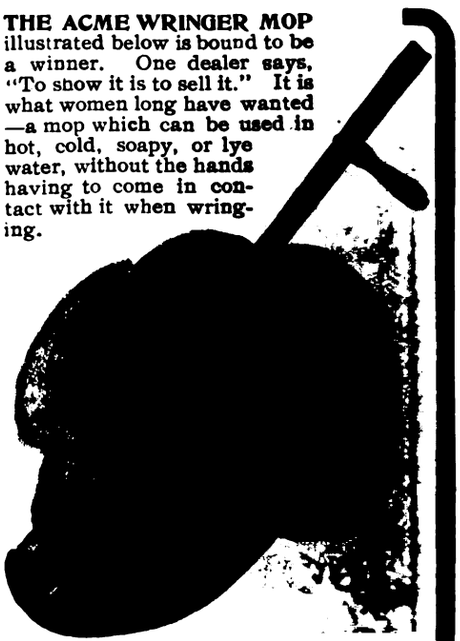
will wash thoroughly and perfectly clean anything, from the finest piece of lace to the heaviest blanket, without tearing a thread or breaking a button. In fact, there is nothing in the way of washing which can be done by hand or with any other machine which cannot be done better, more easily and more rapidly with the **Improved Acme Washer.**

Besides being made of the very best materials, handsomely finished in natural wood, it has a number of

SPECIAL FEATURES

not found on any other machine. These consist of: **1, a Movable Wringer Stand,** which brings the wringer directly over the tub, so that all the water falls back into the tub, instead of on the floor. (The wringer need never be taken off.) **2,** the **Hinged Lid,** which is practically steam-tight, prevents the water from splashing over. This is merely raised up and leaned back against the handle, so that all the suds must drain into the tub. **3,** the **Extension Stand** holds the basket, or rinsing tub, close to and on a level with the machine, so that the clothes cannot fall on the floor, and no stooping is necessary. **4, No Iron Post** runs through the machine to rust and stain or tear the clothes.

There are many other good points about the **Acme,** all described in detail in our little booklet entitled "Wash-day Comfort." This is **free** for the asking. May we send you a copy?



IS THIS A FAIR OFFER?

If you will write us that you are interested, we will give you the name of the dealer in your town who handles the **Improved Acme Washer.** You can see the machine at his store and learn all about it before you buy it. If you buy it, it is with the understanding that any time within 30 days, if the machine is not in every way satisfactory, he will take it away and give you back your money. He will do this cheerfully and readily, because our guarantee to him protects him against loss. You risk nothing but a two-cent postage stamp to mail us your letter.

Write To-day—even if you are not just ready to buy or even try a machine; in that case let us send the **little booklet**—remember, it's **FREE**—**write to-day!** Address

ACME WASHING MACHINE COMPANY
2511 S. High Street, Columbus, Ohio

THE ACME WRINGER MOP illustrated below is bound to be a winner. One dealer says, "To show it is to sell it." It is what women long have wanted—a mop which can be used in hot, cold, soapy, or lye water, without the hands having to come in contact with it when wringing.

"SIMILAR"

A CERTAIN tool manufacturing company adorns the pages of the catalogues it gives to hardware buyers with a rubber stamp impression like this:

Similar to Starrett's No.....

That Starrett Tools are the standard is a fact which we have for some time, and with strenuousness and persistency, tried to impress upon mechanics and the trade, and we have been to some expense and a good deal of labor to accomplish this purpose. It is therefore gratifying to find a competitor backing up our advertising with such an unqualified endorsement. We deeply appreciate the compliment.

It is doubtless unnecessary to suggest that live hardware dealers will still prefer Starrett Tools to any whose highest claim is that they are "similar."

THE CLIPPER LAWN MOWER CO

The Clipper Lawn Mower Company, Dixon, Ill., manufacturer of pony and hand mowers, is building a new plant, which, when completed, will provide greatly increased manufacturing and storage capacity. The building under erection is 40 by 150 feet, three stories high, and another building already on the site is 25 by 95 feet, one story in height. The two buildings will give the company a total floor space of 18,000 square feet. In addition to manufacturing lawn mowers the company expects to produce marine gasoline engines.

REDUCTION OF RATE IN IOWA.

Implement dealers in and around Davenport have just been notified by the Iowa railroad commissioners that the freight on iron pumps will be reduced. The change comes principally through the efforts of S. B. Lafferty of the Red Jacket Manufacturnig Co., who has been one of the most enthusiastic advocates of the measure. The new ruling of the commissioners provides that after February 24, iron pumps will be reduced from first to third class, which means a corresponding reduction in the freight rate.

F. E. MYERS & BROS.' GOOD REPORT.

F. E. Myers & Bro. report that the loss of their shipping warehouse and a large amount of finished goods has not caused any delay in filling their orders. Their shipments during the months of January and February were larger than a year ago, and they have the largest business booked of their career. The increased capacity of their work by the addition of a large machine shop and nearly one-half larger capacity to their foundry, and running all night turns, has enabled them to take care of their customers in this satisfactory way. Having this increased capacity and a good supply of raw material they are in position to make all shipments promptly.

EMPLOYING A LAWYER.

A little knowledge of law may be a dangerous thing; still the business man who would depend upon his attorney to direct his every movement that had a legal bearing would be hopelessly handicapped. Some business ventures require quick decision when advice is not available; others are too trivial to warrant it. The ordinary business man can determine readily enough whether the amount involved in a contemplated action would be enough to make a "taking the chances" policy unwise. The real question is, "what else is involved." Is the action limited to the one transaction or does it possibly entail future obligations? This he should always determine before signing any contract or in any way binding himself either by his own knowledge or through legal advice.

It is a pretty safe rule to consider every contemplated act first from the standpoint of future responsibility and, having that disposed of, the question of lawyer or no lawyer may be very easily decided from the merits of the case.

CHICAGO CASH BUYERS' UNION.

A receiver was appointed to take charge of the affairs of the Cash Buyers' Union First Co-operative Society at Chicago on February 26th by Federal Judge S. H. Bethea. The concern was capitalized at $5,000,000 and sold shares among farmers and laboring people all over the country. The action was taken on the petition of three creditors, whose claims aggregate $700. These companies acted at the direct instigation of the postal authorities, who have been conducting an investigation of the company during the last six months. Criminal prosecution depends upon the examination of the books, which will be taken up under the receivership.

The postoffice inspectors say that $1,027,000 worth of common stock has been sold. Julius Kahn, formerly with Sears, Roebuck & Co., is president. Admitted liabilities are close to $300,000, and it is estimated that the merchandise on hand is not worth more than $150,000. The open bank account of the society is $00.

The court gave the receiver permission to go on with the business of the company, so far as cash sales are concerned. Sales of stock, however, will not be allowed. Payment of the employes also was allowed. This amounted to $2,770. A petition was filed by Assistant County Attorney Jones for the payment of the personal property tax of the company for 1905. This tax amounts to $1,047. Kahn had mailed a check for the amount to Treasurer Hanberg, Mr. Jones said, but the bank had refused to honor it. On a recent date the opinion was expressed by Receiver E. C. Day that the Cash Buyers' Union would find a way out of its difficulties.

THE USE OF TROUBLE.

Worry is an expensive luxury, but there is nothing like a little concern and uncertainty about the future to keep the rust from gathering. There is a lot of stimulus in occasional misfortune and the man who can sit complaisantly down and watch Dame Fortune smile at him isn't in it as a business hustler with the fellow who has to make his raids upon her cupboard when her back is turned. A bed of down is far more comfortable at the time than one of thistles, but the latter furnishes a great deal more inducement for an early business rising.

THE PERMANENT EMPLOYEE.

There is a well defined prejudice against the third-term office seeker but the wise business man will not allow that prejudice to enter into his office management, for it is not good business whether it is good politics or not. The salesman who is only pretty fair is worth a good deal more in a concern with the goods and methods and customers which he is familiar with than in any other place or than even a better salesman would be in his. It is true that a new man could soon learn the methods and he is probably familiar with the goods already, that is the small end of it. He cannot readily acquire all of the individual peculiarities of *your* customers as the man who has been selling to them for you for the past year knows them.

An old horse dealer used to say that every time two men traded horses both of them lost 25 per cent., providing neither one got cheated, because no man could get the same service out of a strange horse without injuring it, that he could out of his own and he lost that much before becoming accustomed to the new one.

The same rule applies with even greater force to the employment of office men and clerks. Don't trade; don't shift about. Life is too short to break in new men constantly. Choose carefully at the start and when you take a new man upon your force regard him as a permanent fixture. Use the energy you would expend on hunting up a better clerk in making a better clerk of him, then keep him working for you as long as he works for anyone, even if he asks more pay as he becomes worth more. If he goes from you he will naturally seek employment in a smaller line among your competitors and may, with his personal knowledge of your customers, take some of them with him. At any rate the effort spent in hunting and training new help may as a rule be more profitably employed in strengthening the old force; for that is the initiatory expense which is always the heaviest and most unprofitable part of any investment that is not of a permanent nature.

ANIMAL PECULIARITIES.

Tortoises and turtles have no teeth.

All animals which chew the cud have cloven feet.

Both mandibles of the parrot's beak are movable, but most birds are able to move only one.

The deer is furnished with supplementary breathing places in addition to the nostrils, and this would appear to be an extraordinary provision of nature giving the beast of the chase a free respiration.

The stork is partial to kittens as an article of food, and finds them an easy and wholesome prey; and the cats reciprocate by a love for young storks.

The frog, owing to its peculiar structure, cannot breathe with the mouth open, and if it were forcibly kept open the animal would die of suffocation.

Whalebone is found in the mouth of the whalebone whale, where it forms the substitute for the teeth, of which otherwise the animal is destitute.

Pigs are poor swimmers, their forelegs being set closely under them, and when they fall into the water they sometimes cut their throats with the sharp points of their cloven feet.

Fishes swallow their food hastily and without mastication, because they are obliged unceasingly to open and close the jaws for the purpose of respiration, and cannot long retain food in the mouth when quite shut.

The faculty the chamelon has of changing its color has been attributed to the protective instinct of the animal, by which it seeks to render itself less observable by enemies by assuming the color of the bed on which it lies.

The hump on the back of the dromedary is an accumulation of a peculiar species of fat, which is a store of nourishment beneficently provided against the day of want, to which the animal is often exposed. The dromedary, or camel, can exist for a long period upon this lump without any other food.

MARCH 10, 1906

Editorial Trade Review

The number of conventions of the retailers of the country is drawing toward a finality and as state after state shows an organization of 600 or 700 members each they show at least an interest which brings about an unselfish altruism that will result in more uniform profits that are proper and commendable, resulting in a greater volume of business and a more equable division of customers so as to keep the local trade well in hand. Numbers of papers have been read at the various gatherings detailing how a successful business can be done profitably, and told unselfishly by competitors in a manner that takes one into their confidence as belonging to the same guild, and entitled to the information. The relations existing between the retail dealers and the jobber are more clearly defined and can be safely depended upon, the jobber having come to the meetings and answered adverse criticism frankly and insisting with the manufacturers on his rights, telling him to keep within his own domain and leave the retailer "to his friend the jobber." The manufacturer has been wrestled with conscientiously, to let the catalogue house alone and cease to supply a class of trade that the retailer regards as his arch enemy. So that the catalogue house, to get the goods on which they founded their business, is compelled to a great extent to use some of their immense capital in manufacturing a large portion of it. Anything springing up that threatens the vitality and general usefulness of the dealer, a united organization of all concerned can be depended upon to wipe it out of existence or know the reason why.

There has been a very gratifying trade in all lines of goods for February so that when comparisons are made with previous years the fact remains that 1906 is telling a flattering tale and maybe a magnificent business is indicated by the daily activity that accompanies this sanguine view of its early wants.

So many jobbers have stocked up during the four months past and advances in every line have made this cause a good one to be guided by, that they can honestly shade the market on many good things and make dealers reap the advantages by so doing. The active demand they felt satisfied would prove the good market of the Spring trade has resulted in making it an eager one to cater to, and the volume of trade continues large and will be found to affect favorably the increasing business of the future which already is evidencing a strength both satisfactory and profitable to all concerned.

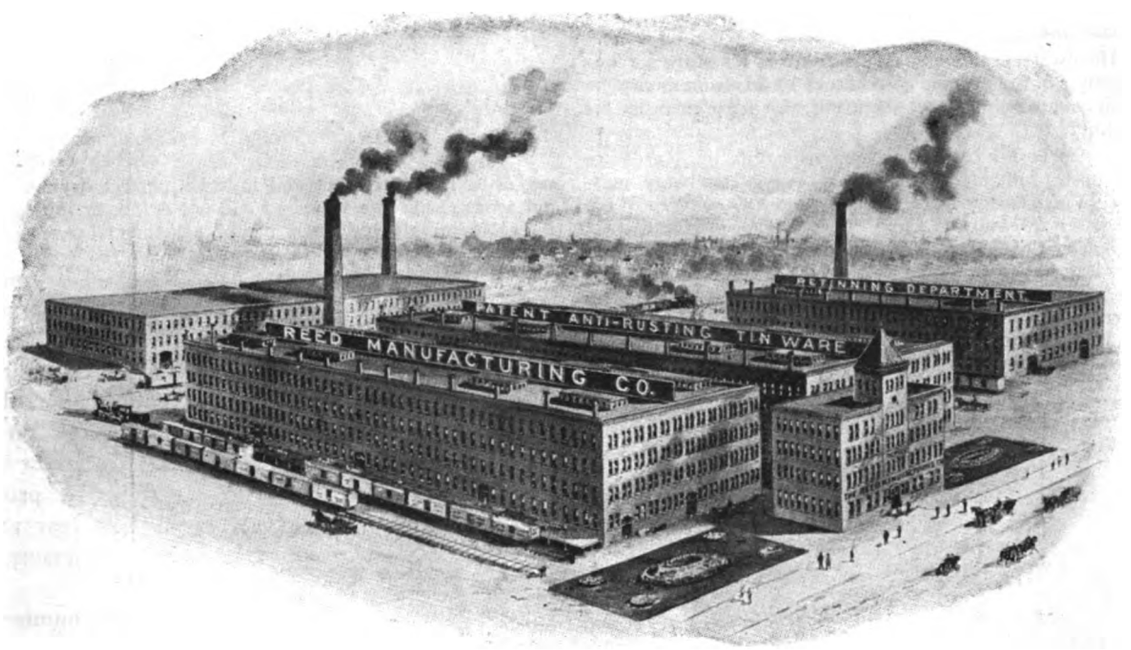
The season has been such an open one that the retailers who booked orders for what is usually considered early enough, have found a demand still earlier and have been urgently begging for shipments in advance of anticipated requirements that cannot always be responded to. This includes such staples as Nails, Wire and Fencing with which to commence the trade of the season; so that jobbers report a state of traffic thus far in the year the figures of which on the articles it includes that has never been reached before, which if continued throughout the year will be unparalleled. This feeling of sanguine eagerness in regard to all transactions indicates a growth in the customary confidence usually affecting buyers, and manufacturers are preparing by increasing facilities to be ready to fill the orders from jobbers which they know must come.

The constantly increasing population promises increasing acres of our domain that will be added to our crops annually, only to know the wealth will follow that makes our country's prosperity. We are growing marvellously, crowding over into Canada and increasing the wheat fields of that great northern domain at a rate that excites wonder and astonishment where conservatism is the rule rather than the reverse. And building operations on an extended plan permeate the West and Northwest with the scale of improvements which follow, that promises a steady consumption that will make this year present a period of growth in the Hardware trade unsurpassed in its volume and wider in its distribution.

There has been an increase made in the number of factories who can see good money in manufacturing Hardware and a number of plants have been started, making special branches of Hardware in the North and Northwest. While the factories that have been added are not in all cases large or noteworthy, they have confined themselves to making specialties that meet with a ready sale. Then again companies already prominent on the market have largely increased their capital for additions to their present works, increasing their ability to turn out goods, thus adding greatly to the general productiveness.

THE CLERK'S SPARE TIME.

If your clerks came with a demand for a one or two hour decrease in the length of their working day the chances are that the demand would not be willingly conceded; but how much more than that time are they now really serving you? After taking into account their idle time between the demands of successive customers upon them is it not true that their actual average daily service is curtailed by an hour or two? The mere fact that they are on hand prepared to work is not of itself a source of profit for their employer until he is able to utilize this readiness to his own advantage.



To devise between-time occupations that are evidently intended to use up their idle minutes more than for any other purpose is to secure their ill-will without obtaining their very hearty co-operation. That is the sort of thing which stirs up the spirit of "getting even." Instead some useful form of invoicing work, or labeling or arranging, for each one in some special department should be devised, something as much a relief as possible from the regular duties and that will at the same time awaken a certain interest in its completion. Then don't make the mistake of telling them that you see they have a little spare time which you wish to utilize. Tell them instead that you are anxious to get this list made out or these goods labeled as soon as it can possibly be done without interfering with their other work; "just watch your chance and get it done as soon as you can." A discreet manager will keep the between-times of his clerks profitably employed in tasks in which they will take a personal interest and will render willing assistance if worthy of their hire.

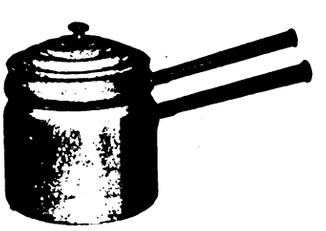
PROFIT MAKING LINES

REED'S FLINTSTONE ENAMEL WARE.

The illustration herewith shows the present plant of the Reed Manufacturing Co., of Newark, N. Y. The rapid growth of this concern is indisputable evidence that Reed's Patent Anti-Rusting Tinware, Reed's Extra Heavy, Hand-Made Pieced Tinware; Reed's Retinned Plain Stamped Ware, and a special line of full weight Copper Nickel Plated Ware, Planished Copper Wash Boilers and Aluminum Galvanized Iron Ware, are "Profit Making Lines" for the Hardware dealer. Their complete catalogues for all these lines can be had for the asking.

PLANT OF THE REED MANUFACTURING CO., NEWARK, N. Y.

Their Three-Coated Enamel Steel Ware—*"Flintstone"*—however, has broken all records so far as sales are concerned. As soon as it was placed on the market it met with such favor everywhere that the Company had to increase its facilities. Last year they trebled their output, while the demand for Flintstone Enameled Ware is steadily on the increase.



FLINTSTONE BASIN.

The reason for such popularity is not far to seek. The chemicals used in its manufacture are especially imported from Austria and Germany in the raw state, and the duty on same being insignificant when compared with the duty of the finished product, Flintstone has the advantage over imported ware. Moreover, it has stood the severest tests to which the best chemists of the United States have subjected it, who have pronounced Flintstone free from poisonous ingredients, and practically insoluble. As its name implies, it is as hard as Flint, and the manufacturers claim that Flintstone will outlast any other Enamel Ware made. A Ten Years' Guarantee is given with every piece sold by the manufacturers. Flintstone is light, artistic, cleanly, economical and durable. It is both seamless and sanitary and marks a new epoch in the history of cooking utensils. A handsomely embossed booklet, describing Flintstone is mailed to any one on application.

FLINTSTONE TEA KETTLE.

FLINTSTONE RICE BOILER.

To facilitate the handling of their wares, and especially to meet the growing demand for Flintstone Ware, the Reed Manufacturing Co. has established four branch offices: New York: Irving Bldg., Hudson & Chambers Sts.; Chicago: No. 223 W. 12th St.; Cincinnati: No. 11 East 2nd St.; St. Louis: 118 North 3rd St.

FLINTSTONE BERLIN KETTLE.

C. A. CHAPMAN'S HOUSEHOLD SPECIALTIES.

PROFIT MAKING LINES.

Among kitchen specialties which appeals most to thrifty housewives and which each Hardware dealer ought to handle, those manufactured by C. A. Chapman, Geneva, New York, are most profitable. They are made profitable because the demonstrations by Mr. Chapman throughout the country, wherever he is called to give them, not only teach the merits of the goods, but also teach scientific cake-making in a way that is so practical and attractive that all housekeepers are sure to be interested and attend many times. These demonstrations can be made perpetual and a very profitable feature of any store, as is proved by the many that have been conducted for years past. The cakes made at these demonstrations are of superior quality and always find a ready sale, on which the dealer receives a profit as well as a profit on the sale of the specialties, thus giving the dealer two profits and many new customers.

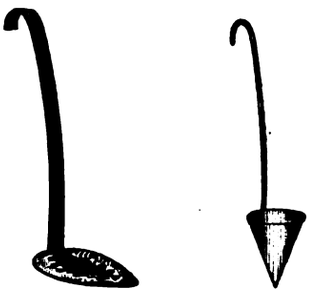
If every Hardware dealer had in the front of his store a regular department for the women purchasers of his community he would certainly not only attract them but also keep them as his steady customers.

The specialties best adapted for demonstrations in Hardware stores and most profitable to handle by every Hardware merchant are the Van Deusen Cake Moulds, Van Deusen Egg Whip and Van Deusen Measuring Cup. They are a profitable trio. The Van Deusen Cake Moulds are made solid, will not get out of order, or leak batter as would be the case where the sides and bottom are made loose or detachable. Being made of an extra quality of charcoal tin, they are the most durable moulds on the market; and as they sell at retail prices no higher than any other make, afford a good profit to the Hardware dealer.

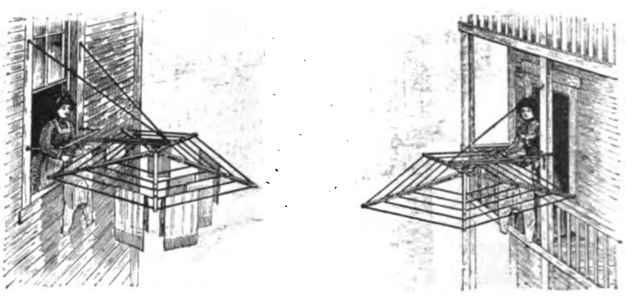
THE VAN DEUSEN EGG WHIP.

The *Van Deusen Egg Whip* is made of a solid piece of tin and is the strongest whip on the market. The groove feature adds to its effectiveness and durability. It is clean and convenient, is especially designed for whipping the whites of eggs, and comes in two sizes, retailing at five and ten cents.

THE VAN DEUSEN MEASURING CUP.



The *Van Deusen Measuring Cup* is an absolutely correct measure—as correct as a pair of scales. One side is marked in thirds and the other in fourths, thereby enabling the user to get any part of a cupful desired. The figures are plainly marked so that there is less chance for making mistakes. These are very important features and make it a good seller. It retails at five cents.



A most practical and economical Corn Popper also manufactured by C. A. Chapman is *More's Reversible*. As one side is made of wire, like the ordinary popper for dry-popped corn, and the other is made of smooth steel for corn popped in the seasoning, this corn-popper really does the work of two ordinary corn-poppers.

Kindred profitable specialties of the Chapman make are the *Superior Skimming Spoon* for removing the scum from food while boiling. It sells at sight. The *Superior Cream Dipper* for dipping cream for milk bottles is an indispensable necessity for those who use milk in bottles, and the demand for this Dipper is steadily increasing.

Another profitable article of the Chapman line is the *Superior Clothes Drier* for use at windows, on balconies and verandas. These Dryers are time and labor savers. They prevent the stealing or soiling of clothes and insure a perfect drying. They are put up as easily as a rope and will not deface or injure the building. No private residence, flat or apartment house ought to be without these Dryers as they fill every requirement.

SKIMMING SPOON. CREAM DIPPER.

SUPERIOR CLOTHES DRIER.

A postal addressed to C. A. Chapman, Geneva, N. Y., will bring all necessary information about demonstrations, catalogues and discounts.

PIKE MFG. CO.'S NEW SOUVENIR.

Pike Mfg. Co., Pike, N. H., have prepared a handy little souvenir consisting of a paper weight, blotter and sharpener, which is designed to be used in advertising the Pike Corundum Wheel. This souvenir has a small corundum wheel attached to a blotting pad, the wheel serving as a handy sharpener for pocket knife, ink eraser, etc., whereas the blotter has six blotting sheets and will be found very convenient for desk use; while the whole makes one of the most convenient paper weights that could be imagined. Those of our readers who desire to add one of these souvenirs to the desk outfit can obtain it by addressing the company as above and mentioning Hardware.

KENTUCKY RETAIL HARDWARE ASSOCIATION

The Sixth Annual Convention of the Kentucky Retail Hardware and Stove Dealers' Association was held at Louisville, February 20, 21 and 22. Over 75 members were assembled at the Court House at the opening session, others being expected. There was also a good number of exhibitors present, and in this respect it surpassed all previous conventions of the State Hardware Association. The Convention was formally called to order on Tuesday afternoon by President J. D. Frederick of Owensboro, who extended greetings and introduced Mayor P. C. Barth, who expressed his pleasure in extending a welcome to Louisville. U. S. Shacklett of Fulton, who is also mayor of his city, responded to Mr. Barth in a graceful manner.

The increasing membership since the 1905 meeting has been about 40 per cent and the total is now over 150 members.

PRESIDENT'S ANNUAL ADDRESS.

President J. C. Frederick of Owensboro made a thoughtful address from which we make the following extracts:

My experience in association work in the past four years has convinced me that it has passed the experimental stage. The splendid associations in more than 20 States, with an aggregate membership numbering thousands, the largely attended annual State conventions, with hundreds of enthusiastic members taking part in their deliberations, are evidences of their success.

It is not only in the correction of abuses that were injuring the retail dealer; in the defining of our rights and the establishment of a better understanding between the manufacturers and jobbers and ourselves, and in the influence we are bringing to bear upon the enactment of protecting laws. These, it is true, were some of the primary ideas and objects for which these associations were founded, but they are

EX-PRESIDENT J. C. FREDERICK.

FAST BEING OVERSHADOWED BY THE BROADENING INFLUENCES

that are growing out of them.

I hold it to be an undeniable fact that greater good will come to the Hardwaremen from the uprooting of the foolish jealousies existing among competitors and from the recognition of the fact that there is more benefit for each in selling goods at a profit than in a senseless warfare of cutting prices; in friendly co-operation to run their business upon a healthy basis, than from the removal of the catalogue house.

While it cannot be denied that

THE CATALOGUE HOUSES ARE A GREAT INJURY TO OUR BUSINESS,

it is also indisputable that our associations have become great training schools and are year by year better instructed to meet the enemy. Some there are who believe that mail order houses have come to stay, and it may be that they are right. The birth of these houses may have been an accident, but their phenomenal success would indicate that they met a "long felt want" and are filling it. It should be our business to find out what that want is and fill it ourselves. Is it that we have been careless about letting the people know about the goods we have to sell? Have we been indifferent about meeting the demands of our customers for certain goods they want, but which we thought "wouldn't pay" to carry? Have we preferred to sell $100 worth at 50 per cent. profit rather than $300 worth at 25 per cent.? If our associations are waking us up to these facts

IT WILL NOT BE LONG BEFORE WE BEGIN TO FIGHT

for what should belong to us, and then the catalogue house will no longer trouble their dreams, but will be having troublous dreams itself.

Another danger and a grave one, that at present threatens the retail dealer and jobber in every line of business, is the different parcels post bills that are being introduced in various guises and backed by mysterious though powerful influences. It is imperatively necessary for every retail dealer to watch these measures, and to write to the several Representatives and Senators in Congress protesting against the enlargement of privileges now existing and urge the adoption of a 1-cent letter postage rate.

I feel highly encouraged by the growth of our association, and by the enthusiasm and spirit of hopefulness that possesses it. I fully believe that

WE HAVE PASSED THE CRITICAL STAGE

and that henceforth it will continue to increase and will take the place it should occupy in the ranks of the State associations. With a comfortable sum in our treasury left over from last year, with a profitable advertisement acccount in this year's programme and with the increasing interest among the Hardware dealers in the State, the outlook is bright indeed.

SECRETARY'S REPORT.

The report of the Secretary, John R. Sower, Frankfort, gave a review of the work of the year. We give the following brief extracts from it.

The past year has been a very busy one. I have endeavored to create an interest in our association by sending out circular letters to every Hardware dealer in the State from time to time. My efforts, while not entirely successful, have been encouraging, and I believe most of you will be satisfied with the results.

I FIND IT HARD TO CONVINCE BROTHER HARDWAREMEN

that they have time to come to our convention. Just before the convention I sent out 700 postal cards, enclosed with a circular letter, asking each dealer to write me if he could attend our convention. I find that most of those who could not attend gave as an excuse that they could not leave their business. I wish every Hardware merchant felt as I do about this association. I would come if it were only for the privilege of meeting my fellow Hardwaremen and hearing how they run their business. I learn something every time I come. A few grievances have been reported, all of which I believe

U. S. SHACKLETT, PRESIDENT.

have been properly adjusted. I sent out during the year 4,000 circular letters. I wrote about 150 letters soliciting advertisements for our programme, and from a financial standpoint I believe you will agree that it is a success.

There were 17 new members enrolled during the year.

"THE RETAILERS, THE WHOLESALERS AND THE MANUFACTURERS"

was the subject of a paper by U. S. Shacklett of Fulton, from which we make a few extracts.

There are many lines of goods that can be handled profitably direct to the trade, but while there is one line that will be successful that way there are a great many that will be very unsuccessful. I feel that the jobbers are taking on some things that they will find very disagreeable to themselves, as well as getting both the retailer and jobber into trouble. That is along the line of Stoves and Implements, and such goods as require repairs, which being changed from year to year, one line of goods and then another, are creating a great deal of trouble.

I have always been very

FRIENDLY DISPOSED TOWARD THE JOBBERS

and the manufacturers, too, from the fact that I have a great many friends among both, but I find that when you simmer it down to dollars and cents, they are all cold blooded and when the retailer thinks he has a cinch because some jobber tells him that his credit is unlimited he is badly fooled. They are looking for our business while we are prosperous and are looking for our money when crops are bad. Whenever we do not get the money they get awfully busy and never stop to think that all our money is tied up with our customers and it may be perfectly good. That is my experience. Perhaps it is yours also.

I find among the merchants of the Pennyrile District after visiting several of them that practically all jobbers in one line or another are sneaking a fine wildcat trade, notwithstanding every one of them is ready to jump on the manufacturer because he happens to sell the retailer direct and happens to get a little of his business. Then they are all ready to say the retailer should not kick.

Digitized by Google

I find from coming in contact with a large number of manufacturers and jobbers that they are not acquainted with conditions surrounding the retail Hardware dealer. In the first place, the retailer has to stand between the jobber and the manufacturer when, the question of quality arises, and the

RETAILER NATURALLY HAS TO MAKE ANY DEFECTS GOOD.

A great many of the jobbers and manufacturers are very slow to make good these defects, however plain and simple they may be, and it forces us to either lose their business or lose the price of the goods. We realize that we can be and will be imposed on in some cases, but we feel that the other end of the line should not expect us to be devoid of common judgment in the matter. On the other hand, I find some manufacturers and jobbers quite liberal and we have never had very much trouble with their goods.

"IMPROVING SALESMANSHIP."

President Frederick called upon Frank Semple of the Simmons Hardware Co., St. Louis, to address the meeting on the subject of "Salesmanship." Mr. Semple said in part: "The way to increase profits in business is to increase the efficiency of the selling end. We all know that a salesman who understands his business will sell goods whether the customer wants them or not. If you want to increase your earning power, increase the selling power of your men. Have the salesman who sells your goods get your clerks together and explain how and tell why the particular article he is selling possesses merit. Then when a clerk gets to understand the merits and demerits of a specific class of goods give him that line and he will handle it at a profit. Cultivate affability in your clerks and a desire to please." Mr. Shacklett said he sent one of his men to the plant of the Ringen Stove Company, St. Louis, to acquire a knowledge of the construction and operation of a gasoline stove and with good results. "Where customers, particularly ladies, had formerly been prejudiced against the gasoline stove, considering it dangerous, the young man clerk in taking the stove apart is able to make its construction and operation so simple that he is now hardly missing a sale. This experience also increased his capacity for selling coal oil stoves." Mr. Shacklett thought the idea could well be adapted in many other Hardware lines to advantage.

THE IMPORTANCE OF MIXED PAINTS.

P. C. Frayer, a salesman for the Acme White Lead and Color Works, Detroit, Mich., read a paper on the subject of "Mixed Paints and Why Hardware Merchants Should Handle Them", which we intend using in the immediate future.

INDIFFERENCE IN WINDOW DRESSING.

A. Steitler, Jr., of Owensboro, read a paper on the above subject, from which we extract the following:

I believe many Hardware and Stove dealers are not keenly alive to the spirit of the times. Some of us are more or less indifferent to our best interests. We are not

MAKING THE MOST OF OUR OPPORTUNITIES.

We do not fully realize that conditions in the business world have changed and are still changing; that to conduct our business in the old fashioned way, in the face of present methods and conditions, will at the most only yield us a living; but the chances are we shall be forced out of business by our more progressive competitor.

Among the many methods that the merchant has to use for advertising, the most direct.

BEST AND ATTRACTIVE MEANS IS THE SHOW WINDOW.

The success of a tasteful window is best manifested by the interest it produces in the passer-by. One person looking and remaining before a window will invariably draw others. Show cards are a very necessary adjunct for an attractive window. They can be made by most any one, always using neat, white cardboard and making a neat letter and figure with Letterine and a brush or a good rubber marking set, for it is very important to have most goods marked with a neat price ticket and often new goods or specials with a descriptive card.

Some merchants do not favor putting prices on articles unless they have special values. Have you ever found yourself looking into a show window, and without a price you found little interest in the display, but

WHEN PRICE CARDS WERE DISPLAYED YOU WERE IMPRESSED

with the price of the article and when in need your mind drifted back to where you saw the item and the price was impressed upon you?

In building a new store or remodeling same the mistake too frequently made is that the base of the window is built too high.

The floor of the window should never be higher than 18 inches over and above the level of the sidewalk and on a line with the front. The display in the window should be brought before the eyes of the passer-by in a natural manner. For instance, a Range, Heater or Refrigerator should be on an even level, but if the same articles were seen 3 feet high in a show window the effect would be seriously diminished.

To appreciate the value of window displays you should do a little figuring. How many people pass your place in a day. If the average is five a minute in the eight busiest hours of the day 2,400 people would pass your window. This number, 2,400, represents what in newspaper parlance is called "daily circulation." Now your show windows occupy, say, 100 square feet of space, and in it you can display attractively quite a line of goods, changing the [illegible] as you wish. In a daily newspaper with an actual circulation of 2,000, five square inches (not square feet) would cost approximately $5 per day, and in this space you can put only illustrations of the articles themselves and as a rule the illustrations but imperfectly represent those articles. Now your window space presents a surface of 288 times as great as your $5 newspaper space, has depth in addition to surface, and in it can be displayed the articles themselves, true to life as to color, size, shape and everything, and furthermore they are seen at the entrance to your establishment, inside of which

A SALESMAN STANDS READY TO GIVE ADDITIONAL INFORMATION

and exercise his ability at making a sale.

This window space is yours every day and all day. It presents wonderful possibilities as an advertising medium, and it's up to you to get those possibilities out of it. If newspaper space, properly used, is worth its cost (and we are firmly convinced it is), how important it is that so

VALUABLE AN ADVERTISING MEDIUM

as show windows should not be neglected.

You no doubt realize that Hardwaremen, as a rule, devote far less attention to their show windows than they should, usually contenting themselves with the fact that their windows are merely to complete the effect of their store building and not for the purpose of selling goods; such merchants generally use show windows for a sort of catch all, for goods which cannot be conveniently displayed elsewhere.

"THE COUNTRY HARDWARE MERCHANT AND HIS STORE."

was the subject of a very interesting paper read by John W. Read of Hodgensville.

SELLING SAWS.

A paper of considerable interest was that read by G. W. Clark of E. C. Atkins & Co., Indianapolis, Ind., on the above subject.

George A. Cubbage, of Leitchfield, read a paper of more than usual interest on the subject of

HOW TO DERIVE BENEFIT FROM THE ASSOCIATION.

Mr. Cubbage pointed out some of the many advantages secured by the members especially through attendance at the annual gathering. He urged the members to put their whole being into the movement and to get competitors to join and do likewise.

It was decided to make the

COMMITTEE ON LEGISLATION

a much more active one than it has been heretofore. Some of the subjects that will receive their attention will be:

A change in the exemption laws so that they will protect the merchant in place of the dishonest debtor; changes in itinerant venders' or peddlers licenses; garnishee laws; reduction in the license in selling pistols; etc. The laws of Kentucky provide that in order to sell pistols the merchants must pay an annual license fee of $100. This law is prohibitive, not of the sale of this class of goods, but of the sale of pistols by the merchant, as the catalogue house is a direct beneficiary and is supplying the demand and reaping the harvest in this field cleared of competitors. The state itself is losing practically all revenue from this source, where a modified fee would yield considerable income.

N. A. Gladding, Vice-President of E. C. Atkins Co., Indianapolis, Ind., urged the members to pledge themselves to bring at least one new member with them to the next convention. He spoke of the great good derived from the Association work, which is bringing manufacturers, jobbers and merchants into more harmonious relations.

ELECTION OF OFFICERS.

Officers were elected for the ensuing year as follows:

PRESIDENT, U. S. Shacklett, Fulton.
FIRST VICE-PRESIDENT, Paul Wagner, Louisville.
SECOND VICE-PRESIDENT, John W. Read, Hodgensville.
SECRETARY, John R. Sower, Frankfort, (re-elected).
TREASURER, A. Steitler, Jr., Owensboro (re-elected).

The Executive Committee is composed of the officers.

The following were chosen delegate to the National Convention: J. S. Ogden, Ashland, and John R. Sower, Frankfort; alternates, A. Stietler, Jr., Owensboro, and J. W. Mahan, Lawrenceburg.

Lewisburg will be the convention city again next year, the date of meeting will be set later by the Executive Committee.

THE COMMITTEE ON RESOLUTIONS, composed of John W. Read, J. C. Kirchdorfer, Albert F. Lamb and Henry Jansen, reported the usual resolutions of thanks, which were unanimously adopted.

Following adjournment many members accepted the invitation of the Belknap Hardware and Manufacturing Co. to make an inspection of its plant.

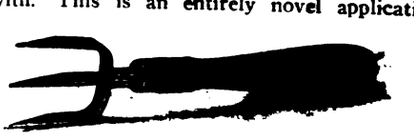
Thursday afternoon was devoted to a banquet given at the Galt House, at which Colonel Morris B. Belknap presided as Toastmaster, and a number of appropriate speeches were made by Mayor Paul C. Barth of Louisville, J. C. Frederick, Ex-President of the Association, A. Y. Ford and J. J. Fitzgerald of Louisville, as well as a number of impromptu speeches made by several persons present.

EXHIBITS.

In the parlors and many rooms of the Galt House there were a large number of exhibits present, both of the manufacturers and jobbers, and a very handsome display of goods was shown in each and every case.

DEATH OF FREDERICK T. TOWNE.

Frederick Tallmadge Towne, General Superintendent of The Yale & Towne Manufacturing Company and younger son of Henry R. Towne, the company's president, died at his home in Stamford, Conn., Sunday morning, February 4, of Bright's disease.



Mr. Towne was born in Stamford March 5, 1872, and after preparatory courses in Stamford schools and St. Marks' School, Southboro, Mass., entered the Massachusetts Institute of Technology. After leaving college he entered the works in Stamford and regularly worked his way up through the various departments, studying the business and methods of management, with the sole purpose of qualifying himself intelligently to make a specialty of a business then highly specialized.

At the time he had fairly qualified himself for serious work in the Yale & Towne works his father, Henry R. Towne, was still living in Stamford, and he became his father's assistant. Later, when his father transferred his residence from Stamford to New York, in order more effectively to direct the affairs of the company from its general offices, which were also transferred at about the same time to New York, he became first the assistant general superintendent and finally the general superintendent in charge of the entire management of the company's plant and responsible therefor directly to the president. He has held and ably filled the position thus implied during the past six or seven years.

In his home and social life, while possessed of a certain quiet reserve, with those whom he knew well he was cordial, sympathetic, a good companion and true friend. In the community where he was born, lived and died nearly every one in active life knew him personally and held him in high esteem. He was a member of the Suburban Club and Wee Burn Golf Club of Stamford, the Engineers' Club of New York and St. Anthony Club of Boston. He is survived by a widow and two sons.

STANDARD PRESSED STEEL ICE PICK.

The Standard Stamping Co., Albion, N. Y., are placing before the trade the Standard Pressed Steel Ice Pick which we illustrate herewith. This is an entirely novel application for the

STANDARD PRESSED STEEL ICE PICK.

purpose and one that promises to prove an effective one. It is ten inches in length, and is provided with three prongs of pressed steel heavily retinned and has handles 6 inches long, ferruled with the same metal, which makes a very substantial and useful tool that can be used either for an ice pick or garden fork.

BICYCLES AND THE HARDWARE DEALER, No. 3

When the Nineteenth Century dies and the Twentieth Century is called upon to carve an epitaph upon its tombstone, an epitaph must be carved extolling wonderful progress in easy selling Hardware specialty lines. In no other field has such marked development been known. During this entire century, advance has been an omnipresent watchword. One side line has followed another. To-day's effort has surpassed that of yesterday, and acted only as a stepping stone to the greater effort of to-morrow. It has been an age when the greatest instinct, the keenest forethought, the highest degree of excellence has triumphed in its respective specialty field. There has been little room for loiterers. The pace has been swift and fast and only the most masterful have remained to tell by results they have achieved, the story of their exertions and triumphs.

In no field has progress been more marked than in that of bicycle making and selling. It is the king of mounts. It is adopted as the journey companion. No life is perfect unless enlivened by the delightful exercise and health it helps to create. But, to give perfect enjoyment, the wheel must be a perfect machine. It must be perfect to look upon and perfect to ride upon. It must have ease of action and be supplied with that apparent feeling of response that makes the rider and the machine almost a single being.

The present bicycle manufacturers seem to be ever conscious of one duty—one ambition—something better—something truer—something more simple, lasting and satisfying. With bicycles of distinctive design, equipped with everything helpful to comfort and pleasure, the unanimous opinion among the trade is that the bicycle has been lifted up to a plane it has never risen to before. The bicycle of to-day is not only absolutely accurate in every detail, but in construction throughout, is most simple and easily mastered. The demand for good bicycles is constantly increasing as is best shown by the flood of orders pouring in and the insistence with which the general public call for new mounts. The time has gone by when a bicycle can be considered a luxury. It is entertainment—it is an out-door exerciser—it is an investment to prolong good health and cheer. The bicycle as a means of conveyance and an economizer of time makes it especially adapted as a vehicle for either pleasure or business purposes, for the use of men and women in all classes of life.

"But how am I going to learn to ride it?" is the first question the would-be cyclist is liable to ask the dealer who wants to sell him a bicycle. Riding a modern safety is quickly and easily learned, but where the prospective rider is inclined to be nervous, perhaps the following instructions may prove of value and assistance:

Get an old wheel, if possible; if not, take your new mount, adjust the saddle low enough for the ground to be easily reached by your feet while seated in the saddle. Remove the pedals, choose a level bit of road, get astride the saddle, push the wheel along until it has headway, then raise your feet from the ground, maintaining your balance until the machine finally compels you to place one or both of your feet upon the ground. Repeat this until you have learned to balance yourself and have acquired the confidences begotten thereby.

You will find it necessary in learning to ride, to unlearn much of your previously acquired knowledge regarding the art of balancing. The whole secret of wheel balance lies in doing just the reverse from what you feel inclined to do, namely, when the machine begins to incline toward the left, turn the steering wheel to the left; if you are falling toward the right, turn to the right. Once you have learned to do this so as to do it unconsciously, you are more than half way through your cycling novitiate. Endeavor to avoid sudden and violent pulls at your handle bar at this stage of learning.

When able to balance yourself on the machine for as great a distance as the wheel will run from the momentum given it by a shove from your feet, find a smooth road with a slight down grade and gradually take the machine nearer and nearer the top, as each succeeding trial gives you confidence. Steer as straight always as you can. After awhile, practice balancing on the step. Place your left foot on the step, giving a slight shove off down the incline with your right foot, raise yourself on the step, resting all your weight on the left foot, remaining in that position s long as the motion of the wheel keeps it upright.

When you can balance yourself with some confidence both in the saddle and on the step, start down the incline on the step and while in motion, glide smoothly into the saddle. The length of time required by the beginner to learn the art of balancing varies considerably, but usually it can be fairly acquired in three or four lessons of an hour or two each, and with ordinary caution, no falls need be experienced.

Having reached this stage, replace the pedals, raise the saddle a trifle, still however not so high that your toes cannot touch the ground start down the incline as in previous practice, and while keeping your attenton chiefly on the steering and balancing, feel cautiously for the revolving pedals beneath your feet. At first, try only to follow them around, and take your feet off at the first decided symptom of wobbling. After a little practice at this, begin to press gently on each pedal as it goes down, and you will soon learn to propel yourself.

Woman should take a long time to habituate her muscles to the new exercise; and even when she is perfectly at home on the wheel, she should remember her sex is not intended by nature for violent muscular exertion, and that bicycle riding is suited to her needs only for the reason that it spares any serious effort. Every time, therefore, that a woman at home on the wheel contemplates a series of long rides, she should enter on a course of gradual training. Disdaining this precaution, she is in greater danger than a man of subjecting herself to extreme exhaustion, muscular pains, general malaise and that form of fever which characterizes the abuse of exercise by subjects who are not properly prepared. And even when a woman has cautiously prepared herself and has trained for the work, her speed should never be that of an adult man in full muscular vigor.

Women should furthermore avoid excessive speed on the wheel; not only does fast riding require too much energy but it is too great a strain on the heart. Women are more readily winded; the heart is more sensative. We know that in muscular exercises which are too rapid and continuous, the heart arrests the athlete—it is not so much the muscular effort. Indulgence in rapid riding involves the imminent danger of foregoing all possibility of salutary gentle exercise.

A very usual mistake is for the bicyclist to ride machines which are too large. The advice of good and experienced riders—never to have the legs at full stretch when riding—is amply borne out by practical experience. In choosing a bicycle, the rider should ascertain that the middle of his foot, under the instep, touches the treadle, during the whole of its revoluteion. In that case—as the ball of the great toe is the proper one to tread with when in action—the knee need never be quite straight and consequently, the hip-joint also is a little bent. This is of great consequence, as the strain upon the groin is considerable when the leg is forcibly strengthened, and there is liability to rupture.

Another reason why it is dangerous to ride a bicycle with too long a tread is that, when the legs are obliged alternately to be at full strength, the pressure of the saddle comes mainly on the front part of the fork, where it is least easily borne: in fact, it is like riding on a rail. The body ought to be supported on the broad seat, and should rest on the hinder part of the saddle, not on the narrow part of the front, and it is impossible to avoid such a mistake if the treadle be not easily within the reach of the rider during the whole of its revolution.

It may be almost impossible to invent any exercise more calculated to call into play every muscle of the body than bicycling does. The simple act of pointing the toes, as in standing on tiptoe, calls into play something like a dozen muscles of the foot and leg; then the leg cannot be moved backward or forward without using some powerful muscles which are attached to the trunk. The whole leg is at work in propelling the bicycle and every muscle of the arm and body is constantly at work in retaining the balance and guiding the machine.

Regular exercise, in some form or other, is essential to the good health of everybody. It is impossible to estimate how much biliousness, gout, indigestion, accumulation of fat, and various other maladies are engendered by giving up active exercise. The boom of being able to mount the "iron horse" and get a peep of country and a breath of fresh, pure air is immense to those who are employed all day in large towns, and who, but for this steed, could not get away far enough in the time they have to spare after work is done.

In selling bicycles, put in an attractive line of floor samples. Try to make the line appeal to your customers and if your line of wheels is kept in new, clean attractive shape, your trade will soon begin to take an interest in the line.

Get rid of the notion that there is anything complicated or impossible about selling bicycles. Believe that so far as it applies to your trade, the selling of bicycles is easily within your power. Take up the line and go at it without any feeling other than that the successful and profitable selling of bicycles is nothing more than the use of your voice and proper showing up, the same as displayed in making sale of any of your goods. Then, knowing your line and the class of people you are dealing with, the balance of the selling problem is easy.

St. Louis, Mo. G. H. DIRHOLD.

ILLINOIS RETAIL HARDWARE ASSOCIATION

The eighth Annual Convention of the Illinois Retail Hardware Association was held at the First Regiment Armory, Chicago, on Tuesday, February 20, and the two following days. The convention was so well attended by the Hardware men of the state that at the close of the meeting it was announced that nearly 700 members were enrolled as against over 225 the year previous. This is a record for State associations never previously reached.

At the opening session on Tuesday morning the convention was crowded. The Rev. Austin D. Crite invoked the divine blessing. Mayor Edward F. Dunne of Chicago delivered the address of welcome, which was responded to by Ex-President Chas. H. Williams of Streator.

PRESIDENT'S ANNUAL ADDRESS.

President Frank B. McKenney of Rockford delivered his annual address from which we make extracts as follows:

Of course the catalogue house proposition and all those things have been taken up to some extent and at some length in all of these meetings. It has been said of General Grant that he did not have brains enough to know when he was licked and that was the reason

Frank B. McKenney, President.

Leon D. Nish, Secretary.

that he won the great civil war for his country, and I think that if the Hardware dealers and all other dealers in all the states of the United States did not have enough brains to know when they were licked and kept on fighting until they had the General Jackson (the catalogue houses of the city of Chicago) wiped out of existence it would be just as well. I hope we have got brains enough at least to keep on fighting along the lines we have been fighting on, not only fighting on our own lines but with other lines. It is my opinion that if all the grocery, dry goods, boots and shoes and other lines of industry would fight as industriously as this association and the other associations in the Hardware line that we would have them "going" some: and the most that I can say to you about the catalogue houses is to keep on fighting and you are hurting them all the time.

RAILROAD RATES.

Another thing that we have accomplished to a certain extent that has been a great deal of help has been our railroad rates, which have been materially reduced in the last year, and I expect that they will be still further reduced. We are certainly getting after the railroads through the head of our government at Washington. If we can keep him fighting and Governor Folk and a few others of his class I think in the course of five or ten years we will make a little showing.

CREDIT TO CHICAGO.

As far as this association is concerned I am pleased to state that it is through the efforts of the Chicago retail Hardware dealers of this city that we are meeting in this building and the credit is wholly due to them for this big exhibit, and this display has been one of the best things that this association or any association has ever had, and I hope that you will all appreciate it: and if there is anything that you can do to encourage these men that have been to the expense of coming here and giving us the exhibit they are giving, I sincerely hope that you will do so.

THE FIGURES.

Now we have increased this year in membership over last about 225 members, making in all a paid up full membership of 482 members, I think, or 485. That is a good showing, and the credit is wholly due practically to the insurance proposition that has been in here this year from Minneapolis. It has turned us in about 122 to 125 new members, and they are entitled to a part at least of your business. You get as good security for your investment as you can get and a rebate of from 25 to 35 per cent. each year, which is worth saving: and it is a benefit in a great many ways, not only financially, but in a great many ways helps along the association: but this next year we hope to see this association up to 1,500 people. We have, I believe, in this state about 1,800 eligible members to this association. We have about 500 here this morning and they are coming in every hour. You have got to keep going from start to finish; you have to meet the competitors not only in your own town but in all the bigger towns; you have got to sell your goods at a reasonable price and you have got to keep your expenses down; you have got to do everything you can to turn a cent you way, and there is no better place to get instructed as to how to do so than at your state conventions. I have received more good points from attending state Hardware conventions than from all the Hardware experience I have ever had. I don't care where the man comes from or how big he is or how near he is to the middle class. We believe he has got some points, if you get next to him, that he can tell you that you don't know, and you can tell him something he doesn't know. You take the good things and sift them out and take them home and you will find you have made your expenses and about a hundred per cent. added.

BE UP TO DATE.

In 1879 when I commenced in the Hardware business it required but a small stock of door knobs and a small assortment of this class of goods to meet the wants of the trade. Now to meet the wants of the trade in that class of goods you have got to have $500 to $700 invested. If you have got the goods you can sell them. If you have not got them your customer is going to send to the catalogue house. Now the best argument you can fire at the catalogue house is to have the goods and have them at a reasonable price; have your store cheerful and clean and be at it from 7 o'clock in the morning until you close your doors at night, and then you have got to be pleasant and agreeable to your customers and you have got to have the goods to show them, and if you have got the goods you can sell them. (Applause.)

CONVENTION COMMITTEES.

President McKenney then announced the following committees:

Nominations.—C. M. Hurst, Denver; D. M. Norris, Kankakee; E. B. Johnson, Kewanee; J. L. Smith, Chicago; T. C. Conners, Chicago.

Auditing.—Grant Porter, Chicago; Orion Howe, Streator; O. B. Stebbins.

Press.—M. R. Costello, Chicago; C. D. Warren, Chicago; J. P. Eckels, Decatur.

Location of Place for Holding Next Convention.—R. G. Scheurer, Vandalia; Chas. Maurer, East St. Louis; Wm. Bittell, Peoria; E. W. Howell, Dixon; Chas. Kruse, Richmond.

Resolutions.—C. A. Williams, Streator; H. G. Cormick, Centralia; Dan Holder, Centralia.

Special.—L. D. Ray, Belvidere; G. A. Engelhardt, Chicago; Wm. Gormley, Chicago.

The remainder of the Tuesday morning session was occupied by addresses of prominent Hardware jobbers and manufacturers, many of whom were present which included A. C. Bartlett, President of Hibbard, Spencer, Bartlett & Co., Geo. W. Trout of the Trout Hardware Co.; C. W. Asbury, of the Enterprise Mfg. Co., of Philadelphia, and Vice-President of the American Hardware Manufacturers Association.

Remarks were also made by Henry A. Taylor of Chicago, Sales Manager of the American Screw Company; W. H. Bennett of the Lawson Mfg. Co., Chicago; Charles Smith of the Charles Smith Co., F. F. Porter, Chicago; A. P. Reiter of Hibbard, Spencer, Bartlett & Co.; Wm. T. Gormley of Bullard and Gormley, Chicago, and Lazarus Kahn of F. & L. Kahn & Bros., Hamilton, Ohio.

The programme provides for morning sessions only, and this arrangement gives the visiting members opportunities to inspect the exhibits on the main floor of the Armory and to visit the salesrooms of manufacturers and jobbers in the city.

The Wednesday morning session was largely given over to a discussion of fire insurance. W. P. Lewis of New Albany, Ind., Treasurer of the National Mutal Fire Insurance Company, read a paper containing many valuable statistics favoring mutal companies over stock organizations. K. Nentson of the Retail Hardware Dealers' Mutual Insurance Company, Minnesota, also discussed Mutual Fire Insurance Companies, and said among other things that the lowest rate of fire belongs to the Hardware trade. He told of the great strides made by the Minnesota Company, which has saved as large a surplus since its organization as the losses amount to, and as a

Digitized by Google

result it hopes to return in the near future instead of 40 per cent. 60 to 70 per cent.

C. A. Peck, Secretary of the Wisconsin Mutual Fire Insurance Company, told of the benefits derived by the insured from that organization.

J. D. Kenyon of the Sheldon School of Scientific Salesmanship, was present and delivered an interesting talk on "The Science of the Selling Side of Trade."

Grant Porter read an able paper prepared by Z. T. Miller, former President of the Illinois and National Associations, who was prevented from attending the convention.

On Wednesday afternoon S. R. Miles of Mason City, Iowa, gave a stereopticon talk on the catalogue house question. At this session Secretary L. D. Nish of Elgin delivered his annual report, from which we give extracts:

SECRETARY'S REPORT.

The secretary has used the influence of this association in conjunction with the Merchants' Association of Illinois for the passage of equitable laws and in the interest of the retail merchant in general.

The secretary has kept in close touch with the National Association and the Joint Committee and furnished the necessary data for Illinois.

Early in last year the Minnesota Retail Hardware Mutual Fire Insurance Company compiled with all the Illinois laws necessary to be admitted to do business in Illinois, but did not get into the field to do active work until last fall, and then they sent Mr. Neutson, and through his efforts some 140 odd new members have been added to our roll.

The association has been a gainer in actual number of new members through the efforts of the Promotion Committee, which was appointed at the last meeting of the association, and to them is due the thanks of the association; and to the knights of the grip we are certainly indebted for the long list of new members which they have sent in. They have kept the secretary posted on prospective members throughout the State and seem always willing to put in a good word for our association. The Illinois Association

WAS NEVER IN BETTER CONDITION.

than it is to-day, having added to its roll of membership during the past year and at this convention a grand total of 317 new members, making a paid-up membership of 600 or over, and all this notwithstanding the lone cry of one trade journal that the Illinois Association's affairs were on the wane. It is to be hoped that each member when he goes home from this convention will remember to get his competitor in line, for it is by members we acquire the financial wherewithal to push our claims.

I believe you can look back over the seven years of our existence and see wherein we have changed our ideas for the better. We no longer attack problems before us with an aggressive whine, but with an aggressive ring true as steel, born of the knowledge of the power of well known weapons in master hands. Advertising, systematizing, better salesmanship will nullify the effects of some of the forces that are working against us and win for us a competency in our old age.

The Report of Treasurer George Engelhardt showed the finances were in good condition.

MR. KRETSINGER'S LETTER.

A letter was read from F. S. Kretsinger, president of the American Hardware Manufacturers' Association, which was in part as follows:

It affords us pleasure to congratulate you on conducting successfully an organization composed, as it is, of active, earnest workers, whose calling is not only an ancient and honorable one but one in which intelligence and ability are marked requisites.

By an interchange of views and concert of action you have done much to correct evils and to minimize competition, as well as to improve conditions generally, and not only for your own individual members, but for the trade at large. Furthermore, you have doubtless learned that an enlarged acquaintanceship among others in your line of work and a free interchange of views on questions pertaining to the occupation brings both pleasure and profit.

We sincerely trust that the result of your deliberations will be a betterment of trade conditions among yourselves and also with those from whom you draw your supplies.

As an association and also as individual manufacturers we have your interests sincerely at heart, and it is our desire to so conduct our affairs as to merit the good will of every distributor, retail and wholesale alike.

Although a large part of our product finds a consuming market through the channels of the jobbers, yet we recognize that the retailer is an important factor, whose influence and co-operation are of value to us—he it is who displays our wares, explains their use and praises their merits to the actual user, whose influence reflects favorably or otherwise.

Our association, as perhaps you know, has a membership making so varied a line that the manner of marketing their wares naturally differs. Some rely largely on direct trade with you, and have little or no trade with the larger buyer, the jobber: some again look altogether to the wholesale trade to distribute their product, and others manufacture such articles as pass directly into the hands of the customer.

Under the circumstances it naturally follows that our association can only act in a general and advisory way in our relations with each other and with the trade at large. For most of the lines of materials and merchandise produced by our members you are the natural and proper distributors to the user of the same, and so we have interests in common to no small degree.

Rest assured, please, of a cheerful willingness and a desire on our part to co-operate with the trade in its improvement and its upbuilding, and we shall avail ourselves of every favorable opportunity so far as it is possible to do so for an organization composed, as ours, is, of industries differing in a very great degree, as ours do.

THE QUESTION BOX.

At the Thursday morning session the Question Box in charge of J. P. Eckles was taken up and the following, among other questions were discussed.

Does it pay a Hardwareman to display 5 and 10 cent articles in his store?

This was discussed by several of the members, and it was their opinion that it was unwise for retail merchants to install a 5 and 10 cent department, inasmuch as they believed that such a line of goods was out of place in the Hardware store.

Is it good policy to make concessions in prices to farmer's clubs on staple articles?

One of the members stated that he did not believe in making a reduction on regular stock. However, a granger in his district came to him and wished to have reduced prices on a large amount of Twine, Wire, Nails, &c. The orders were placed directly with the manufacturers and the commission on this business was given to this dealer. In this way the benefits were derived by the merchant himself, and the odium of making reduced prices was not known in the community as it would have been had the stock been taken from the store.

Is it more effective to handle and push one brand of goods than to carry several brands?

Mr. Eckles said that he has endeavored to put in a line of special brands only and in this way is getting away from competition entirely. He said that he has found this very profitable and intends to expand in this direction.

What is a healthy limit for the expense account as compared with total sales, or what proportion should be figured between the two?

One member carefully outlined his method of recording all expenses whereby at the end of the month he was in position to tell at a glance the expense attached to conducting his business. One of the delegates said that he figures his expense at only 10 per cent., but this was considered very low. Another stated that he always added 10 per cent. to the cost of his goods as the expense for conducting his business and then added a further per cent. for his profit. Another merchant said that he had a talk with a large Hardware retailer in Chicago who employs 60 people, who told him that his average expense was 25 per cent.

Should merchants sell at the same price to everybody or make different prices to different customers?

It was the consensus of opinion that only one price should prevail, and the merchants that had followed out this policy found that in the long run they benefited by having their store known as a trading place where only one price prevailed. Another said that he gave a discount of 5 per cent. on cash sales of stoves, &c., but does not extend this to other lines.

Should a merchant make his remittances by local check or bank draft?

Half of the merchants that discussed this question were paying by local checks and found that remittances by bank drafts were more satisfactory and that no exchange was charged, as the banks were only too glad to extend them that courtesy.

Has any good come out of your Hardware association?

This was discussed at length, and the session almost resolved itself into a testimony meeting. In towns where a number of Hardware merchants are in business and members of the association it was found that better feeling exists, and that price cutting and other unwise competition has been largely eliminated.

RESOLUTIONS.

The report of the Resolutions Committee was adopted as follows:

That we thank the officials of the National Retail Hardware Association for their untiring efforts in our behalf during the past year.

That we heartily indorse the action of the Joint Committee in its efforts to better the conditions of the trade.

That we congratulate our State officers on the splendid results obtained in the past year.

That we extend to the officers and members of the Chicago Retail Hardware Association our sincerest appreciation of the efficient work they have done for us.

That we thank the ladies of the Chicago Retail Hardware Association for the royal manner in which they have entertained our visiting ladies.

That we greatly appreciate the zeal displayed by the manufacturers and jobbers in making their displays and the universal courtesy of their representatives in charge.

That we heartily indorse the attitude of President Roosevelt in his efforts to provide a square deal for everybody in the business world, great or small.

That Governor Deneen commands our commendation for his acts and attitude toward the commercial interests of this great State of Illinois.

That the thanks of the convention be tendered to his Honor, Mayor Dunne, for his kindly welcome.

That we fully appreciate the additions to our membership through the efforts of the solicitors of the Minnesota Mutual Fire Insurance Company.

That the committee recognize the responsibility and economy of the National and all the various State mutual fire insurance companies. They are saving us 25 to 40 per cent. of all premiums paid and we have the example of long established mutuals in Rhode Island that return 82 per cent.

That we pledge ourselves to work individually and vigorously to secure new members during the ensuing year.

That we thank the loyal trade press for the many courtesies extended us.

That we adhere unflinchingly in our position to parcels post legislation.

That we believe 1-cent postage on first-class mail is due our citizens rather than that Uncle Sam should go into the express business to the detriment of the first-class mail, which is the great mainstay of all business.

NEXT CONVENTION.

The committee on places of holding the next convention reported in favor of Chicago. The report was adopted.

The Executive Committee was also instructed to confer with the National Retail Hardware Association, so as to have this body hold its convention next year in Chicago during the same week the State Association meets. In this way it is believed that the Hardware Conventions would occupy a solid week.

INCREASE IN DUES.

The report of the Legislative Committee which was adopted recommended an increase of the dues from $3.00 to $4.00, which becomes effective January 1, 1907.

FREIGHT COMMITTEE.

In the report of the special Freight Committee they reviewed the work that had been accomplished and the reduction in freights granted by the railroads on all shipments within the state so that its efforts were not in vain.

G. R. Lott, President of the Chicago Retail Hardware Association, to whose efforts the success of the meeting was largely due, was thanked in behalf of the Association by Frank B. McKenney, and in response said that the members of the Chicago Association had gained much experience which would be of benefit to them next year.

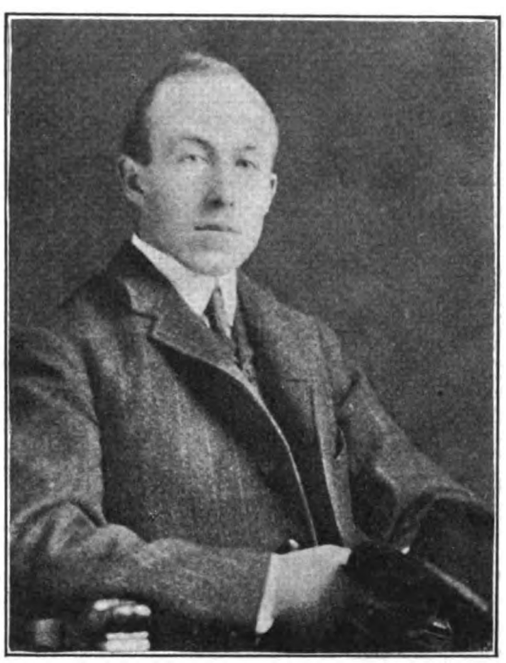
THE OFFICERS

for the ensuing year are as follows:

PRESIDENT, Frank B. McKenney, Rockford.
VICE-PRESIDENT, F. Giessing, East St. Louis.
SECRETARY, Leon D. Nish, Elgin.
TREASURER, H. E. Gnadt, Chicago.
EXECUTIVE COMMITTEE.—Three-year term: T. J. Mathews, Mt. Vernon: D. M. Norris, Kankakee. Two-year term: G. McCurdy, Bloomington.

The following standing committee were chosen:

LEGISLATIVE.—C. H. Williams, Streator: Geo. Harns, Peoria: J. L. Smith, Chicago: C. Hauss, East St. Louis: Henry Murphy, Galesburg.
INVESTIGATING.—Orrin Howe, Streator: H. A. Uehren, Aurora: F. D. Johnson, Kwanee: C. E. Maurer, East St. Louis: C. H. Albright, Newton.



(Concluded on page 29.)

CONNECTICUT RETAIL HARDWARE ASSOCIATION

The fourth annual convention of the Connecticut Retail Hardware Association was held in New Haven, Tuesday and Wednesday, February 27 and 28. The attendance was a very good one. It was the first time in which the Connecticut Association had ever held a two days' session, and the entire success of the result showed that it was important they should never hold a shorter meeting.

The first day's session opened at 1:30 o'clock P. M. in the Chamber of Commerce. The meeting was called to order by President Charles G. Agard. The appointment of committees by the chair was the first thing in order, as follows: On resolutions, W. A. Church, Derby; Eli C. Birdsey, Meriden; F. T. Terry, Ansonia; John M. Paige, Naugatuck. On nominations,

George J. Bassett, President.

F. L. Lightbourn, New Haven; George D. Buck, Naugatuck; F. W. Hallock, Derby; G. M. Merwin, Winsted; Frank W. Palmer, Stamford. Question Box, W. H. Burchell, New Haven; Irving C. Treat, Hartford; Charles M. Beach, New Milford; W. U. Harris, Waterbury; A. H. Abbe, New Haven. Constitution and By-Laws, L. L. Rosenberg, New Haven; W. D. Williams, Hartford; W. A. Church, Meriden.

After the reading of the minutes of the last meeting and ordinary routine business, President Charles G. Agard delivered his annual address.

THE PRESIDENT'S ANNUAL ADDRESS.

With this our fourth annual meeting permit me to congratulate you on our successful association. I am pleased to say we have made large gains in our membership, have had more interest shown in our several meetings. Representing as we do nearly three-fourths of the Hardware dealers of the State, and with our start to-day of a two days' meeting, I feel sure it will be advantageous to all of us. I know I voice the sentiments of all of you that we can have that friendly feeling that is bound to exist at least twice a year for our mutual benefit and welfare.

It has been my greatest endeavor to increase our membership as well as your interest this last year, and your secretary and myself both feel proud of our efforts so far. There should be more who ought to take advantage of the opportunities that the State Hardware Association offers them, affiliating as we do with the National.

Our Grievance Committee, only organized the latter part of July last, is doing good work. Those who are taking advantage of the Hardware insurance make savings of from 40 to 50 per cent.; it speaks for itself alone as being one reason for holding members in the Hardware Association.

The power of the National Hardware Association is already an established fact, and without it we would be as individuals and at the mercy of the manufacturers. And another thing, at our conferences you will meet and hear many of the most successful men in the Hardware business. Our association needs just such men of help, experience and backing in carrying out our plans, and your business will be improved by our conferences and protected as well.

For the past three annual meetings we have been promised faithfully that a national officer would be present with us. We have been, unfortunately so, disappointed. But to-day, gentlemen, we are fortunate to have with us, and our guest as well, the most prominent member of the National Hardware Dealers' Association, a gentleman of sterling worth, and we shall take pleasure in listening to his remarks, words full of wisdom and practical advice.

I will take this opportunity to thank you for the support given me the past year. I asked for it and insisted upon it, and, gentlemen, I got it. And I assure you I shall always look back upon this as a personal honor, representing as I did the most intelligent and most satisfactory and most sought for, either as a body or individually, that are to be found in our grand old Commonwealth.

The report of Treasurer Lewis B. Crosby, showing a remarkably prosperous financial year, was accepted, after which Secretary James De F. Phelps presented his annual report, which we give as follows:

Charles G. Agard, Ex-President.

SECRETARY'S ANNUAL REPORT.

Our present membership is 65 firms, ten new firms having been added this year, three firms resigning. I have collected for dues during the year $192, for assessments $143; balance on hand March 7, 1905, $14.94, and have turned over to treasurer $366.94. Your directors and officers have had several meetings during the year, the expense of which I believe it proper that you should know is borne by themselves. It costs the association nothing for the time of its officers and directors or for defraying expense of their meetings, of which there are anywhere from three to five each year, and it is also well to say that this is done without one word of complaint, nor do I know that it is thought of. Their only thoughts have been along the line of what can we do to better the Connecticut Hardware Association members?

I report this not simply to give you information, which doubtless you all have, but to stimulate you to a more earnest endeavor to be present by all means at our two meetings held each year. This is little for you to do for what you get in return both financially and socially. Thus you can show your appreciation of the efforts of your president and associate officers and directors. I would recommend this for your more serious consideration. Take the time. If you are too busy you can afford to secure the services of more clerks. If not you can get next to and absorb some of the inspirations that are present at our conventions and be the better fitted to be the busier when you do get back to your desk.

We have about two-thirds of the total number of the firms of the State on our rolls, and the Membership Committee and your secretary have sent, during the last few weeks, four articles, including the *Hardware Bulletin*, to every Hardware dealer, with some result, but not with the result it should, it seems to me. There should not be the feeling of apathy among the dealers who are not members.

GENERAL BUSINESS.

The Grievance Committee made its report and told the work accomplished during the year, especially in the matter of wood

Digitized by Google

screws. This was followed by some discussion. Mr. Birdsey asked to be relieved of the chairmanship of the committee and Frank T. Terry succeeded him. Irving C. Treat of Hartford was added to the committee, Mr. Birdsey retaining his membership.

A telegram was received from the Ohio Hardware Association, the oldest in the United States, to the Connecticut Association, "assuring them of high esteem and an earnest desire to co-operate for the good of Hardware merchants." A return message of congratulation was sent to the Ohio Association in session at Canton.

THE CATALOGUE HOUSE QUESTION

came up first in the form of letters from several manufacturers, in which they spoke of their efforts to prevent the sale of their goods to these houses. These letters included the Winchester Repeating Arms Co., New Haven, the Savage Arms Co., Utica, N. Y., and the American Axe & Tool Co., Glassport, Pa.

President W. P. Bogardus of the National Retail Hardware Association read a paper on the Catalogue House Question, which embodied his views.

James De F. Phelps declined to serve again as Secretary, but the association insisted upon his continuing his valuable work and voted to create a new office, that of Financial Secretary, to take a portion of the duties of the office.

ELECTION OF OFFICERS.

The following officers were elected for the year:

PRESIDENT.—George J. Bassett, The John E. Bassett & Co., New Haven.
FIRST VICE-PRESIDENT.—Irving C. Treat, Clapp & Treat, Hartford.
SECOND VICE-PRESIDENT.—Ell C. Birdsey, Birdsey & Raven, Meriden
SECRETARY.—James De F. Phelps, F. S. Bidwell & Co., Windsor Locks.
FINANCIAL SECRETARY.—F. H. Farrar, Bilsh Hardware Company, South Manchester.
TREASURER.—Lewis B. Crosley, G. M. Williams Company, New London.
DIRECTORS.—For three years, F. W. Palmer, Lockwood & Palmer, Stamford; Frank West, Bridgeport; J. L. Carroll, Winsted; C. H. Preston, Preston Bros., Norwich.

President Bogardus read from the *Iron Age* of February 22 the article on the proposed new Postal Laws. Taking this as his text he strongly condemned any proposition for Parcels Post as a fraud on the face of it.

F. Alexander Chandler, Secretary of the New England Hardware Dealers' Association, brought up the successful effort that killed the legislation which would have made it possible to mail matter by number on rural free delivery routes.

George J. Bassett advocated one cent postage as the first-class rate, and putting each class on a basis which would make it self-supporting.

It was voted that the Secretary be delegated to represent the association at the convention of the National Retail Hardware Association at Chicago.

In the evening the members to the number of fifty attended the theatre.

On Wednesday morning the first event was a visit to Yale University, which occupied the time from nine until ten o'clock.

At the Wednesday morning session it was voted to increase the annual dues from $3.00 to $5.00. There were addresses made at this session by T. James Fernley, Secretary-Treasurer of the National Hardware Association; R. R. Williams, Hardware Editor of *The Iron Age;* W. B. Simpson, Huntingdon, Pa., Secretary of the National Hardware Dealers' Mutual Fire Insurance Association.

EXHIBITS.

There were a number of Hardware exhibits at the Hotel Davenport, which was also the headquarters for the members, the entire second floor of the building being so occupied.

CORBIN CABINET LOCK CO., New Britain, Conn., have recently published a new Catalogue and Price-List of Keys and Key Blanks, Tags, Strikes, Rings, Etc. The Catalogue is in the form of a large book of 215 pages, cloth bound, and measuring 11 by 8 inches. On the first page may be seen a view of the Company's Offices and Factories, following which is a very carefully prepared Index to the contents of the catalogue, while several pages are devoted to Price Lists of Keys and Key Blanks, Brass Key Checks, Steel Split Rings, Strikers and Name Plates and Key Assortments. The catalogue has been made very comprehensive, showing many new designs, and particular attention is called to the many additions which the Company has made to their line recently. The book is a valuable one to those interested in this line and will be useful to select from. They state as follows: "In addition to sending our new catalogue to Hardware jobbers and dealers generally, it is our intention to send a number of copies to the locksmiths trade, but with the distinct understanding that their orders will be executed through the dealer only." For further information, illustrations, prices, etc., write for this most interesting and instructive catalogue.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

WILL AND NO WITNESSES. BANK ACCOUNT AND NO WILL.

QUESTION.—Is a will legal if drawn on a regular printed form, such as stationers issue, and signed by the testator only, without witnesses, and will the executor have full power to carry out its provisions?

(2) A single man over 21 years of age has an account in a savings bank. If he dies intestate, who will obtain his savings, he having parents and brothers and sisters living?

REPLY: A will is not legal unless it is subscribed *at the end* by the testator and witnessed by two witnesses. The testator's signature must be made in the presence of each of the attesting witnesses or acknowledged by him to have been so made to each of the attesting witnesses. Furthermore the testator at the time he signs the will must declare in the presence of the witnesses that it is his last will and must request the witnesses to sign their names thereto as witnesses and they must sign at the end of the will. If these formalities are not complied with, the will is perfectly void, and the executors will not have power to carry out any of its provisions.

(2) Section 2732, sub-division 7 of our Code of Civil Procedure provides: "If the deceased leave a father and no child or descendant, the father shall take one-half if there be a widow, and the whole if there be no widow."

COMPOSITION WITH CREDITORS.

QUESTION.—The firm of A. B. & Company failed and made an assignment for the benefit of creditors. Afterwards several of the creditors entered into a composition agreement, agreeing to accept thirty-three cents on the dollar in full settlement of their debts. To induce one of the creditors to enter into this agreement, one of the partners without the knowledge of the other creditors, agreed to pay him sixty-six cents on the dollar for his claim. Now that the other creditors have found this out, have they any remedy?

REPLY: So scrupulous are courts in compelling creditors to observe good faith in cases of this kind that any security given to one of the creditors without the knowledge of the others better than that which is common to all is held to be void and inoperative; and no contract or security secretly given, whereby one of the creditors obtains an advantage peculiar to himself, can be enforced. Furthermore the composition agreement as to all the innocent parties becomes void and they retain their right to enforce their original claims as if they had never entered into the agreement. It follows that the innocent creditors have the right to treat the composition agreement as discharged and sue for the full amount of their original claims.

GUARANTEE—WHEN VALID THOUGH ORAL.

QUESTION.—"A" hired "B," a contractor, to build a building for him. "B's" workmen after the building was partially built refused to go ahead until their pay was guaranteed. "A" the owner of the house to prevent work being stopped, said to the workmen "Go ahead and do the work and when its through I will see you are paid." The workmen finished the building and the contractor cannot pay them. Can they sue the owner?

REPLY: This is a promise to answer for the debt of another person and the statute of frauds provides that to be valid it must be in writing. The case you state, however, comes within one of the well recognized exceptions to the general rule because the promise to pay the contractor's debts was made to subserve the owner's own purpose. The owner had an interest in the performance of the work and the completion of the house. His primary object in promising to see the workmen paid was not to guarantee the contractor's debt, but to get his own house built. Where the promise to pay is founded on a new consideration beneficial to the man making it, the promisor comes under an independent duty of payment. Such a promise can be enforced even though not in writing.

ILLINOIS RETAIL HARDWARE ASSOCIATION—Concluded.

FREIGHT.—J. L. Hudson, Springfield; L. Kahn, Petersburg; Jacob Ballet, Bloomington; C. M. Hurst, Decatur.

The following delegates to the national convention were selected: H. G. Cormick, Centralia; F. B. McKenney, Rockford; Fred Glessing, East St. Louis; Daniel Holder, Centralia.

The convention closed with the singing of "America," and the benediction was pronounced by Charles H. Williams.

EXHIBITS.

The exhibits of the manufacturers and jobbers on the main floor and balcony of the Armory had never been equalled at any state convention. Nearly 175 spaces were occupied and more than 200 been secured.

In appreciation of the value of such extensive displays, which in this instance reached the proportion of a Hardware show, it was decided to meet again in Chicago next year and the Coliseum will be procured and ample room provided for the manufacturers and jobbers to show their goods.

NEW YORK STATE RETAIL HARDWARE ASSOCIATION

The fourth annual convention of the New York State Retail Hardware Association was held in the city of Binghamton on February 20, 21 and 22. Eighty new members were reported as added during the past year, bringing the membership up to nearly 280. The attendance at the convention was a very good percentage of the membership were present as well as many representatives of manufacturers and jobbing houses who were greatly interested in the proceedings. To the persistent efforts and thoroughly energetic labors of Secretary Foley, the growth of the association and good attendance may be attributed.

The exhibit feature of the convention was considerably more in evidence than any previous occasion, many suites of rooms at the hotel being retained by the jobbers who desired to see and entertain their customers.

The regular sessions of the convention were well attended by the assembled delegates and President Sherwood ably presided over them and conducted the business in a manner that was gratifying to all concerned. Great pleasure was expressed on every hand by the able manner in which he had handled the work appertaining to his office during the past year.

THE QUESTION BOX.

A committee headed by Second Vice-President L. G. Mattison, Newark, had charge of the Question Box and devoted much care and attention to the subject. It was presided over by Secretary Corey of the National Association, whose efforts to make it interesting were indefatigable. Several of the questions and the treatment they received, we give herewith.

Does it pay for a retailer to send a special representative among the farmers to sell Hardware and other commodities?

This question brought out what was perhaps the most interesting discussion, and developed some difference of opinion. The opinion was expressed that if one merchant in a town or section did it others would think they must, and as there would not be enough business to go around, it would be a losing proposition for all. Several merchants, however, reported that they were using this method of getting in touch with the farmer trade and were satisfied that it paid.

A BASIS FOR CORRESPONDENCE.

One explained that he had his canvasser bring in a list of all persons he ran across who wanted something. This list was made the basis of active follow up correspondence which generally resulted in getting the people addressed into the store. If he did not succeed in selling them the article wanted in the first place, he was sure to sell them something afterward. To be

AFRAID OF OFFICE EXPENSE,

he said, is a great mistake. Get a stenographer, and go after business with business like letters as well as with newspaper advertisements, circulars, etc. The rural telephones now stretching further and further into the country districts are also a boom to the merchant. Use them. The farmers must be cultivated to keep them buying at home. On the whole, it seemed to be the consensus of opinion that if a Hardware merchant had a good, prosperous country neighborhood to work on, and especially if he sold implements, it would pay him to have a canvasser out at least during certain portions of the year.

Does it pay to keep a 5 and 10 cent counter in a country Hardware store?

Many merchants who had tried were very positive in their statements that it did pay. They often bought goods with that department in view, finding it well worth while to increase the size of the department. Ten cent articles can be bought 10r from 50 cents to $1 a dozen, averaging perhaps 80 or 85 cents. Many articles in a Hardware store can easily be marked down to place on such a counter. The larger it is the more attention it attracts and the more likely people are to look it over and buy an odd thing that attracts them. Trade on this counter is of course almost entirely cash trade—a fact that makes it all the more desirable.

How can we best handle requests for donations from churches, charitable societies, etc.?

Cause for complaint seemed to arise more from appeals and schemes from out of town than from local charitable organizations with which merchants were familiar. A method referred to with favor was to refer applicants to a committee of local merchants from all trades, agreeing to support the action of this committee. This is especially feasible in towns where merchants' associations exist.

Does it pay to push a cheap quality of goods against low-priced competition?

Many argued that it does, but against this position it was urged that if an article fails to give satisfaction the purchaser will never remember what he paid for it but only where he bought it, giving that store an unfavorable impression which will never be effaced from his mind.

R. U. CONGER'S ADDRESS.

"Salesmanship" was the subject of an interesting address by R. U. Conger of the Sheldon School of Scientific Salesmanship. Although somewhat abstract in character his remarks were

C. P. SHERWOOD, EX-PRESIDENT.

of a helpful nature and were listened to with much attention.

THE POSTAL QUESTION

was discussed by Charles W. Burrows of the publishing house of Burrows Bros. Co., Cleveland, he being First Vice-President of the National Board of Trade. His figures and calculations, showing the abuse of the postal laws by a certain class of publications, were in the nature of a revelation to many present.

MUTUAL FIRE INSURANCE ASSOCIATION.

"Mutual Fire Insurance" was the subject of an able and convincing address delivered by C. H. Miller of Huntingdon, Pa., President of the National Hardware Mutual Fire Association. He gave figures to prove that Mutual Insurance would save $27,000 a year to the present members of the New York Association, and a much larger amount if participated in by all the Hardware merchants of the State.

OFFICERS FOR 1906.

The following officers and directors were elected for the ensuing year:

PRESIDENT, Louis J. Ernst, Rochester.
FIRST VICE-PRESIDENT, L. G. Mattison, Newark.
SECOND VICE-PRESIDENT, John Holley Bradish, Batavia.
SECRETARY, John B. Foley, Syracuse.
TREASURER, F. E. Pelton, Herkimer.
DIRECTORS: Charles P. Sherwood, White Plains; Charles E. Wethey and W. D. Garry.

The following delegates to the National Convention were chosen: J. B. Foley, Syracuse; F. E. Pelton, Herkimer; George W. Rockwell, Horseheads. Alternates: J. A. Andrews, Salamanca; F. G. Houk, Owego; James C. Williams, Baldwinsville.

SECRETARY'S REPORT.

The report of Secretary Foley shows an accession of 80 new members during the year, bringing the total on February 17 up to 257. After the convention opened quite a number of new applications were received, making a total list of about 280.

REPORT OF THE TREASURER.

F. E. Pelton, of Herkimer, covered receipts of $1,635.39, and disbursements of $1,113.81, leaving a balance on hand of $521.58, and showing the association to be in a very satisfactory condition financially.

CONVENTION COMMITTEES.

The following committees were appointed by the President:

RESOLUTIONS.—Thomas F. Hobbes, Utica; H. B. Koenig, North Tonawanda; George Johnston, Fulton; Charles J. Fix, Buffalo; Willard Larkin, Cobleskill.

Digitized by Google

CREDENTIALS.—J. B. Foley, Syracuse; William R. Walton, Saranac Lake; F. F. Dorance, Camden.
RECEPTION.—J. J. Douglas, Binghamton; J. H. Callahan, Binghamton; F. G. Houk, Owego; T. W. Stevens, Oneonta; C. W. Youngs, Elmira; C. A. Hammond, Horseheads; E. Jerome Woodford, Candor; H. D. Hull, Troy; W. D. Hollowell, Penn Yan; F. D. Smith, Cortland.
FINANCE AND AUDITING.—Louis J. Ernst, Rochester; W. T. Olin, Perry; J. J. Douglas, Binghamton.
TRANSPORTATION.—F. E. Pelton, Herkimer; Charles L. Steininger, Buffalo; J. F. Shults, Coshocton.
CONSTITUTION AND BY-LAWS.—John G. Ferres, Johnstown; Geo. W. Rockwell, Horseheads; A. E. Towne, Saratoga Springs; John R. Taylor, Little Falls; John Holley Bradish, Batavia.
PRESS.—H. Jason Knapp, North Tonawanda; W. D. Britton, Ogdensburg; J. B. Foley, Syracuse.
PROGRAMME.—Louis J. Ernst, Rochester; L. G. Mattison, Newark.
QUESTION BOX.—L. G. Mattison, Newark; William Fowler, White Plains; Irving Van Voorhis, Cobleskill.

RESOLUTIONS.

The following resolution on the death of H. D. Hull was recommended by the committee and adopted by unanimous vote of the convention:

We learn with keen regret of the death of H. D. Hull, of Troy, the first president of this organization. Mr. Hull was one of the pioneers of the trade in New York State and his life was a splendid example of business integrity and high character.
We recommend that this meeting express its appreciation of his services, both to our association and to the general trade, and that the secretary be directed to spread this tribute on the records of the meeting and send a copy of same to Mr. Hull's business associates.

JOHN B. FOLEY, SECRETARY.

Resolutions were also passed expressing the sentiment of the association in favor of "the present established system of trade distribution," as opposed to centralization, which is fostered by catalogue house methods. One-cent letter postage was formally indorsed, but opposition was expressed against any legislation tending to the establishment of a parcels post.

PRESIDENT SHERWOOD'S ADDRESS.

The annual address of the president, C. P. Sherwood, of White Plains, was, in part, as follows:

The object of these annual meetings of ours is to get together and discuss such methods and plans as will improve and protect our business of retail Hardware. One of the direct benefits we offer now is mutual insurance to members, which results in a much less rate than the old line companies will give, and saving of this will be an item. Of the indirect benefits the results have proven that many have already been received, and more are to be obtained for the whole retail Hardware trade throughout the country as a result of the efforts by the former officers of our State Association, the various other State associations and largely by the National Association, and last, but not least, in getting together in these our annual meetings and becoming acquainted by exchange of ideas, by getting wider views and by opening up

THAT BROTHERHOOD OF FEELING,

broadening our lives, making new resolutions, advancing our friendship, our business, our lives and our prospects at home and throughout the country. We need to inaugurate some plan or system to create an interest between annual meetings and to enlist every retail Hardware dealer in the State to join us.

Co-operation is the keynote to-day in business of every kind. Merchants are tending to get together for the betterment of each other. Our aim as retail Hardware merchants should be to unite our efforts so that our trade shall not be diverted into other channels and the distribution of Hardware and kindred goods be confined to the retail Hardware trade.

The growth of this association has ever been on the increase, the interest to-day is greater and merchants are awakening to the fact that the New York Retail Hardware Association is a certainty. More have joined the past year than any previous year, and many more would belong to-day if we could rightly reach them. We have tried this year in a small way to solicit members and for a short time we had a solicitor. We found encouraging results, but it will be necessary to make still further efforts to show our brothers who are still outside the error of their ways and enlist them in our ranks. Much could and should be done by each and every member to reach out about them and get their next door neighbors to become members. If every member to-day had brought another, see what a throng we would have! And it could have been done. Yet we are encouraged with the prospects and with the results of our efforts, and with knowledge of the past year's work we trust our next year will double our membership and the interest and benefits derived be greater.

OUR FINANCES ARE PROSPEROUS

and with the careful management of so able a treasurer show a very satisfactory balance.

We have a large army of earnest friends going up and down the land to-day who are largely interested in our success and prosperity. They would fill the greatest hall in the State if we could get them together in one body, and we want them with us.

THEY WILL DO MORE TO INCREASE OUR MEMBERSHIP

and create a greater interest in the association than any other source, and before we adjourn arrangements should be made so that they will be invited to become members of the association in some way.

The question of

CATALOGUE HOUSE COMPETITION

is being strongly discussed and action is being taken by all lines of trade to compel these houses to sell certain lines of goods at fair prices. Manufacturers and jobbers alike are becoming awakened to the necessity of protection to the retail merchant, who, as stated last year by one of the eloquent speakers who addressed you, "pays the local tax, contributes to local enterprises, subscribes to local charities, takes produce in exchange, carries his customers when they need credit, and gives his life to local upbuilding and educational influences." The catalogue house absolutely pays no local taxes, does not contribute to local charities, does not take produce in exchange, does not carry any credit, gives no influence of any kind for the building up of the community.

The greatest thanks for the success of our meetings and work this year should be given our worthy secretary, who straightens out the tangled paths, assists and counsels the president and all the committees, performs much work for each of us, and by his kindliness and courteousness wins his way to our hearts. Our wish is that the association shall continue to have the advantage of his ability and experience many more years, that our progress may continue and larger gains result from his broad and liberal management.

THE SUCCESS OF THE ASSOCIATION

depends more on the work of the secretary than all the rest of the officers together. That officer should be made as near a permanent official as possible, and a fair recompense for his services should be made.

THE TRAVELING MEN.

"Traveling Men" was the title of an interesting paper read by A. E. Towne of Saratoga, which was greatly enjoyed. He showed a full appreciation of the serious side of a salesman's life and work, as will appear in the following extracts:

One has said: "Formerly when great fortunes were made only in war, war was business; but now when great fortunes are made only by business, business is war." In this warfare the traveling man is both the scout and the soldier of his house. Armed with prices and samples he penetrates cities, towns and villages, skirmishing for trade; he meets others of his kind; if there is a big sale to be made there is an action. Some try direct assault. Others execute flank movements through their local agents. Still others try the stratagem of friendship, of the secret society, and even of rebates that savor of frenzied finance until some one secures the order—the spoils of this merry warfare.

The chief field of action, however, is in the store of the merchant.

THEY WORK HARD TO SECURE HIS ORDERS

and harder to capture his good will. Such fights often last for years. but the traveling man is patient, courageous and indefatigable. He has built up great enterprises and splendid fortunes for others. Once their numbers were few, but railroads came bringing cheap transportation, and as the mileage increased their numbers grew—to-day they are an army.

Let us now look at traveling men as we know them. As a rule, they are a bright, energetic, substantial, clean sort. We like to do business with them; they are our friends. Their suggestions are timely;

THEIR FUND OF INFORMATION IS USEFUL,

sometimes valuable—but there are others. There is the lofty representative of a trust who condescends to take your orders. There is the pompous friend who is surprised when you decline to take up his particular good thing when your competitor is literally losing sleep in his anxiety to secure the agency, as he leads you to believe. There is the enthusiastic friend who rushes in between trains breathlessly to let us in on a good thing before it is eternally too late. The last two Hardwaremen have bought at one time or another. These men are so fertile in imagination and their word painting is so vivid that occasionally

Digitized by Google

we forget that there are very few retail dealers who have ever had to adopt the desperate expedient of building libraries and endowing colleges to escape the terrible risk of dying rich.

The drummer to-day while hustling for new customers carefully cultivates those he already has. A nicely developed territory is desirable, for it yields results. Such a policy is developing a fine class of traveling men, who are conspicuous for fair dealing and who, recognizing a common interest, work with the merchant for a common end.

The traveling man's

VOCATION IS NOT AN EASY ONE.

The work is hard and there is constant worry. A competing house may be cutting in here, a customer may be dissatisfied. He must look out for both to the best of his ability. Besides merchants are not all saints. With their list of non-profit paying goods constantly increasing, buyers are looking for low prices and do not always scruple as to how they get them. So the salesman must know his business, and he does. He learns all the dealers' tricks of "jewing down" fully as well as the merchant knows all the salesman's tricks of "booming up." That the traveling man makes mistakes is natural, for he is human; he cannot always do as he would like, being hampered sometimes with red tape. His house may be constantly putting new things on the market and new things do not always go with the public. The merchant, wary from an expensive experience, is hard to get at; he even grows distrustful of the salesman. If he is burdened with dead stock long enough he may in time come to treat the drummer as his natural enemy. Then, too, a merchant who is looking after his collections, heading off deadbeats, bolstering up the work of the incompetent clerks, and at the same time sustaining the crossfire of half a dozen traveling men,

SOMETIMES GETS A LITTLE PEPPERY

along toward closing up time. So the drummer must have judgment and tact and use them both. On the other hand, much is due the traveling man. He is a recognized and important part of the machinery of distribution, and though he sometimes markets goods that are unsatisfactory he introduces the latest improvements and the best sellers. If something new comes up he is the first to hear of it, and his judgment is worth considering. For these reasons the merchant who wants to keep up to date will be in touch with him. Few of us can spare the time to go to market;

THE SALESMAN BRINGS THE MARKET TO US.

He is an invaluable friend, ready with suggestion and anxious to help building up his customers' business because it increases his own.

There are "little tin gods" in business who waste the salesman's time, whether they buy or not, just to gratify a notion of their own personal importance. Still others, tired, nervous or busy, as the case may be, put off the interview they dread, so wasting the salesman's time. If for any reason one does not wish to buy he can say so, and the traveling man who is a gentleman will not trouble him long.

We have named some of the peculiarities of this interesting creature and a few of his virtues. As a class he is improving The law of the survival of the fittest is at work weeding out the undesirable and leaving the intelligent, reliable, resourceful class of fellows who are splendid business men and whose co-operation is invaluable to us as merchants.

"JUST A LITTLE NONSENSE."

An entertaining address was that of H. Jason Knapp of North Tonawanda. Mr. Knapp had for his subject, "Just a Little Nonsense," and from it we give the following extracts:

We may wear a long face because some fellow does not pay up as he agreed to, but we might better laugh, for it will have a better effect upon the next customer we wait upon, for we all know that "you catch more flies with molasses than with vinegar."

If you have one of those blue days, when everything seems to go wrong, go out in the back yard and throw stones at the barn until you feel better. Don't under any circumstances venture to wait on a customer while in such a mood. Cultivate the "Sunny Jim" spirit, it will help your business, and when a customer asks to see something that is on the top shelf or upstairs bring down an assortment so they may have something to pick from, and do it cheerfully. Nine times out of ten they will buy the first one, but if you show them a variety they will go away feeling satisfied with their purchase and pleased with your treatment and obliging ways.

Nearly all other retail merchants act as if the Hardwareman

WAS MAKING A BARREL OF MONEY

on every line he handles, and consequently the department, dry goods, grocery, drug and other stores all keep adding lines that belong and have been for years sold from the Hardware store. Don't be discouraged at this. If they put in some of your lines and sell cheap just to make people dissatisfied with you and your prices, just "bob up smilingly" and put in some of their lines, a cheap line to meet their price and

A GOOD LINE FOR COMPARISON.

Then sell the cheap line right down to cost, only be sure to do the cutting on the side lines and not on staple goods. Above all things do not discontinue any line of goods just because some other store has put it in and is selling it cheap. "Keep what you get and get what you can." Add new lines and keep right up to date. Some may say it is bad policy to cut prices, and so say we all if you just cut for the sake of cutting, but where

YOU MUST FIGHT TO HOLD YOUR OWN

and you have right on your side it would be suicide to sit idly by and see the business get away from you. If you have to fight, fight for your rights.

Marshall Field said: "Cultivate a happy expression and a happy manner; feel it, mean it; the advantage is wonderful in every way." If you wish to take the drudgery out of your work do it cheerfully even if it is not congenial; do it in the spirit of an artist, not an artisan. Keep the reputation of the Hardwareman for cheerfulness, honesty, square dealing and decency up to the highest standard.

C. E. WOEPPEL'S ADDRESS.

An interesting and suggestive address was made by C. E. Woeppel of Weed & Co., Buffalo, who advocated the division of the store into departments. Mr. Woeppel pointed out the advantages of doing so, and described the methods which might be pursued and put the plan into operation.

THE BANQUET.

The Banquet was a complimentary one tendered by the manufacturers, jobbers and local Hardware dealers. It was quite an elaborate affair and was thoroughly enjoyed by every guest present, inspiring many compliments for G. G. Stewart of the Pittsburgh Steel Company, upon whom devolved all necessary arrangements in detail. Retiring President Sherwood gracefully presided, introducing the important jobbers present.

JOBBERS, MANUFACTURERS AND OTHERS PRESENT.

The jobbers of the State were largely represented at the convention as was evident from the number of representatives present.

NEW CONSTITUTION.

The report of the Committee on Constitution and By-Laws was presented by its Chairman, J. G. Ferres of Johnstown. An entire new Constitution was proposed to the session, showing in its strong, well-ordered and comprehensive articles the great amount of time and thought which the committee had devoted to the subject. One or two matters had been left open for decision by the convention, notably the selecting of a place of meeting. Only a brief discussion was necessary, however, and the report was unanimously adopted.

EXHIBITORS.

Upwards of forty manufacturers exhibited at the convention, and among the lines were a number that were shown with liberality.

HORTON'S TRANSPARENT WINDOW SIGN.

Horton Mfg. Co., Bristol, Conn., have prepared a Window Sign of attractive appearance, which is furnished to dealers selling "Bristol" Steel Fishing Rods, on application. We present herewith a reduced copy of the same, made of translucent ma-

terial showing how handsome an article it is, and mounted as it may be on glass, or framed so the light can be shown through the brilliant coloring, and made to form a pretty picture. The artistic effect gives it an attractiveness worthy of emulation.

THE REPLY COURTEOUS.

A well-known Judge was standing at the door of a ballroom, when a very beautiful woman passed him. "What a lovely woman!" said the Judge, but so loud that the lady overheard it. Turning her head, she recognized the speaker. "And what a good judge!" she said.

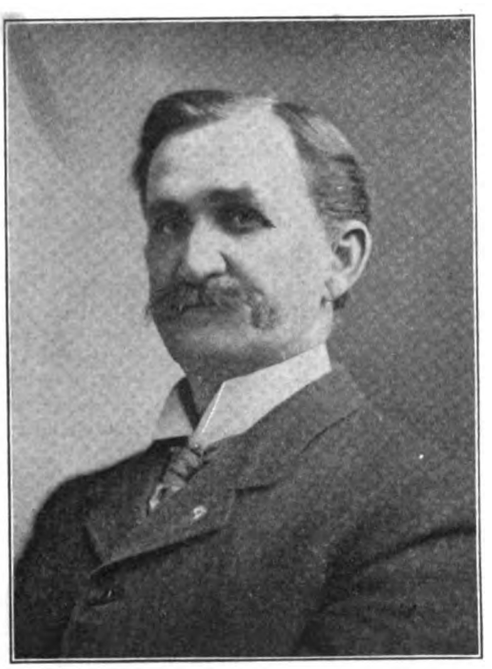
MISSOURI RETAIL HARDWARE ASSOCIATION

The eighth annual convention of the Missouri Retail Hardware and Stove Dealers' Association was held at the Coates House, Kansas City, on Wednesday and Thursday, February 20 and 21, about 60 delegates being in attendance.

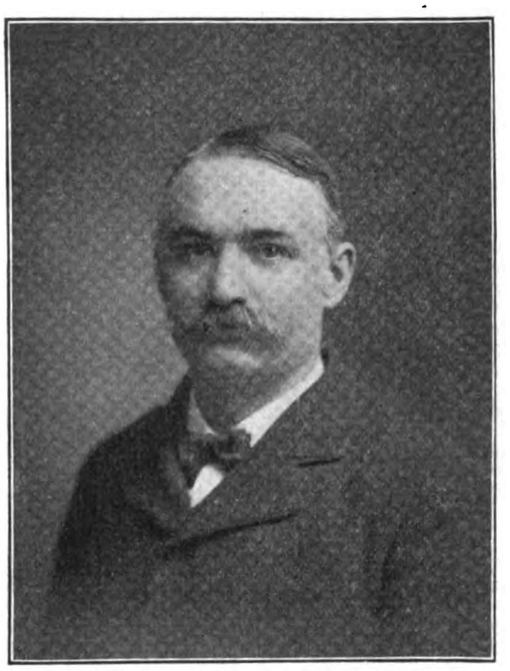
ANNUAL ADDRESS.

After calling the convention to order President Taylor Frier of Louisiana delivered his Annual Address.



This was followed by the Secretary's Report.

SECRETARY'S REPORT.



BY FRED. NEUDORFF OF ST. JOSEPH.

Mr. Neudorff's report was as follows, in part:

One of the duties incumbent on your secretary is the presentation of an annual report. I confess that my preference in the matter is to beg to be excused at this time fro mmaking or attempting to make a report. I have served the association for five terms. In and out of season I have labored assiduously, conscientiously, faithfully and withal economically to build up the association to where it is—far, far from where it should be.

TAYLOR FRIER, PRESIDENT.

FRED. NEUDORFF, SECRETARY.

We have enrolled probably one and a half tenths of the Hardware dealers of Missouri. We have had probably four-tenths in the association at different times. It is not an uncommon condition to find four-tenths to seven-tenths of the dealers in some of the States north of us in their State associations, and some of them have not received one-tenth the urging our people have had in the past four years.

There are reasons for this, and the main one, I take it, is the fact that the majority of the Hardware dealers of Missouri are more vitally interested in the Implement and Vehicle branch of their business than they are in the Hardware part, and, being members of an Implement dealers' association, they feel they cannot afford the additional $3 dues per annum to join with us.

We have strange people in Missouri; they have in every State, but the per capita of strangeness is greater in some States than in others, and Missourians take the belt, bake shop and all. I am very frequently asked by dealers in Hardware the question, "What has the association done, what can and what it aims to do." Such questions naturally are very depressing, and I often wonder how long the inquirer has been in the business and whether he reads the trade paper. It seems suffcient for myself to know that in this country there is an alert, aggressive, progressive, intelligent, honest body of my fellow tradesmen who are standing as a bulwark of strength to look after my interests, fight my battles for a fair, square chance to make a living. I know that in unity there is strength, and that the knowledge of this unity among us is a powerful deterrent force against evils that would prevent our business success. The merchant who cannot agree to these truths has not enough initiative thought in his make-up to cause much of a ripple on the sea of life.

Some people are ruled wholly by the selfish, personal viewpoint of life. To them the question is, "Where does it benefit me?" And these are so narrow that the broader viewpoint, that "which benefits my brother, also blesses me," is entirely obscured. Our association has taken a patriotic and progressive step in an attempt to personally benefit the Hardware merchants of this State in its insurance branch, and that company exemplifies the value of a little unity, which, if it had consisted of double the portion, would have netted us all fully 55 per cent. rebates on our insurance expense.

A paper on "Advertising a Retail Store," by O. W. Johnston, of Marshall, was read and appreciated, and well discussed.

ADVERTISING A RETAIL STORE.

The fundamental principle of advertising is to create in the minds of as many people as possible a desire to buy what is offered for sale. In this wonderful age of progress, these strenuous times of restlessness, of unusual activities, of new adventures and innovations in the business world, it behooves us to catch the spirit of enthusiasm, to wake up to the importance of adopting all modern methods of merchandising. This was not so necessary when our only competitor was in our own town and as slow and unprogressive as ourselves.

A different condition confronts us. We are in direct competition to-day with the large city stores, who reach our customers daily through the large city papers. We cannot find fault with our city merchant for going out in this legitimate way for business with

HIS FLAMING PAGE ADVERTISEMENT,

so well displayed and written. He rather deserves our commendation and emulation. Our competition does not stop with the city stores, but we are in direct competition with the large catalogue houses. I firmly believe that what trade they may have taken from us is due largely to their successful method of advertising. Their large catalogues full of pictures and minute descriptions of each article appeal strongly to the consumer. However, a careful study of this proposition convinces us that the enormous expense, which runs into the millions to issue the catalogues alone, compared with the low rate of expense and advertising we have to pay, places us in a position to do as well by our customers on the same quality of goods.

Yes

IT COSTS MONEY TO ADVERTISE, BUT IT PAYS.

Advertising alone will not bring the desired results; you must have a well selected stock, bought at the lowest possible price, well displayed; a clean, bright and attractive store, where your customers find prompt and courteous treatment. And you should adopt the motto of "short profits and large sales," always having the interest of your customers in view, never deceiving them, giving the article advertised and at the advertised price. Do these things and we guarantee that your sales will increase if your advertisements are well written and well displayed. Your

HOME PAPERS ARE YOUR BEST MEDIUMS;

use them freely and constantly. You cannot get the best results when you stay out of the paper three or four months at a time. Change your advertisements often.

Digitized by Google

Do not forget to use your show windows; they will sell a great many goods if properly looked after. The demonstration or exhibit idea we believe to be a good one, including such as cooking exhibits and heating stove demonstrations.

This is an advertising age. You cannot afford not to advertise. And remember the best results come from a well written and well displayed advertisement in your home paper. Do not get the foolish idea in your head that you can write such an attractive advertisement that people will come to your store and pay you more for your goods than they can buy them for elsewhere.

Keep your prices down, advertising up. Your

PROFITS MUST COME FROM INCREASED SALES.

All large retail dealers and jobbers who have made a success will tell you that they spend a great deal more money advertising to-day than they did twenty years ago, and that they sell on a closer margin and at the same time give out the statement that their annual dividends or net profits are larger than before. The large increase of business that comes to them by diligent advertising and using all modern and up-to-date methods of merchandising more than offsets the additional expense.

In a discussion which followed Mr. Johnston's paper Secretary Neudorff, Vice-President Hahn, J. L. Boehl, Frank H. Mayer, B. E. Hickson, H. J. Brunner, U. L. Coleman, F. P. Haus and others participated.

An interesting point was made by Secretary Neudorff in explaining how the St. Joseph Local Association combined its forces in local advertising; each advertisement being composite in its character was headed with a specific guarantee of the association. Circulars and window displays, personal letters, fence advertising, were all effectively used by the speakers, and a vigorous campaign of advertising was prescribed as the best remedy for the mail order evil.

LOCAL CREDIT ASSOCIATION WORK.

During a discussion of the garnishee and lien laws W. C. Lang of Webster Grove told the success which followed the formation of a Local Credit Association, in which all but two of the merchants of the county were enrolled. The plan he adopted was described as successful in weeding out dead beats, and in making honest but improvident buyers more careful. That the people of the county were benefited quite as much as the merchants because of a better understanding of the value of credit.

An interesting discussion here followed on the topic "How Best to Sell Paints," a discussion entered into by A. H. Gruendlar, R. H. Meyers, W. C. Lang, W. H. Hahn and others. The conclusion was reached that the sale of white lead and oil to painters nearly always involved loss, while the sale of ready mixed paints for cash to painters or consumers alike was one of the most profitable adjuncts to the Hardware business.

SALE OF FURNACES.

Secretary Neudorff and Vice-President Hahn, R. H. Meyers, F. H. Mayer, J. A. Feffer and others spoke on the subject of "Furnaces and Heating," and the general sentiment was this is a highly important branch in the Hardware business and could be made very profitable because so many farmers have reached a degree of prosperity and education where they are no longer satisfied to heat their homes with stoves.

"HOW BEST TO SELL STOVES."

F. P. Haus of Iberia, for 38 years connected with the Charter Oak Stove and Range Company of St. Louis, read an instructive paper on "How Best to Sell Stoves," which was enjoyed very much, for it gave good practical information on a popular subject.

BUILDERS' HARDWARE.

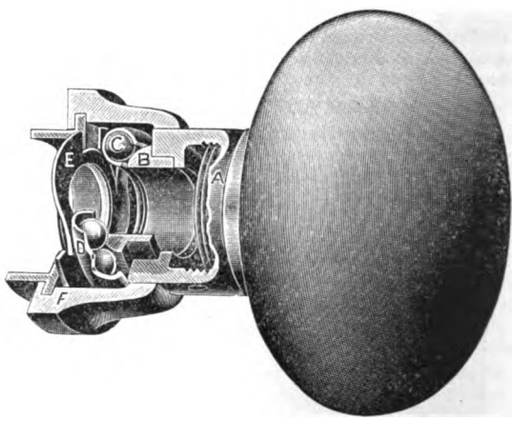
A vigorous discussion of this topic finally resolved itself into an experience meeting as to the inroads of jobbers who sold direct to contractors and consumers or to racket stores.

"HARDWARE CONDITIONS; PAST, PRESENT AND FUTURE"

was discussed by W. H. Hahn, who fearlessly attacked jobbers who sold at retail and who sold Hardware to grocers, druggists, racket stores and other competing dealers. He held that any Hardware merchant made a mistake who made a feature of advertising or pushing jobbers' special brands, because in so doing they were inevitably creating competition for themselves.

A motion by O. W. Johnston to the effect that the Missouri Hardware Association request all jobbers and manufacturers of Hardware to refrain from selling any but legitimate Hardware merchants, was carried without a dissenting vote.

(Concluded on page 45.)



RUSSWIN BALL-BEARING KNOBS.

WITH COMPENSATING ROSE.

RUSSELL & ERWIN MFG. CO., New Britain, Conn., and 43-47 Chambers street, New York, has recently brought out an improved design of Bronze Door Knobs, which, being ball-bearing in its construction, and having a compensating rose, gives it many advantages not possessed by any similar on the market. Anyone who has applied a lock set to a door knows the difficulty of adjusting the knobs so that they will neither bind nor shuck, when, as is so often the case, the roses are not in perfect alignment. The spring has an adjustment of 1-16 inch on each knob and will compensate for a considerable variation in the application of the trim to the door, bringing the knobs in perfect alignment and the ball-bearings in even contact with the cone. The principal result obtained is perfect action of knob under conditions which would render any operation of the regular type of knob impossible.

DESCRIPTION OF PARTS.

A—Outside or connecting sleeve, cast bronze.
B—Hardened steel cone, bearing at all points on the balls.
C—Hardened steel balls.
D—Hardened steel ball race.
E—Hardened steel compensating spring.
F—Cast bronze thimble or rose.

RUSWIN BALL BEARING KNOB.

Ball-bearing shanks and compensating roses make a closer adjustment of knobs possible and make sqeezing, binding or slow action impossible.

"COLUMBIAN" FLOOR HINGE.

The Columbia Hardware Co., Cleveland, O., are manufacturers of the "Columbian" Floor Spring Hinge, which we illustrate herewith. The box containing working parts, Fig. 1 and 2, which sets into the floor, is just the depth of a double floor (1¾ in.) This shallowness is a great advantage, for if it is required to set the box over a joist or I-beam, no cutting into

FIG. 1.

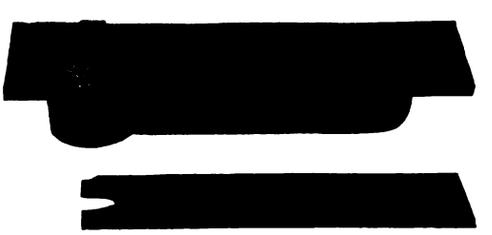


FIG. 2. FIG. 3.

same is necessary. The box, while it necessitates cutting into the floor, is just the depth of a strip of flooring, and the working parts in it are covered and protected from dirt and moisture by a neatly finished top plate, Fig. 3. The hinge operates through the action of a strong compressed spring, whose tension may be adjusted by removing top plate. No removing of hinge or door is necessary. The loose top pivot is another desirable feature of this hinge. By inserting a nail or thin tool in slot of top door part, the top pivot, Fig. 4, which is held in place by a spring, may be raised and the door released in an instant, without disturbing the hinge or its tension. The hinge is simple and compact, and the ball bearing feature contributes to its smooth, noiseless action. It also reduces the strain and jar on door to a minimum. The simplicity of the hinge is such that any person can understand its workings, or take it apart if necessary. It is easy to apply, and once applied it will give long and satisfactory service. The hinge, which is supplied plated in a variety of attractive finishes, is described in catalogue No. 18, which may be had for the asking.

OHIO HARDWARE ASSOCIATION

The twelfth annual convention of the Ohio Hardware Association was held at the Auditorium in Canton on Tuesday, Wednesday and Thursday, February 27 and 28, and March 1. The attendance was a record-breaking one, and it was thought that of the 600 members 250 delegates were present at the opening session on Tuesday afternoon.

TUESDAY AFTERNOON SESSION.

The convention was called to order by the President, John F. Baker of Dayton, at 2:30. Rev. O. B. Milligan of the First Presbyterian Church, Canton, was introduced and he invoked the divine blessing.

A. R. Turnbull, Mayor of Canton, was introduced by Presiden Baker, and he welcomed the delegates in a graceful speech, which was ably responded to by the President.

After calling the roll President Baker announced the following committees:

ON RESOLUTIONS.—P. E. Snyder, Blanchester; Mr. Thompson, Cambridge; M. E. Redblack, Oakwood.

ON QUESTION BOX.—N. C. Alton, Lorain; B. H. Coe, Youngstown; F. C. Massey, Osborne.

ON NOMINATIONS.—H. C. Wiseman, Springfield; F. C. Weir, Stubenville; Adam Bretch, Dayton; E. N. Baldwin, Fayette.

ON LAWS RELATIVE TO THE HARDWARE TRADE.—W. B. Martin, Mansfield; E. L. Harris, Columbus; Mr. Carl, Shreve.

C. S. JOHNSON, PRESIDENT.

MEMORIAL COMMITTEE.—James Bell, Roscoe; Mr. Meinerding, Ft. Recovery; Robert Armitage, Attica; Mr. Sparks, Wilmington.

President Baker stated that the convention would be called to order promptly on the minute the next morning at 9:30 o'clock.

The convention then adjourned for the day.

WEDNESDAY MORNING SESSION.

The morning session was called to order by President Baker promptly at 9:30. After some preliminary work, reading letters and telegrams, the President delivered his Annual Address as follows:

ADDRESS OF PRESIDENT JOHN F. BAKER.

With the beginning of the present session, the Ohio Hardware Association completes the eleventh year of its existence. From its very inception, it has had a continuous and healthful growth, ranking the foremost of all Hardware organizations in the Union, and when we reflect that it is

THE LARGEST ASSOCIATION IN THE COUNTRY

that does not include stove and implement dealers in its membership, we may safely say that it is the largest body of retail Hardware dealers in the world.

The members who attended the first meeting at Columbus in 1894 were enthusiastic in their hopes that the initial conference would be the forerunner of many successful and memorable meetings, but I doubt if the most sanguine predicted such signal success.

The last meeting which was held at Dayton, was without doubt one of the best we have had, yet the officers and executive committee in conference agreed that it was possible to eclipse all former efforts at the next convention. With this end in view, the present session has engrossed the attention of the executive committee, and our able, efficient and tireless secretary, from the adjournment of the convention at Dayton last March unto this present day, and we now sincerely hope that when we shall have closed this meeting it will go down in history as being the most successful we have had.

I take it that with very few exceptions, the year 1905 has been a prosperous one in the Hardware trade. Inquiry develops the fact that

THE ENTIRE COUNTRY WAS PROSPEROUS TO A HIGH DEGREE,

and as the year closed the opinion was universal that 1906 would surpass its predecessor.

Our membership now numbers 600. We should have at this time 1,000 members, but the Ohio dealer moves slowly. He is closely related to his eastern brother, who does things very deliberately, more so than the western dealer, and yet we must not complain, and will not, for we are having a good solid, substantial growth. To one who has seen it grow from its very inception I cannot but be greatly pleased with our association. To meet and greet the dealers of the state once a year is to me a genuine delight and a great privilege, that I am unable to express in words. I trust you may all enjoy this pleasure, as much as does your presiding officer.

Since last we met death has again invaded our ranks, and taken from us a number of our members.

I cannot tell you how greatly shocked I was to learn of the death of Mr. T. J. Morris of Lima, who was the first president of our association.

I now call to mind the first time I met him at the initial meeting at Columbus, and how I was attracted to him by his kindly, gentlemanly manner. Mr. Morris made a fine president. He was courteous and considerate, and in speech and dress was neat to a fault; notwithstanding the fact that he had not been a dealer for some years, he retained his membership with us, and was present at the meetings, that he might continue the friendship he had formed in previous years.

THE CATALOGUE HOUSE QUESTION

and the post parcels bill should and will have some attention at your hands. Regarding the former, I suggest that the discussion of this important subject be such as will inure to the benefit of the retail Hardware dealer, and as to the second subject that we take some decisive stand, and present an unbroken opposition to any plan which has for its end the enactment of the post parcels law.

You have already noticed the fact that the Hardware and kindred exhibits are now shown in one building. We were extremely fortunate

F. A. BARE, SECRETARY.

in finding a location, in which we could not only make our headquarters, but hold our daily sessions, and at the same time give abundant space for these exhibits. I doubt if a more successful and satisfactory exhibit has ever been made at an annual gathering, and trust that you may find sufficient time to compliment our friends by making an inspection of their wares.

The twelfth session is now formally opened, and we shall proceed to the consideration of business in a business manner, and as benefits business men. It will be the constant aim of your presiding officer to have every moment occupied, and it is his wish that consistent with good order and beneficent results, the fullest freedom will be granted to one and all.

To those who have never attended any of our sessions, we extend a hearty welcome and to those who have been numbered with us in former meetings, we bespeak their co-operation that the fraternal spirit which is ever predominant at these meetings shall be in evidence every moment of our stay. To this end let every man deem it his duty and call it a privilege to form the acquaintance of every other man present.

HARDWARE SALESMANSHIP.

At the completion of the address President Baker introduced W. C. Holman of Chicago, editor of *Salesmanship*, who addressed the convention on the subject of "Hardware Salesmanship." Mr Holman said in part:

The same principles of salesmanship apply in the Hardware business as in other lines of trade. What is salesmanship any way? The art of selling goods at a profit. A big word "Salesmanship," simply the art of selling goods at a profit, the ability that a man or concern had to sell goods; not merely to sell them, because that requires no ability to sell a thing at less than value, but to sell at a profit. Hardware salesmanship, of course, is selling something at a profit.

SALESMANSHIP, LIKE ALL OTHER ARTS, IS AN EVOLUTION.

It is not a thing that is fully born into being complete. It is a thing grown from a small beginning, like a tree coming from the seed.

Continuing he said: A man who has a knowledge of the principles of salesmanship is generally to be found at the head of the business.

He said that the Japanese were successful in their fight against Russia because they were scientific in their methods.

He said further: There are two things necessary to sell goods: first, you have got to have the goods; secondly, you have got to have a man who wants them. Then, you have got to supply the connecting link. You have got to make him know that you have got them, and you have got to make him come in and get them. To understand how to sell him you must know the principles of salesmanship. In addition to knowing your goods, you have got to know the public that buys the goods. You have got to know how to put it up to them.

There is a way to approach a man. There is a way to get a man's

Digitized by Google

interest and attention, and the way to get it is to appeal to a man's selfish interest—to put it up from his point of view.

SALESMEN ARE BORN, BUT THEY CAN BE MADE BETTER

by the study of scientific principles of salesmanship—a knowledge of men. It is necessary to have a systematic method of realizing on your goods, of analyzing the customers.

He referred to the success of the late Marshall Field of Chicago, whom he said was a successful salesman, and a student of human nature.

The speaker said further: A man to succeed in business must think; he must know his business; he must reason. He cannot go along haphazard; he must have strong beliefs and enthusiasm; he must make his salesmen believe in his concern and in his product.

QUESTION BOX.

The Question Box was then opened and was participated in to a considerable extent. A few of the questions, which some of the members desired to know how to settle, were the following:

"Is it a good thing to have an understanding between the dealers of a city or town on the prices of staple articles?"

"Which is the most beneficial, to cater to the commercial traveler and pay his salary and expenses, or purchase direct from the wholesaler and get the benefit of their experience and visit his establishment?"

"What per cent. profit must a Hardware man have in Ohio to make the business profitable?"

"Should a Hardware merchant speculate on future orders, or take the chances on the markets at the times he is in need of goods?"

"What clerks pay the largest dividends to the merchants, married or unmarried men?"

"Is it to the welfare and interest of the general Hardware dealers to abandon the old established custom of list and discounts, and establish net prices on such goods as Stanley Rule and Level Co., on rules, planes, and other goods, bolts, screws, etc.?"

"Does a tinshop, roofing and spouting in connection with a Hardware store help Hardware trade? Does it not belong to the Hardware trade?"

"What is the best way to mark selling price on goods, in plain figures or characters?"

"Will it be profitable to a small Hardware store to carry goods at prices to meet the catalogue house goods? Would it be best for a country Hardware man to sell strictly for cash, so he can meet the catalogue house price?"

At this interesting work the rest of the afternoon was spent.

THURSDAY MORNING SESSION.

Nearly the entire morning was devoted to Fire Insurance. The convention was called to order promptly by President Baker at 9:30, and it was moved and carried that the Association immediately go into a committee of the whole to consider the report of the OHIO HARDWARE DEALERS' INSURANCE COMPANY. C. W. Jewell of Utica was selected as Secretary. George M. Gray, Secretary and Treasurer of the Ohio Hardware Dealers' Mutual Insurance Company, read his report which was an interesting one.

NATIONAL DELEGATE REPORTS.

The regular business of the convention was resumed with President Baker in the chair. The report of the delegate to the meeting of the National Retail Hardware Association being called for, C. S. Johnson of that committee made his report, which concluded as follows:

We urge you one and all to carefully read the National Bulletin and

KEEP IN TOUCH WITH THE MANUFACTURERS

and jobbers, who are our friends. We all know firms who are loyal to the retail Hardware dealers, and we in turn should be loyal to such concerns, and as members of our different state organizations and especially as individual members of the Ohio association, the first of its kind.

WE MUST NOT LAG OR GROW WEARY,

but must be up and doing and keep our secretary well posted at all times. Be not afraid to write him a few lines, if only such once a month. The 24 cents spent thus during the year will more than repay you when you meet in convention assembled. Likewise, we would like to impress upon you the importance of keeping in touch with the national secretary, as he needs the ammunition and encouragement of all.

Write to him, and if you have any kicks coming, any words of cheer, and if you have anything in the way of a news item be sure and pass them up to him, as it takes work to produce a bulletin such as we have to-day.

In conclusion I wish to urge that we back up our secretary in the attendance at these annual meetings and see that he has sufficient help that he may realize during the year upon all the good features that will be presented at the secretaries' meetings during the annual conventions of the national association.

THE QNESTION BOX

was then resumed with more question.

THURSDAY AFTERNOON.

The convention was called to order promptly at 2 P. M. The Treasurer, L. F. Stahler, made his annual report, which showed that the total receipts for the year, including the balance originally on hand, was $2,625.00 and the total disbursements were $2,197.43; leaving a balance on hand of $427.57.

Secretary F. A. Bare, of Mansfield, then presented his annual report.

ANNUAL REPORT OF SECRETARY.

To my mind one of the highest compliments that can be paid to the Ohio Hardware Association is the fact that every man of the original thirteen organizers has stayed with it so long as he was in business, has been an ardent and an enthusiastic supporter of the organization without cessation.

The makers of our constitution showed their wisdom when they said in Article 1, "The object of this association shall be the mutual benefit of the retail Hardware merchants of Ohio by promoting their interests and securing their

FRIENDLY CO-OPERATION."

This, gentlemen, puts the responsibility of this organization upon the individual members.

You will agree with me that in every city or town in our state there is almost without exception a Hardware merchant who is a prominent and influential citizen, who takes an interest in the welfare of the state as well as in the development of his own town. Now, suppose we could have in this organization every such representative man in the state, and carry it further—suppose the leading Hardware merchant in every town in the United States were an active worker in his own state association, and through it affiliated with the National. Suppose the National secretary were to notify every state secretary of the proposed pending dangerous legislation, the state secretary in turn notify an active, influential, wide-awake citizen of every town and hamlet in his state, every one of these gentlemen so notified, telegraph or write his representative in Congress and both of his United States senators.

We had a practical demonstration of this thing last fall when the Fourth Assistant Postmaster General, McGraw, issued an order to all postmasters in the United States: First, number consecutively all rural mail boxes; second, deliver mail to them when addressed merely to box number. This order was surely meant for the good of catalogue houses. The national secretary notified the state secretaries, the state secretaries in turn entered protest at Washington and wired association members all over their states to do likewise. What was the result? The Fourth Assistant Postmaster General's desk was buried under protesting telegrams and postmasters over the United States were at once notified to suspend the order until further notice.

Look at the long list of prominent and representative jobbers and manufacturers of the United States, who refuse to sell catalogue houses. Now, gentlemen, I understand that some of these manufacturers and jobbers still do furnish catalogue house trade in an underground manner, but the majority of them stand fairly and squarely for the retail Hardware merchants of the United States.

It is the opinion of the secretary that every loyal association member is under obligations to do all in his power to increase our membership. If for one year one man in each of the eighty-eight counties of our great state would take an active and determined interest in our organization we could easily double our membership.

THE EXHIBIT FEATURE,

as you know, has been added this year. The special exhibit committee appointed by President Baker, consists of W. L. Jacobs, Youngstown, chairman; C. S. Johnson, Barberton, treasurer; W. M. Crumrine, Salem, secretary. This committee has worked faithfully. It must be remembered that they had no precedent to govern them. No retail Hardware association of the United States has rented space before this year. Our organization has been one of the pioneers and this committee helped to blaze the way. This entire auditorium building was rented. The committee took a great deal of time and used the utmost care in estimating the cost of conducting the exhibit. After reaching the conclusion they proceeded to name prices for space. There has been no desire on the part of committees or officers of the association to make this a money making scheme. It has been done only for the purpose of broadening the sphere of our association by giving Hardware merchants an opportunity to study new and up-to-date Hardware and to get better acquainted with manufacturers, jobbers and salesmen.

When prices were first announced some exhibitors thought them high, but after seeing the quarters and learning of all the privileges and advantages the objections were promptly withdrawn.

During the past year the secretary visited a few towns for the purpose of securing new members. Almost without exception he was received with the most courteous treatment and succeeded in getting the desired applications. I believe this is the most practical way to increase the membership.

Members have joined us since the Dayton convention. Great credit is due to the Canton Hardware Co. and its representatives for the splendid way in which they have secured new members. They kept at it all the year.

The matter of securing an accurate list of Hardware merchants is very important and perplexing. If every member would report promptly to the secretary any changes or new stores it would enable him to compile and keep a true list.

The nominating committee made the following report:

REPORT OF THE COMMITTEE ON NOMINATIONS.

PRESIDENT.—C. S. Johnson, Barberton, O.
VICE-PRESIDENT.—F. W. Ingalls, Bryan, O.
SECRETARY.—F. A. Bare, Mansfield, O.
TREASURER.—C. C. Fouts, Middletown, O.
FINANCIAL SECRETARY.—A. L. Shearer, Dayton, O.
EXECUTIVE COMMITTEE.—N. C. Alton, Lorain; Adam Bretch, Dayton; J. V. Osborne, Bellefountaine, O.; John Dixon, Columbus, O.
DELEGATES TO THE NATIONAL CONVENTION.—F. W. Ingalls, Bryan; F. A. Bare, Mansfield.

which were all subsequently elected for the ensuing year.

RESOLUTIONS.

The committee on Resolutions submitted their report which reaffirmed the resolution adopted at the fourth annual session, also at Columbus, Ohio, February 26, 1903.

The committee on "Memorial" presented their report.

REPORT OF COMMITTEE ON MEMORIAL.

Your committee on memorial note with sorrow that during the past year five of our members have been called from us by death—

G. H. Kroft, Ashville, O.
C. A. Weatherford, Chicago Junction, O.
Thomas J. Morris, Lima, O.
J. H. McCune, Newark, O.
Evart Bogardus, Mt. Vernon, O.

As we look over these names pleasant recollections of the memories of past conventions come to the mind, and with these recollections comes the fond hope that those whom they have left behind shall be reconciled to their loss, knowing of a surety that it was the will of the Great Father that they should be called from these scenes of action to the great beyond.

Resolved, That a copy of this memorial be sent to the friends of our deceased members.

Mr. Johnson, the President-elect, was called upon to address the convention, and made a few brief remarks.

The selection of a place for the next meeting was the next thing in order. The citizens of Columbus extended a cordial invitation to the Association to meet there, and no other cities being put in nomination, the question of meeting in Columbus was put to vote and unanimously carried. The convention then adjourned *sine die*.

THE ORIGINAL HACKMAN.

"Say," queried little George, addressing his historical cherry tree, "why don't you branch out?"

"I would leave this place," answered the tree, "if I had some way to move my trunk."

"If that's all that holds you," said the embryo daddy of his country, "I'll see that you get a hack."

Whereupon he hurried over to the woodshed in search of his little hatchet.—*Cincinnati Enquirer.*

"I know, old chappie," said Dobbs, "she has her faults, and a temper, and all that; but I—I love her, and can't live without her."

"Just so," calmly replied his friend; "but the question isn't that. Can you live with her? That's it, old fellow—can you live with her?"

Digitized by Google

RECENT TRADE PUBLICATIONS.

Kelsey Heating Co., Syracuse, N. Y., have favored us with a copy of an exceedingly attractive pamphlet entitled "All About the Kelsey Warm Air Generator," Book No. 5. They state in regard to these Generators: "The selection of a heating apparatus should not depend on the mere question of cost only. Economy of fuel, health and comfort are of far greater importance than the saving of a few dollars on the first cost of a heater. Comparing with furnaces, a Kelsey Generator warms air by a much better method, has much greater weight and heating surfaces, and utilizes all of the heat to better advantage. In our booklet we have detailed information about Kelsey weights and heating surfaces; this kind of information is not printed about furnaces, and comparisons are difficult. A Kelsey Generator, however, has an average of 65 square feet of heating surfaces to each square foot of grate surface—a furnace has an average of about 25 square feet. These great heating surfaces mean that a Kelsey Generator will warm more air than any furnace with the same size grate, or will warm as much air as any furnace, with a saving of 20 to 40 per cent. in fuel." Accompanying this very instructive and helpful book is another entitled, "What the Users Say," which contains a large number of letters from satisfied purchasers of the Kelsey Generators, also photographs of the residences of these customers. Either or both of these valuable books will be gladly sent upon request.

The Atlas Shear Co., Bridgeport, Conn., manufacturers of Hardware Specialties, Cast Shears and Scissors of every description for domestic and export trade, are placing in the hands of the trade their Catalogue No. 16, which describes and illustrates the Atlas Brand of Shears and Scissors. Among those shown are the Bent Trimmers, Straight Trimmers, Jointed Steel Screw Shear, Crown Pattern Cushion Bearing Shear, German Pattern Shear, Red Star Pattern Shear, Barber Shear, Ladies' Scissors' Pattern Shears, Carbonized Steel Trimmers' Snips and Victoria Shears. Descriptions are given of the blades and handles of each article and the prices of the various styles and sizes are also given. Send for catalogue for further information, and one will be gladly sent free of charge.

Iwan Bros., Streator, Ill., have sent us an envelope sized pamphlet which describes the Iwan Patent Improved Post Hole and Well Auger. They state that the many purposes for which the Post Hole Auger can be used on the farm makes it a highly prized tool, it being an economizer of labor and time. They claim one can save both strength and time by using this Auger, which makes a hole quickly and smoothly, empties easily and is very durable. The little book treats in an interesting manner of the uses, Construction and Operation of these very valuable tools, and contains a Price List showing the various sizes and their respective prices singly and by the dozen. One page is devoted to a number of interesting verses in praise of the Iwan Augers, and the book closes with two pages of testimonials from some of the numerous satisfied users of this valuable little tool. If you have not received one of these pamphlets write to the manufacturers and they will gladly send a copy.

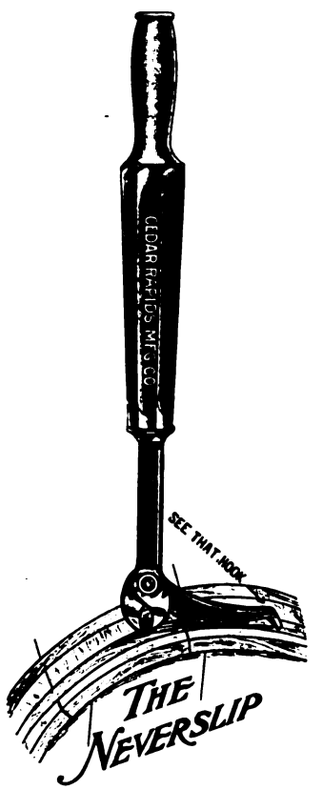
The Osborn Manufacturing Co., Cleveland, Ohio, makers of Brushes and Brooms, Foundry Supplies and Hardware Specialties, have favored us with a copy of their Catalogue No. 101. They state in introducing the book: "We have issued many catalogues but none have afforded the gratification which we feel in presenting this edition to our customers, and to those whom we hope will be. Many new lines of goods have been introduced and former ones improved, making this catalogue very complete." They state that their plant has been greatly enlarged, new machines introduced, and improved methods of manufacture adopted, which improvements place them in a position to ship promptly those goods for which there is a general demand and of which they keep a large stock, also their specialties, many of which are made only to order. They also call attention to the fact that their long experience and diligent attention to the production of odd and special brushes, etc., have given them a practical knowledge, which, coupled with the new and improved machinery, give them unusual advantage in aiding customers to secure just the goods which will best meet their requirements. The book contains 100 pages, but measures only 5 by 7½ inches, which makes it a convenient size to handle and a ready reference book. Catalogue may be had upon application.

The American Beauty Gas Stove Works, Ltd., Erie Pa., have presented us with a copy of their latest catalogue of Heaters, Ranges and Hot Plates. They state that all their stoves are the best on the market; are well made and of the best material, and are all thoroughly tested and well crated before shipping. The catalogue is well printed on excellent paper and contains a large number of very fine illustrations of the company's product; each cut is carefully described and the dimensions and weight of the respective Heater or Range is plainly given. The company will be glad to supply their catalogue to those not already in possession of one.

Potter Mfg. Co., Geneva, Ohio, has favored us with a very artistic and interesting Catalogue and Price List of Flesh Forks, Spoons, Cake Turners, Mincing Knives, Carpet Stretchers, Wall Scrapers, Ice Picks and Hatchets, Ice Chisels, Tack Hammers, etc., in regard to which they state in part as follows: "In presenting this Catalogue to the trade, we feel that the items shown herein are ones of merit, and that they cannot fail to make money for the dealer. Our aim has been to improve the quality, instead of sacrificing quality for the sake of price. We shall continue to produce the best goods possible, and at the lowest prices consistent with a straight-forward, legitimate business policy." The book will be found a handy and useful one to those interested in these lines and a copy will be gladly sent upon request.

Colt's Patent Fire Arms Manufacturing Co., Hartford, Conn., have recently issued a catalogue descriptive of Colt's Revolvers, representing New Service, New Service Target, New Army, New Navy, Marine Corps' Model, Officers' Model, New Police Target, Police Positive and New Pocket Double Action Revolvers, all with jointless solid frame, simultaneous ejection; Double Action Revolvers, .38 and .41 caliber, with and without ejector; Single Action Army, Bisley Model and Bisley Model Target, Single Action Revolvers, Automatic Colt Pistols, &c. The company's arms are guaranteed for the use of standard factory loaded ammunition, either black or smokeless powder. The little book is a valuable one to those interested in this line and will be found very useful to select from. A copy will be gladly sent upon request.

Stover Manufacturing Co., Freeport, Ill., have recently issued their 1906 catalogue of "Ideal" Hardware specialties, in which it will be seen that a number of new, up to date lines have been added, and also that the standard lines have been increased so as to meet the new conditions and requirements of the trade. They state that in addition to their regular Hardware they are well equipped to do job work in gray iron, brass, bronze and aluminum castings, also galvanizing, tinning, japanning, bronzing, and nickel, bronze, copper or brass plating. Among the articles described and illustrated in the catalogue are the following: Spring and Screw Mops, Mop and Brush Holders Combined, Tinned Steel Mops, Steel Brush Attachments, Lamp Brackets, Bird Cage Hooks, Lemon Squeezers, Cork Pullers, Tack Hammers, Shingling Hatchets, Ice Shaves, Waffle Irons, House Numbers, Soldering Sets, Screen Lifts, Door Pulls, Etc. The book is well illustrated and is attractive in appearance, and to those interested in these lines will prove very useful to select from. Send for a copy.



The Sun Mfg. Co., Columbus, Ohio, have made us the recipients of two very interesting and attractive pamphlets, which are their Catalogues Nos. 26 and 27. Catalogue No. 26 numbers 40 pages, measures 7 x 5¼ inches, and thoroughly describes and illustrates numerous styles of Show Cases, Coffee Mills, Money Drawers, Lawn Furniture, Rat Traps and Store Fixtures. Catalogue No. 27 is an envelope sized pamphlet of 32 pages, containing illustrations and very complete descriptions of the Company's Coffee Mills, Money Drawers, Poultry Be-Headers and Rat Traps. They state in introducing the last published of these little books: "We have, in the last three months, installed a lot of new machinery of our own invention, in our coffee mill factory. This machinery is the result of twenty years of manufacturing coffee mills, and is not possessed by any other factory. We are now entirely out of the old-style coffee mills, and the coffee mills that we are supplying on your orders are not excelled by those of any other manufacturer in this or any other country in workmanship, material and finish." They also state that electrotypes of anything they manufacture will be furnished free to jobbers for use in special advertising. Send for catalogues.

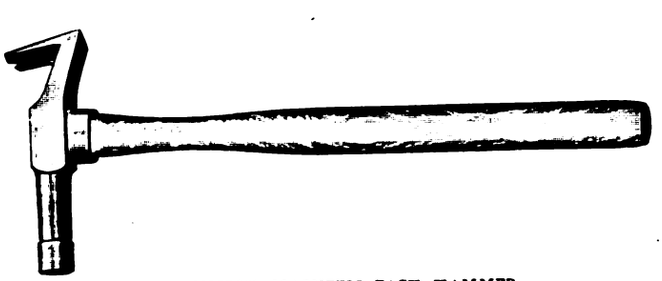
NEW GOODS AND SPECIALTIES.

NEVERSLIP NAIL PULLER.



Cedar Rapids Mfg. Co., Cedar Rapids, Iowa, are placing on the market an Improved Nail Puller, which possesses so many special advantages as to make it a good proposition. The hook, which is one of the principal features to which the manufacturer calls attention, and for which he claims among other advantages: that where the hook is set it sticks, and the greater the pressure the harder it sticks; this is referred to as of vital importance in drawing nails from the extreme edges of boxes or the chines of barrels; that the hook acts as a raised fulcrum and

results in pulling nails straight from flat surfaces; that it permits the curve of a curved surface in packages as small as a nail keg to enter between it and the jaws of the puller, thus making it easier to pull nails from barrels and kegs than with the ordinary puller, as it never slips; that the hook makes it possible to pull nails from difficult corners and other odd places. It has one desirable improvement in the rammer with an anti-pinching lip, which serves to push the fleshy part of the hand away instead of permitting it to be pinched. The manufacturer states that in the jaws and shank a strictly high grade of tool steel is used invariably. The rammers are finished with a brilliant aluminum enamel, and the tool is a full size nail puller measuring eighteen inches when closed and weighing five pounds.

THE LONGDON MAGNETIC TACK HAMMER.

The Arcade Mfg. Co., Freeport, Ill., have made a popular addition to the number of specialties which they are now manufacturing, by recently purchasing the tools and equipment for the manufacture of the Longdon Magnetic Tack Hammer, which

THE LONGDON MAGNETIC TACK HAMMER.

is of novel construction, and has many ingenious improvements upon the ordinary type. The construction of the Claw brings the fulcrum close to the tack and in pulling it the handle becomes a powerful lever. The claw is formed so that it makes an excellent screw driver. The tempered head retains its magnetism permanently. Its strength and many uses make it a valuable household tool.

THE VANDERGRIFT WOOD HANDLE WRENCH.

The Vandergrift Mfg. Co., Shelbyville, Ind., for whom the Smith & Hemingway Co., 296 Broadway, New York, are sales agents, are the manufacturers of the Wood Handle Wrench shown in the accompanying illustration. It is substantially made

THE VANDERGRIFT WOOD HANDLE WRENCH.

of malleable iron and machine steel, and is brought out as a companion tool to their well known Screw Wrench. It is made in two sizes, 8 and 10 inches and in the following styles: Polished head, japanned body; polished head, plain body; plain head and plain body.

"NEVERSLIP" FILE HANDLE.

The McKinnon Dash Co., Buffalo, N. Y., are the makers of the "Neverslip" File Handle which we illustrate herewith. Being provided with a pressed steel ferrule the full length of the tang, which possesses a special shape, it is claimed to have five times the binding power of any similar handle. By the use of this handle, the tang does not work loose so quickly, requiring less

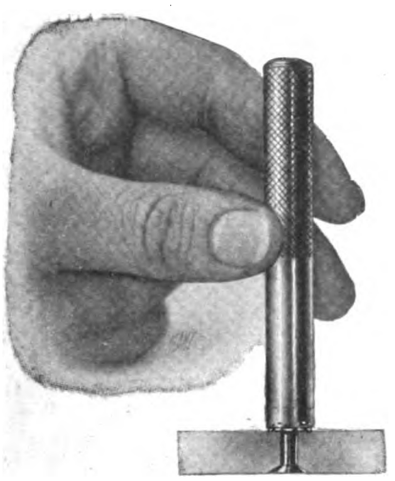
"NEVERSLIP" FILE HANDLE.

frequent driving into the handle, which has a tendency to prolong the life of the handle. The ferrule is indestructible as far as the material is concerned, and the wood if necessary can be renewed when desired. It is made in five lengths running from 4½ to 6½ inches.

A BOON TO TRAVELING MEN.

A compact, serviceable case which includes the entire shaving outfit has long been desired by traveling men. The Gillette Safety Razor Company, Boston, Mass., have conceived the perfect idea for such an outfit, and have placed upon the market The

GILLETTE SAFETY RAZOR COMBINATION SET.



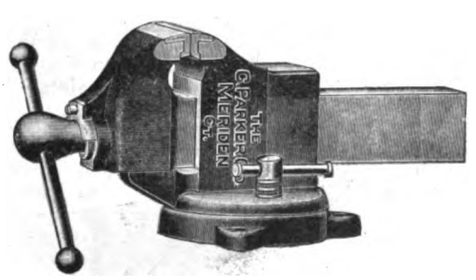
Gillette Safety Razor Combination Set. There is no doubt but this outfit will prove a boon to every traveling man, and to men generally on hunting or fishing excursions as it will answer the

Digitized by Google

first requisite of a man's comfort and convenience. The combination set consists of a razor, one dozen blades neatly arranged in the package, together with a silver holder containing one of the finest badger hair brushes made, also a silver holder containing a shaving stick of one of the best known shaving soaps. The entire package is a sample of excellent workmanship, durability and utility. Furthermore, this outfit assures to the traveling man the possession of a hygienic device which frees his face from the unclean results often coming from the unsanitary conditions of shaving appliances. If every man would consider the personal advantage that comes from the use of "The Gillette," he would discard all his old ways and habits of shaving. A man's face is the index of his character. The unclean face indicates a careless and thoughtless mind. There is moral excellence in the cleanly habit through the independent act of self-shaving. It adds capital to a man's appearance, impression and address.

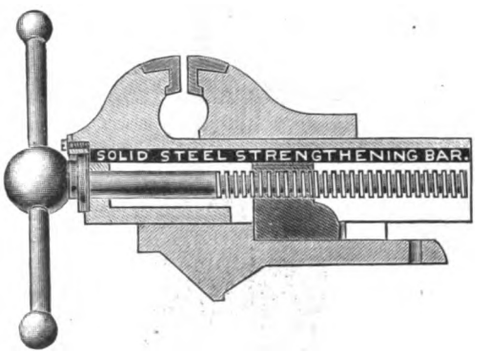
THE "SIMPLEX" RIVETER.

F. H. SMITH MFG. CO., Chicago, Ill., are placing before the Hardware trade the "Simplex" Riveter, manufactured by them, and which is claimed to possess advantages over other appliances,



THE "SIMPLEX" RIVETER.

that make it a very popular article. We give here an illustration showing the "Simplex" Riveter and manner of using it. It is the simplest possible form of tool for setting tubular and split rivets now before the trade, having a wagon tire or other convenient hard substance at hand to rest the head of Rivet against, and a hammer or wrench to drive with. Made with a view of being sold at 25 cents, including a box of 50 Rivets, it meets with a ready sale.

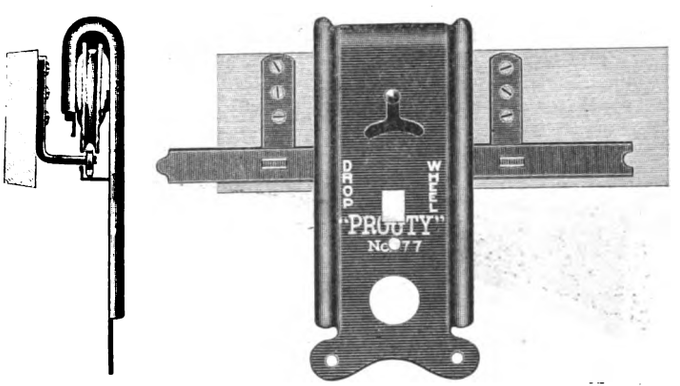


STEEL BAR STRENGTHENER VISE.

THE CHARLES PARKER CO., Meriden, Conn., and 22 Warren Street, New York, have recently patented their latest Vise, which they call their Steel Bar Strengthener Vise and which we illus-

STEEL BAR STRENGTHENER VISE.

trate herewith. It is provided with a solid steel bar running entirely the length of the slide, which adds a very material element of strength to the Vise, making the slide or front jaw, usually the weakest part of a Vise, in this tool, the strongest. The Steel Bar is cast solid into the slide so that there is no possibility of its getting loose. Another important feature in these Vises is the composition of cast iron and steel of which the castings are made. This important improvement has been attained only after a long season of experiments. They also call attention to the thickness of the castings composing the front jaw, as being placed at point of greatest strain. With all these advantages and improvements



SECTIONAL VIEW OF VISE.

these Vises are sold at the same price as ordinary Cast Vises. Mechanics will readily see the value of such a tool. It is made in six sizes, both stationery and swivel, from 3¼ to 6¼-inch jaw. This Vise also contains all the former "Parker" improvements. The steel faces of these Vises are milled and fitted to the jaws and are renewable.

PROUTY BARN DOOR HANGER NO. 77.

T. C. PROUTY CO., LTD., Albion, Mich., are the manufacturers of the Prouty Barn Door Hanger No. 77, an illustration of which

PROUTY BARN DOOR HANGER, NO. 77.

accompanies this. The combination of the safety hook and drop wheel prevents the Hanger from having any tendency to leave the track when in use. This safety hook also acts as a gauge for attaching Hangers to doors as it permits setting the Hanger on the door down to the gauge, and does not make it necessary to take any measurements; at the same time enables one to be sure that both are being hung at the proper distance. The rollers in this Hanger are equipped with a double row of roller bearings which give uniform wear and insures a true running roller at all times, which is claimed to be very desirable in an article of this kind. The Hanger is made for 3-16 x 1 and 1¼ bran door rail.

MOLLY STARK MOP WRINGER.

The Bennington Mop Wringer Company, Bennington, Vt., C. E. Peabody & Co., 155 Chambers Street, New York, selling agents, are introducing to the Hardware and house furnishing goods trade the patented Molly Stark Mop Wringer, of which we give an illustration. It is made of malleable iron, japan finished. The outer dimensions are approximately 7 by 7 inches at the top, 10 inches top to bottom, with a lever handle 14 inches long. The strong point of the Wringer is the automatic adjustment it affords to unequal thicknesses of the body of mop, the pressure being equalized and entire mop squeezed an equal condition of dryness. The handle is coupled to a movable jaw hinged at lowest point with slotted back and bottom in one casting, which in use is pushed forward against another jaw, 5½ by 6⅓ inches, which is hung on an axis. Thus in the process of squeezing the frame coupled to handle is forced forward against a swinging grate like section that from its very nature adjusts itself to inequalities. Both squeezing jaws have V-shaped verticle bars, one group of which is directly

Digitized by Google

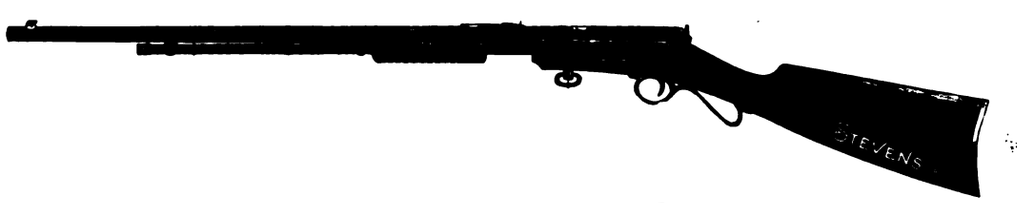
opposite the open spaces of the other jaw. The Wringer may be instantly secured to wood or metal pails by beams of two eccentric clamps that adjust themselves readily to varying

MOLLY STARK MOP WRINGER.

thicknesses of pails. There is an absence of wood and screws in the construction, while a pull on the lever handle accomplishes the entire operation at one stroke, the water from mop falling by gravity into the pail, not squirted outside. The wringers are packed in crates of twelve, weighing complete 90 pounds.

SAVAGE SINGLE SHOT RIFLE.

THE SAVAGE ARMS CO., Utica, N. Y., are the manufacturers of the Single Shot Rifle of a new pattern which they will have ready for the trade during the present month as their Model



SAVAGE SINGLE SHOT RIFLE.

1905, Style C, of which we present an illustration. This rifle possesses the same features as the regular Target Rifle—in fact, its entire mechanism is the same. As many people prefer shot gun butt, they have fitted this Rifle with an "English Model" shot gun butt stock, length of stock 14 inches. The Rifle is also equipped with an adjustable rear sight and metal bead front sight, which are the same sights as used on 1903 Model Repeater. Length of barrel, 22 inches; the Rifle weighs 4¾ pounds. They are distributed to the dealers singly packed each in a cardboard box, and packed ten in a case. Weight of case, 63 pounds.

STEVEN'S NEW GALLERY RIFLE, NO. 80.

THE J. STEVENS ARMS & TOOL COMPANY, Chicopee Falls, Massachusetts, will place a new rifle on the market, July 1st, for use in shooting galleries. It has many new features never before

STEVENS NEW GALLERY RIFLE, NO. 80.

embodied in a rifle of this class, as follows: The action in principal is of the bolt type. The breech block in action works the bolt lever first upward, then back, extracting and ejecting the empty shell—its forward motion forcing a fresh cartridge into the barrel. The construction of the breech block is such that when the action is closed it presents a solid top, preventing dirt or any obstruction entering to clog it. The manipulation of this bolt makes it impossible to discharge a cartridge until the action is locked. The feeding of the cartridge from the magazine into the carrier is done horizontally, thereby avoiding any chances of scraping the lubricant, or the bullet, or the clogging of the action. It has coil steel springs; the barrel can be cleaned by drawing a rod through without taking the mechanism apart; the take-down feature is unique; it is made to take 22 short rim fire cartridges only, and the magazine holds 16; it is fitted witht bead front and sporting rear sights, walnut stock, blued trigger-guard and aluminum butt plate. The travel of the forearm in operating is only 1¼ inches, or less than any other repeating rifle, a feature appreciated by rifle experts. Especial pains have been taken with this new rifle to assure accuracy, thus sustaining the Stevens hard-earned reputation. This rifle is in a class by itself, not a mere toy or a light, boy's rifle, but has a 24-inch barrel (40 inches over all,) a heavy solid gallery rifle intended for men and youth who desire a serviceable repeating rifle of simple construction that is dependable.

THE NEW BRANDT SPRAYER.

THE HEATH-QUIMBY CO., Minneapolis, Minn., are putting on the market the New Brandt Sprayer which can be used with a single as well as a double nozzle, as illustrated herewith. As this Sprayer is a radical departure from other types of Knapsack Sprayers, it has attracted considerable attention. It is designed for distributing Paris green, Bordeaux mixture, Paris green and Bordeaux compound, Spanish pink, etc. It can be used for spraying potatoes, tomatoes, tobacco, and pineapples; gooseberry, currant and rose bushes; cabbage, celery, cucumbers, squash, cauliflower, etc. It is explained that two rows of potatoes can be sprayed at a time as fast as a man walks, and that a row a mile long can be sprayed with one filling of three gallons; also that 15 to 25 hills of potatoes can be sprayed with each stroke of the pump. The chief points of excellence of the sprayer are referred to as follows: That it combines all the advantages of the tank sprayer with those of the hand sprayer and many others; that it is ready for use immediately, as the first stroke of the pump discharges spray from the nozzle at standard pressure; that a uniform spray is emitted from the nozzle at all times, as the equalizing reservoir at the end of the pump so distributes the air between the nozzle tip and the tank as to maintain a uniform pressure at the nozzle tip at all times; that the nozzle is so constructed as to emit spray of exactly the proper density, not too light, not too heavy, a result obtained after long experimenting in actual use on the farm of the inventor of the Sprayer; and that it is substantially constructed braces, and reinforcements being used wherever there is any advantage to be gained by so doing.

THE NEW BRANDT SPRAYER.

NEW ENGLAND HARDWARE DEALERS' ASSOCIATION

The annual convention of the New England Hardware Dealers' Association was held at the Hotel Vendome, Boston, Thursday and Friday, March 1 and 2. The meeting was a very notable affair, abundantly justifying the change to a two days' session instead of one. As is the custom in all the conventions of Eastern trade the programme alternated very pleasantly between business and sociability. President W. P. Bogardus of the National Retail Hardware Association made his first visit to New England, a fact which was very much appreciated.

The opening session on Thursday afternoon was followed by a smoker to which the manufacturers of Hardware present were made welcome. After a stag supper the party attended the theatre.

Friday morning was devoted to business. In the afternoon the members and guests made a tour of Boston and Harvard University in special electric observation cars. The convention closed with a reception and banquet at which, as usual with Eastern folks, many ladies participated.

The business session, at which President John B. Hunter presided, was given over to the private discussion of important trade topics, including the Parcels Post Bill, Hardware Mutual Fire Insurance, the rescinding of the rule by which the manufacturers of builders' Hardware made an additional charge of 10% on the orders figured and made up at the works, and various other matters of general importance. On a general showing the association was found to be in an exceedingly prosperous condition.

F. ALEXANDER CHANDLER, SECRETARY.

Secretary F. Alexander Chandler made an informal report in which he stated that the membership had doubled during the past year. Mr. Chandler was interested in launching a plan for the establishment of a Hardware Dining Club for Boston, which would occupy commodious quarters.

ELECTION OF OFFICERS.

A committee on nominations was elected from the floor, consisting of A. H. Abbe, New Britain, Conn.; F. Alexander Chandler, Boston; and E. L. Davis, Boston, which committee brought in the names of a large Executive Committee, the association having voted to add two members. The officers elected were according to the committee's recommendations, as follows:

PRESIDENT, John B. Hunter, J. B. Hunter & Co., Boston.
FIRST VICE-PRESIDENT, S. H. Thompson, Thompson Hardware Company, Lowell, Mass.
SECOND VICE-PRESIDENT, F. E. Pierson, Pierson Hardware Company, Pittsfield, Mass.
SECRETARY, F. Alexander Chandler, Chandler & Farquhar Company, Boston.
TREASURER, Henry M. Sanders, H. M. Sanders & Co., Boston.
DIRECTORS.—D. Fletcher Barber, Chandler & Barber, Boston; Charles E. Adams, Adams Hardware & Paint Company, Lowell, Mass.; Bion C. Pierce, Pierce Hardware Company, Taunton, Mass.; Calvin M. Nichols, the Hoyt Hardware Company, Boston; E. L. Davis, S. H. Davis Company, Boston; John A. Manson, John A. Manson & Co., Burlington, Vt.; W. H. Underwood, Manchester Hardware Company, Manchester, N. H.

To the Executive Committee was left the matter of sending delegates to the convention of the National Association at Chicago.

At the Smoker on Thursday afternoon the presence of President Bogardus, Samuel A. Bigelow, former President of the National Hardware Association, T. James Fernley, Secretary-Treasurer of the National Hardware Association, and J. B. Sargent of Sargent Co., New Haven, Conn., added importance to the occasion. An address was delivered during the convention proceedings by Mr. W. P. Bogardus on the proposed changes in the postal laws, in the course of which he said.

Last year about 70,000,000 pounds of letters and postal cards went through the mails, and the income was about $70,000,000, or about $1 per pound. In the second class there was distributed 365,000,000 pounds, and the income was about $3,000,000, or a little over 1 cent per pound.

THE LOSS

on carrying that amount of second-class matter was over $40,000,000. First-class matter furnished 80 per cent. of the postal income and used only four per cent. of the tonnage. Second-class matter furnished a little over 4 per cent. of the income and took 65½ per cent. of the tonnage. And third and fourth class matter almost paid their way.

OTHER ADDRESSES.

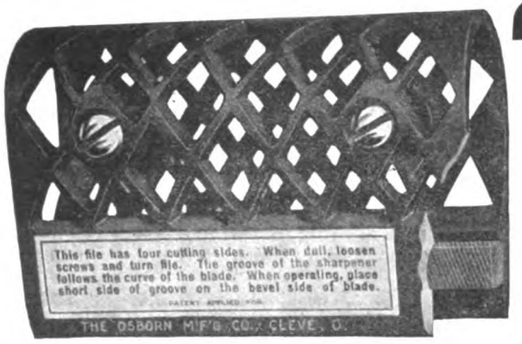
T. James Fernley brought the greetings of the National Hardware Association and told the work of the Association. He was followed by J. B. Sargent, who was given a hearty reception, indicating the high appreciation in which he is held. Mr. Sargent made an interesting and able address, in which he made reference to some of the questions connected with the distribution of Hardware and alluded to the desirability of marketing goods through the retail merchants.

Friday evening was devoted entirely to the banquet which was provided for the occasion. Over 200 ladies and gentlemen were present. At the guest table were President J. B. Hunter, who acted as toast master; President Bogardus, Secretary Fernley, J. B. Sargent, Samuel A. Bigelow of the Bigelow & Dowse Co., Boston; R. R. Williams, Hardware Editor of *Iron Age;* Charles E. Adams of Lowell, President of the Massachusetts State Board of Trade; William H. Sayward, secretary and treasurer of the Master Builders' Association of Boston; William A. Barrett, president of the Boston Common Council, who represented Mayor Fitzgerald; Rev. Eugene R. Shippen, Dorchester, and F. Alexander Chandler. President Barrett responded to the toast "Boston;" President Bogardus, "The National Retail Hardware Association;" Charles E. Adams, "The Ladies;" Mrs. S. H. Thompson, Lowell, "For the Ladies," a graceful and pleasing feature of the occasion; J. B. Sargent, "The Manufacturers;" R. R. Williams, "The Trade Press;" Rev. Mr. Shippen, "The New Man;" Mr. Fernley, "The National Hardware Association." It was a most delightful evening, a fitting ending to a gathering of New England Hardware merchants which was full of promise of good work to come as well as a demonstration of good work done.

MANUFACTURERS' EXHIBITS.

There was a large representation of manufacturers, and the exhibits were of an interesting character. They more largely participated in that department than on any previous occasion held in New England.

A VALUABLE OFFICE BOY.



The employer was bending over a table, looking at the directory. The new office boy slipped up quietly and poked a note into his hand. The surprised employer opened it, and read:

"Honored Sir—Yer pants is ripped."

OSBORN

LAWN MOWER SHARPENER

The only practical and easy one

Does the work quickly. Keeps lawn mowers in perfect cutting condition. Fits any blade. The sharpener follows the curve of the knife and gives the proper bevel. The iron holder has a neat and durable "Tucker," bronze finish; the file has four cutting sides, which, when worn, can be turned by simply loosening the screws in holder.

SIMPLE IN CONSTRUCTION

ALWAYS READY FOR USE

Sharpeners are packed one dozen in compartment box, having hinged cover, with neat two color label, making an attractive display package.

Size of box, 11 x 9¼ inches.

RETAIL PRICE.....25 cents each

WRITE FOR PRICE.

THE OSBORN MANUFACTURING CO.

5403 Hamilton Ave., N. E. Cleveland, O.

MINNESOTA RETAIL HARDWARE ASSOCIATION

The tenth annual convention of the Minnesota Retail Hardware Association was held at the Nicollet Hotel, Minneapolis, on Wednesday, Thursday and Friday, February 28, March 1 and 2. At the sessions there was always a large number of delegates. As there were probably 700 members and others present the spacious hall was crowded on each occasion.

At the Wednesday afternoon session the delegates were called to order by President Stebbins at two o'clock, and an address of welcome was delivered by Mayor D. P. Jones of Minneapolis, which was responded to by E. H. Loyhed with a well delivered address.

PRESIDENT'S ANNUAL ADDRESS.

President Stebbins then delivered his annual address, in part as follows:

We must realize that the business methods of yesterday are not the methods of to-day. A constant change is taking place, and as the individual tries to keep pace with this evolution and the conditions that follow mammoth combinations of capital and brains he must of necessity realize that the situation demands constant and determined effort aided by progressive thought. Do I hear some one ask, What can this association do as against these combinations, intrenched as they are behind untold wealth? My answer is to keep digging and improve our opportunities as best we may and results will follow.

I once heard a minister say that the greatest thing in life is opportunity. If we improve the opportunity of to-day, while the pendulum seems to be swinging farther and farther away, who knows but what something said or done during this meeting may hit a responsive chord throughout the length and breadth of this land that will cause the pendulum to swing to the other extreme and we may receive a lasting benefit thereby?

When we organized ten years ago those of us who were there little dreamed of the progress that would be made in a decade. We had no National Association, as we were among the first to organize. Now more than half the States in the Union have Hardware associations and are affiliated with the National. And right here let me say that while Minnesota is now in the lead in point of numbers, we must look well to our laurels, as we are being closely pressed. Within another decade I expect to see a Hardware organization in every State, when by co-operating with other similar bodies we can easily make our influence felt. Ten years ago the jobbers were not with us. To-day the jobbers and retailers are working hand in hand. Within the next ten years, instead of having about 400 manufacturers friendly with us, I expect they will all be our friends.

We occasionally hear criticism from Hardware merchants to the effect that our organization has accomplished nothing; that we meet annually, pass resolutions, go home and forget them, and thus end our efforts. My heart ever goes out in sympathy for such a deluded merchant, and I sometimes wonder if his digestive organs are in good working order or if his appendix needs attention. I never go home from a convention without a feeling that some good has been accomplished and a feeling that I could make good use of some suggestion or brother merchant's experience, and thus to some extent, at least, be the more competent to sell Hardware at a profit. If there be such a pessimist here I would like to ask him, What have you done to help along the work? Have you offered any solution for the ills that beset us? Have you ever taken any part in the discussions? Have you even as much as dropped a question in the Question Box? Do you continue to buy goods that are quoted in catalogues at ruinous prices? Whose fault is it that we have not accomplished all we could have hoped for? Is it not your fault and mine? Have any of us been as loyal to our association as we ought?

Loyalty to ourselves, our neighbors and our country is a God given virtue, the practice of which makes the true type of American citizenship.

What are some of the objects of our association? Allow me to suggest:

1. To better the condition of the retail merchant.
2. To correct the evils that now exist.
3. To bring about better trade conditions.
4. To weed out dead beats.
5. To stop wholesalers selling consumers.

Digitized by Google

6. To encourage co-operation of manufacturers, jobbers and retailers.
7. To eliminate price cutting.
8. To restore confidence between dealers, where petty jealousy now exists.
9. To become honest with one another.
10. To encourage a more general reading of trade papers.
11. To affiliate with State and National associations.

SECRETARY'S REPORT.

This was followed by Secretary M. S. Mathews' Annual Report. The report was as follows, in part:

With the constantly increasing numerical strength of this organization the grievances, or at least the reports of them to reach this office, appear to be falling off in an inverse ratio to the lengthening of the membership roll. Two of the complaints were caused by a misunderstanding of facts, and on an explanation of the same were dropped. At the present time there is only one case undisposed of and this awaits further information from the aggrieved party.

These improved conditions come, doubtless, from a clearer understanding between manufacturers, jobbers and retailers. Another feature of the movement is the broadening of the work through the efficient methods of the National Association and the Joint Catalogue House Committee, whose efforts are accomplishing much toward securing more desirable conditions for the retailer. The improving trade conditions through organized effort are so well understood in this State that in Hardware circles the association non-member is now the exception instead of the rule. While it is probably true that many remain members for the insurance benefits it is equally true that a large percentage are members from a love of the cause and a belief that only through organization can trade conditions be permanently improved. As showing that this position is correct, it only need be stated that barely 65 per cent. of this association's members carry insurance with the Minnesota Retail Hardware Insurance Company.

At the last annual meeting a paid membership list of 644 was presented. While the increase the past year has not been so marked the growth has been steady and continuous, the printed list showing 688 names. These, with later additions since the book was given to the printer, enable Minnesota to retain first place among Hardware associations with a following of 702 members in good standing.

Mr. Mathews furnished the figures concerning receipts and disbursements during the year, showing that the balance in the hands of the treasurer was $653.04.

THINGS TO THINK ABOUT.

An entertaining address was that by J. F. McGuire of St. Paul, whose topic was "Things to Think About." Mr. McGuire referred to a number of matters worthy of attention at the hands of those present, both individually and as an association.

SMOKER.

Preceding a smoker held Wednesday evening S. R. Miles of Mason City, Iowa, gave an illustrated lecture on the catalogue house question, and he was followed by Conway McMillan on "Factors of Modern Advertising." Leon C. Warner, president of the Minneapolis Retail Hardware Association, presided.

QUESTION BOX.

The Question Box, conducted by Secretary Corey of the National Retail Hardware Association, came next in order.

MR. MILES' LECTURE.

In the evening S. P. Miles officiated at a meeting held under the auspices of the Joint Catalogue House Committee, at which he gave his well-known lecture on "Trade Problems" and punctuated his points with characteristic illustrations.

Mr. Conway McMillan delivered an address on "The Factors of Modern Advertising," which was under the auspices of the National School of Salesmanship of Minneapolis.

THURSDAY SESSION

9 A. M., a meeting was held of the Retail Mutual Fire Insurance Company, at which the attendance of all policy holders was requested. President Charles F. Ladner of St. Cloud made his annual address.

SECRETARY'S ADDRESS.

This was followed by the reading of his report in which the Secretary of the Company M. S. Mathews reviewed the work of the year. A statement of the condition of the company December 31 was presented, following which Mr. Mathews said:

The season of severe cold weather has been passed through with moderate losses of but 25 per cent., thus giving a much better start than in the corresponding period of 1905. The success of this company has been so marked that students of the insurance problem have carefully noted its growth and many inquiries are received as to its methods. Were this the only company making so favorable a showing its record would cause more extended comment, but, as a matter of fact, similar companies in neighboring states are making equally good progress, all of which tends to show that for a Hardware merchant the solution of the insurance problem lies through the "Hardware Mutuals." One question arises, with an insurance company of your own a demonstrated success and making such remarkable savings why is it only favored with insurace business from 65 per cent. of the members of the Minnesota Retail Hardware Association and with a total amount of Minnesota insurance in force December 31 of but $1,359,000?

We would ask you to study the figures as presented by this company and consider that with an increased volume of business comes lower cost of insurance. Forty per cent. of your insurance expense is a large saving, but the seven years' experience of this company points to still better results in the future.

Hon. T. D. O'Brien, Insurance Commissioner of Minnesota, delivered an address on "Insurance Methods."

REGULAR BUSINESS.

The meeting was called to order at 10:30 by the President, A. T. Stebbins, when the manufacturers, jobbers and traveling men had the floor. F. W. Hurty of Hurty-Simmons Co., delivered an address on

"SUCCESSFUL RETAIL HARDWARE MERCHANTS FROM THE JOBBER'S POINT OF VIEW."

which was in part as follows:

These highly successful ones present a combination of ability and morality that would make them successful, and highly so, at anything they might attempt, for they are all good buyers, good sellers and good collectors. It is the combination that wins.

In a wholesale house the man that buys is not supposed to have any ability as a seller, and the man in charge of the selling would be expected to make a mess of it if he tried to do both the buying and the selling, and the credit man is like the villian in the play—he has the unthankful part, both with the house and with the trade. If he is not a good collector he loses standing with the house. If he is an extremely close collector in a short time he is unpopular with the trade. But the retail merchant who is compelled to be his own buyer, seller and collector necessitates qualifications of a much higher order than in most any other branch of business.

In analyzing the successful merchants of Minnesota with whom I have been in intimate contact for many years I find them to be strong in selling and strong in collecting, and while they are not weak in buying by any means they give the selling and collecting end of their business the greatest part of their attention and in buying they avoid speculation—that is, they seldom overbuy, but they order frequently, and in such quantities as they really need.

The jobber should do all in his power to assist the retail merchant, not to be satisfied with simply selling him goods and collecting his money, but help the merchant dispose of his goods, which can be done by supplying him with printed matter, set advertisements, electros, hangers, price cards, and in many other ways. Here is where the intelligent salesman makes himself of service to his customer. Much good advertising matter is relegated to the ash heap for lack of interest or understanding on the part of the merchant.

The jobber who depends principally on financial favors to hold trade shows a lack of confidence in his goods, service and prices. The retail merchant who is entirely dependent on a jobber for financial accommodations is not likely to be on an equal footing with his neighbor, to say nothing of attempting to compete with our arch enemy, the catalogue house, which buys and sells for cash.

Alex. W. Crozier of the National School of Salesmanship, Minneapolis, delivered an address on "The Practice of Salesmanship."

THURSDAY AFTERNOON SESSION,

2 P. M., meeting was called to order by the President.

The Convention Committees reported.

A. C. Hatch was heard from on "The Present Steel Age." A. F. Rock, Secretary of Superior (Wisconsin) Merchants' Association, delivered an address on "Credits."

Hon. John A. Johnson, Governor of Minnesota, delivered an address.

S. P. Miles read a paper on "Practical Paint Salesmanship," a subject that was well considered, which in part was as follows:

HANDLING PAINTS.

In my opinion every Hardwareman should handle Paint for the simple reason that Paint in reality is a part of the business. Anything that can be classed in with Builders' Supplies belongs to the Hardware store, and surely all kinds of Paint products come under that head.

Paint is bought and used by the kind of people that the Hardwareman is in touch with. Besides, contractors and carpenters are in our stores after other material. They influence the sale of a great deal of Paint, and surely it is just as easy for the painter and the property owner to go to the Hardware merchant as anywhere else.

In addition to this, the Hardware merchant usually knows when an old house is going to be repaired or a new house going to be built. This information can be of value to him in selling a bill of Paint.

It is to the interest of the Hardware merchant to sell Paint, because in these days of strenuous competition everything must be made to count. If the Paint business is handled correctly it will afford the merchant a satisfactory profit; but that is not all. I have found by experience that a line of Paint has some peculiarities that are attractive in themselves.

Digitized by Google

A man may sell a bill of Hardware, a Stove or a Corn Planter without making much noise, but when he sells a bill of Paint he cannot help making noise, and if he is handling a good Paint, a Paint that will give his customer satisfaction, this bill of Paint will be a monument, a standing advertisement in his locality. Every neighbor will see it, notice it and will be almost certain to ask the buyer what kind of Paint he used on his house and where it was bought. I am of the opinion that it is well worth the Hardware merchant's while to sell a line of Paint, if it were only for the advertising he will get from it.

Mixed paint to be good must be just as pure and just as honestly made as Hand Mixed Lead and Oil. It should be composed of Lead, Zinc, Linseed Oil, a little Turpentine and Dryer and the necessary coloring pigments to make the different shades, and in my opinion a dealer will make a great mistake in putting in any line of Paint unless he is absolutely certain that his Paint is pure, for you must bear in mind that your principal competition will be strictly pure, Hand Mixed White Lead, and in order to successfully displace Hand Mixed White Lead you must give your customer a Paint that is just as pure, just as honestly made, and superior in other respects.

It is not enough to have the manufacturer agree to sell no one else direct; he should make provision to see that none of his goods reach your community through any mail order or catalogue house, or through any other source, for if you work hard to build up a business on the line you control you ought to spare no pains to safeguard your interests and keep that line out of the hand of every one else.

To sum the whole matter up, we have the following:

1. It is to the interest of every Hardware merchant to carry Paint.
2. He should carry nothing but the best.
3. He should carry a line that is effectively advertised.
4. He should have the exclusive sale of the full line manufactured by the firm he does business with.

ST. PAUL NEXT YEAR.

J. Gregg of St. Paul, representing the commercial associations of that city, extended an invitation to the association to meet there next year. The invitation was accepted by unanimous vote.

NEW OFFICERS.

The report of the Nominating Committee was adopted and resulted in the election of the following officers:

President, Julius Schmidt, Wabasha.

Vice-President, Amos Marckel, Perhan.

Executive Committee—Three years: C. H. Casey, Jordan; A. T. Stebbins, Rochester; Elmore Houghtaling, Fairmont.

The Executive Committee reappointed M. S. Mathews, Minneapolis, and G. F. Duerre, Plain View, secretary and treasurer, respectively.

Delegates to the national convention were appointed as follows: M. S. Mathews, Minneapolis; Julius Schmidt, Wabasha; H. M. Clark, Lakefield; C. H. Casey, Jordan; F. W. Lucas, Litchfield; J. F. McGuire, St. Paul; W. H. Tomlinson, LeSueur; Elmore Houghtaling, Fairmont.

Directors of the Mutual Fire Insurance Company were elected as follows for a term of three years: Julius Schmidt, Wabasha; C. H. Casey, Jordan; J. F. McGuire, St. Paul; Amos Marckel, Perhan.

FRIDAY'S SESSION.

At 9 A. M. there was an Executive Session to members only followed by the report of delegates to the National Convention.

D. H. Evans delivered an address on "Decadence of Inland Towns."

R. A. Kirk of Farwell, Ozmun, Kirk & Co., St. Paul, read an able paper on the "Catalogue House Question."

RESOLUTIONS.

The usual resolutions were adopted.

ENTERTAINMENT.

On Thursday evening the members of the association attended the Orpheum Theatre in a body. On Friday afternoon they visited the new building of Farwell, Ozmun, Kirk & Co., in St. Paul, and a thorough inspection of the plant of the Minnesota Linseed Oil & Paint Company was made. Special cars were provided for conveying the members to St. Paul, where the establishments of both concerns are located. The new building of Farwell, Ozmun, Kirk & Co. is nine stories high and is one of the best equipped Hardware jobbing warehouses in the country. Cars conveyed the party after an inspection of this building to the State capitol. Governor John A. Johnson, however, was unable to be present, owing to the late hour at which the party arrived, and he delegated Frank R. Day, his private secretary, to receive them. Several guides were also in attendance and a thorough inspection of this handsome building was made.

♣

Mary's father was making the experiment of raising chickens with an incubator in his barn. The neighbors were much interested in this experiment, and, meeting Mary, one of them asked: "Mary, have you any little chickens at your house yet?"

"No, but we're makin' some," replied the little maiden.

REVIEW OF THE MARKETS

WIRE NAILS: New business is arriving at the mills in a satisfactory ratio. Specifications on contracts already booked supply them with the greatest volume. The mills running behind on shipments on account of the urgent deliveries that are solicited. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers	$1.85
Carload lots to retail merchants	1.90

New York.—The advanced price agreed upon by jobbers is making deliveries satisfactory, although the demand for small lots from store is about the average. We quote on small lots from store a basis of $2.15 per keg.

CUT NAILS: At the recent meeting of the Cut Nail Association prevailing prices were reaffirmed. The demand is ordinarily moderate and prices firm. Quotations are as follows: f.o.b. Pittsburgh, for carload lots, $1.80, base; for less than carload lots, $1.85. For carload lots on dock New York, $1.95; for less than carload lots, $2. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 to 10 cents advance on Steel Cut Nails.

New York.—Trade in the local market is not noticeably active, although prices are well maintained at the advance made by jobbers. Quotations on small lots from store are on the basis of $2.05 per keg.

BARB WIRE: For present business the orders are not especially heavy. Shipment by the mills for last month showed excellent activity. Prices are held firmly and prospect good for heavy deliveries on old orders. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.00	$2.30
Retailers, carload lots	2.05	2.35
Retailers, less than carload lots	2.15	2.45

SMOOTH FENCE WIRE: Specifications on contracts placed last year for the Spring trade are unusually heavy, making it difficult for the mills to avoid running behind on shipments. There is less trouble on any new business, it being quite moderate. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.70
Retailers, carloads	1.75

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	12½ @ 13
B Quality Manila	11½ @ 12
Pure Sisal, 7-16 and larger	9½ @ 10
No. 2 Sisal, 7-16 and larger	8 @ 8¼

BINDER TWINE: General market quotations f.o.b. Eastern factories may be given as follows:

White Sisal (500 feet to the pound)	9 @ 9½
Standard (500 feet to the pound)	9 @ 9½
Standard Manila (550 feet to the pound)	10 @ 10½
Manila (600 feet to the pound)	11¼ @ 11¾
Pure Manila (650 feet to the pound)	12¼ @ 12¾

Less than car lots ¼ cent advance.

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 2 cents per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

THE PHILADELPHIA TRADE.

It is commonly said that some people can always find fault, but he would be exceedingly ingenious who could find fault with the present volume of trade, as we do not recall a year in which February has recorded such an enormous volume of business, as this new year of 1906. Last year the month of February was a record breaker, but 1906 has far exceeded 1905. A new record has been established which makes a high mark for the endeavor of future years. No doubt the open Winter has partly been the cause of this abnormal trade, as building operations have been greatly forwarded by the open winter—not only are building operations in our own city going forward on an enormous scale, but these conditions are by no means confined to Philadelphia. In almost all parts of the country we hear of similar reports of active operations.

It would seem that the unusually high prices of lumber, steel and other building materials, as well as the high wages paid for labor, might cause a suspension of building activities, but this is far from being the case. The general conditions of trade and widespread prosperity seem to justify the work that is being done. The mild Winter is, also, responsible for the unusual and early demand for Spring goods of all kinds. Much outdoor work forbidden at this season of the year has been possible for a long while and farmers and mechanics are not slow in taking advantage of the situation, so that the demand for Spring goods is of such a character that in many lines manufacturers now complain of being swamped with orders.

It is hardly fair, however, to give the Weather Bureau credit for all this development of business. No doubt, a large part of it is due to the blessing bestowed on our country by a bountiful Providence in the large crops which have been marketed at high prices. It is comparatively rare that large crops and high prices go hand in hand, but the wedding of these two factors has resulted in bringing to the farmer and community unusual surplus means, so that not only have old debts been cancelled, but luxuries hitherto unattainable have been brought within the means of thousands, and as a man's desires are boundless, he is very ready to employ his surplus means in satisfying his cravings.

The conservatism of our manufacturers—or rather Hardware manufacturers—under such circumstances calls for a few words of praise, as they have shown commendable slowness in yielding to the temptation of advancing prices unreasonably. It is true, that many complaints are heard of high prices but these criticisms are more rife in other lines of business than in ours. The great increase in the cost of materials, notably brass, copper and tin, has compelled some advance on special lines, but on the whole the advances have been quite moderate, and some goods can still be mentioned which are sold at practically old prices, and if the higher cost of materials is taken into consideration, apparently sell on a lower margin than was paid for them several years ago.

We earnestly hope, in times like these, prudence may keep pace with ambition. The new forces, which of late have entered the mercantile world in the guise of mammoth trusts and corporations have perhaps modified the old laws which appeared to regulate business and which we considered infallible. He would be rash, however, who ventured to say that these laws have become obsolete. It seems to us the part of wisdom to recognize the fact that experience is still a valuable teacher, and that the old lessons of the dangers of undue expansion may be a warning not to let our zeal outrun discretion. It is hardly to be expected that prosperity will always be with us, and as has been said by the wise man of old: "The prudent man forseeth the evil and hideth himself."

Biddle Hardware Co.,
James H. Ritter.

THE ALBANY TRADE.

We have just worried through what is the dullest month in the year as far as the selling of goods is concerned for immediate shipment, but for future business it is quite as good as any of the early Spring months. The weather conditions in this section have been unfavorable for business. The long continued mild weather has kept the river open; no ice has been made and consequently the large amount of money which is usually disbursed along the river front between this city and Poughkeepsie has not been in circulation. Possibly it may surprise many readers to learn that this sum, covering the expense of harvesting, storing, reshipping and delivering to New York City, involves the large amount of $2,500,000 in one season and by taking this out of circulation of necessity means a large loss of business to the local dealers along the Hudson river. The sales for future delivery on general Hardware and metal business, have been as large as usual and the report from our customers indicates a hopeful condition of business throughout the Spring season. The market is well maintained. There are but few instances where any sagging in price is noticed. A slight reduction in the price of lead and goods made of this material is observed and is very satisfactory to the plumbing and other branches of trade that uses this line as the prices have been higher than conditions seemed to warrant. The staples, including wire nails and fencing are well maintained in price and, in fact, no instances of weakness in this branch of business seem to have been noticed. A month hence undoubtedly the country trade will have started up and the wheels of commerce will attain a greater speed, all the merchants probably be just clamoring for shipments of orders which have been dragging along the road. This is quite a serious complaint—the

slowness with which goods reach destination when shipped from distant points. We have heard for a long time of the famine in cars and the lack of capacity for handling freight and while it is true and, perhaps, excusable, yet it is difficult to convince our customers that it is unavoidable and the merchants have to bear the blame. We predict a trade of equal volume to last season and shall be greatly disappointed if this prophecy is not verified.

Albany Hardware & Iron Co.,
Chas. H. Turner, *Pres.*

THE CLEVELAND TRADE.

A little lull in purchasing has caused anxiety in some quarters lest depression in the iron and steel trade was approaching, but those familiar with conditions have no fear of radical decline. The large manufacturers have orders on their books for larger amounts than ever before, and in some lines are declining to accept more. The increased use of steel and iron is increasing the value of ore in the mines as an asset, and the steel magnates can leave it there if it is not wanted. In the meantime, the building of boats, bridges, buildings, cars and fences that were until recently built of wood will continue, and increase of population will affect the problem. What becomes of all that is being sold, is the query now; where we are to get all that is wanted, is likely to be that of the future. Fifty million tons annually which will soon be used, will exhaust the supply, and the present holders are alive to these conditions. The estimated value of $1.00 per ton in the mine made a few years ago, does not seem as extravagant now as it did then, and higher estimates will be justified soon. We shall not always likely be on the topmost wave, but if the gold production continues to increase, the general price level will probably be higher. Iron and steel are taken out of the pauper class by the immensely increased use of them, and the perception that the supply is not unlimited. Notwithstanding that our estimate that wealth is the highest product of civilization, has been shocked by the action of some of our millionaires, the country has a fairly solid foundation. The people are not all involved in frenzied finance and lots of us are not likely to become millionaires; but people in business have a chance to make a living. February, as a trade month, exceeded the most sanguine expectations. The Lockwood-Taylor Hardware Co.,
C. B. Lockwood, *Pres.*

THE PITTSBURGH TRADE.

There has been no let down in the good business that has been doing since January 1st. The first two months of the year show considerable gain in amount of sales over the same time last year. A large proportion of early Spring sales are, however, of goods bearing such a small margin of profit that it is a question whether the jobber does not do this part of the year's work purely as an accommodation. The probable coal strike is a serious menace to business all through this section. Manufacturers are storing coal and much anxiety is felt as to the outcome of negotiations now in progress between the operators and miners. Unorganized mines would, of course, profit by a strike but as they are not able to supply but a part of the demand, great loss and inconvenience may result if the strike is begun.

Logan-Gregg Hardware Co.

THE DAVENPORT TRADE.

After several months of the most delightful winter weather, made up of clear skies and bright sunshine, Prof. Moore has just sent us a case assortment containing seventeen kinds of weather for one day. Some one may ask what weather has to do with a trade report. It may have nothing of interest in the report, but it figures largely in trade. We have never known of an overstock of orders when roads were impassible and it was raining.

We do not like to report light trade and slow collections and will not do so now, hence must defer sending in our usual trade letter until your next issue. In the meantime we hope to see the clouds roll by. Sickels, Preston & Nutting Co.

THE GRAPHITE TRADE.

Business for January and February, 1906, is ahead of that of January and February, 1905. There does not seem to be any one locality that is sending in more business proportionately than any other locality. Orders generally throughout the United States are coming in in a most satisfactory way, even beyond our capacity to fill. Furthermore, export orders are also coming in and business from Cuba and Mexico is on the increase. Things generally seem to be up and doing and people who send us orders get the goods as promptly as we are able to fill the orders.

Joseph Dixon Crucible Co.

THE CHICAGO TRADE.

Being in the midst of a very busy season, we will drop some of our work, and take time to write you, regarding our condition of trade. In this connection, we are pleased to state—beginning January 1st, our business increased largely, was still on the increase in February, and shows a still greater increase in March. This state of affairs is practically brought about by our new catalogue, which is a beautifully illustrated—1200-paged book, and which we are just sending out to our customers, and the trade generally. The work is, in every way, satisfactory to us, and we pride ourselves in having gotten out one of the most valuable Hardware and Supply Catalogues that can be produced. Much of the work is shown in colors; made up in bond-paper, and finished in the most modern binding. The work throughout is very plain and finished in a manner to suit the general Hardware trade. Any one not familiar with the Hardware line can use it to advantage, as it is so arranged that it facilitates the finding of any particular article appertaining to the line; besides showing up large numbers of goods that have been carried in stock and which the trade was not familiar with. We shall be pleased to have a request from any of our customers who have traded with us, or from prospective customers (with whom we should like to trade) for a copy of this catalogue. The outlook of trade, in general, was never more promising, or more healthy than at the present time. Prices are not high, and the manufactured goods, in all lines are scarce and stocks in the general merchants' hands are light, which is an indication of a continuation of this favorable condition of trade throughout the year. The tendency of manufacturers, in general, is to keep prices on their present level, and when prices will advance it will be brought about by the increased demand and the light supply. Unless something unforseen shall happen, we predict this healthy condition of trade to remain with us for the balance of this year.

Wells & Nellegar Co.

THE SAN FRANCISCO TRADE.

In the trade situation there has been no change for a fortnight. Notwithstanding the visible cross currents and contradictory elements we read of in Eastern news, noticeable particularly in the iron and steel industry wherein we see unprecedented production and continued weakness of scrap and efforts of speculative holders to liquidate resulting in lower prices with less disposition on the part of consumers to place future contracts; that in some districts stocks of furnaces have increased, but others still report brisk operations, with urgent calls for prompt delivery. It is significant that except in a few cases the lower prices have not appreciably stimulated the demand and there is no longer a general and widespread boom in the iron and steel industry. We hear from New York that "the situation is mixed," and this phrase explains the current condition of trade. One thing is certain, however, that the Pacific Coast is doing as well as at any time during the past eight years, excepting perhaps the boom era of the Spanish war, and with the current copious rains, which almost assure abundant crops for this year, the outlook in California and the two northern States could not well be better. Fine umbrella weather has been the feature of the week, but this is seasonable and Hardwaremen are well pleased. The rain caused a partial suspension of farm work and orange picking and in some sections retarded the growth of crops, but in other respects it was beneficial. Grain is in good condition and making fair growth, but would be improved by less cloudy and warmer weather. With continued favorable conditions it is probable the wheat, oat and barley crops will be fully up to average and in some sections the yield will be the best for several years. One night last week prominent Hardwaremen of this city had a gay time at Delmonico's. The occasion was a complimentary banquet given by the Palace Hardware Company to Robert J. Wisnom, who has been prominently connected with the company sixteen years, but who is now retiring to open a Hardware store for his own account in San Matro, on the west side of the bay, twenty-one miles from San Francisco. Oscar F. Sites, vice-president and manager of the company, was toastmaster at the banquet and proved not lacking in doing his share that made the walls ring with the fun of the evening. Among those present were past members of the company, present members, prominent Hardwaremen of the city and interior of the State, and a party of ladies. F. H. Ellis, president of the Palace Hardware Company, presented Mr. Wisnom with a fob, and Mr. Sites presented a silver pitcher. The gifts represented good will on the part of the company, and the employes. The speeches of the evening were informal and some verses were read indicative of the difficulties encountered by the "Hardwareman," and the instrumental and vocal music was furnished by the Hawaiian band. The California Promotion Committee, consisting largely ofHardware men, is desirous that all trade paper correspondents lend all the Assistance possible to promoting the Balboan Exposition in this city, which is planned to take place in celebration of the discovery of the Pacific Ocean by Balboa and also the opening of the Panama Canel. Last week our Washington representative, Congressman Kahn, introduced a bill in Congress to appropriate $5,000,000 conditionally upon the raising of a like amount by California for this exposition purpose.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED FEBRUARY 12, 1906.

397,498. Device for Opening and Closing Doors. C. F. Hemenway, Lowell, Mass.
397,591. Wash Board. H. C. Hall, Canton, Ohio.
397,618. Pipe Wrench. J. H. Vinton, Boston, Mass.
397,625. Tubular Lantern. L. F. Betts, New York, N. Y.
397,769. Drill Head. W. R. Wright, Port Huron, Mich.
397,794. Manufacture of Wrenches. A. D. Gates, Cleveland, Ohio.
397,843. Edge Trimmer for Grass Borders. C. Everding, Branford, Conn.
397,847. Cooking Utensil. J. F. Fredericks, Lock Haven, Pa.
397,869. Baking and Roasting Pan. J. R. Munson, Scranton, Pa.
397,883. Coffee or Tea Pot. L. S. Wright, Groton, N. Y.

PATENTS ISSUED FEBRUARY 13, 1906.

812,190. Churn. J. W. Dowden, Pearl, La.
812,198. Bit Brace. J. Gessert, Buffalo, N. Y.
812,225. Bolt Clipper and Punch. J. L. Painter, Bellevue, Ohio.
812,229. Sash Lock. J. Power, Methuen, Mass.
812,242. Shade Fixture. S. L. Skinner, Ottawa, Ill.

PATENTS EXPIRED FEBRUARY 19, 1906.

397,893. Combination Lock. H. C. Brown, Jr., Brooklyn, N. Y.
397,913. Step Ladder. G. W. Hatcher and S. D. Hatcher, Cleveland, Ohio.
397,921. Churn. J. C. Kerns, Maitland, Pa.
397,954. Wrench. W. C. Worthen and G. Pendleton, Jr., Boston, Mass.
397,964. H. Brand, Ilion, N. Y.
398,016. Sash Holder. H. A. Flatman and J. Seed, Southbrook, New Zealand.
398,118. Pipe Wrench. M. V. Barton, Bath, N. Y.
398,137. Extension Strip for Window Shade Rollers. A. B. Dunkle, Steelton, Pa.
396,170. Washing Machine. E. B. Loverich, New York, N. Y.
398,187. Weather Strip. J. C. Reid and J. Reid, Leeds, County of York, England.
398,247. Plane. H. Fry, Eugene City, Oreg.
398,297. Ironing Board and Step Ladder. J. H. Whistler, Broadway, Va.
398,302. Saw. W. T. Wilson, Marshfield, Oreg.

PATENTS ISSUED FEBRUARY 20, 1906.

812,808. Window Sash Adjuster. H. Bowers, Wichita, Kans.
812,828. Lock and Latch Mechanism. N. W. Crandall, New Britain, Conn.
812,829. Door Check and Closer. N. W. Crandall, New Britain, Conn.
812,850. Window Screen. D. W. Keith, Keithville, La.
812,871. Lock and Latch. P. Papenfoth, New Britain, Conn.
812,884. Clothes Drainer. F. P. Sager, Maplewood, Ohio.
812,904. Lock and Latch Mechanism. H. C. Voight, New Britain, Conn.
812,905. Lock and Latch Mechanism. H. C. Voight, New Britain, Conn.
812,947. Combination Tool of the Hammer Type. H. E. E. Molkenthin, Coeur d'Alene, Idaho.
812,990. Wheel Barrow. W. Gossett, Falls City, Nebr.
813,031. Nut Lock. A. B. Allen, Pueblo. Colo.
813036. Saw Clamp. C. A. Cardwell, Jamaica, N. Y.
813,070. Attachment for Wood Boring Braces. D. B. Yoder, Guthrie, Okla.
813,111. Door Check. C. I. Parker and P. Papenfoth, New Britain, Conn.
813,168. Nut Lock. J. Peters, Bothwell, Canada.
813,179. Mop Wringer. F. B. Smith, Palmyra, N. Y.
813,180. Quick Acting Monkey Wrench. J. L. Smith, Piru, Cal.
813,237. Attachment for Coffee Pots. R. F. Randall and E. V. Peirson, Newark, N. J.
813,260. Vise. T. W. Vare, Philadelphia, Pa.
813,271. Combined Storm and Screen Door. J. Abrim, Joliet, Ill.
813,325. Butter Churn. C. M. Runyan, Elyria, Ohio.
813,342. Combination Tool. J. D. Barry, Daco, Tex.
813,374. Soldering Iron. P. Gilbert, Newport, R. I.
813,376. Latch. J L. Greenwood, Hoboken, N. J.

MISSOURI RETAIL HARDWARE DEALERS' ASSOCIATION.

(CONTINUED FROM PAGE 34.)

INSURANCE ASSOCIATION.

The Wednesday afternoon session was largely devoted to the Missouri Hardware Mutual Association. After a lengthy discussion it was decided to continue the present "note plan" which limits the liability of each policy holder until policies in force reach the aggregate of $500,000.

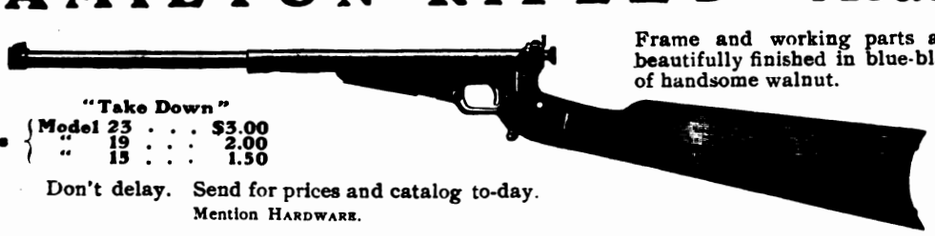
RESOLUTIONS.

A number of Resolutions were offered by the Committee on Resolutions, which were unanimously approved.

"HOW TO SELL WASHING MACHINES."

An interesting paper entitled, "How to Sell Washing Machines" was read by C. W. Magill, representing the Boss Washing Machine Company, Cincinnati, Ohio, which was listened to attentively by the delegates present.

ELECTION OF OFFICERS.



The following officers and committees were chosen for the ensuing year:

President.—W. H. Hahn, St. Louis.
Vice-President.—M. A. Wengert, Kansas City.
Secretary-Treasurer.—Frederick Neudorff, St. Joseph.
Executive Committee.—Taylor Frier, Louisiana, three years; O. W. Johnston, Marshall, two years; W. T. Shoop, Richmond, one year.
Trade Abuse Committee.—H. J. Brunner, Kansas City; J. L. Boehl, St. Louis; A. R. Bondurant, Galt.
Auditing Committee (re-appointed).—J. G. Weber, Clayton; A. Steinmeler, St. Louis; G. L. Phillips, Bethany.

The place and time of the meeting of the next convention was left to the decision of the Executive Committee.

A local organization of the Hardware merchants of Kansas City and surrounding towns was effected as a result of the missionary work done by the State Association. Geo. W. Simms was elected President; James L. Burnett, Vice-President, and Milton A. Wingert, Secretary-Treasurer.

OUR BRITISH LETTER.

(By Our Special Correspondent.)

London, February 28th, 1906.

THE PRESENT DAY SALE OF GAS AND OIL ENGINES.

The present day widespread use of oil and gas engines has diverted the source of power from the engineers, as associated with those engaged in the erection of heavy plant and the manufacture of steam engines, and make it possible for the Hardwaremen, many of whom are well able to undertake the work, to handle contracts for the erection of motors and power for driving machinery. Many ironmongers have introduced machinery into their own workshops, and use small oil and gas engines for providing power, running dynamos, etc. This has taught ironmongers' workmen, by experience, something of their use and afforded them practical knowledge of such engines, especially of the smaller sizes. Quite a number of comparatively small wheelwrights and builders now make these little engines and find them useful. There are many makes on the market, among which the "Jack of all Trades," handled in this country by Fairbanks, Morse & Co., of London, is very popular and is sold largely as well as engines of English make.

IRONMONGERS AND THE SEED TRADE.

Many years ago the greater part of the business in farm seeds was conducted through the ironmongers, and farmers regularly drew their supply of cereals and root crops from that source. The seed grower in time developed into a seed merchant and many of the leading firms became catalogue houses dealing direct with the farmer. When the implement man became an independent trader he sold implements and machines only, but in time he added seeds, oil cakes, and food stuffs; so the business drifted away from the country ironmonger and, with only a few rare exceptions, seeds and artificial manures were banished from the Hardwareman's store. During recent years, however, many ironmongers have combined the implement trade with that of Hardware, and, finding it pays, have made a separate branch of this section; thus, in a great number of instances seeds, now sold in packets and bags conveniently handled, as well as food stuffs and oil cakes, are again being distributed through the old channels. Garden and flower seeds and various sundries are gradually being looked upon as a part of the horticultural branch of the Hardware business and many ironmongers have now built up really good turnovers in that direction. The springtime, when the trade will be at its height, is coming on, and considerable activity is already visible among country ironmongers in consequence.

EARLY SPRING GARDEN TOOLS.

Already some ironmongers have filled their windows with lawnmowers and rollers, spades and forks—the first requirements of spring gardening operations. Window-dressing is an art, and the results a successful window dresser may achieve, far-reaching. Indeed it is difficult to estimate the extent efforts of salesmen are influenced by it, and to how great an extent their best sales may be traced to window dressing. Considering the advantages of good, smart, effective and frequently-changed windows, fully believed in by drapers and other retailers, it is hard to understand why Hardwaremen do not give more attention to this important matter. True, the windows of British ironmongers are now far advanced from those lukewarm efforts remembered by Hardwaremen who are now far advanced in age; still, it is no use disguising the fact that a great sameness is noticeable in ironmongers' windows and, as an ironmonger remarked to me a few days ago, "even the special displays and artistic windows of American Hardwaremen, sometimes held up as bright examples for English ironmongers to copy, have lost some of their shine and originality."

STEEL GIRDERS VS. WOODEN BEAMS.

Although here and there buildings are being run up in London bearing strong resemblance to American sky-scrapers, the "lofty" example is not closely followed in our great city; nevertheless, steel girders are fast taking the place of old English wooden beams. Indeed, the transition is almost as complete as that change which has abolished "the wooden walls of England" and substituted the great steel structures of which the "Dreadnaught," launched a few days ago by His Majesty, the King, at Portsmouth, is a magnificent example. Steel girders are, of course, largely contracted for direct from the manufacturer, still, a very fair business is now done by builders' ironmongers in these commodities. The use of expanded steel is also another growing feature which has to be reckoned with. Instead of lath and plaster walls and divisions, expanded steel, not only for interior work but as the groundwork of exterior walls, is being used more and more. So, right along the line, metal largely enters into building materials and enterprising builders' ironmongers have many opportunities for the expansion of their trade; and, it is pleasing to know, they are taking those opportunities, and much of the building materials hitherto handled by so-called builders' merchants now go through the books of Hardwaremen.

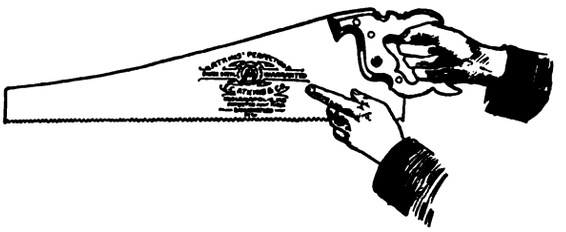
THE GREAT DISTRICT SHOWS.

The fixtures of local agricultural shows for 1906 season are now mostly made and full programmes of the leading district migratory shows have been issued. There are three Great Shows which stand out prominently and which are regarded as events not lightly to be overlooked by implement makers. These are the Royal, which is now migratory and will be held this year at Derby; the Bath and West, a society covering the Southern and Western counties of England, to be held at Swindon (a great railway town, although in the middle of a wide agricultural district); and the Highland, a show visited by all Scotch and North of England farmers, to be held at Peebles. At all these shows American harvester firms attend year after year, their salesmen pointing out the merits of the light, attractive and reliable products of the land across the water—now but a comparatively short trip from the old country.

WHAT ARE IRONMONGERS DOING?

Is a question which may arise in the minds of some of your readers. It is a natural one, easily answered. Retailers of Hardware hold a prominent place among tradesmen in every town in the United Kingdom. They sell goods for which there is a steady demand in every home, in every workshop, and even in every retail establishment. It is well to remember the backbone of the trade although we are apt sometimes to think more of the side lines and outlying branches which are given prominence in discussions on how to increase trade and are brought forward at trade conferences, than of the groundwork of every Hardwareman's stock. During the past month stocktaking has been going on, and in some instances "sales" have been conducted in order to reduce surplus stock, to get rid of damaged articles, and to clear out unsalable lines so that room may be made for new goods. It is especially desirable to reduce out of season goods and to mark down lamps and such like at the close of the season, and ironmongers are doing this more than ever. During the past few weeks several of the larger associations have held their annual dinners, among the rest being the London Association, which has the largest membership of any.

ABOUT OLD CLOCKS.



In an article on "Old-Fashioned Timepieces" in a recent *Delineator*, N. Hudson Moore gives some facts of interest, among them being the following:

"The origin of the earliest time-keeping device is lost in antiquity, but among the first clocks composed of an assemblage of wheels, of which there is no doubt as to age, is the clock in St. Paul's Cathedral, London, which was put up in 1286. By 1600 there were clocks made for a moderate price and for the use of the average householder. These clocks were known by the names 'bird cage,' 'lantern,' or 'bedpost' clocks. They were put on shelves or brackets attached to the wall, and were wound by pulling down the opposite ends of ropes on which the weights were hung. Some of these were striking clocks; others were furnished with an alarm, and none of them was expected to run more than thirty hours. 'The pendulum, which was introduced about 1661, superceded the balance. The first form was known as the 'bob pendulum,' which by 1680 was followed by the 'royal' or long pendulum. America has contributed many valuable inventions to the science of clockmaking, the most important being steel springs, which could be produced at a low price, and thus enable the manufacture of cheap clocks. Another invention was the pendulum covered with gold leaf, which is a necessary part of a regulator clock, and which was made by Silas B. Terry, a son of Eli Terry, of Windsor, Conn., who was one of the early makers of American clocks."

A man has no more right to say an uncivil thing than to act one; no more right to say a rude thing to another than to knock him down.—*Johnson.*

BRANCHES: Atlanta, Chicago, Memphis, Minneapolis, New Orleans, New York City, Portland, San Francisco, Seattle and Toronto, Canada

FROM SECRETARY NEUDORFF. "A REMARKABLE SHOWING."

The following is self- explanatory. We feel the association is now on the up grade and will grow rapidly—due to the personal interest results like the following demonstrate.

To Whom It May Concern:

This is to certify that I hold policy No. 80 in the Retail Hardware Dealers' Fire Insurance Company issued February 26, 1905, and expiring February 26, 1906. Amount of policy, two thousand dollars, premium paid, $28.00, upon which I received a settlement which netted the cost of this insurance to be but $2.80, or ten per cent. of the amount paid the company. This is a remarkable showing and I can recommend the company as having a thoroughly safe proposition. Yours very truly,

J. P. Hamilton,
Bethany, Mo.

The "Heart and Soul"

of this Wrench

Is in the Name of the Maker

"COES"

COES NEW "Hammer Handle" MODEL

Is every bit as strong as the "Steel Handle."

Size for size it is

30 PER CENT. STRONGER
Than any other Wrench Made

IF You are looking for quality in a Wrench, have the name COES with you.

You can't get away from the name COES. It's inseparably wrought into every part of the best "Steel Handle," "Knife Handle" and "Hammer Handle" Wrenches in the world.

Why? Because it belongs to the Coes Wrench Family. It fills the hand so that no gripping power is lost. Even in the large sizes the handle is not too large for one hand.

The handle is of hard wood—the heaviest on any wrench. Inserted at both ends—held by an extra large rivet in centre—double extra heavy riveted tip—it can't be taken off without breaking the rivets.

Best balanced—smoothest—best finished. 15-in., 18-in., 21-in. sizes.
No advance in price over other styles. The question remains:

How Many Do You Need For Spring Trade?

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Bluff City, Kan.—Newton & Baker have started up in the Hardware business.

Brownwood, Tex.—The Jackson-Hughes Hardware Co. has been incorporated with a capital of $100,000.

Buffalo, N. Y.—J. F. Berner Hardware Company has been incorporated. Capital, $10,000, and directors: J. F. Berner, Sr., J. F. Berner, Jr., J. G. Berner.

Columbia, Tenn.—The Hardware firm of J. P. Street & Co. has been incorporated, the incorporators being J. P. Street, W. P. Ridley, George P. Martin, R. L. Vaughn and John W. Matthews. The capital stock is $45,000.

Garden City, Kan.—Struthers & Wiss have opened a new Hardware store.

Greensboro, N. C.—The Central Hardware & Mantel Co. has been incorporated. Capital $25,000 (authorized) and $5,000 (subscribed.) Incorporators: J. B. Harrison, J. H. Medearis, Edwin Kiser, D. E. Harllee and L. V. Butner.

Greensboro, N. C.—The Guilford Hardware Company has been incorporated with an authorized capital stock of $50,000. The incorporators are R. L. Woodard, W. T. McCuiston and Ernest E. White.

Hartford, Ct.—Smith & Bishel Co. has been incorporated to deal in Hardware. The incorporators are Arthur H. Bishel, Frank H. Smith and Joseph Kincaid, Jr. The capital stock is $10,000.

Hot Springs, Ark.—The Hamp Williams Hardware Co. has been incorporated with $40,000 capital stock. The incorporators are: H. Williams, O. M. Williams and Clyde M. Morris.

Joliet, Ill.—J. C. Kinser Hardware Co. has been incorporated. Capital, $10,000. Incorporators: J. C. Zinser, O. A. Fisher and Robt. T. Welsh.

Juliaetta, Ore.—The Hardware Co. has been incorporated with $10,000 capital.

Kansas City, Kan.—The Richards & Conover Hardware Co., has been incorporated. Capital stock, $100,000. Directors: J. F. Richards, John Conover and W. S. Richards.

Leshara, Neb.—F. C. Harmon has opened a new Hardware and implement store.

Louisville, Ala.—Clay Hardware Co. has been incorporated with $4,000 capital. Incorporators: R. A. Cains, H. C. Webb and W. B. Williams.

Lowell, Mass.—Healy & Wyman Hardware Co. has been incorporated to deal in Hardware; capital $15,000. President, F. A. Healey, East Boston; treasurer and clerk, William E. Wyman, East Boston.

Medford, Ore.—A. D. Houston has started up a new Hardware store.

Medical Lake, Mich.—John Reilly & Sons have started up in the Hardware business.

McDonald, Kan.—J. Johnson has opened a new Hardware and implement store.

Norcatur, Kan.—Richer Bros. have recently opened a new Hardware store.

Olney, Tex.—The Graham Hardware Co. is opening a new store.

Omaha, Neb.—The Omaha Iron Store Company, which will deal in heavy Hardware, has been incorporated. The company has a capital stock of $100,000. The incorporators are H. I. Adams, G. C. Adams and H. C. Woodland.

Pelahatchie, Ala.—Pelahatchie Hardware Co. has been incorporated with $10,000 capital stock.

Quincy, Ill.—Gunther Hardware Co. has been incorporated. Capital, $20,000. Incorporators; R. C. Gunther, R. F. Gunther and Le Roy Richards.

Red Lodge, Mont.—The W. A. Talmage Co. has been incorporated to engage in the Hardware business. The incorporators are W. A. Talmage, George A. Jeffrey and H. C. Provinse. The capital is $100,000.

Roswell, N. M.—The W. P. Lewis Hardware Co. has been incorporated. Capital $50,000.

Seymour, Tex.—The W. R. Hiltiard Hardware Co. has been incorporated with a capital of $20,000.

St. Louis, Mo.—F. H. Keuthan Hardware Co. has been incorporated with $20,000 capital. Incorporators: F. H. Keuthan, A. Summers and Wm. Garenhorst.

Ulysses, Neb.—The Barnes-Havlik Hardware Co. has opened a new store.

West Terre Haute, Ind.—George W. Splady has engaged in the Hardware business recently.

Winston-Salem, N. C.—The Wall-Huske Hardware Co. has been incorporated with $100,000 capital stock. The incorporators are: J. D. Wall, N. W. Huske and W. Richmond.

Changes and Improvements.

Akron, N. Y.—E. M. Sherwood has removed his Hardware business from Clarence Center to this city.

Attica, Kan.—Stout & Davis have succeeded to the Hardware business of Devine & Stout.

Bradshaw, Neb.—Andrew Klien has sold his Harware store to the L. C. Smith Co.

Birmingham, Ala.—The Powell Hardware company is about to absorb by purchase the Birmington Stove and Hardware company. It is understood that the price agreed upon is something like $75,000, and that the deal will become effective about March 1. The Powell Hardware company recently purchased the Gray & Dudley Hardware Co.'s Birmingham business, and has already one of the largest Hardware establishments in the Birmingham district.

Boise City, Ida.—B. S. Eastman and W. R. Teller have purchased the interest of George W. Fletcher in the Hardware business of the Fletcher-Eastman-Teller Company. The company is to be reorganized by the remaining partners.

Bee, Neb.—O. C. Bedford has sold his Hardware store to Frank Cuda.

Blackfoot, Ida.—Boyle Bros. & West have been succeeded in the Hardware business by Boyle Bros.

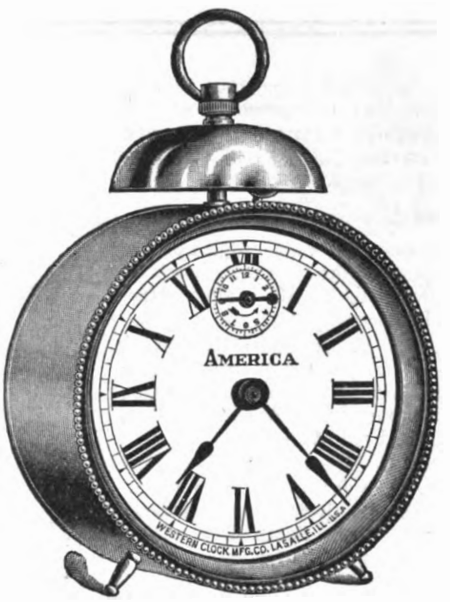
IS 33⅓% PROFIT ENOUGH FOR YOU?

You can make that or more on every Iwan Post Hole Auger. And say, if you push them just a little, you can sell 50 or 60 during the Spring.

Its been done by many other good dealers, so try it yourself. You ought to sell one with every new sale of fencing.

The Iwan P. H. Augers are the highest grade post hole augers made, and are entitled to the highest price. Don't wait for the farmer to come to you and ask "Have you any post hole augers?" Tell him in your home paper, either daily or weekly that you handle the Iwan Augers and he'll buy from you, because he sees it advertised in his farm Journal. We are advertising them in 53 of the best agricultural Journals, reaching more than 5,000,000 farmers and refer ALL inquiries to the dealers.



Sizes, 3, 4, 5, 6, 7, 8, 9, 10, 12 and 14 inch. We will lend you a cut free.

IWAN BROTHERS, STREATOR, ILL.

We make also Post Hole Diggers, Sickle Edge Hay Knives, Tile Drain Cleaners, Open-back Tiling Spades, Revolving Chimney-tops and wire Conductor Pipe Hangers.

BUY THEM FROM YOUR JOBBER.

The America Alarm

Gives you an opportunity to offer a clock, accurate, efficient, guaranteed, at a remarkably low price and is sold at a figure that leaves you plenty of room for profits. Your jobber has the "America."

The **Western Clock Mfg. Co.**

La Salle, Ill.

NEW YORK 51 Maiden Lane

CHICAGO 151 Wabash Ave.

GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

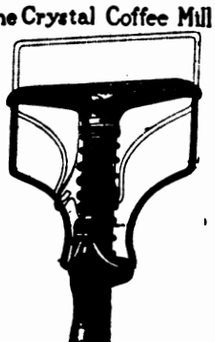
A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 800 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill



THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE RIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

BANKRUPTCY—JOINDER—PREFERENCES.

The Supreme Court of Indiana held, in the recent case of The Booneville National Bank et al. vs. Blakey, that in an action by a trustee in bankruptcy to recover property conveyed by an insolvent debtor to a creditor, who "had reasonable cause to believe that it was intended thereby to give a preference" in violation of section 60 (b) of the bankrupcy act, the complaint need not allege a demand before suit, and that where an action by a trustee in bankrupcy against several creditors, to each of whom the bankrupt was alleged to have made a separate conveyance in violation of the rights of creditors, proceeded upon the theory of a several liability by each defendant and not a joint liability, and as against one of the defendants a plain statutory action under the bankrupt act was stated, which was triable by jury, while a cause of action in equity to rescind a conveyance for actual fraud was stated as against other defendants, the party against whom a mere statutory cause of action at law was stated was entitled to a separation of the causes of action under a demurrer for misjoinder and to a seperate trial by jury on proper request.

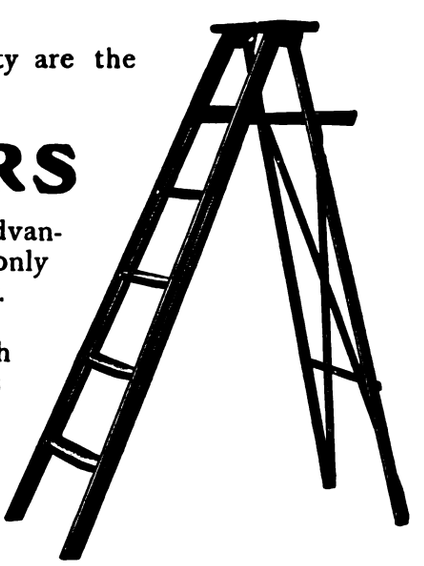
Back of every big ladder trade there's a cause--a reason for its success.



Push, salesmanship and advertising can move an undesirable stock of ladders—for a time, but a prosperous trade that grows each month larger and more profitable must be based on quality.

Strength, Stability, Lightness and Durability are the qualities that make

UDELL LADDERS

such satisfactory trade builders. There's not an advantage lacking in Udell Ladders to make them only "just as good as other kinds." They are the best.

Udell Ladders combine the best material with the most skilled workmanship and each one is backed by the "Udell" guarantee of satisfaction.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Boothbay Harbor, Me.—The Sheepscot River Trap and Bait Company, a new concern, has been incorporated to carry on a general fish and trap business. The capital stock is $45,000. Officers are as follows: President, Capt. Eben T. Lewis, Capt. Benj. H. Spurling, J. S. Seavey, Hardy McKown, L. A. Duton, M. A. Perkins, W. M. Sawyer, W. T. Marr and W. T. Holton.

Boston, Mass.—The Linscott Sporting Goods Co. has been incorporated with a capital stock of $5,000. Officers: W. A. Bragdon, president; J. M. Linscott, treasurer.

Boston, Mass.—The Equitable Distributing Co. has been incorporated as a cycle jobbing concern.

Boston, Mass.—The Martin Mfg. Co. has been incorporated with a capital stock of $260,000, and will deal in sporting goods. The officers of the company are J. C. Edwards, president and J. C. Martin treasurer.

Bradford, Pa.—Dember & Antico have been incorporated to carry on a bicycling business.

Oswego, N. Y.—The Willis Company has been incorporated to deal in bicycles. Capital, $6,000. Directors: N. Willis, J. T. Skehan, C. L. Lattin.

Pepperell, Mass.—The Burkinshaw Knife Co, who will handle cutlery of all kinds, has been incorporated with a capital stock of $4,500. The officers are as follows: Alta A. Shattuck, president; Susan A. Burkinshaw, treasurer.

Sayreville, N. J.—Brixite Explosives Co. has been incorporated to manufacture gun and blasting powders, gun-cotton, dynamite, etc.; capital, $125,000. Incorporators: Theodore Brix, Sayreville, N. J.; Walter L. Benn, Hotel Majestic, New York; Walter E. Warner, Brooklyn.

Changes and Improvements.

Brockton, Mass.—G. A. Gove has purchased the business of E. M. Buffom, and will operate as the Brockton Sporting Goods Co.

Chicago, Ill.—The Diamond Rubber Co. is erecting a three-story building which will have a frontage of 100 feet and a depth of 80 feet.

New York.—The Lentz Manufacturing Co., formerly of 132 Church street, manufacturers of sportmen's specialties, have moved to larger quarters at 54 Vesey street, where they have installed new modern machinery.

Pittsburgh, Pa.—Beltz and Delavie have succeeded to the business of Charles Beltz, manufacturers' agent and jobber. After April 1 the company will move to 524 Penn Ave., in order to accomodate their increased business. They handle a complete line in everything in automobile, bicycle and rubber goods.

Sacramento, Cal.—Ernest Norton has sold out his business to P. E. Nelson.

Springfield, Mass.—John McGregor, superintendent of the Pope bicycle factory at Westfield, Mass., has resigned that position to become superintendent of the Hendee Manufacturing Co. R. H. Patterson, foreman of the Pope enameling department, will also enter the Hendee employ in a similar capacity.

Wheeling, W. Va.—A. C. Alexander and O. H. Burdette, who recently moved from Athens, O., and leased a building, are now placing machinery in it which will be used in the manufacture of gun stocks.

Fires.

Buffalo, N. Y.—George N. Pierce Co.'s plant recently sustained heavy loss by fire. The main factory was not touched, but as that part of it destroyed was used for the testing of the Pierce automobile engines and for the assembling and storage of bicycles and repair parts, the loss and inconvenience cannot be readily overcome. A large number of finished bicycles were destroyed, including one lot of 400 which had been just made ready for shipment to Japan. The loss, estimated at $75,000, is fully covered by insurance.

Vermilion, S. D.—O. B. Nelson's bicycle store was recently destroyed by fire. Estimated loss is $2,000; insurance, $1,500.

Miscellaneous.

At the annual election of officers for the Edgecombe Wheelmen, of New York City, the following were elected: President, Samuel R. Morrison; vice-president, Reese Hughes; treasurer, Bernard Glemba; recording secretary, Otto Brandes; financial secretary, Richard Hughes; captain, Nicholas Kind.

✤

The annual meeting and election of officers of the Clover Cycling Club, of Lynn, Mass., was held recently and resulted as follows: President, George H. Paris; vice-president, E. S. Hazlett; recording secretary, F. L. MacLean; financial secretary, E. N. Blethen; treasurer, B. R. Falls; directors—Members Brown, Murphy, Calahan, Allen and Badger.

✤

For the 12 months of 1905, Germany's export of cycles and parts attained a total of 5678 tons as against 3811 tons in 1904; the values are not given.

✤

A Hagerstown factory has an order for 100 bicycles to be shipped to Japan.

✤

The Acquackanonk Wheelmen, Passaic, N. J., have elected these officers for the present year: President, A. N. A. Stroyer; vice-president, F. C. Greeme; recording secretary; Peter Kicntt; financial secretary, F. A. Lau; treasurer, W. Hendry, Jr.; captain, Arthur Kinloch; road manager, W. Totten.

IS "HUMAN NATURE" YOUR CLERK?

The greatest sales force on Earth is a true knowledge of Human Nature. Suppose a man buys a cheap, inferior imitation of "3 in One." He's more than likely to conclude that everything else you have is equally bad. That's all wrong, but— If

3 in One

pleases as it must, isn't he likely to come back not only for more oil but for other things? Think it over. Write your jobber for large and small size bottles.

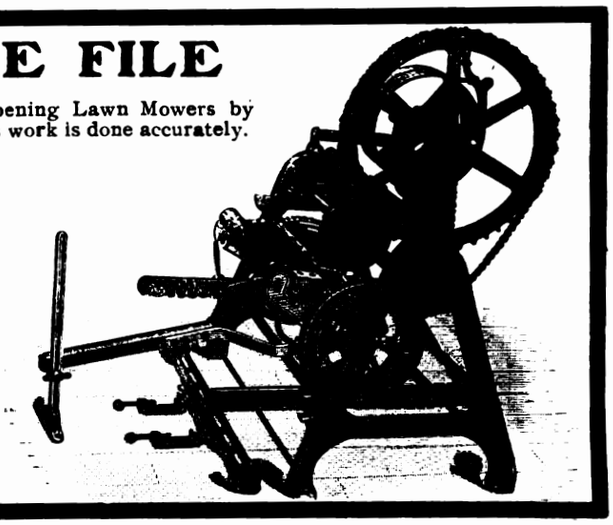
THE MAN BEHIND THE FILE

Is also behind the age if he still persists in the drudgery of sharpening Lawn Mowers by hand. It is mighty tedious labor, and he never can be sure that his work is done accurately. But if he will purchase an



IDEAL LAWN MOWER GRINDER

his work becomes almost play; his effort will have produced a cutting surface mathematically exact on every blade, and he will have saved time enough in the grinding over the old manner, to sharpen four lawn mowers. He can, moreover, sustain his old rate and in many cases the Grinders have paid for themselves within a fortnight. The Grinders are made for either hand or power grinding. The latter is equipped with tight and loose pulleys, and can be operated by hand if desired.

The greatest satisfaction and the most money for the least effort—that's the key to the 1906 model of the IDEAL LAWN-MOWER GRINDER.

Send for particulars.

THE ZINN

The Zinn Automatic Razor is unique. It is "The Razor with the always Keen Blades"---twenty-four of them---so thin that 200 of them are only an inch thick! Hard enough to cut glass---sharp enough for the toughest whiskers---uninjurious to the tenderest skin.

Its phenomenal success is due chiefly to the Zinn Blade:

Show a customer a Zinn Blade---

He will buy a Zinn Razor.

No Honing!
No Stropping!
No Dissatis-faction!

Two Parts Only---
Holder and Blade.

ZINN PROFIT SHARING

We don't want all the profits. We want every Dealer to share with us and enjoy our protection against cut prices. Send at once for Rock Bottom Prices and Agents' agreement.

Then---display Zinn---talk Zinn---and the Zinn will talk for you.
One pleased customer begets another.

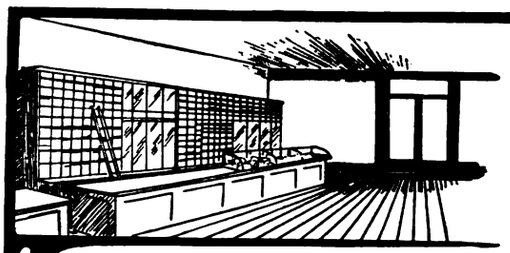
The 4 Big Lawn Mowers

Our Style A Is the Only ALL STEEL MOWER MADE

It has 10 inch wheel, 4-blade cylinder, train of 3 gears, double ratchet, making both wheels drivers. Three others—Style E, K and C—belong to the same combination.



STYLE A

In each, the revolving cutters are without bar in centre have large, long bearings, and are the most satisfactory Lawn Mowers to sell. We have others shown in 1906 Catalogue. You ought to have a copy and see how complete our line is!

The Philadelphia Lawn Mower Co.

3101-09 Chestnut St., Philadelphia, Pa., U. S. A.

DON'T MOVE

You can increase the size of your store without increasing your rent by installing one or more

Milbradt Rolling Stop Laddors

They make it easy to utilize the space between the top shelf and the ceiling for extra shelvings and boxings.

Milbradt Ladders are made to order from measurements covering the conditions peculiar to each store.

They combine great strength, easy and noiseless operation and handsome finish at a cost that is as low as the price for ready made ladders.

Style No. 4 (shown in outline), a ladder for use on shelving with very narrow or no base. The swinging arms hold the ladder in the position most convenient for climbing. These arms may be swung up allowing the ladder to hang close to the shelves when not in use. Rubber rollers are attached to these arms and run against the base. This is a most convenient ladder for use in narrow aisles or in stock and store rooms.

Our latest catalog illustrates 14 other standard styles adapted to every form of shelving. It will be mailed on request.

The Simplex Riveter

Price with 12 boxes of Rivets **$1.50 per doz.**

This is the simplest possible form of tool for setting tubular and split rivets and is also the easiest and simplest to use; all that is necessary being a wagon tire or other convenient hard surface to rest the head of the rivet against and a hammer or wrench to drive with. The illustration explains the method of using.

This is new and sells like hot cakes at 25 cts., with a box of 50 rivets included.

For sale by leading jobbers, or we will send one dozen prepaid with 12 boxes of rivets on receipt of the price.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

PLAIN PATTERN CITY HEAD.

CORRUGATED PATTERN.

"DAN PATCH" SHOD WITH CAPEWELL HORSE NAILS WHICH ARE "THE BEST IN THE WORLD."

PLATE PATTERN.

Allentown, Pa., Sept. 21, 1905.

The Capewell Horse Nail Co.,

Gentlemen: I shod **DAN PATCH** this morning for his record breaking performance, with No. 4½ Plate nails, Capewell. He reduced the world's record on a half mile track from 2:03 to 2:01; also from 2:11 to 2:05 for wagon. I have driven Capewell nails for years on the Grand Circuit. I think them the only nail in the world for race horses. With best wishes,

Yours truly, J. F. HANSON.

The Wiederhold Inverted Light

LIGHT COMPLETE
Price $1.75
GLOBE REMOVED

The Best--Because
It never flashes back, blackens mantels nor smokes. Does not flicker.
It's ornamental, durable and gives
50 Per Cent. More Light
at less cost for gas and mantels. Fits any fixture—burns all kinds of gas.
Mark: Its Rays Are Downward.
We want a representative in every town. Write us.
The WIEDERHOLD LIGHT CO.
96 Warren St., New York

Why
is it thousands of Hardware Dealers are discarding their inefficient lighting systems, whether gasoline, gas or electric, and installing the
AMERICAN AUTOMATIC LIGHTING SYSTEM
Because there is money in it. These machines cost less for maintenance and installation and consume less gasoline per candle power than any other gasoline system on the market.
Compared with gas or electricity they cost less than either per hour and give the merchant perfect independence.
Send us plan and size of your store and we will give you an estimate of the cost of installation and maintenance.

The Insignia of Excellence

North, East, South and West the stamp of popular approval has been placed upon

REED'S FLINTSTONE Enameled Steel Ware

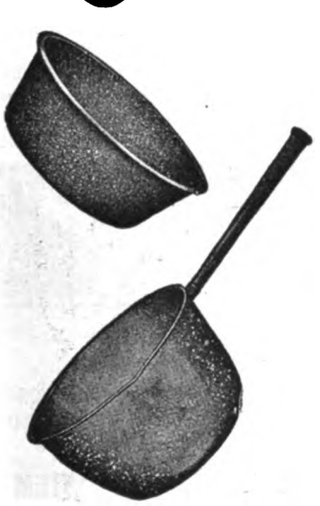
The Reason?

The sale of Flintstone has been so phenomenal, and we have more than trebled our output the past year, because

Flintstone Enameled Ware

has stood the most exacting tests of the best chemists in the U. S.

It is free from poisonous ingredients and practically insoluble.



Flintstone is seamless, sanitary, substantial.

It is the best moderate priced Three-Coated Enameled Steel Ware on the market.

It's pleasing to the eye. It lasts and —outlasts the other kinds.

Our Ten Years' Guarantee

with every piece. Write for prices to-day.

Nebraska City, Neb.

They only manufacture the

FAULTLESS

IS 331-3% PROFIT

ENOUGH FOR YOU?

You can make that or more on every Iwan Post Hole Auger. And say, if you push them just a little, you can sell 50 or 60 during the Spring. It's been done by other good dealers, so take a try at it. You ought to sell one with every new sale of fencing.

They are the highest grade post hole augers on the market and entitled to the highest price. Don't wait for the farmer to come to your store and ask, "Have you any post hole augers?" Tell him in your home paper, either daily or weekly, that you handle the Iwan Auger and he'll come and buy, because he sees it advertised by us in his farm paper. We are advertising these augers in 53 of the best agricultural journals, reaching more than 5,000,000 farmers and refer all inquiries to the dealers.

Sizes: 3, 4, 5, 6, 7, 8, 9, 10, 12 and 14 inch.

IWAN BROTHERS,
STREATOR, ILL.

We also make Post Hole Diggers, Sickle Edge Hay Knives, Tile Drain Cleaners, Open-back Tiling Spades, Revolving Chimney-tops and Wire Conductor Pipe Hangers. BUY THEM FROM YOUR JOBBER.

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

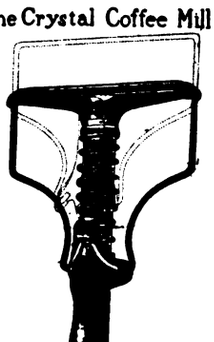
A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 800 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill



THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE RIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

GOULDS MFG. CO.'S NEW CATALOGUE.

GOULDS MFG. CO., Seneca Falls, N. Y., issue a handsome catalogue in white and gold of their line of Goulds Pumps for fire service. Illustrations are given of the High Pressure Fire Protection Plant installed at Dreamland, Coney Island, New York, which includes the Goulds Triplex Double-Acting Piston Pumps, Nash Gas Engines, Goulds Underwriters' Triplex Fire Pumps and Electric Rotary Fire Pumps. Various views of Dreamland are given, showing the Fire Pumps in active service, and making this a very interesting pamphlet.

THE NEW UNIVERSAL SQUARE.

The Duby & Shinn Manufacturing Co., Inc., of New York City, have had so many cases of misunderstanding among the dealers who have filled orders with the common squares in place of the "New Universal," because of the fact of the "New Universal" being numbered 1, 2, and 3, and on account of these being similar numbers to those on the common squares, that they are compelled to adopt new numbering, and herewith announce to the trade that henceforth their squares will be numbered as follows, viz.: The six inch, Size No. 6; The ten inch, Size No. 10; The thirteen inch, Size No. 13.

SECURING CHEAPER ALCOHOL FOR INDUSTRIAL PURPOSES.

We have received the report of hearing on the subject of untaxed denaturized alcohol before the Committee on Ways and Means at Washington, D. C., on February 7-9th, at which representatives of the manufacturers, farmers and workers testified as to the advantages which would result from the removal of the internal revenue tax from alcohol made unfit for beverage purposes.

The statements submitted by Professor Elihu Thomson of the General Electric Company, Mr. Leonard Goebbels of the Otto Gas Engine Company, and Mr. James G. Warnes of the International Harvester Company, as to the value of alcohol as a motor fuel, were of special interest to the members of the Committee, as they showed that with the tax removed alcohol could be substituted for gasoline in the internal combustion farm engines which are coming into such general use, thus lessening the steadily increasing demand for gasoline which has operated to advance the cost of that material in recent years.

Testimony was also submitted showing that untaxed alcohol could be used for lighting, heating, cooking and other purposes, for which large quantities of gasoline are now consumed. The substitution of alcohol for these purposes would leave just so much more gasoline for motor vehicle use, and would prevent a still further advance in its cost, due to a diminishing supply in proportion to an increasing demand.

From a recent cable dispatch from London, published in the *New York Herald*, that the five hundred motor omnibuses which will shortly be in use in that city, will alone consume three million gallons a year, there may be some question as to the availability of alcohol as fuel for automobiles, but its substitution for gasoline for purposes that now consume millions of gallons of this, would have the displaced supply for consumption by motor vehicles.

GARLAND NUT & RIVET COMPANY.

The Garland Nut & Rivet Company, Pittsburgh, intends to make some large additions to its works at West Pittsburgh, Pa. A new building will be erected of brick construction 62 by 160 feet and two stories high, which will increase the floor space available for manufacturing to 66,000 square feet. This extension to its plant is made necessary by the largely increased business the company is receiving for its new lines of small Machine, Carriage and Tap Bolts. Other products manufactured by the company are Small Rivets, Cold Punched and Semi-finished Nuts and Galvanized Pump Chain.

GERMAN SILVER.

One of the oddities of our nomenclature is that the combination of metals known as German silver contains no silver in its composition, and is of Chinese and not of German origin, says the *American Machinist*. It was first introduced into Europe by the Germans, and for some time it was not generally known that they had simply borrowed it from the Chinese.

THE J. D. WARREN MFG. CO.'S NEW HOME.

The J. D. Warren Manufacturing Co. have purchased the large plant of the Ellington Manufacturing Co., at Quincy, Ill., for the extension of its business. Equipment is now being removed from the old plant at Quincy into the new works and new machinery added which will make the plant modern in every way. The Ellington plant is of itself handsomely built, and the main buildings are over 400 feet in length. But it is the Ellington no longer, and is now the Warren plant, costing in its modern construction $110,000. The new factory has, in round numbers, 100,000 square feet of floor space or just about four times the capacity of Mr. Warren's present factory. It is remarkable, too, how little work will be necessary to convert into a model wood-working factory a modern iron-working plant, and we are told that the peculiar fitness of the Ellington plant to Mr. Warren's needs had much to do with his ultimate decision to make the purchase. His business had grown to such tremendous proportions that larger manufacturing capacity was imperative, because his old factory has long since been inadequate to meet the demands for his up-to-date shelving, and cabinet work for modern Hardware stores. The show rooms of the J. D. Warren Manufacturing Co. are in the Masonic Building, Chicago. The company manufacture a complete line of Cabinets, Shelving and other furnishings for Hardware stores.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

STATUTE OF LIMITATIONS—EFFECT OF ACKNOWLEDGMENT.

QUESTION: Seven years after a note was due one of the endorsers wrote to me as follows: "Several years ago when the blank company went into insolvency, you held a partially paid note of the company endorsed by me. I am not yet able to take up the note and have no definite prospect of being able to do so for a long time to come; but if you are disposed to name a small sum that you will take for the note I shall be glad if I can do so in justice to other interests to buy it." Is this an acknowledgment of the note that will enable me to sue upon it?

REPLY: It is well settled that even though the Statute of Limitations has run against a debt or claim, a new acknowledgment in writing signed by the party to be charged, will remove the bar of the statute and enable the creditor to sue upon the claim. But in order to have this effect, the acknowledgment must recognize an existing debt and contain nothing inconsistent with an intention on the part of the debtor to pay. In other words, it must be an unqualified admission of a present debt, which the debtor is liable and willing to pay. We think this acknowledgment is plainly insufficient. So far from containing a promise to pay, the debtor expressly says that he has no prospect of being able to take up the note. The acknowledgment is plainly inconsistent with a promise to pay.

USURY—LOAN BY PRIVATE BANKER.

QUESTION: A private banker doing business in the State of New York lends money at seven per cent. interest. The interest has been paid. Can the borrower refuse to pay the principal on the ground that the loan was usurious?

REPLY: Not in the State of New York. The general rule in this State is that a usurious transaction is void altogether and the lender can neither recover interest nor principal, if he has agreed to take more than the legal rate of interest. The statute recognizes an exception to this rule, however, in cases of State banks or private or individual bankers. These are put on the same footing as national banks under the federal laws. A loan by them at usurious interest does not forfeit the principal, but the bank can still recover the principal loaned. No interest, however, can be recovered, and if the borrower has already paid more than the legal rate, he can recover twice the amount that he has paid in a suit against the bank or banker.

MARCH 25, 1906

Editorial Trade Review

The few days of wintry weather we are having in this changeable month of March, if they do nothing else, they exert an influence on the orders which have been going forward regularly and in large volume. Having a halting influence, be it ever so little, it will have the effect of giving the manufacturers a breathing spell of limited duration, and enable them to catch up a little so that they can fill some of the more insistent demands that are daily made on orders previously bestowed upon them. The manufacturers would not be embarrased by a lull in the vigor of ordering goods. Orders have been received in such volume that they could almost welcome a month's dullness, enabling them to get some Spring goods ahead, on which they have been hard pressed to deliver within a reasonable limit of specified dating. The demands upon the jobbers' stocks have been so full and frequent by the retailers that they have been depleted to such an extent they themselves find their supplementary orders are in no condition to be filled in the hurry they endeavor to insist upon, interfering with anything like a prompt delivery.

Every Spring and previous to the season's anxiety, it has been customary to find too much delay in shipments, which seems to get worse with each succeeding year. Special orders to be shipped direct from the factory to customers of the jobber seem to be the great cause of the delay. Each with all the increased facilities for manufacturing they have inaugurated, factories cannot ship all they make on an arbitrary date. They have necessarily got to average the delivery of their output. This affects shipments of wire cloth and wire netting very largely. This matter is referred to more at length in our Philadelphia trade letter.

The building season opening much earlier than usual, the dealers are endeavoring to hurry forward all the goods they need to replenish their diverse stocks. They wish this season especially to be thoroughly equipped for business so as to lose no item of trade they anticipate getting, and so throttle the trade of catalogue houses; as they will be able to deliver at once, while their hustling competitors will have the usual delays to contend with, which will make deliveries uncertain and indefinite.

Axes are in great demand at the new prices, which are quite low by comparison with prevailing quotations of the immediate past, which have been so high that the dealers have sold out their stocks to the lowest limit, and the demand to-day is of a character to brace up the market effectually, and will probably show record sales as a result.

There is but little of a speculative feeling behind most of the orders. They are intended to supply but the wants of a few months of regular goods. There seems to be a fear that beyond that time, which even the condition of the axe market engenders, on account of increasing production, if the manufacturers should get a set-back on account of crop failures, all goods would be relatively lower in price.

The entire trade is knuckling down to pay every attention to the strenuous demand that exists to complete the stocks of the retailers, and open up the season thoroughly in harmony with the desires of the trade as planned and purposed.

There is every probability that in the Southern trade March will prove to be the banner month for many years, as all the Spring and Summer goods called for by the dealer are in such increased quantities as were never before realized, especially in steel goods and the various garden tools of the trade. As the planters have been largely investing in the implements which possess so much of an interest to them, it is supposed the new crop of cotton will show an increased acreage of that important staple.

The home industries are in such excellent condition that the export trade, it would seem, would be left to take care of itself as usual; but the care with which markets are studied and the spread of our commerce in the Hardware line is carefully manipulated; there is no let up even under existing conditions that would cause the tendency to sag, but it is followed up, and every advantage taken where possible to foster a trade with territory that promises a profit in the future.

HOW A WOMAN LIKES TO BE TREATED.

The average woman likes to be met on plain business principles. Politeness she expects; but the clerk who bows excessively, who alternates his words with "Ma'am" used expletively, gains nothing unless it be her amusement or contempt. While flattery as a skilfully concealed adulterant may be received with no special disfavor, the crude article is speedily rejected.

Does she prefer a woman clerk? Ordinarily, no; especially not for articles with which she herself is not thoroughly familiar, hence dependent partly on the advice of her dealer. Not that she distrusts her sex, but that she has more faith in the masculine knowledge of things outside of her sphere.

She likes to feel that she is treated as her husband would be—the same goods, the same prices, and no affectation.

DEATH OF WARREN JORDAN.

Warren Jordan, a well-known citizen of Peekskill, N. Y., died at his home, No. 950 Paulding Street, from bronchial trouble on March 9th. Mr. Jordan was born on April 24, 1833, at Croton. At an early age he went to Peekskill and learned the trade of iron moulder. He saved a little money, and engaged in the stove and Hardware business in Main Street. He was the oldest Hardware merchant in the village, and had made a competence. He lived in one of the finest homes in the city. He was a trustee of the village for sixteen years, and for the last few years a water commissioner. He was a member of Peekskill Lodge No 714, B. P. O. Elks; a trustee and vice-president of the Peekskill Savings Bank, and a member of the board of trustees of the Peekskill Military Academy, and trustee of St. Paul's Church, of which he had been a member nearly a half century. He married Ann E. Royce May 9, 1870. She and three children, Warren S., Edmund and Grace, a brother, Cyrus A. Jordan, of Jamaica, L. I., and a sister, Miss Hannah Jordan, of Peekskill, survive him.

RUMINATIONS OF A COUNTRY HARDWARE MERCHANT.

The Addition of Some of the Newer Ideas to the Successful Methods of Former Days.

The cheery Illinois Hardware dealer greeted me with a smile and pointed to a chair as I asked "What's new."

"There's nothing particularly new," said he. "I'm not specially one of those new fellows. My brother Sam, that's in the grocery business, thinks I'm a kind of back number, though he has to admit that I have got together more money than he can begin to produce. Now Sam is great for progress and for new things. He is an easy mark for the man who wants to put in some new labor-saving machine that will give his clerks more time to loaf, for he will never fire a man, nor make any tremendous shove for business. Consequently every new thing he has adopted is pretty near a dead loss to him. Why he's running one more wagon now than he needs to and is paying for the stabling, care and keep of his horses and wagons instead of having his own hands to do the work themselves.

"Speaking of new methods, the factories help us out a bit and keep us up to snuff by the rounds of their demonstrators who cook on gasoline ranges and all kinds of ranges. That sort o' livens up things and keeps the people interested. Curious how my place has come to be headquarters for the farmers. They simply can't help coming here. They've been doing it for years and their boys are following them. It's not that I spend so much time on the farmers. I just give 'em an observation or a jolly as I go about my work. They know I give them a square deal and a straight opinion on any proposition, no matter if it's a few cents against me. They have got into the habit of bringing stuff in from the country. Just for the fun of things, a few years ago I started a little rivalry between two fellows who thought they were the beginning and end of knowledge on raising corn. Sanders brought in an ear one day, which I duly labeled "Sanders' best ear; who can beat it?" and put it on the shelf in plain sight. You ought to have seen that shelf two weeks after. Well, since that time I have been kind of unconsciously running a young county fair. It's getting to be a nuisance, but what's the use of shutting it off. I just draw the line on pumpkins, for I haven't room.

"The building boom is on now, and between you and me that's where the money is. It didn't look so one time. The builders went running around to everybody getting estimates on all the builders' Hardware for every small job. Of course, I was in strong for the business with the rest and we got profits shaved so closely that there was nothing in it. Then I called off. Whether the others did or not I don't know. I quit following up this trade so strongly and began to quote them a fair profit and put it up to them without any urging for the business. There were the goods. There was the quality. I quoted the exact prices I paid for them. I left myself a fair, decent profit, and I began to capture the trade on the new basis, largely by talking quality. We Hardwaremen don't do enough of that. It is much more profitable than this everlasting harping on price."

"How about housefurnishing goods?" I asked the grizzled though kindly Hardware veteran. "Don't you have any schemes for getting the women and selling a lot of that stuff, or is the store so filled with the bosh of farmers and overalls of the carpenters that there's no room for the women?"

"Don't think that I haven't gone all over that," he replied, "I never go to Chicago without going down into the housefurnishing basements of the department stores to see what is going on. Honestly, candidly, they are offering many an article at retail as low as I can buy it for or lower. Seconds, do you say? Yes, but don't they take especial pains to explain that to customers? The articles give some kind of service, and so the trade wages on. It has given me cold feet to an extent on going in strongly for many kinds of housefurnishing goods and kitchen utensils. But we give some of them a show, though we do not specialize on them. A fellow came along one day with a simple little thing with a rubber on the end cut off squarely at the bottom just below where it joined the little iron handle. It was intended to shove off every vestige of food that stuck to a plate. I didn't think very much of it, but the man was persistent. I bought two dozen and stuck one, with the price mark, on top of my cutlery case where people could see it. Well say, the two dozen lasted just two days and then I ordered some more—six dozen I think. You never can tell how these things will take. Woman is a complex institution, and it takes more than my own X rays to get into her brain. But the women came after these things and they are going pretty well yet. I don't want to get too full of novelties, but when the top of that cutlery case is not too crowded I always take on a few of anything that looks good and put it up there. I dont place a big order for a novelty at first. I stand just as good a chance of being stuck as of selling it. You must try it on the women first.

"Now go back to 'new methods', I suppose some people think I'm an old fogy not to put in more up-to-date labor-saving appliances. Of course, I've got a cash register and the absolutely necessary things. But did you ever think that a man can make things too easy for the boys in the store? When things come to the pass that the force I have have trouble in waiting on customers and I am losing trade thereby, I'll spend money along this line. But the people here have plenty of time and are not running a 2:40 gait."

"Well," said I, "if you persist in calling yourself an old fogy, I suppose you don't warm up real strong to advertising."

Here he gave me a funny look, as he said, "You're about right. I never made any money out of advertising that I can trace, and I do very little of it except at special times and then as much to keep solid with the editor, through the advertising solicitor. There's a close connection, you know."

"But what did you have in the ads.—simply a business card?" I asked.

"Something like that," was the reply. Sometimes there might have been a cut of a range."

"What's the matter with printing that big list of users of the ——— range that's hanging on your wall, and growing from month to month?"

"I never thought of it. Most people have seen it."

"Didn't you ever try to close out some stock that you are tired of through cuts in prices and special advertising?"

"No, for I have but little accumulation of dead stock, as I buy very carefully and keep my stock by a special system of my own."

This closed the interview, and it represents the state of mind of this dealer as nearly as pen can do it. It is not far from the view of the average dealer throughout the country. The man whom we quote is a successful merchant who has adopted his methods to the town in which he lives, and is ranked with the solid men of the place.

The new century, however, has ushered in a new era in which new ideas are being grafted on to the sturdy, common sense principles by which he has won success. No Hardware dealer is getting the most out of his business who has not divided his stock into departments with more or less definiteness and is not pushing the sales of each department as strongly as possible. If he is not doing this, some department store housefurnishing department, some bracket or novelty in a ten-cent store will be carving off slices of his trade in some way or another. The margins are getting closer in the business, and the yearly profits can only be maintained by increasing the volume of sales. Of course advertising, persistently and systematically, must be done to aid in accomplishing these results. And this advertising need not cost a great deal of money. If a dealer contracts for a five or six inch one-column space for a year and changes the ad. every issue, be the paper a weekly, semi-weekly, or daily, the results will be prodigious in the course of a year. The turn of the season, the new goods, the visit of the demonstrator, the special sales of old stock, and many other matters will furnish texts for the man with alert brain to keep the public mind alive to the fact that there is something always doing at the store that advertises in this way. A Philadelphia Hardware house has used this plan for a year or two and proves the fact that a six inch space can be used daily—and changed each day—with profitable results. In this store the show windows are dressed to largely conform to the ad.

Of course, with a system of this kind, the windows and the clerks must back up the ads, or the effect is lost. An indifferent clerk will freeze any customer whom the ad. has brought to the store. He will turn away visitors and nullify the best work of any advertisement writer. The chain must be complete—advertisement window, clerk—and last, but not least, the goods, which are the foundation of the best appeal for trade. To keep this chain complete and every link strong the dealer must be free enough from detail to carefully supervise the whole.

The reader of the above who is located in the country may make the mental comment that advertising is all right for the man in a larger place, but questionable for him. But here is a case which shows that this is not so with the right kind of advertising. We refer to the work of Tobey & Smith, Hardware dealers, of Sherburne, N. Y., a village of perhaps a thousand inhabitants. They have twelve inch deep, double-column space, though half this space, with neat border, would do as well. But space in a country weekly is cheap and they want the display. Here is the gist of one ad. The lines in small capitals were displayed several times in large type:

"JUST A WORD. Time was when people thought of a Hardware store as a musty, fusty old place where nobody's ambition rose above a nail keg and was not expected to. So there was a deal or tradition—not to say prejudice—to overcome when we started

Digitized by Google

out to make this the Bargain Store of the town. Yet probably there will be sundry nice old ladies and gentlemen—bless 'em—who wag their heads solemnly and keep on measuring us by the shingle nail and carpet tack standard. Such let us take on a 'believing' voyage while the store is at its bargain best. CONTINUOUS SALE NOW ON.

"Steel Kitchen Knives	.04
Butcher Knives, 6 inch blade	.10
Hand Saws, with large brass screws, 16 inch	.21
Hand Saws, 18 inch	.23
Hand Saws, 26 inch	.48
Blanket Pins, 3 inch	.02
Mrs. Pott's sad irons, 3 in set, polished	.72
Tinned Mixing Spoons, 10 inch	.02
Long handle round point shovels	.33
Long and short handle square point shovels to arrive soon at same price	.33

"A few items only. Watch our ad. for new Hardware and tinware list. Don't be misled by others. Remember we sell at a profit, but, 'we have got the goods and have got the prices.'

In another advertisement the citizens of Sherburne are exhorted to "Look in our show window and see the barrel of flour baked into loaves of bread with less than a hod of coal used as fuel, by the ————range."

Before Christmas "NICKEL PLATED GOODS FOR CHRISTMAS" were exploited—chafing dishes, pudding pans, tea kettles, tea and coffee pots, pocket knives, razors, scissors, shears, fully guaranteed butcher knives, skates and sleds. The "Savory Roasters" came in for attention thus:

"If you knew what the Savory roaster can do with a tough piece of beef, if you knew that a six year old turkey will come out of a Savory roaster as tender and delicate as a Spring chicken, we are sure you would have one of these roaster within 24 hours." Who could resist talk like this—especially a man or woman who needed a roaster.

Here is a concern in a village of 1000 doing some very lively advertising for a place of that size. A dealer in a large place should be very shy of stating that he doesn't believe in the increased trade he can secure by the use of live, well-worded advertising. The Hardware business, as well as any other, is what you make it.

SOUTHERN HARDWARE JOBBERS' ASSOCIATION.

The following letter from Secretary-Treasurer Carter has been sent recently to the members:

KNOXVILLE, TENN., March 8th, 1906.

To the Members of the Southern Hardware Jobbers' Association.

Gentlemen:

EXECUTIVE COMMITTEE MEETING.

There will be a meeting of the Executive Committee of our Association at the Fort Pitt Hotel, Pittsburgh, Pa., on the 27th and 28th inst.

The reason for the selection of Pittsburgh for the meeting was to confer with the Executive Committee of the American Hardware Manufacturers' Association, as a meeting of the officials of that Association will be held at the same time and place. Inasmuch as the convention of the American Hardware Manufacturers' Association will be held jointly with our own Association at Hot Springs, Va., on the 12th-15th of June, it necessitates very close co-operation between the two associations to bring about the best results, ont only in connection with the happy consummation of plans as to the details of the convention but also to consider ways and means whereby the mutuality of interest between the manufacturers and jobbers may be more closely conserved.

The unanimous approval of both manufacturers and jobbers in the decision to meet again at Hot Springs, and the promise of many to meet with us this year who did not come last June, enables us to state positively that the convention this year will be much larger, more attractive, of greater interest and far more profitable. Of course everybody who went last year will be on hand this time. However, to secure the best results, we must have the active assistance of our individual members and looking towards this end, we ask that you "put on your thinking cap" and study up subjects and plans for discussion both at our Committee meeting and also at the Convention. If you are confronted with conditions which are not wholly satisfactory and if there is any likelihood or any possibility of correcting the same, we hope you will communicate with us. It is very necessary for the individual members to keep in close touch with the work and to offer suggestions from time to time. Utilize the Association at every possible opportunity. On account of our conferences with the manufacturers and the very close relationship existing, opportunities were never better to bring about improved conditions.

Yours very truly,

C. B. CARTER,
Secretary-Treasurer.

PENNSYLVANIA WHOLESALE HARDWARE AND SUPPLY ASSOCIATION.

The Pennsylvania Wholesale Hardware and Supply Association held its annual convention at the Hotel Astor, New York City, on the 7th and 8th inst. The meeting was the best attended in the history of the association. Two firms were added to the membership. The meeting was called to order by President H. L. Raub of Lancaster, Pa., after which officers were elected for the ensuing year, as follows:

PRESIDENT, A. W. Lewis, Phelps, Lewis & Bennett Company, Wilkes-Barre, Pa.
FIRST VICE-PRESIDENT, A. B. Stein, Stichter Hardware Company, Reading, Pa.
SECOND VICE-PRESIDENT, Geo. Small, P. A. & S. Small, Cork, Pa.
SECRETARY, John Waeldin, Canton, Pa.
TREASURER, Geo. D. Krause, Geo. Krause Hardware Company Lebanon, Pa.

EXECUTIVE COMMITTEE.

W. H. Conyngham, chairman, Pennsylvania Supply Company, Wilkes-Barre, Pa.
F. W. Bleckley, Hazelton Machinery & Supply Company, Hazleton, Pa.
W. E. Bittenbender, Bittenbender & Co., Scranton, Pa.
J. N. Kline, Kline & Co., Williamsport, Pa.
John H. Obold, John H. Obold & Co., Reading, Pa.

Interesting and valuable papers were read by R. M. Reilly of Reilly Bros. & Raub, Lancaster, on "The Civilizing Influence of Trade;" by J. N. Kline of Kline & Co., Williamsport, on "Parcels Post," and by F. A. Phelps of Phelps, Lewis & Bennett, Wilkes-Barre. Addresses were also made by T. James Fernley, secretary-treasurer of the National Hardware Association, on "Association Work," and by R. R. Williams, Hardware editor of *The Iron Age*, on "The Golden Rule in Business."

A RATHER UNIQUE ENTERTAINMENT.

The Stowell Manufacturing Co., South Milwaukee, Wis., having just completed a large brick addition to the machine shop, before placing the machinery decided to give a Glee Club Concert in it for the benefit of the employes. The Lyric Club of Milwaukee, well known throughout that section of the country for their splendid entertainments, was engaged, as the company did not consider anything too good for this occasion, and the programme of the entertainment was as follows:

PART 1.

DANIEL PROTHEROE, Conductor
CHAS. M. LURVEY, Accompanist
MISS EDITH WEIL, Reciter

1	Soldier's Chorus THE CLUB	*Gounod*
2	The Drowsy Nook MR. ROBERTS *and* THE CLUB	*Storch*
3	(a)—Molly (b)—The Water Million MISS EDITH WEIL	*Anita M. Kellog* *Anny*
4	(a)—Sandman's Song (b)—Laughing Song THE CLUB	*Protheroe* *Abt*
5	Good Night, Little Girl, Good Night MR. HAASE *and* THE CLUB	*Macy*
6	Estudiantina THE CLUB	*Lacome*

PART 2

1	In Vocal Combat THE CLUB	*Buck*
2	A Tragic Tale (Pigtail) G. ARTHUR DANIELS	*Slater*
3	(a)—Calm is the Lake (b)—A Summer Lullaby THE CLUB	*Pfeil* *Gibson*
4	(a)—Jim's Defense (b)—Among the Heather MISS EDITH WEIL	*Anny*
5	Popular Melodies HABHEGGER, RIEDEBURG, OWEN *and* GARRETT.	
6	Sword of Ferrara THE CLUB	*Bullard*

A temporary platform was erected in one end of the new building, and seats arranged in the body of the building. Tickets were issued to all of their employes and their families, and there were nearly a thousand in attendance. All seemed to appreciate the fact that the company were attempting to show their good will, and expressed themselves quite freely in commendation of their action. Being ardently interested in this feature of welfare work, this is the second entertainment of this nature that they have given to their employes, and they expect to make it a permanent event.

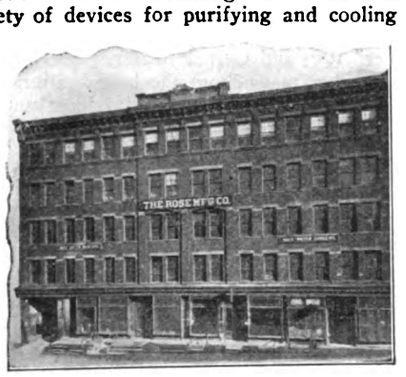
PROFIT MAKING LINES

THE ROSE WATER COOLER.

"War has slain its thousands—but disease its tens of thousands." How true this is on endemic and zymotic diseases! If any particular disease has had a hand in this slaughter, it has been malaria and typhoid fever. Few, if any countries, on the face of the globe have not been visited by these scourges, and to-day what locality is free from them?



Hygiene and sanitation have certainly made tremendous strides within the past ten years, and municipal governments throughout the land have established expensive filtration plants to stamp out

THE ROSE WATER COOLER.

these "ills that flesh is heir to," but have not quite succeeded, for it seems as though in certain quarters malaria and typhoid fever germs are as alive as ever.

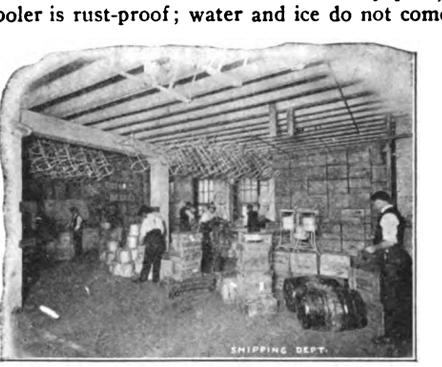
As soon as the presence of these germs was discovered, years ago, in drinking water by medical science, almost everywhere preventive measures were taken to exterminate once for all these enemies to public health. Drinking water was boiled or sterilized; a variety of devices for purifying and cooling water were

made and sold, and today their name is legion. The water vending business, too, sprang into existence, and is today in a most

flourishing condition just because the necessity for clean and pure drinking water is universal.

It is this universal need for clean and cool drinking water in every hamlet, town and city which makes the handling of Rose Water Coolers a most profitable line for Hardware dealers in

every part of the country. The Rose Water Cooler was originated by A. N. Rose, president and manager of the Rose Mfg.



Co., 505-513.W. Fiftieth street, New York City, and patented by him December 9, 1902. The Rose Water Cooler stands in a class by itself, because:

First, It maintains an even temperature of the water which does

not become "ice water," the bane to the digestion and health of so many people. Hygienically it is perfect.

Secondly, The water it cools is made absolutely pure, because the entire cooler is rust-proof; water and ice do not come in con-

tact with each other; every part is cleanable. There are no coil pipes, crevices nor inaccessible parts to collect dirt or slime.

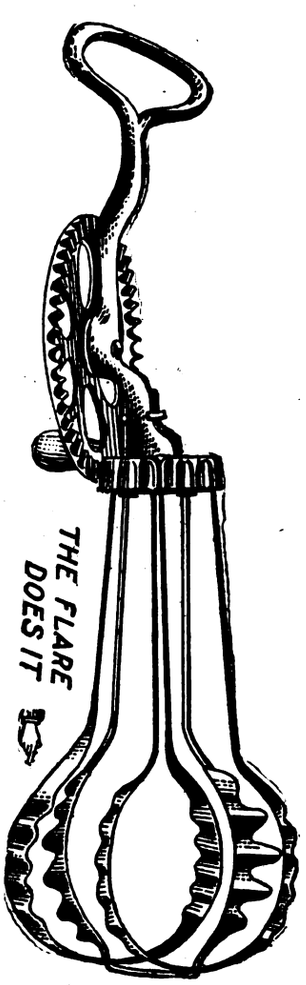
Thirdly, The water container is made of antiseptic and filtering earthenware, faced with white porcelain and may be quickly removed by simply unscrewing the faucet. For this operation no

Digitized by Google

tools are required. The container being porous, except for the thin glazed coating, offers no resistance to the cooling contact.

Fourthly, The accompanying cross-section of the Rose Water Cooler shows the space between the double walls to be tightly packed and thoroughly insulated, which permits of a saving of at least 50 per cent. in ice. This saving alone more than pays the cost of a cooler in a single season.

The Rose Water Cooler has other advantages. In construction it is simplicity itself. All the manufacturer claims for it is amply substantiated by the phenomenal increase in the sale of certain sizes for 1906, which is four times larger than during 1905. Rose Water Coolers are not only claimed to be better than other coolers, but are sold at a lower price than others, because all raw material necessary for its construction is bought in large quantities from the mills. Again, rigid economy is exercised in the various departments of this new and rapidly growing industry.



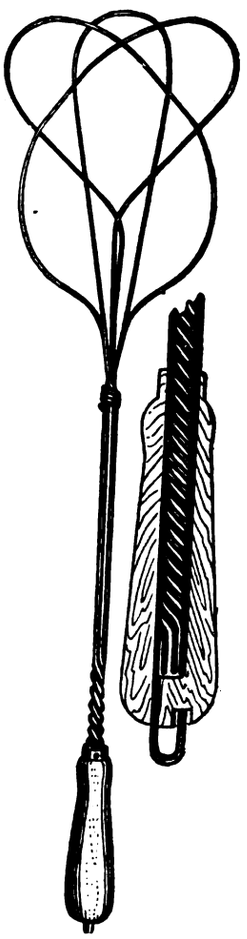
The advantages above enumerated make the Rose Water Cooler an excellent seller, not only for family use but also for those engaged in the water-vending business. The Rose Water Cooler is best for offices, hotels, boarding houses, etc. They are built to withstand hard usage.

The marked advance shown in the manufacture of the Rose Water Coolers and their superiority in every detail is chiefly due to A. N. Rose, whose untiring efforts have been crowned with complete success. The accompanying cuts show the plant and its various departments. Further particulars about prices, discounts and catalogue may be had by addressing the company at Nos. 505-513 W. Fiftieth street.

THE HOLT-LYON CO.'S SPECIALTIES.

Holt-Lyon Co., Tarrytown-on-Hudson, N. Y., are the manufacturers of Holt's Patent Egg Beaters, Lyon Egg Beaters and Cream Whips, "Cleaner" Rug and Carpet Beaters and Holt's Self-Adjustable Flue Stops.

Holt's Patent Egg Beaters and Cream whips come in 10, 15, 20 and 25 cent sizes and their manufacturers claim them to be the



HOLT'S PATENT EGG BEATER.

best Egg Beaters made. This is substantiated in part by their sales.

In six months from July 1, 1904, they sold over 23 tons of their Nos. A and B sizes, 15 and 25-cent Beaters, to wholesale dealers in London and Birmingham, England. In this country the sale of their goods has been phenomenal as last year they sold over $26,000 worth of these goods.

The No. A size is larger and better made than any 10-cent Dover. The Dashers are harder, thicker and flared. It is this "Flare" that makes it possible for anyone to beat eggs with the Holt Beater in twenty seconds, and to whip cream fine in two minutes.

IMPROVED CARPET BEATER.

Holt's new 10 and 15-cent Beaters have the flared dashers, Nos. 5 and 7 have half longer cogs in gears and longer cogs in pinions, and will outlast any two other Egg Beaters made.

The "Cleaner" Rug and Carpet Beater, made by this company, is very elastic, being made from the best furniture spring steel. It has more weight and is far more durable than Rattan Beaters. The "Cleaner" is used all the year round on rugs, furniture, clothing and carpets. It will beat them with half the usual labor because its beater "head" is made six wires wide, closely braided. Four wires, extending from beater nearly through handle, and twisted 1½ inches out of the handle, greatly stiffen it there, so that it does not break off at the handle. Moreover, one wire is driven through, bent and driven back into handle so it will not come off or turn around.

The Holt-Lyon Co. is giving their Egg and Carpet Beaters wide publicity and, judging from the wide sale these goods are enjoying, there is profit for the aggressive Hardware merchant in handling them.

DEATH OF EDWIN BINDLEY.

Edwin Bindley, a widely known manufacturer and business man of Pittsburgh, died of pneumonia at his home in that city on Saturday, March 10th, after an illness of only one week. Mr. Bindley was born in the First ward of Pittsburgh on March 10, 1842. In the late '70's he became associated with his brother, John Bindley, in the Bindley Hardware Co., and has been its vice-president since its incorporation in 1890. While not having an active part in the conduct of the business, yet his personality has always been a factor in the company, and his sunny disposition has cheered those around him. It is noteworthy to refer here to the warm affection that has always existed between the deceased and his brother, John. Theirs always seemed to be a common cause. In 1884 Mr. Bindley was married to Mary, the daughter of the late John Musgrave, who survives him. He is survived also by two sisters, Mrs. Zabina Johnson and Mrs. Mary B. McMillan, and two brothers, John and Josiah Bindley, of the Bindley Hardware Co.

OUR BRITISH LETTER.

(By Our Own Correspondent.)

LONDON, MARCH 12.

THE WORK OF IRONMONGERS' ASSOCIATIONS IS DEVELOPING.

The number of ironmongers' associations steadily increases. True, some of them are very apathetic and have made little headway, but such bodies are but twigs to the tree. On the other hand, some of the stronger branches are vigorous, and it is clear to all that the work of the present winter sessions is of better quality than on many former occasions. Many of the questions now being discussed are practical and deal with matters of public interest, having some bearing upon the Hardware trade at large. Of course, there are always local affairs to be considered, but such questions are only of small importance compared to the larger and weightier concerns. Especially is this the case on those subjects involving interests of manufacturers as well as retailers. In the promotion of safeguards and other protective measures there is always an element of danger, visions of possible injunctions and actions for libel—in short, such matters require very careful handling. For several years the I. F. A., the Central Board and a few of the local branches have been advocates of the private circulation of a list of names of manufacturers from whom loyalty to the trade might be expected. The first project was to publish a "black list," but to do so was found to be open to serious consequences, so a "white list," or, as it is now called, our "In-Accord" list was devised. This list which has been signed by a number of firms is virtually an agreement to distribute only through the mediums of retail ironmongers. R. B. Browne, of Liverpool, has interested himself much in its preparation, and the first edition of the list was circulated a short time ago. A second edition is now being prepared and efforts have been made to bring the factors into line. Here comes the block at present existing. The Birmingham Factors' Association consists of the bulk of the Hardware factors in this country and they as a body refuse to sign, considering that the demand for signature to an "In Accord" list on the part of the I. F. A. is overstepping the limit usually adopted in business. Again, it is pointed out that many of the leading manufacturers are not signatories to the document; also, that there are still very many of the best ironmongers in the country who are outside the association movement. The latter statement is a fact tob true; for, in the country district and even in towns, there are a large number of leading Hardwaremen who are either too busy to take part in the association membership or else prefer to retain their isolated positions. In the States it would appear from the reports you publish from time to time, that the best Hardware dealers are active members of associations—here it is almost the

WHAT ASSOCIATIONS ARE DOING.

Since the establishment of ironmongers' assistance associations the workers in Hardware emporiums have had a distinct individuality and their doings have been brought more prominently before the trade than formerly. The movements of these bodies are being closely watched by employers and also by those who take an active share in the conduct of employes' associations. Naturally, there is a tendency, especially among the members of some associations, to indulge in recreative entertainments and social gatherings and not give quite as much recognition to the true object of traders assistants' associations as is desirable. Undoubtedly, advancement in business knowledge, and co-operation in the benefit intellectually and financially of the members, both individually and collectively, should be the first motive and principal aim of all members. Some of the assistants' associations have capital leaders who show great zeal and energy in guiding the younger men, and in instituting lectures and addresses on trade subjects as well as in encouraging assistants themselves to read papers. Quite recently a very useful address on "Ticket-writing" was given before the members of the Croydon Association and some good examples of ironmongers' tickets shown, as well as practical points on how to do the work given.

The third annual examination in Ironmongery has just been held in Birmingham; the entry was not large, the number taking part in it being thirty-seven. Judging from the photographs of the group I have seen I should consider the candidates were an exceptionally intelligent lot of young men, all apparently zealous and wishful to make their mark among their fellows. Some of them who, it is hoped, will be possessors of the coveted certificates and prizes, will themselves be ironmongers in a few years. There is no doubt the opportunities now offered, both for technical education and practical experience are greater than they have ever been and the prospects of an elevated and advanced type of Hardwaremen in future years loom bright. The Birmingham examinations were presided over by Charles Parsons (the president of the I. F. A.), C. C. Theedam, H. Smith and R. M. Iddon, in conjunction with Secretary Smith. The questions put were very well spread over a wide area showing the extent of the retail Hardware trade in this country. Among the compulsory subjects dealt with were handwriting, gauges, calculation of areas and cubic capacities, locks, bolts, screws, tools and cutlery, holloware, wire and wire goods, workshop management, standard weights and measures, lamps, woodturnery, furnishing ironmongery, etc. The optional subjects were practical and the questions fairly stiff, at any rate sufficiently tough and varied to show pretty clearly that those who answered them had a grip on the matters under consideration. The ground covered was grouped under physical characteristics of metals and alloys, gasfitting, sanitary plumbing, electric lighting and electric bells, rainwater goods and kitchen ranges, agricultural implements, colliery and mill furnishings, cycles, guns, oils, paints and glass.

A NEW SOCIETY.

The formation of the Society of British Gas Industries is a very desirable connecting link between ironmongers and plumbers and gasfitters and gas companies. It is primarily a society of manufacturers of all the different branches of the gas industries —gas plant, retortsetters, conveying and labor-saving machinery, makers of gas stoves, gas fittings and contractors. Hitherto the Institute of Gas Engineers has been the only society in which those interested in gas engineering could take part. The new society, however—which is in no way antagonistic to the older and more scientific body—will unite a section hitherto left out in the cold. It will also be of great importance to Hardwaremen at this juncture when they are becoming more aggressive in capturing gas business, and are now, with more or less success, approaching gas companies with a view to checking corporate trading, and are obtaining a share in the sale of gas stoves and fittings. Several of the active members of this new society are large makers supplying through retail ironmongers, and it is more than likely that the Society of British Gas Industries will, sooner or later, prove a useful ally, and be helpful in bridging over any difficulties or differences which may arise between the gas companies and members of the Hardware trade so many of whom are not only wishful but quite capable of carrying out gas contracts, and in many ways putting forward the development of lighting, heating and cooking by gas.

DEATH OF FRANK S. COWLES.

Frank S. Cowles, president of the Norwalk Lock o., died at his home in Norwalk, Conn., Friday, March 9th, after a lingering illness following an attack of pneumonia a year ago. Mr. Cowles was born forty-three years ago at Belchertown, Mass., where he received his education. When a young man he obtained employment in the Boston office of the Norwalk Lock Co., where he quickly developed qualities fitting him for the Hardware business. Later he represented the Company in the selling branch of the business throughout the New England States, making his headquarters in Boston. In 1896 he assumed charge of the New York office of the management, which position he retained until he was elected president of the company in 1903. Mr. Cowles is survived by a widow.

DEATH OF WILLIAM J. STAIRS.

William J. Stairs, president of Wm. Stairs, Son & Morrow, wholesale Hardware, Halifax, Nova Scotia, died on the 27th ult., in his eighty-seventh year. For over three-score years Mr. Stairs was identified with the firm as well as being honorably conspicuous in the commercial and financial life of Nova Scotia.

ACCIDENT—NEGLIGENCE—FELLOW SERVANTS.

The Supreme Court of Minnesota held, in the case of Doerr vs. The Daily News Publishing Company, that where an operator or pressman of a printing press, while engaged with his helper in the usual duty of running the machine, starts it without giving proper warning to the helper, who by reason thereof is injured by having his fingers drawn between the rollers, the relation between them is that of fellow servants, notwithstanding that the helper is under the direction and control of the operator in respect to the running of the press.

NATIONAL RETAIL HARDWARE ASSOCIATION

The Seventh Annual Convention of the National Retail Hardware Association was held at the Great Northern Hotel, Chicago, Ill., Tuesday, March 20th, and the two days following. The proceedings had great significance, as it was the largest and most enthusiastic they had ever held. Seventy delegates responded to their names on roll call.

TUESDAY AFTERNOON SESSION.

The Association was called to order at the Great Northern Hotel promptly at 2 P. M. by Preseident Bogardus.

The president stated that the session was an executive one for accredited delegates only.

President Bogardus introduced George H. Harper of the National Enameling Company of Baltimore, who he said was obliged to leave on an early train and that he had a communication to read from the American Hardware Manufacturers' Association, and suggested that he be given the floor before the regular program was opened.

Mr. Harper read the following communication from F. S. Kretsinger president of the Association.

E. M. Bush, President.

Dear Sir:—

The bearer, Mr. Geo. H. Harper, while representing directly the National Enameling & Stamping Co., which concern is a member of our Association,, has consented, and is therefore commissioned to represent this Association in conveying to you our hearty fraternal greetings and best wishes for the welfare of your Association.

"We are pleased to recall that we have been favored more than once by the presence of representatives of the Retail Trade at our gatherings, and I only regret that circumstances may possibly prevent a recognition of this on our part, by the personal presence of some of our officials during your sessions.

It affords us pleasure to congratulate you on conducting successfully, an organization, composed as it is, of active, earnest workers, whose calling is not only an ancient and honorable one, but one in which intelligence and ability are marked requisites.

By an interchange of views and concert of action, you have done much to correct evils and to minimize competition, as well as to improve conditions generally, and not only for your own individual members, but for the trade at large. Furthermore, you have doubtless learned that an enlarged acquaintanceship among others in your line of work, and a free interchange of views on questions pertaining to the occupation, brings both pleasure and profit.

We sincerely trust that the result of your deliberations will be a betterment of trade conditions among yourselves, and also with those from whom you draw your supplies.

As an Association, and also as individual manufacturers, we have your interests sincerely at heart; and it is our desire to so conduct our affairs as to merit the good will of every distributor—retail and wholesale alike.

Although a large part of our product finds a consuming market through the channels of the Jobbers, we recognize that the retailer's is an important factor whose influence and co-operation are of value to us—he it is who displays our wares, explains their use, and praises their merits to the actual user, whose verdict reflects favorably or otherwise.

Our Association, as you perhaps know, has a membership making so varied a line, that the manner of marketing their wares naturally differs. Some rely largely on direct trade with you, and have little or no trade with the larger buyer—the jobber; some again look altogether to the wholesale trade to distribute their product; and others manufacture such articles as pass directly into the hands of the consumer.

Under the circumstances, it naturally follows that our Association can act only in a general and advisory way in our relations with each other, and with the trade. For most of the lines of materials and merchandise produced by our members, you are the natural and proper distributors to the user of same, and so we have interests in common to no small degree.

Rest assured, please, of a cheerful willingness, and a desire on our part to co-operate with the trade in its improvement and its up-building, and we shall avail ourselves of every favorable opportunity so far as possible, to do so, for an organization composed, as ours is, of industries differing in a very great degree, as ours do.

M. L. Corey, Secretary.

President Bogardus stated that he would be unable to name all of the committees until tomorrow morning, but said there were some committees that he felt necessary to appoint immediately.

The following committees were appointed:

Press: S. R. Miles, Iowa; F. C. Moys, Colorado; G. R. Lott, Illinois.

Auditing: J. P. Doty, Iowa; J. S. Ogden, Kentucky; A. J. Scott, Michigan; H. J. Hall, Nebraska; B. L. Andrews, New York.

Suggestions: F. C. Moys, Colorado; C. N. Barnes, North Dakota; G. R. Lott, Illionois; W. H. Tomlinson, Minnesota; E. W. Hawkins, South Dakota; James De F. Phelps, Connecticut; F. Alexander Chandler, Massachusetts.

President W. P. Bogardus of Mount Vernon, Ohio, then delivered his annual report, which in part read as follows:

PRESIDENT'S ANNUAL ADDRESS.

In making my report to you of the work of the year just passed it is with a good deal of pleasure that I am able to report progress. There has been a large growth in the membership of the several State associations and unusual enthusiasm was manifested at the meetings. It was my duty to visit the State associations at Little Rock, Ark.; Saginaw, Mich.; Milwaukee, Wis.; Lincoln, Neb.; Des Moines, Iowa.; New Haven, Conn.; and the meeting of the New England Hardware Association at Boston. I found that the work is going on with vim and as it progresses and the Hardwaremen of the several States become accustomed to the work still greater results will be achieved. In

Digitized by Google

the progress of our work it has been our duty to attend the meetings of the manufacturers and jobbers, both North and South. I observe that it has been and still is necessary

TO CARRY ON A CAMPAIGN OF EDUCATION

with both manufacturer and jobber. While a very large percentage of the jobbers have gotten our point of view and are in sympathy with our objects there are some manufacturers who have failed to get a proper conception of the wants of the Hardwareman. There are some yet who seem to think that the Hardware associations are unions which are making demands on them, and in the event of failure of the manufacturer to yield to these demands will seek to enforce them by boycott—a proposition so foreign to the ideas and policy heretofore followed by the Hardware associations that I am at a loss to understand how such an idea could find lodgment in the mind of any manufacturer. I can understand how some might conclude that the presentation of the stereopticon views at Washington last fall was a challenge, but it was not; it was simply a presentation of the retailer's point of view from an entirely new standpoint. By this means we in a large measure succeeded in placing before the manufacturers the fact that what we wanted was not combat, not even discussion,

BUT CONFERENCE AS BETWEEN BUSINESS MEN

who were interested in the same things and the accomplishment of the same result, viz: the disposition of the manufacturers' output so that the consumer might be best served and his wants satisfied at a minimum of cost to him. There has been no effort to bring about new conditions that would result in a hold-up of the consumer. Even should such an attempt be made the universal intelligence and the widespread circulation of prices would preclude any hope of success.

EXHIBITS HAVE BEEN INAUGURATED

this year by the many State associations in conjunction with the conventions. This has resulted in a greatly increased number of exhibitors. As the plan has been to rent the hall where exhibitions were held and to sublet to those who desired to show their line of goods, the result has been satisfactory in two ways; First, it has been profitable to the association, and second, it has acted as an educational factor for the men who attended the conventions. The success attending this scheme will undoubtedly cause it to be still further developed. In the furtherance of the scheme of the exhibition it is suggested that the meetings of the several associations be so arranged that it will be possible for the exhibitors to go from one meeting to another. As they are now arranged it requires several sets of samples and a corresponding number of salesmen to take in all the association meetings.

* * *

GROWTH OF MUTUAL INSURANCE.

The report of the National Insurance Company will show a substantial growth. The successful management of the National, as well as several of the State insurance companies, has done much to give strength to association work. Their policy to declare dividends to be returned to the insurance from 20 to 40 per cent. shows that they have come to stay.

In the furtherance of good will and a better understanding between the jobber, the manufacturer and the retailer, last fall I extended an invitation to both the Manufacturers' Association and the National Jobbers' Association to send delegates to our annual meeting. I did this believing that the better we get acquainted the better we will understand each other's condition and we will be the better able to help one another.

SECRETARY'S ANNUAL REPORT.

Secretary M. L. Corey of Argos, Ind., next read his annual report. He said in part:

The success and progress of the past year should inspire extra effort and confidence in the future of the National Retail Hardware Association. We have added four new States and over 2000 new members. Nearly every State has doubled its convention attendance, and everywhere there is enthusiasm, lively interest and absolute harmony in our ranks. More letters from members are reaching the secretary and more manufacturers are showing

A DISPOSITION TO TREAT WITH US ON ISSUES OF POLICY.

Practically every jobber is pledged to respect and protect our rights and territories. Governors, legislatures, Congress, even the people themselves have been warned of the apparent danger and widespread injury that would follow the success of the catalogue house system of distributing merchandise and its concentrating of capital, trade and population at the expense of the country at large.

Many have gone on record in opposition and many plans and schedules have been proposed as a solution.

THE COUNTRY PRESS HAS SOUNDED A WARNING

and trade papers in other lines are taking an active part in the fight and many new organizations are being formed. During the year we have persistently worked to obtain this result, to awaken merchants in other lines to the danger of the mail order system, and we have corresponded with the secretaries of nearly all the retail organizations.

Early in the year the Inland Empire Hardware Association, having members principally in Washington and Idaho, voted to join us. During the year your secretary assisted in organizing a State association in South Carolina, the meeting having been held at Columbia. There is a move toward combining with North Carolina, and we believe it can be done, thus making a strong body in this territory. In January a State Hardware Association was formed in South Dakota. We have had letters from Hardware merchants in Delaware, New Jersey, Kansas, Alabama, Tennessee and Montana, asking us to assist them in organizing.

With 20 State associations in adjoining territory, nearly all desiring to meet in the month of February, some

SCHEDULES SHOULD BE ARRANGED TO AVOID CONFLICT

of interest. This should also be done if the presence of a national official is desired, as well as to accommodate manufacturers who wish to exhibit goods. We might meet the first two weeks in January and the first two in March, making eight weeks in all, and if adjoining States will agree in some instances to use the same week where two-day sessions are held, choosing the days from Tuesday to Friday, it would permit of our attendance at both.

We suggest that this matter be taken up by the secretaries' meeting and if possible, a schedule arranged for our 1907 conventions.

The report of Treasurer A. T. Stebbins of Rochester, Minn, showed a balance on hand of $4225.40.

President Bogardus stated that T. Frank Ireland, one of the members of the Association, was lying critically ill at his home at Belding, Michigan, and suggested the appointment of a committee to prepare a telegram to be sent to him expressing the sympathy of the Association. The following committee were appointed for that purpose:

Mr. Peck of Wisconsin, Mr. Digby of Pennsylvania and Mr. Johnson of Ohio.

President Bogardus stated that the report of the treasurer would be submitted to the auditing committee and that the report of the president and secretary would be referred to The Committee on Suggestions in the president and secretary's report.

S. R. Miles of the Joint Committee on the Catalogue House Question read his report.

President Bogardus stated that arrangements would be made for a theatre party for any delegates accompanied by ladies and asked all of those present who desired to attend the theater party to raise their hands. The president also stated that the delegates would be entertained on Wednesday evening with a banquet by the Retail Hardware Dealers of Chicago.

After announcing the programme for the next day the president stated that the association would adjourn until the next morning at 10 o'clock.

WEDNESDAY MORNING SESSION.

President Bogardus called the convention to order promptly at 10:00 A. M.

E. M. Bush, Indiana, read the following paper on

LEGISLATION.

He said in part.

Gentlemen:—

That the community whose patronage affords a measure of success—the living wage—to the retail merchants in her midst, keeping in her own marts of trade the money to the community, thus affording in her well stocked stores investment for capital, employment for clerks, bookkeepers, porters, drivers, etc., whose families help to build up the community, and whose living expenses add, in their turn, to the prosperity of their neighbors. That such a community is *alive*, full of healthy growth is as *sure* as in the gradual decline and eventful decay of a community depleted by the constant drain of every drop of blood that flows away from her, in money sent out to other cities and never again returned to add to her strength and natural growth.

Retailers throughout the country—we as well as others, are vitally interested in any remedy for this depleting drain—for instance, in the passage of laws that will compel those firms doing a retail mail order-house business, interstate and interurban in character, to stand some just proportion of tax or license to be paid into those localities from which their business is derived. Just how to draft a law to this effect which would be constitutional, is beyond my knowledge; but that it would be just, I believe that all will admit.

Perhaps all have not yet reached such a degree of enlightenment and development as will enable them to think that the tax-paying citizens who assists in building up a community has some rights which the outsider—the free booter, who, in order to sell, misrepresents the quality, quantity and value of many of his wares—should be compelled to respect.

The tax or license referred to may not be feasible, but something must be done to stop this drainage of money from the smaller communities.

Unless I mistake greatly the intelligence and fairmindness of our people, there is now springing up,—perhaps hardly perceptible, but stirring into life—a sentiment against the favored centres of trade which congest population in their own fevered centers and draw the very life blood from smaller urban and rural districts, wherever their long tentacles can reach.

The hope of our country's future lies in developing these smaller urban and rural populations, in making ours a country of homes, not tenements—a people content with their surroundings. Free rural delivery was a step in the right direction, but if it is prostituted to further this tendency of congesting popu-

Digitized by Google

lation and centering great wealth in large cities by the passage of the Parcels Post Measure, there will be much lost for which we have striven—and stringent laws of necessity may be passed for the benefit of the many as against the few.

I need not dwell upon the importance of your opposition to the passage of this Parcels Post bill. We all recognize in it class legislation—a measure for the benefit of the few mail order houses as against the interest of hundreds of thousands of retail merchants all over the country—against the interest of the communities which these merchants have helped to build up and make prosperous and the rural districts whose wide tarms are dependent in many ways on the prosperity of the little cities which they surround. Shall these all be improverished, that seething centers of trade shall become even more congested?

This organization may congratulate itself upon the very important part it has taken in educating all other classes of merchants against this iniquitous Parcels Post.

We should oppose the measure now before Congress to consolidate third and fourth-class mail matter, as it is only an open wedge for Parcels Post.

Some changes should well be made in postal rates—one cent letter postage, weekly and daily newspapers read now so universally, at even a lower rate, but periodicals and monthly magazines, a higher rate than they now pay.

The modern method of introducing goods to the consuming public through advertising calls for a large expenditure of money. Since in many cases, the manufacturer who makes the goods creates a demand for them by this vast amount of advertising for which he pays. Has he not ethically and lawfully the right to say that the value of his property shall not be destroyed by price cutters?

When a retailer, going into business, either hardware or otherwise, is called upon by those extending credits for a statement of his assets, should it not be a criminal offense for him in reply to make false or misleading statements? More than the wrong to individual creditors is the injury to legitimate retail interests which must compete with receivership and bankrupt sales, easily avoided had true conditions been known. It would lighten our woes considerably could we also establish an X-Ray commission to make investigations of capacity and ability, as well as assets. Is there a genius in the audience who could frame such a law for the relief of suffering competitors?

The present bankruptcy laws are so few and the amounts involved so small that we have had no personal experience with the law.

But laws, however favorable, cannot in these strenuous days of competition, make a business success. It's up to us, gentlemen, to keep abreast of the times with stores well-stocked, goods properly bought and well displayed by the use of modern shelving cases and counters, with attentive salesmen interested in their work, with proper regard for your home competitor, but a grim determination that no money for Hardware shall be sent away from home, with the proprietor in the foreground to greet with a smile or hand-shake, those who pay him the compliment of trading at his store, and a watchful care that every customer receives prompt and courteous treatment and a dollar's worth of goods for every dollar spent.

Gentlemen, I thank you.

A general discussion followed.

The convention then adjourned until 2:00 P. M.

WEDNESDAY AFTERNOON SESSION.

The convention was called to order at 2:00 P. M.

Mr. Abbe of Boston read a paper on the subject

"WHAT ATTITUDE SHOULD WE AS RETAILERS TAKE TOWARDS THE MANUFACTURER?"

Mr. Abbe said in part: "One thing certainly I believe the retailer should insist upon and that is that the manufacturer should see to it that no retailer buys his goods at the jobber's price. I believe that a large buyer in the retail business is entitled to a small percentage for quantity, but this percentage should be so small that it would not cut any figure in the retail price of the goods."

"We should also insist that the manufacturer discontinue the practice of shipping direct to the retailer's customer—the consumer—as I understand many manufacturers ship direct from the factory to the consumer upon the order of the catalogue house."

"I feel that the retailer should confine his purchases to goods manufactured by people who show by their actions that they appreciate his business and want to hold it."

The proper distribution of goods should be from the manufactprer to the jobber, the jobber to the retailer, the retailer to the consumer."

President Bogardus announced the next thing on the program would be a paper by H. F. Emery, President of the North Dakota Hardware Association, on the subject of the

"RELATION OF THE RETAILER TO THE JOBBER."

Mr. Emery's paper was in part as follows: "After a thorough discussion by the Trade Journal the conclusion reached by many is that the jobber is a necessity and is here to stay. In analayzing this question we find that the retail Hardware merchants are divided into three classes:

First, the small dealer who employes not to exceed $2000.00 capital, doing a credit business, trying to carry an assorted stock with a limited amount of yearly business. This merchant is by the condition of things bound to go to a jobbing house for his supplies and our advice to him is, stick to one good jobber and he will see you through.

Second, the second class to be considered are those who have at their command a large capital. They are a cless by themselves and must be taken as individuals, for no rule can apply to them, as they are in a position to go upon the open market and buy where they wish and of whom they wish.

Third, the third class are made up of the great army of merchants scattered through the length and breadth of our land, having from five to $20,000.00 in their business, and, maybe, in a large part, trying to do a greater amount of business than their capital justifies, when we take cash discounts into account. These merchants are in a position to buy goods from the manufacturer, but are not large enough but that they must keep close to the jobber in order to replenish their stock very often. The relationship between a merchant of this class and his jobber ought to be very close.

HE SHOULD BE ABSOLUTELY HONEST

in his statements and keep his jobber posted to such an extent that the greatest confidence exists between them.

From these viewpoints we see that the relation between the retailer and the jobber is absolutely mutual. It is a good merchant who can successfully compete against illegitimate competition, but let our competition be what it may, in the swift age of changing conditions, all must be alert, up and doing. The jobber says, 'Keep your stock in shape and meet the price,' and this opinion is held by several members of our organization.

A general discussion followed on the points raised in the paper.

President Bogardus announced that A. T. Stebbins of Minnesota would read a paper on "SUGGESTIONS AS TO FUTURE WORK."

Mr. Stebbins said among other things: "I am no prophet, neither am I the son of a prophet, nor can I now sound the depths or trace the current of future trade condition, but if we are to judge the future by the past as did Patrick Henry, I would say that organization and co-operation must be our watch-words if we expect to accomplish results. Let us then, for a moment, consider the question of organization. There are at present but twenty-five States affiliated with the National Retail Hardware Association, scarcely more than half, even though Oklahoma and Indian Territory should by the grace of Congress be admitted as one. Should not then our attention be given to the organization of all the States and Territories? With the growth and splendid showing of our association it would seem to be a comparatively easy task to accomplish. Hardware merchants, north, south, east and west, are numbered the progressive and foremost of our American citizenship. They are not slow to grasp a situation. It only needs a leader—some one to issue a call, and when once assembled and the situation fully presented, in the light of present conditions and achievements already accomplished, organizations would surely follow. My suggestion as to our future work would be that this association take up this work at once to the end that next year when we meet we may have double the representation that we have this year."

Local organizations should be recommended and encouraged.

Mr. Stebbins closed his address by referring to the good work done by the Bulletin edited by Secretary Corey.

Charles H. Williams of Illinois next read a paper on the subject

"WHAT WORK WE MIGHT DO THAT WE ARE NOT DOING."

Mr. Williams, among other things, said that the Hardware association movement had not trailed along any beaten path made by older organizations; that it has sewn its own way thus far; combining the best ideas offered by the followers, weeding, sifting, weighing, and moving with stability, self-respect and dignity; that he favored that the same general policy should be followed in the future. He said the field was still open for doubling the present membership in the National Association; that eternal watchfulness and work was necessary to prevent unfair legislation in the interest of the few against the many.

That the retailer occupied a position on the firing line of discontent. He referred to the subject of false advertisements, which should be corrected.

Referring to the matter of education he said:

"Along the line of mutual education I believe that most of our members need to improve in our knowledge of advertising and of salesmanship and in the training of salesmen. Private courses in these are expensive and an educational department in the Bulletin, furnished by specialists in each line, is a thing worthy of our consideration."

G. R. Lott of Chicago distributed the banquet tickets for the evening, the banquet to be held at the Sherman House at 7 P. M

The meeting adjourned until 9.00 o'clock the next morning to enable the various committees to meet in the meantime.

THURSDAY MORNING SESSION.

President Bogardus called the convention to order at 10:00 A. M.

The first thing taken up was the report of the committee on suggestions in the President's and Secretary's reports.

The committee on suggestions referred that portion of President Bogardus' annual report referring to the Parcels Post Bill to the committee on resolutions. The committee recommended that the free and frequent use of the telephone would be beneficial to the members. They suggested that the national officers attend and assist in organizing any State Hardware Association where their presence is desired.

Digitized by Google

It was recommended by the committee that the State Associations so arrange the dates on their annual conventions that they will not conflict with the meeting of the National Association, so that the officers of the various State associations would be enabled to attend the meeting of the National Association.

President Bogardus called for the reports of other committees.

Report of the committee on fire insurance was called for.

Mr. Miller of that committee presented his third annual report. He said the year just closed had been the most successful that the National Retail Hardware Dealers' Insurance Company had experienced; that it showed a decrease both in expense and loss ratio over the first two years, and that the dividends for the year had averaged about thirty-two per cent. He said that the company had been well represented at the various State Association conventions.

Mr. Miller gave a statement in detail of the fire losses incurred during the year. He also stated the number of policies issued in the various States. He said it is interesting to note that the total amount of insurance carried by the Hardware mutuals, according to the various statements issued by them January 1st, 1906, was $7,625,306.91; that, assuming that the membership is 7,000, there would be an average of $1,099.00 insurance to each member.

On motion, the report was referred to the insurance committee of the association.

The auditing committee reported as having found the books and accounts of the treasurer in good condition.

The committee on legislation reported no recommendations.

The committee on by-laws had no changes to suggest in the constitutions and by-laws.

RESOLUTIONS.

The Committee on Resolutions submitted the following resolutions with a number of others and recommended their adoption by the association.

REPORT OF THE COMMITTEE ON RESOLUTIONS.

Your committee beg leave to report that they recommend the passage of the following resolutions:

PARCELS POST: Would recommend that our association continue opposition to the extension of the Parcels Post system, and that the State Secretaries communicate with each member of the State Association that they request their U. S. Senator and member of Congress to oppose such legislation.

RATE LEGISLATION AND FREIGHT DISCRIMINATION: That we approve the course of President Roosevelt on these questions, and would recommend that the Legislative Committee of this Association take proper action to carry out the sentiments of this association on these questions.

That this convention direct their secretary to send the following letter to Mr. S. Norvel, of the Norvel-Shapleigh Hardware Co., of St. Louis, expressing our confidence in their methods of doing business and their attitude towards this association.

CHICAGO, ILL., March 22, 1906.

MR. S. NORVEL, ST. LOUIS, MO.

DEAR SIR:

The National Retail Hardware Association here assembled. In reply to yours of recent date would say we appreciate your offer to pay the expense of a committee to your place of business for the purpose of investigating certain reports that have been published concerning your method of doing business. We believe these reports to be untrue in every respect, and were published for the purpose of sowing discord and discontent in the ranks of our association and for your personal injury. We at this time wish to extend our heartfelt thanks to you as chairman of the Joint Committee, for the great amount of good that committee has accomplished and assure you that we have the utmost confidence in the business methods pursued by your house and your attitude towards the retail dealers. Hence, there is no occasion to send the committee you have suggested, and it is the sense of this convention that the success of the Joint Committee will be largely enhanced if you are continued as its president, and the convention assembled earnestly urge and instruct their delegates upon that committee to continue you in the office of chairman.

With the best of wishes to each and every member of the Joint Catalogue House Committee, of which you are chairman, and again assuring you that we greatly appreciate the work they have done for the retail dealers in this United States of ours, we beg to remain as loyal as ever.

Resolved, That we advise all retail Hardware merchants of the country, before sending to the trade press criticisms of a personal nature and of policy or methods of officials and committee members, to confer with some official, preferably with the secretary of their respective State associations, thus acquainting themselves with actual facts.

The committee on the next place of meeting made their report and stated that a ballot of that committee showed the selection of Boston as the next place of meeting, by a large majority.

The report of the committee on nominations was called for.

ELECTION OF OFFICERS.

The Nominating Committee made the following report and recommendations, who were subsequently elected unanimously: President, E. M. Bush, Indiana; First Vice-President, S. R. Miles, Iowa; Second Vice-President, G. W. Rockwell, New York.

EXECUTIVE COMMITTEE.

A. T. Stebbins, Minnesota; H. J. Hall, Nebraska; D. Fletcher Barber, Massachusetts; H. L. McNamara, Wisconsin; G. R. Lott, Illinois; G. W. Wolbert, North Dakota.

President-elect Bush was called to the platform and he addressed the convention briefly cordially thanking them for the honor conferred upon him.

At the close of Mr. Bush's remarks Mr. Cormick of Illinois presented the retiring president, Mr. Bogardus, on behalf of the association, with a handsome gold-handled cane.

Mr. Bogardus feelingly thanked the association for the favor bestowed.

The convention then adjourned.

THE PERCUSSION-CAP CENTENARY.

It will be news to many people that this year, says the *Ironmonger,* is the centenary of the percussion-cap—not, indeed, the cap as it is now known, but rather the principle of ignition by the use of a detonating agent as applied to the firing of a charge of powder and shot contained in the barrel of a gun. The inventor was a Scotch minister named Alexander Forsyth, who took out a patent in 1806. Prior to that date flintlocks, or devices yet more rudimentary, were employed for the production of the fiery spark essential to the ignition of gunpowder. Our authority for these statements is the firm of F. Joyce & Company, of 7 Suffolk Lane, E. C., who have compiled a highly interesting booklet dealing with the invention of the percussion-cap and the evolution of the sporting cartridge. To the founder of Joyce & Co., Mr. Frederick Joyce, a chemist, belongs the distinction of having turned to practical account the inventions of Forsyth and subsequent investigators, by evolving, in the year 1820, what was known as Joyce's anti-corrosive percussion powder. Forsyth's detonating substance was injurious to iron and steel; Frederick Joyce devised a powder consisting of mercurial fulminate instead of a chlorate, and thus solved a problem which had puzzled many clever heads for fourteen years. The writer of the booklet under review claims that "around the Joyce cap of 1821 the whole fabric of modern sporting and military firearms centres, for in essentials the caps now used do not differ from the caps then introduced." The first achievement of the firm of Joyce & Co. was to establish the percussion-gun as the predominating type for muzzle-loaders on a method of construction which endures to this day. In 1820 Mr. Joyce set up works for the manufacture of caps at 55 Bartholomew Close, West Smithfield, E. C., where the business was carried on until 1842, when a site at Waltham Abbey was selected for the factory.

In 1835 the breech-loading gun came on the scene, and later on "Needham" ammunition, known as the "skin cartridge," was introduced, the needle of the gun penetrating the skin-covered base and igniting the fulminate inside. In 1853 Mr. Charles Lancaster introduced the central-fire breechloader. The original Lancaster cartridge was made without a cap, but in appearance was not unlike the modern central-fire case, although the rim at the base was not very pronounced. For ignition by cap the permanently successful system, all inventors adopted the methods inaugurated by Mr. Joyce. Combining with the making of caps the production of gun-wadding, Joyce & Co. were as intimately concerned in the developments of the muzzle-loader as afterwards they were with the breechloader. Continual references to the firm will be found in the writing of the period. Tom Hood the elder found inspiration in the products of the firm; in the poem entitled "Shooting Pains" he wrote:—

Joyce may talk of his wonderful caps,
But for night-caps they set me desiring;
And it's really too bad, not a shot have I had
With Hall's powder, renowned for quick firing.

Joyce & Co.'s pamphlet describes the central-fire gun and the centrically-capped case introduced by a Mr. Daw, who obtained a prize medal for the invention at the Exhibition of 1862. Both cap and gun, however, were really of French invention. In the early days of the central-fire paper case, with metallic base, two defects were constantly being encountered. The first was that the paper tubes were very apt to tear or split, while in addition the cap, although tightly fitting into its place, did not entirely prevent the escape of gas. To prevent the escape of gas at the cap-chamber, Joyce & Co. introduced the Bailey case, which was an ordinary central-fire paper case, slightly reduced in size at the base, this part, as well as the cap, being covered with a capsule of thin brass. In modern cartridges the cap, lightly seated in the cap-chamber, expands under the pressure created by explosion, and so effectually seals the base that until the pressure relaxes and there is no longer gas present, any escape is effectually prevented. Not the least valuable feature of the work is a glossary of technical terms relating to ammunition, which I. F. A. examination candidates and ironmongers' assistants generally ought to find extremely useful.

A contented mind is the greatest blessing a man can enjoy in this world; and if in the present life his happiness arises from the subduing of his desires, it will arise in the next from the gratification of them.—ADDISON.

THE VIEWS OF NATIONAL PRESIDENT BOGARDUS ON THE CATALOGUE HOUSE QUESTION.

On the subject of Catalogue House Competition, the following address was delivered by W. P. Bogardus of Mount Vernon, Ohio, president of the National Retail Hardware Association, before the annual convention of the Connecticut Retail Hardware Association, at New Haven, February 28.

A solution of the catalogue house question in its various ramifications has a good deal to do with the future success of the retail trade of this country. And, while some may be very tired of the subject, it is one that will not rest or be quiet until it has been settled and settled right. There is a good deal of talk about the rights of this and that party in the controversy. Some have taken the position that the catalogue houses are here to stay; that they are legitimate and as proper as any line of business; that the agitation of the question is simply to make them stronger and more widely known; that we cannot do anything and that we are wasting our time in bothering with them; that

THEY CAN GET ALL THE GOODS THEY WANT,

if not at first hands then at second or third. There is a very much mistaken idea, on the part of some manufacturers, as to the policy of the retailers in their organizations in the several states. The first organization was started to fight against the destructive methods of doing business by catalogue houses. We all know that it has ever been their policy to undersell and undermine the retail trade; that they have based their claim to public consideration on the claim that they are price-cutters; to undersell the retailer that they might create doubt in the minds of the consumers and so undermine the confidence necessary to carry on business. The foundation of their success has always been

THE FAVORS THAT HAVE BEEN GIVEN THEM.

Manufacturers have taken the position that the retail trade through their organizations have undertaken to dictate to them how they should run their business, and meddling with something that did not concern them by trying to tell them how they should distribute their goods. Then they go on to say that they, the manufacturers, think that if every other method fails to coerce them there will be an effort to start a campaign of boycott.

If a number of jobbers buy their supplies from a manufacturer at certain prices with the expectation of selling the goods to the retail trade, and the manufacturer sells to a retailer at prices that practically prohibit the jobber from selling the goods he has bought, is it dictation for the jobber to protest against such treatment? When the jobber says that he cannot stand such treatment is it not a little silly for the manufacturer to cry, "Oh, you are trying to boycott me!"

There has never been any discussion or advocacy of the boycott by Hardware associations. As far as I am concerned I do not believe in it as a means to the ends we are after. The manufacturer who takes the position that he promises to sell the catalogue houses must not expect patronage from any one else. For what is the use of buying goods that you cannot sell? Then, how silly to cry "boycott" when a manufacturer favors some of his trade and demands that the balance shall buy without the favors. To give a retailer the same price that a jobber gets is not fair, and for him to put any of his trade in a more favorable position than others is not equity. To demand that the catalogue houses should raise their prices is not what we want.

What we want is that

THE CATALOGUE HOUSES SHOULD BE RATED AS RETAIL STORES

that are price cutters and base their claim for trade on that proposition and therefore are not entitled to as good a price as even an honest retailer is given. We do not care about their maintaining fixed prices; we think the effort on the part of manufacturers to do this has resulted in utter failure. What we want is that they should pay as much as we do, and then we will take care of ourselves.

It seems to be a determination on the part of some manufacturers that

THE SOLUTION OF THIS QUESTION

is to get the catalogue houses to maintain prices. Again I say it is not what they sell for but it is what they pay the manufacturer that causes all the trouble. What is the sense in selling an article to a catalogue house at forty cents and to a retailer at sixty and then demanding of the catalogue house that the retailer be protected by maintaining prices.

If a manufacturer's platform is that there is a straight road from his factory to the warehouse of the catalogue house let him stand on it like a man. He has no right to whimper or cry out boycott if other than the catalogue people do not buy from him.

It is a far cry to undertake to bring the customer into this controversy. This is a question between the manufacturer on the one side and his distributing agents on the other. And the point of the controvery is that

IT IS NOT FAIR OR JUST OR EQUITABLE

for the manufacturer to show favors; to give prices to some of his customers that he does not give to the balance. The manufacturer does not want to see this point and he dodges by saying that the catalogue house is in some cases a larger buyer than any single jobber and that nine-tenths of his output goes through the jobbers, therefore the catalogue house should not have the price given the jobber; the other reply is, "Well, he buys a lot of goods, and the man who buys the lot gets the price."

The immorality of the position does not seem to strike the manufacturer. To say to your opponent, "You're another," has never appealed to me as a very strong argument. To seek to justify a wrong by saying that the beam in the other's eye is greater than the mote in mine, and should be removed first, is but a shuffle to hide the real issue. Why should prices be given one-tenth of a manufacturer's trade that are lower than those given to the other nine-tenths? Why should prices be given a retailer that will enable him to sell as cheap as the jobber?

The suggestion from the manufacturer that the retailer should keep up his store; assort his stock; study the needs of his constituents; advertise so as to keep his name before the public; take hold of the new things, and then he will not be bothered by the catalogue houses, is talk that would not be indulged in if he had any adequate conception of the conditions existing in the country.

IT CERTAINLY SHOWS A WANT OF KNOWLEDGE

of the true inwardness of the situation for a manufacturer to say that the catalogue houses are a convenience, if not an economy, and that the only way to get rid of them is to educate the people not to buy of them. If they are a convenience and an economy what argument are you going to use to teach the people so that they will not buy of them?

Is the blame on the manufacturer or jobber or retailer because he happens to have a surplus and sells it at a sacrifice to get some ready money? Not a bit of it. For fluctuations in business and prices have been going on since the year one and will continue while the world lasts, and men who go into business realize it. But the blame for this disturbance in business lies at the door of every manufacturer who favors the catalogue houses in prices, knowing full well that the jobber who buys of them cannot live and sell his goods to the retailer. Until the manufacturer will take other conditions into the sale of his goods than quantity the fight will go on.

It is trivial to cite the case of one retailer who charged two and a half times the cost of his goods as a reason for the existence of the catalogue house. It is the prices the catalogue house gets from the manufacturer that enables it to thrive. The solution of this question is not with the consumer. Let the manufacturer give all retailers the same price and they will take care of the consumer.

COMPETITION IS TOO SHARP FOR EXCESSIVE PROFITS,

and the citation of a single case is but begging the question.

Treat all alike and there will be an end of the trouble, for it is favoritism that makes the trouble. It will not do for the manufacturer to say to the retailer, "Go to the consumer and convince him that the retail Hardware merchant can render better, more efficient and as economical service as the catalogue houses and you have nothing to fear from their competition." Let the manufacturer give us the price and treat us as he does the catalogue house and we will not fear any other competition.

KEUFFEL & ESSER CO.'S CATALOGUE.

The Keuffel & Esser Co., 127 Fulton Street, New York, manufacturers and exporters of drawing materials and surveying instruments, have published the thirty-second edition of their catalogue, which has been subjected to a thorough revision, and has received many additions, which make it the most complete catalogue of such goods which has been brought to our attention, comprising in all 546 pages. In a special notice, which is introductory to its contents, they say: "We have copyrighted this entire book, and have also copyrighted separately about 400 of the illustrations contained in it, and much of the descriptive and explanatory matter, although the general copyright of the book covers all of its contents. We have done this at considerable expense in the interest of our patrons to protect them against those dealers who claim to be manufacturers, and copy our cuts and descriptions to create the impression that their goods, mostly bought in the cheapest market, are the same as the special grades and patterns which we manufacture or control." Views of the New York head office and salesroom and the several branch houses in Chicago, St. Louis and San Francisco, together with a page view of the factories at Hoboken, which alone occupy two large squares, ornament the early pages of the volume. The catalogue is unique in the fact that the descriptice matter of the varied contents leaves nothing to be desired, but is plain enough about matters that are usually insufficiently described. Compared with anything previously issued, they state, "We have added an Optical Department, fitted with the latest appliances for manufacturing lenses, prisms, etc., so that we are now able to guarantee also for these important parts of our instruments the same degree of perfection for which our goods in general are known." Besides this general catalogue, they publish separately a catalogue of nautical instruments and catalogue of instruction for forest work; trade price lists, supplemental to the general catalogue listing drawing instruments for schools, etc., and trade price lists of Measuring Tapes for the Hardware trade.

RECENT TRADE PUBLICATIONS.

FOREST CITY BIT AND TOOL CO., Rockford, Ill., are issuing to the trade their Catalogue "G" of Mortising and Boring Machine Supplies. They have taken great pains to show up the excellent qualities of their goods as may be seen in the following extract taken from the introduction to the catalogue: "With this publication it has been our aim to illustrate our regular Hollow Mortising and Wood Boring Tools in a concise and practical way, adding only such information as may prove of value. Consistent with our system each tool is carefully inspected after each operation and thoroughly tested before leaving the factory. All tools illustrated in this catalogue are manufactured in our shops, thoroughly tested and sold under our guarantee. Every tool illustrated in this catalogue and stamped 'Forest City' is made of the finest and toughest steel known in the market and is fully warranted against defects in material and workmanship." The catalogue in pamphlet form, numbering 48 pages, and is well printed and profusely illustrated. Send for a copy of this very interesting and instructive book.

WRIGHTSVILLE HARDWARE CO., Wrightsville, Pa., are issuing to the trade an exceedingly attractive and instructive illustrated Catalogue and price List. The book numbers over 140 pages, is carefully indexed and profusely illustrated with very fine cuts of the various products manufactured by this Company. They make mention of their exceptionally fine facilities, as shown in the following extract: "We have extra good facilities, we believe, for making high- grade goods at a low cost. Located where we have a direct side-track connection with the Pennsylvania Railroad, it is apparent that our shipping facilities are, at least, unexcelled. In our Nickel-Plating department our facilities are such as to enable us to do this character of work promptly and satisfactorily. We also continue to offer special inducements to parties placing large contracts for custom castings. We have had varied experience in this class of work, making large quantities of Oil and Gas Stove, Night Latch, Cupboard Catch, and special castings of all varieties in Grey Iron." They also state that all prices quoted in the catalogue are subject to discount, and will be cheerfully furnished only to the trade upon request. Orders and correspondence by mail will receive their best attention.

RANNEY REFRIGERATOR CO., Greenville, Mich., has issued a most artistic catalogue and price list of the Refrigerators of their manufacture for the season of 1906, describing and illustrating their Lapland, Monitor and Mascot lines in ash, oak and other hard woods. A feature of these refrigerators, to which they call attention, is the All-Metal Cushion Ice-Compartment Supporters, possessing many advantages. The trimmings illustrated are of handsome designs, and the company state that they are manufactured expressly for them, being fully guaranteed against breakage from defects. It will also be noted that the adjustment of the shelves in an expeditious manner is arranged for. Illustrations of the shelves and ice racks will also be found, as well as of the lid holders. Interior views of the construction of these Refrigerators is given as well. The line includes a complete stock for the use of grocers. This company manufacture Ice Chests with double lids, made of hard wood, and a variety of Improved Kitchen Cabinets. A smaller catalogue accompanies this catalogue, devoted to their line of "White Enameled" Refrigerators marketed under the name of the "Charter Oak," made of ash, and the "Monitor," with table top. These catalogues should be sent for.

CONSOLIDATED MFG. CO., Dorr Street Station, Toledo, Ohio, successors of the Kirk Mfg. Co., are presenting to the trade their Eleventh Annual Catalogue of "Yale" Bicycles and Motor Cycles. This is a booklet of 16 pages, attractively gotten up, finely printed, and on the front cover is shown a Yale student in bicycling costume with a "Yale" bicycle. Illustrations and specifications are given of several styles, including the "Yale" California Motor Cycle, the "Yale" Racer, the "Yale" Light Roadster, and the "Yale" Juvenile. In the back of the catalogue will be found a statement as to the equipment of their line for 1906, as well as terms and guarantee. An illustration of their immense plant devoted entirely to the manufacture of bicycles, Hussey bars, and drop forgings and fittings, and consisting of fourteen buildings, completes the contents, and if the dealer will send for a copy of this catalogue it will be gladly sent upon request for same.

NILES MANUFACTURING CO., Nos. 14-16 North Canal Street, Chicago, Ill., manufacturers of spring hinges, lavatory door trimmings and other Hardware specialties, have recently distributed an artistic booklet which is their Catalogue and Price List No. 15, intended for Hardware dealers, plumbers, architects and marble works. The contents contain illustrations of Bronze Metal Trimmings for Lavatory Doors, such as spring hinges and blanks, strikes and bolts, pulls, nuts and stops. A copy of this catalogue will be sent upon application.

ODIN STOVE MANUFACTURING CO., Erie, Pa., are sending out their Catalogue No. 15 of Odin Natural Gas Appliances for the Summer season of 1906. A full description is given of the Odin Ranges, as well as several illustrations. They also describe and illustrate what they term their "single oven and broiler series," which they manufacture under the name of the Rival Odin. A full line of "Eric" Gas Cookers is also shown; also "Eric," "Odin" and "Viking" Hot Plates, the "Joey" Nursery Burner, the "Odin" Water Heater with copper coil, Tri-Odin sectional burners for natural gas only, as well as for ordinary cook stoves and heaters. The contents include a line of Tailor and Sad Iron Heaters, Gas Cocks and "Eric" Gas Ovens. This catalogue is one of a very useful line of goods, and is well worth having.

NORVELL-SHAPLEIGH HARDWARE CO., St. Louis, have presented us with their Catalogue of Diamond Go Carts. They state that they have paid great attention to the finish, style and construction of this line, and have made them up-to-date in every way. They are all built to fold up in a very compact form. These Go Carts are made in several patterns, including the "Little Devil," "Cupid," "Buster," "Lady Jane," "Dolly Varden," "Roosevelt" (for twins), and many others, from the cheapest to the most expensive styles. They also illustrate several lines of baby carriages full size, and different patterns of parasols and cushions. Catalogue may be had upon request.

SARGENT & CO., New Haven, Conn.; New York office, 149-153 Leonard Street, have favored us with a pamphlet containing descriptions and specifications of their lines of Standard Steel Squares. They also show tables and scales which are used with the various squares. The contents include a mention of Bridge Builders', Stone Cutters' and Machinists' Squares, electroplated and blued; also steel squares with metric measure, squares with rafter table, and directions for same; a brace measure, an octagon "Eight-Square" scale, and board measure; also steel squares not tapered, steel rules, and Sargent's Superior Screw Drivers. This is a very useful and valuable pamphlet, and should be sent for.

THE SAMUEL WINSLOW SKATE MFG. CO., Worcester, Mass., are placing before the trade their Catalogue E of Roller Skates, both plain and ball bearing, of the "Vineyard" and "Winslow" patterns. A line of racing and polo skates is shown, as well as a number of ball-bearing rink skates, extension sidewalk, Columbia adjustable, extension cycle with rubber tires, plain and ball-bearing extension; also ball-bearing rolls, and an illustration of the ball-bearing mechanism. A price list is included in the back of the catalogue; also a telegraphic code for use in ordering. The catalogue will be gladly sent to those interested in the above line of goods.

THE INTERNATIONAL SILVER CO., successors to the Holmes & Edwards Silver Co., Bridgeport, Conn., have issued their Catalogue No. 27, with price list, illustrating the various patterns of spoons manufactured by them, including the Imperial, Marina, Kings, Westfield, Waldorf, Minnehaha, Orient, Lincoln, Rialto, Nassau, Windsor and Shell, all of sterling silver, and of the most artistic designs. Other grades of spoons are also shown, such as the Railroad Windsor pattern, of special quality plate, and Old English, intended for steamship, hotel and restaurant use. The contents include a line of Half Plate goods, as well as Bar Supplies, such as julep strainers, lemon knives, soda spoons, etc. Table cutlery of the latest designs will also be found illustrated, as well as orange and dessert knives; also carving sets, and silver-plated steel knives, combination sets in lined boxes suitable for presents, including oyster, berry, salad, ice-cream, fish, cold meats and soup sets. Pearl cutlery with sterling silver ferrules is also shown, hotel cutlery, Craig silver spoons, knives and forks; also those made of Mexican, German and nickel silver, as well as a line of stag handle carving sets. Attention is called to their brand of silver polish. Specifications for replating and refinishing are also given. The catalogue is handsomely illustrated, attractively gotten up, and finely printed on excellent paper.

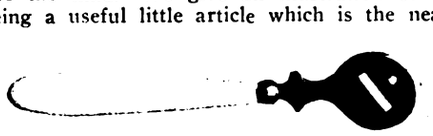
NEW GOODS AND SPECIALTIES

AUTOMATIC ADJUSTABLE-STROKE CENTER PUNCH.

The L. S. Starrett Co., Athol, Mass, have recently added to their assortment of labor saving tools the Automatic Adjusable-Stroke Center Punch, No. 18-A. which we illustrate with a full size cut. This centre punch is provided with a knurled adjustable screw cap which, working in connection with a spring, regulates the stroke. For work requiring a heavy mark, turn cap down; for work requiring a light mark, turn it up. To use it no hammer is needed. The punch being placed in an upright position over the working line, a downward pressure releases the striking block and makes the impression without danger of slipping, as is liable when a hammer is used. When adjusted for either light or heavy stroke all indentations are of uniform size for starting the drill, etc., and accurate and quicker work can be done. The working parts are hardened, durable and accessible for such repairs as may be needed. The adjustable cap fits the hand, with no stroke-adjusting screw through and above it to bother. The point can be ground without removing it. This punch, while small and light, is capable of giving a powerful stroke, thus taking the place of a heavier as well as a lighter punch. It is ½ inch in diameter, 5 inches long when adjusted for medium stroke and weighs but 3 ozs.



AUTOMATIC ADJUSTABLE-STROKE CENTRE PUNCH.

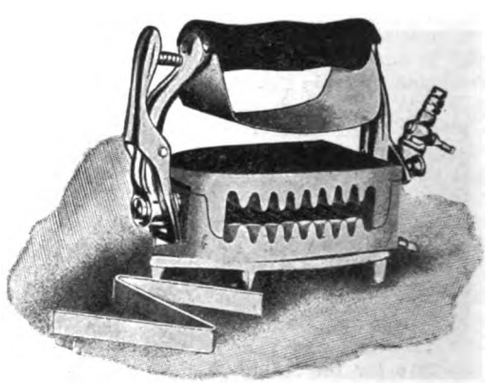
THE KLIP-KLIP "PREMO."

The Klip-Klip Co., Rochester, New York, have recently added to their line of Klip-Klip specialties the Klip-Klip "Premo" and the Klip-Klip Corn Shave, which are articles likely enough to catch the taste of the trade and become the best selling specialties of the kind. We give an illustration of both, the "Premo" being a useful little article which is the neatest and strongest nail clipper that has been added to these pocket manicuring appliances, is heavily nickeled and simply made to be sold at a moderate price and pay the dealer a good percentage of profit.

THE KLIP-KLIP "PREMO."

KLIP-KLIP CORN SHAVE.

THE "HAPPY THOUGHT" RAZOR STROP.



Geo. W. Collins, Peninsular Bank Building, Detroit, Mich., is introducing the "Happy Thought" Razor Strop, which we illustrate. A strip of wood runs between the two Strops, keeping them on a flat surface. The wood strip is also slightly thicker in the centre than it is at the sides, thereby preventing the "round edge" when stropping. A full line is offered, from several low-priced grades to the highest-priced, the latter being of genuine Russian leather, and being self-honing. One of the cheaper Strops has porpoise-hide finished side, with solid web back, especially fitted with hardwood "Happy Thought" center, flat loop, leather handle and single loop swivel, being 23 inches long and 2¼ inches wide. The highest grade is a double leather strop, the finishing side is of light-colored Zulu-finish horse-hide, and the sharpening side is of heavy black horse-hide. Specially fitted with hardwood center, padded leather loop handle and malleable swivel; 24 inches long and 2¼ inches wide. Each Strop is distributed to the trade put up in a neat heavy paper envelope.

THE "HAPPY THOUGHT" RAZOR STROP.

THE "LEONARD" GAS SELF-HEATING IRON.

The Leonard Mfg. Co., Providence, R. I., are presenting to the trade the "Leonard" Gas Self-Heating Iron shown in the accompanying illustration. It is made in two weights, viz., 6¼ and 9 pounds. They also make a Tailor Iron weighing 18 pounds. The Iron is nickeled and polished, while the corrugations on the interior of the body increase the heating surface, the metal being so arranged that the outer sides or edges of the body are considerably thicker or deeper than the center walls, thus adapting the iron, when in use, for the retention of heat for a longer period at the part which first comes in contact with the dampened cloth. The interior is constructed so that the gas flame from the central burner tube has a great heating capacity. The Iron may also be used for a stove by placing the Iron on its side and making a few changes. In this revolving Iron the upper face is heated, while pressing, with the lower face. In the Tailor Iron the faces are 9¾ inches long and 3 ¼ inches wide.

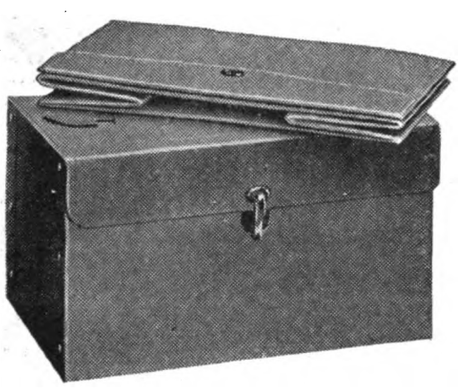
THE "LEONARD" GAS SELF-HEATING IRON.

THE HENIS COMPARTMENT STEAM COOKER.

William G. Henis, 1347 Ridge Avenue, Philadelphia, Pa., is the patentee and manufacturer of a new design in cooking utensils, in the Henis Compartment Steam Cooker, an illustration of which we give herewith. It is unique in its construction, as will be seen by reference to the illustration. It consists of an outside Agate kettle, in which are fitted four compartments with covers complete, in each of which something different

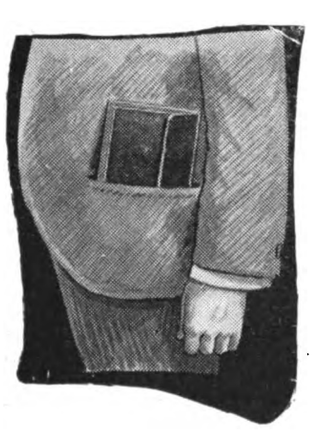
Digitized by Google

may be cooked. It can be used without the compartments if desired, by simply removing the ring, which is made of steel and handsomely tinned. The tin compartments are accurately machine made of the best grade of XX bright charcoal tin. The tin made especially for the Henis Cooker is extra heavy and



THE HENIS COMPARTMENT STEAM COOKER.

warranted to wear five years with ordinary usage. The handles on the compartments are so arranged that the operator can entirely drain the compartment of surplus water by simply reversing the compartment, without losing the smallest portion of the other contents or scalding the hand. More information is contained in a circular, which will be sent on application, and which every dealer should ask for to be up-to-date.



THE IDEAL LUNCH BOX.

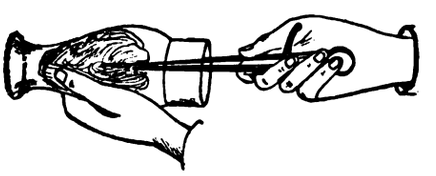
The Rochester Lunch Box Mfg. Co., Rochester, N. Y., are placing on the market The Ideal Lunch Box, which is claimed to be an improvement on any that has preceded it, and is convenient

IDEAL LUNCH BOX.

to carry and attractive in appearance. It is constructed in two grades. The Ideal No. 1 is made of the best black rope fiber, with black patent leather handle. Waterproof both sides. Double bottom and ends. Solid cover. Size, 8x5x4¾ inches. The Ideal

HOW IT MAY BE FOLDED FOR THE POCKET.

No. 2 is made of good quality rope fiber, with webbing handle. Waterproof outside, double bottom and ends. A strong and serviceable box. Size, 7½x4¼x4½ inches. The manufacturers supply advertising matter, window cards and electrotypes with sufficiently large orders.

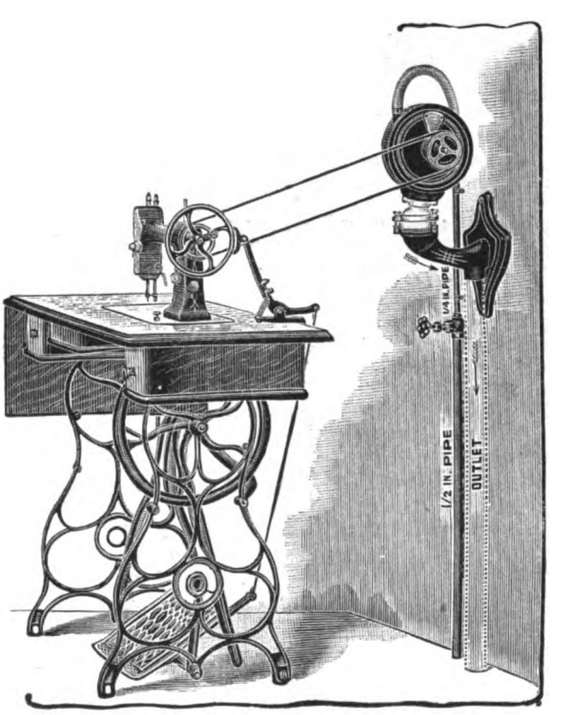


THE "DANDY HANDY" TONGS.

The Lowell Scale Co., Lowell, Mass., are placing on the market what could be made a popular housekeeping specialty, which they name the "Dandy Handy" Tongs, which we illustrate herewith. It is made of steel, nickel-plated, and can be used for

AS A ROAST POTATO HANDLER.

a number of purposes, such as taking vegetables from the kettle, hot potatoes from the oven, handling boiled eggs, boiled corn, in each of which it will be found useful; or it may be used in the operation of cleaning lamp chimneys, or milk bottles. The device is made of metal, formed to shape, with

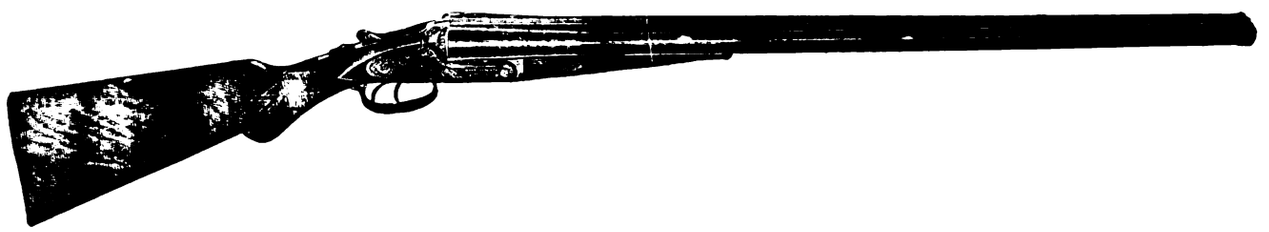


AS A CHIMNEY CLEANER.

teeth near the end of the prongs. A small curved bar guides the two prongs and keeps them in position. A shoulder on this bar locks the arms when they are closed. A slight pressure releases them, when they open with a spring. The device is quite attractive in appearance, and is made to be sold at a moderate price, which affords the dealer a satisfactory profit.

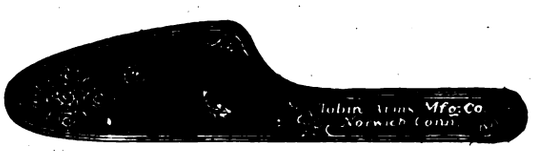
THE POLAR WATER MOTOR.

The A. Rosenberg Motor and Mfg. Co., Baltimore, Md., are the manufacturers of the Polar Water Motor shown in the illustration herewith. The Motor which we illustrate is the seven-inch decorated and enameled Adjustable Water Motor. It has steel shaft 12 inches long, ⅝ inch diameter, with brass hub, steel discs and brass pulleys for either round or flat belt. It is shown here driving a family sewing machine with auto-



THE POLAR WATER . .OTOR.

brake for stopping, starting and regulating speed of sewing machine. It can be run on any ordinary house supply with ½ H. P. with 20 to 75 pounds pressure. It can be used with any pressure when used for driving light machinery. Uses from 10 to 20 cubic feet of water per hour. The same Motor can be used for running a fan.

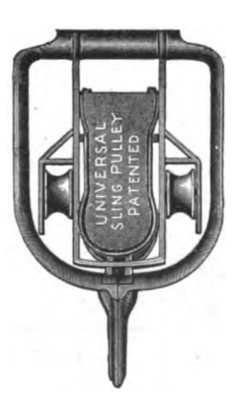


Digitized by Google

THE TOBIN "SIMPLEX" HAMMERLESS SHOT GUN.

The Tobin Arms Mfg. Co., Norwich, Conn., are the manufacturers of the Tobin "Simplex" Hammerless Shot Gun, which we illustrate herewith, giving an idea of the excellent appearance of these goods. An article of merit meets the approval of the buyer whose motto is "A Satisfied Buyer" and when this is taken into consideration with the fact that such goods have merit enough to afford a margin of profit that is greater than is usually to be had on similar goods, the subject is an attractive one for consideration. In this issue of HARDWARE is shown a reproduction of a few original letters that speak volumes concerning the Tobin Arms Mfg. Co.'s "Simplex Guns". The Tobin Arms Mfg. Co. claim some advantages worthy of the attention of the trade, among which are the following: Their line of Simplex guns which sell at a popular price, comprises every feature of excellence demanded by the shooter who has passed the initial stage of cheap guns, and in addition has unique features of simple construction, fine finish, neat design, strictly first-class work and material that combine to make a hammerless gun that merits their claim of "A modern improvement in hammerless gun construction."

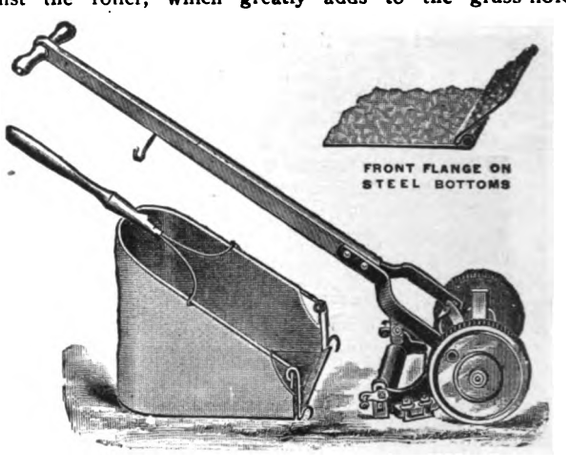
THE TOBIN "SIMPLEX" HAMMERLESS SHOT GUN.



SIDE PLATE SHOWING STYLE OF FINISH.

The Tobin Arms Mfg. Co. are making every effort to handle their line through the legitimate trade channels. Our readers will notice that they have never had an opportunity to refer to these goods being offered by cut-rate dealers anywhere. These makers do not pretend that it is possible to furnish something for nothing and consequently do not wish to convey the idea that they have the lowest priced article on earth, but if you wish an article that looks good to you and your customer, that makes new customers for you when sold, they can supply it to sell at from $22.50 up to $200. Their hammerless guns for "nineteen o six" will be fitted with automatic ejectors or single triggers if required. They also make 12 gauge guns as light as 6 pounds.

MYERS IMPROVED UNIVERSAL SLING PULLEY.



F. E. Myers & Bro., Ashland, Ohio, are placing on the market the Universal Sling Pulley in an improved form. The increased demand for and the use of slings for unloading hay and grain has made a requirement for a device that could be used with the ordinary hay carrier, which the farmer has already placed in his barn, and the Universal Sling Pulley is especially designed to meet this requirement. It can be used on any make of hay carrier without requiring a different fork pulley or registering device of any kind. It is so arranged that it cannot be misplaced on the rope, as it can be used with either side up in connection with any shape or style of fork pulley. It is the only device known making it possible for one traveling pulley to pass through another, and form a loop. In this way they accomplish everything that is possible with any hay sling, and the fork pulley registers in the carrier just as it does with a hay fork. It is adapted for Center Trip Slings, and deposits the hay or grain in the mow in the same relative position as it is in the wagon, and not crosswise, as is the case with many sling carriers. It is referred to as being light, convenient to handle, and a proven machine.

MYERS IMPROVED UNIVERSAL SLING PULLY.

THE EASY EMPTYING GRASS CATCHER.

The Specialty Mfg. Co., St. Anthony Park, Minn., are the makers of the Easy Emptying Grass Catcher shown herewith, which is made in two sizes, which fit perfectly any size or make of lawn mower. It is made from heavy duck, with galvanized steel frame. The galvanized iron bottoms are provided with a flange in front, to prevent the grass being carried forward against the roller, which greatly adds to the grass-holding capacity of the catcher. In order to make it fit any make of lawn mower, the flange may be adjusted by bending it either up or down. The method of attaching the duck side to the galvanized steel bottom is spoken of as being the strongest possible. Special machinery rolls the duck and metal together without injury to the duck, and makes a joint that is referred to as being strong, light and yet durable. The Catcher is emptied by lifting it from the mower by the handle.

THE EASY EMPTYING GRASS CATCHER.

DEATH OF EDWIN GILBERT.

Edwin Gilbert, president of the Gilbert & Bennett Mfg. Co., Georgetown, Conn., and Chicago, died at his winter home in Crescent City, Florida, where he had been accustomed to go for twenty-three years past, on February 28th, in his eighty-fourth year. When Mr. Gilbert went South a little more than a month ago, he was apparently in good spirits and in his customary good health. Edwin Gilbert was born in Georgetown, Conn., in September, 1822, and for many years worked in the factory at the business established in 1818 by Benjamin Gilbert, his father. Edwin became a member of the firm, originally Gilbert, Bennett & Co., in 1844. The business under the present title was incorporated about 1873, and in 1884 Edwin Gilbert was elected president of the company, an office he filled with great ability until his death. He was very domestic in his habits, exceedingly hospitable, intensely religious, and during his life always doing charitable work among the deserving by giving only after personal investigation and on intelligent lines, a characteristic that was perpetuated in his will, in which over $250,000 is given to various worthy institutions; all of the bequests becoming effective on the death of Mrs. Gilbert. Mr. Gilbert nine years ago celebrated his golden wedding. His widow, a few years his junior, survives him, but he left no children.

OUR CANADIAN LETTER

Toronto, March 15, 1906.

THE COMBINE INVESTIGATIONS.

There is little to report this month regarding the trial of the tack manufacturers in Toronto charged with conspiracy to restrain trade. In last month's letter reference was made to eight Canadian manufacturers of tacks being committed for trial on January 24. The case came before the grand jury of the criminal court on February 8, a true bill being brought in against the eight named a month ago. Through sickness of a juryman, however, the court adjourned its sittings and nothing has since been heard of the matter except occasional articles in the *Daily Press* demanding that the trials of the alleged combines in tinware, etc., be proceeded with. The Prosecuting Attorneys are, however, busily engaged in other investigations and the Hardware men can wait for a while.

The Plumbing Supply men have been equally fortunate in gaining time as while their cases have been taken up again another adjournment was made until March 12. Unlike the master plumbers, who laid down and practically admitted their guilt of conspiracy, the supply men intend putting up a warm fight, claiming that they were forced to enter into an agreement with their customers and did so only after they had secured legal advice on the matter.

RETAIL TRADE ORGANIZATION.

The Western Canada Retail Hardware and Stove Dealers Association held their semi-annual convention at Winnipeg, commencing on Feb. 13, the attendance being very large and representative of all that section between Lake Superior and the Rocky Mountains. Little of interest to American readers was transacted, the most important actions of the gathering being their affiliation with the Retail Merchants' Association of Canada and the shelving of the Mutual insurance proposition for another six months. The old secretary was re-elected, his address being J. E. McRobie, 53 Scott building, Winnipeg. J. A. Lindsay, the retiring president has become a manufacturers' agent at Winnipeg, representing several American houses.

The Retail Hardware Dealers' Association at Montreal is progressing favorably and the proposition to organize the retail trade in Ontario is meeting with considerable success.

LUMBER TRADE.

The absence of snow is causing the lumbermen in all parts of Canada a lot of anxiety as it is practically impossible to move their winter's cut. This, of course, has a serious look to those dealers who depend largely upon the lumbermen for trade.

SPORTING GOODS TRADE.

The remarkable winter has had a bad effect upon the many winter lines of sporting goods. Skating, hockey and curling have been indulged in almost as much as in previous winters but there has not been a day's snowshoeing or tobbogganing in Toronto during the entire winter and other sections have fared little better. The heavy snowfalls of the last two winters had caused a revival of these sports but the snowless winter may discourage trade next year.

Everything points to a tremendous trade in summer goods, however, as there is marked enthusiasm displayed in baseball, lacrosse and football, while both lawn tennis and golf are also immensely popular. Bicycling is also experiencing considerable of a revival in Canada, while shooting and fishing are becoming more popular each year, the newly opened districts in Northern Ontario and Quebec providing plenty of field for sport.

OUTLOOK SATISFACTORY.

The Smith and Fergusson Company, Regina, Saskatchewan, report the trade outlook in Western Canada to be very good. The farmers have held large quantities of their grain to be marketed in the spring, this insuring the circulation of a lot of money during the coming summer. Other western houses make similar satisfactory reports.

On the other hand, Mr. A. M. Bell, jobber, Halifax, expresses the opinion of the trade in the Maritime Provinces. He says there is nothing to indicate a better year than last although building is active. The poor winter for lumbering, the high price of cod fish, etc., are reasons put forward to show why the trade will suffer during the coming year.

OPPOSE DUMPING CLAUSE.

During the past month Canadian jobbers of Hardware have entered strong protests against the continuance by the Dominion Government of the Dumping Clause of the Canadian Tariff, aimed to prevent American manufacturers from dumping their surplus stocks upon the Canadian market at lower prices than prevail on the home market. Representing the Canadian Wholesale Hardware Association, Wm. Vallance, Hamilton, Pelee Howland, Toronto, and jobbers from other large centres asked the Tariff Commission at Ottawa to abolish the clause. It was, they declared, impossible of equitable application; it encouraged fraud; it was an injustice to honest importers; it was an unwarranted restriction on freedom of purchase; its tendency was to take the trade in such lines as were affected from the Canadian wholesale merchant and give it to his foreign competitors; it unduly enhanced the laid-down cost of such lines as Canadian manufacturers could not supply when crowded with business, with resultant serious loss on contracts. An increased duty in place of this clause would be infinitely less objectionable.

Mr. Howland maintained that the effect of the anti-dumping clause was to order importers to buy at a combine price, whereas if a combine existed in Canada the duty was thrown down. Importers were continually being asked, he said, by foreign manufacturers to arrange various plans for evading the clause, by charging advertising, travelling expenses, etc. He declared that he had never encountered any instances of American manufacturers selling below actual cost.

Another matter which has created quite a stir amongst the Canadian Hardware trade recently is the proposed duty of 33 1-3 per cent on tin plate entering Canada. The duty is requested by a coterie of company promoters headed by J. Walter Allison, originally a Canadian but more recently of New York. The entire trade, particularly those users of tin plate and sheet metals in manufacturing tin ware, metal roofiings, tin cans, etc., are protesting vigorously, desiring to be able to bring tin in free of duty. Allison is building a rolling mill at Morrisburg but it is freely predicted that, like the Cramp Steel Company at Collingwood, which he promoted, it will never turn a wheel.

TRADE EXPANSION.

The Norris Safe and Lock Company, of Seattle, are to erect a five story business block at Vancouver.

The Peterboro (Ontario) Lock Company have closed a successful year, declaring a dividend of six per cent and an additional bonus of one per cent. after spending $5,000 in enlarging their plant.

The Aikenhead Hardware, Limited, Toronto, have moved into a large new building and are extending their jobbing business in builders' Hardware. The firm was established in 1830 and is the oldest Hardware concern in Toronto.

McLesnnan, McFeeley & Co., Vancouver, are to build a new $7,000 warehouse for their Hardware trade.

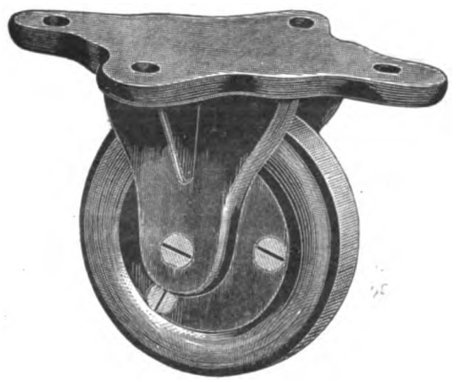
The Kemp Manufacturing Company, Toronto, makers of enamel and tin ware, are considering the advisability of establishing a branch factory at Montreal. Norman Wylie, formerly with Lewis Bros., Montreal, is now assistant to A. E. Kemp, M. P.

INDUSTRIAL CHANGES.

The Nicholson File Company, who were formerly represented in Montreal by the late Walter Grose, have decided to discontinue their agency there. They will make Port Hope the headquarters of their sales department. The Canadian agency of the G. & G. Barnett Co., Philadelphia, manufacturers of Black Diamond Files, will also be centred in Port Hope, as the Nicholson File Works have for some time been Canadian sales agents for this company.

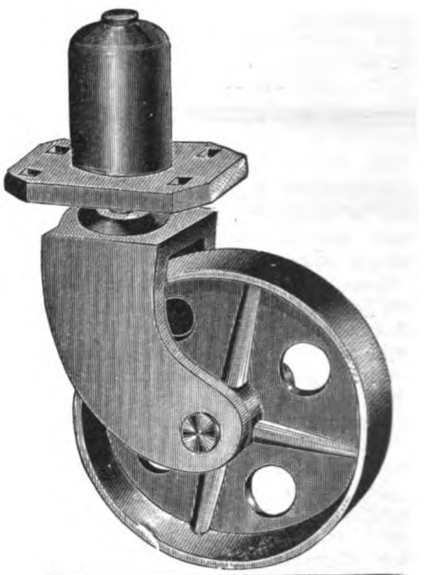
The imperial Steel and Wire Company, Collingwood, Ont., are to build a wire fence plant.

The Brentford Roofing Company, a branch of the Patent Roofing Company, Lafayette, Ind., have commenced manufacturing.



The Canada Cycle and Motor, Company, Toronto Junction, have completed extensions to their plant. In addition to bicycles and automobiles, they now manufacture large quantities of skates.

The Anthony Wire Fence Co., Flint Mich., have established a factory at Windsor, Ont.



The James Pender Company, St. John, N. B., are doubling the size of their nail and wire mills. At their recent annual meeting a 12% dividend and a bonus of 9% was declared.

The Peacock File Company, Buffalo, are said to intend to remove their plant to Port Colborne, Ont.

ABOUT MEN IN THE TRADE.

The death occurred in Winnipeg on February 19, of W. G. McFarlane, vice-president and manager of the Winnipeg branch of the Marshall-Wells Company of Duluth. He was only 34 years of age and he had worked his way steadily to the front.

W. R. B. Leslie, formerly traveling representative in Eastern Ontario for Caverhill, Learmont & Co., Montreal, has entered into partnership with A. C. Jenkins in the agency business in Montreal, representing Smith & Hemenway, New York, and other American houses.

W. A. C. Hamilton, Toronto representative of the Consumers Cordage Company, Montreal, has been transferred to the latter city, he being now vice-president of the company.

Prices of binder twine were slaughtered in Canada last year by the International Harvester Company and about half a dozen Canadian mills were forced to close down. A similar condition is looked for this year, although prices will probably be a trifle higher. The coming to Canada of the Plymouth Cordage Company is not expected to have much effect on the market this season, but interesting developments are looked for when their monster plant at Welland gets in full operation in 1907.

TRAVELLER ARRESTED IN QUEBEC.

About a month ago, J. Greenburg, representing a New York house, was arrested in Montreal because he had not paid the travelers' tax on representatives of "foreign" houses. Mr. Greenburg was engaged in eating his dinner and was prevented from finishing it being taken to jail and thrown into a cell with a housebreaker and kept there six hours before securing a hearing. As Mr. Greenburg also represented an English house he was released and an apology tendered for the manner of his arrest. Not satisfied with this, however, he has started suit against the Province of Quebec for maltreatment and false arrest. Captain Gorman, Deputy U. S. Consul-General at Montreal, having charge of the case.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PAPENTS ISSUED FEBRUARY 30, 1906.

812,262. WINDOW SHADE BRACKET. A. B. Dunkle, Steelton, Pa.
812,292. WASHING MACHINE. T. C. Purves, Chicago, Ill.
812,299. NUT LOCK. J. Schmitt, Brooklyn, N. Y.
812,308. BOX FASTENER. H. Stotz, Albert Lea, Minn.
812,309. BROOM HANDLE. T. I. Swagerty, Pleasanton, Kans.
812,334. HUB WRENCH. M. F. Edwards, Stillwater, Okla.
812,346. DOOR HANGER. J. L. Lawrence, Sterling, Ill.
812,347. DOOR HANGER. J. L. Lawrence, Sterling, Ill.
812,406. CAN OPENER. C. Cochran, Plattsburg, N. Y.
812,411. GAGE READING DEVICE. G. P. Doern, Chicago, Ill.
812,429. NUT LOCK. J. W. Koch, Reynolds, Pa.
812,440. ADJUSTABLE WRENCH. G. McKerahan, Marshfield, Ore.
812,497. NUT LOCK. R. G. Jahnke, Cincinnati, Ohio.
812,538. WRENCH. I. Weisnek, Mindenmines, Mo.
812,551. WRENCH. N. Delisle, St. Tite, Canada.
812,580. LIFTING JACK. H. M. Marsh, Chicago, Ill.
812,590. CULINARY VESSEL. A. W. Obermann, Newcastle, Pa.
812,591. NUT LOCK. M. Omalia, Scranton, Pa.
812,592. CHURN. Wm. L. Pool, Aztec, N. Mex.
812,701. TACK PULLER. J. H. Stiner, Gowen, Pa.
812,772. WASHING MACHINE. S. K. Rice, Concord, Neb.

PATENTS EXPIRED FEBRUARY 26, 1906.

398,392. SPRING LOCK. H. K. Barker, Cincinnati, Ohio.
398,410. COAL HOD. G. Laube, Huron, Dak.
398,492. CARPET FASTENER. J. E. Caldwell, Goodland, Kan.
398,611. MEANS FOR FASTENING MOVABLE BARS OR BOLTS IN DOORS, ETC. Joseph L. Hall, Cincinnati, Ohio.
398,633. SEALING DEVICE FOR FRUIT JARS. John Legan, Xenia, Ohio.
398,660. PERMUTATION PADLOCK. George F. Seiser, Calvin R. Johnson and M. B. Perry, Port Royal, Ky.
398,743. SELF-HEATING SAD IRON. Wm. H. Mull, Lawrence, Mass.
398,763. DOOR CHECK. Owen T. Boker, Fort Worth, Tex.
398,781. ADJUSTABLE ANGLE TROWEL. Francis T. Hovey, Homer, N. Y.

PATENTS ISSUED FEBRUARY 27, 1906.

813,399. DOOR HANGER. R. B. Browne, New York, N. Y.
813,411. WEATHER STRIP. C. M. Eveleth, Plymouth, N. H.
813,492. FISHING ROD. J. B. Fisher, Chicago, Ill.
813,501. BRACKET. H. F. Keil, Bronxville, N. Y.
813,518. WEATHER STRIP. J. H. Pisor, Electric, Mont.
813,539. LAWN EDGER. G. Vincent, Minneapolis, Minn.

REVIEW OF THE MARKETS.

WIRE NAILS: From present indications the jobbers will be well stocked up on Nails for April, as specifications on the contracts already booked form the bulk of the active business. The mills are not receiving new business in any great volume, but the advance that was looked for never materialized. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers	$1.85
Carload lots to retail merchants	1.90

New York.—There is an ordinary demand for small lots from store from contiguous territory, but the local trade otherwise seems to be a waiting market. Quotations for small lots from store are on the basis of $2.15 per keg.

CUT NAILS: Similar conditions prevail in the Cut Nail market that was characteristic of the Wire Nail market, specifications on orders already placed furnishing the bulk of the business. Quotations are as follows: f.o.b. Pittsburgh, for carload lots, $1.80, base; for less than carload lots, $1.85. For carload lots on dock New York, $1.95; for less than carload lots, $2. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 to 10 cents advance on Steel Cut Nails.

New York.—Local business is extremely light, and the prices being obtained by jobbers are firm and satisfactory. Quotations are on the basis of $2.05 per keg.

BARB WIRE: Specifications on orders already received at the mills are satisfactory and liberal in their demands, the jobbers having anything but a heavy stock in warehouses. New business is about as usual at this time in the season. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.00	$2.30
Retailers, carload lots	2.05	2.35
Retailers, less than carload lots	2.15	2.45

SMOOTH FENCE WIRE: Manufacturers anticipate a very heavy trade this season. The fence manufacturers are heard from in the shape of large specifications on contracts already in hand. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.70
Retailers, carloads	1.75

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

BINDER TWINE: General market quotations f.o.b. Eastern factories may be given as follows:

White Sisal (500 feet to the pound)	9¼ @ 9½
Standard (500 feet to the pound)	9¼ @ 9½
Standard Manila (550 feet to the pound)	10½ @ 10¾
Manila (600 feet to the pound)	11½ @ 12
Pure Manila (650 feet to the pound)	12½ @ 13

Less than car lots ¼ cent advance.

ROPE: The following prices may be said to represent the market:

	Cents per Pound.
Pure Manila, 7-16 and larger	12½ @ 13
B Quality Manila	11½ @ 12
Pure Sisal, 7-16 and larger	9½ @ 10
No. 2 Sisal, 7-16 and larger	8 @ 8¼

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 2 cents per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

THE PHILADELPHIA TRADE.

The month of March fully maintains the high record established this year, as the demand for goods continues unabated. The manufacturers report an unexampled rush of business, and the same report is made by the large jobbers, who are unusually busy in filling Spring orders, and who find considerable trouble in getting the goods from the factories. Much complaint exists on this score, and the clamor for wire cloth and wire netting is loud and insistent. It seems unfortunate that the Hardware trade has fallen so largely into the habit of ordering wire cloth and netting to be shipped direct from the factory, and at the same time of the year. With the exception of the far South, almost every dealer wants his wire netting about March 1st, and while the capacity of the factories has been greatly enlarged, it is not to be expected that manufacturers will maintain a plant large enough to ship all their wire netting March 1st. To make a manufacturing plant profitable, it must be run continuously, and wire netting manufacturers should hardly be asked to make all their shipments in one month. The remedy for this state of affairs could be easily found, if retailers were only willing to pay the small freight charges incurred in having their netting shipped from the jobber's stock. The jobber tries to anticipate his customer's wants, but, of course, where he is asked to make direct shipments, he cannot compel shipments at the exact time specified.

Axes are also in great demand. The high prices of the last few years have been the cause of almost entire exhaustion of stocks in the hands of both jobber and retailer. Probably there has not been a time for years when the actual supply of axes in the country has been so small as it is to-day, and now that prices have been so greatly reduced, all dealers—large and small—are replenishing stock; while the farmer, who has been sharpening his old axe almost down to the eye, is now willing to purchase a new one, at the present low price. It may be that this heavy demand will be sufficient to absorb the output of the two or three new factories which have lately come on the market. This now appears highly probable, and if so, a possible advance in price may come before the season is much older.

Trade indications generally are more promising. Some fear was expressed a short time ago, that the mild Winter might be followed by heavy frosts, which would imperil the coming crops, but the colder weather of the last few days has retarded vegetation to such a point, that it now seems as if the great danger of frosts is likely to be escaped. If crops this year should be as large as the previous two or three years, and if there should be the average foreign demand for them—which now, in view of the famine in Japan seems more than probable—there is apparently no reason why a fair volume of business should not be expected for the next six months.

There is a cloud on the horizon, in the threatened coal strike, which now appears to be ominous. For the last few weeks business in the anthracite region has been greatly prostrated, as no one can forecast the situation and business comes to a standstill. A settlement of the question either way is likely to improve the immediate situation. For if a strike is declared suspension will be over, and while the mining of coal would stop, the miners would go to work in their gardens and in other lines of activity, so that a certain volume of business could be reasonably counted upon.

Collections are hardly as good as they should be. Of course, this is the dullest time of the year in the country, where mud reigns supreme. April 1st is the recognized settling time in Pennsylvania, and an improvement in collections may be reasonably expected about that date.

BIDDLE HARDWARE CO.,
James H. Ritter.

THE CLEVELAND TRADE.

Business for March will be large, but inability to furnish goods is seriously affecting the output. Ten to twelve weeks' delay is not unusual on goods wanted at once; this usually loses the sale. The old panic microbe is not dead but panic-creating competition is modified by co-operation. More iron and steel will be used in 1906 than was ever used in any year before, unless serious strikes interfere. Shortage in goods seems to be increasing while demand is not abating. The agitation of public questions alarms some people, but it is well to remember that no high civilization was ever attained without it, and business has nothing to fear from that source. Light let into dark places disturbs only

the bad, while it inspires the multitude to higher endeavor. The big stick and big man may help keep peace but purity can only make it permanent and agitation tends to purify. We are getting no party legislation in Ohio this season, as each House is controlled by a different party, which is an ideal way of preventing bad legislation. The legislation promised by both parties to change the compensation of county officers from fees to salary, has not been passed. The activity of court house cliques has hitherto prevented such legislation. Auditors, clerks, sheriffs, etc., who get from $30,000 to $50,000 per year in fees are making every effort to continue the wrong, and their supposed influence at the primaries has great power with the timid members, but legislation to modify the influence of bosses and leave the nominations in the hands of the people may strengthen the timid and secure the needed legislation to abolish a shameless swindle and wipe out one of the prolific causes of corruption in Ohio politics.

The Lockwood-Taylor Hardware Co.
C. B. Lockwood, *Pres.*

THE PITTSBURGH TRADE.

At the date of this writing, March 16th, the coal labor question is the important matter for this section. If all the miners were in one organization their demand for an increase of wages could be granted and added to the price of coal, the consumer paying it, but as things are there are enough unorganized mines to supply a considerable percentage of the demand. These mines will run at present rates no matter what the others do, and their competition fixes the selling price for the operators who pay the higher rates. It is earnestly hoped that the convention reassembled at Indianapolis and now in session, may arrive at some settlement that will avoid a stop of work at this time, when it would so seriously inconvenience our large manufacturing interests. Belated winter visited us in March, a snowfall of fifteen inches having occurred within the past five days. As this is a general condition, we shall have high water in our rivers within a week. Trade continues quite active, with sales running considerably ahead of corresponding weeks of last year.

Logan-Gregg Hardware Co.

THE ST. PAUL TRADE.

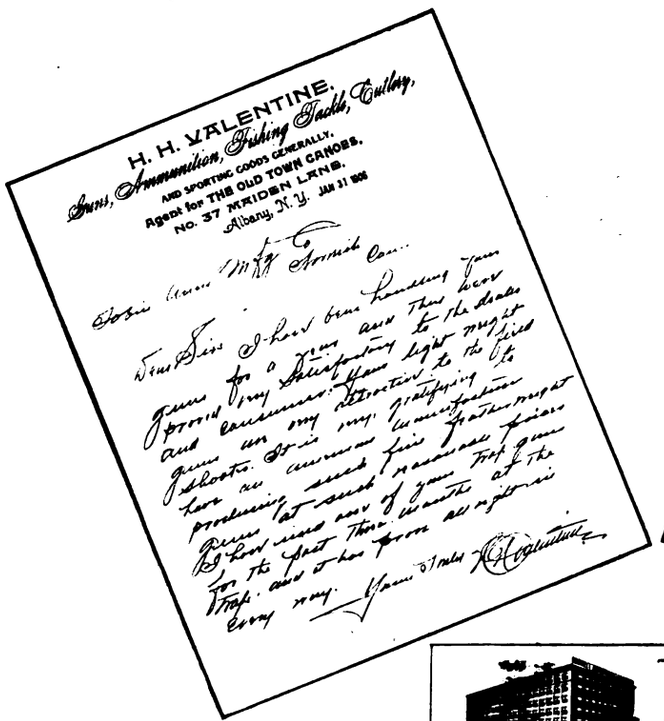
Surely all business is prospering as never before. The trouble is now and will be greater to get goods to supply the demand. So early in the Spring many manufacturers cannot deliver at once, but put off delivery one, two or three months. Of course, under these conditions, we can expect higher prices. It seems to us that we are almost too prosperous, but the proper thing for all is to take advantage of conditions and do all the business possible without too great a risk. Everybody knows that prices are firm. No one owning anything need sell without a profit and the accruing profits should make a bank account to rely upon when trouble comes. We see no clouds in the financial sky and believe that great crashes are not as possible as years ago; yet this era of prosperity cannot go on forever, though a good healthy condition may exist for many years to come. In the meantime, all merchants should buy early and get the goods in to be prepared for the Spring trade which is to come.

Hackett, Walther, Gates Hardware Co.

THE SAN FRANCISCO TRADE.

The growing wheat crop continues to look well. Those parts of the belt which last month were suffering from drought have been visited by copious falls of rain, and no further apprehensions of damage to the plant are now heard. In bank clearings the Pacific Coast cities continue to send in the largest gains, taking the Pacific Slope as a whole. Our local conditions continue excellent, with the weather very favorable for the crops, which are looking well. Our sea commerce is very good, while our domestic trade is active and at profitable prices. We have abundance of funds, rates of interest are moderate, collections are on a normal basis and no complaints of any consequence are heard from any quarter.

Accuracy in reporting is my strongest point. My experience has educated me to the point that I wouldn't incorporate in this correspondence a death notice appearing in some of our local dailies without first verifying the announcement. And now what shall I say of the *California Retail Hardware Dealers' Association News*, edited by the state officers? This publication, sent monthly to Hardware dealers throughout the State, had in its issue that appeared late in January this notice: "The annual convention of the California State Retail Hardware Association will be held in San Francisco, Wednesday, Thursday and Friday, March 7, 8, and 9." Finding occasion to refer to this association, in the March 10 issue of Hardware, I quoted these dates from the associations *News*. And now I want to apologize. The convention did not meet until yesterday, the 14th of this month, and at this writing is still in session.



In the opening address, delivered by President H. C. Bennett, a plan of importance to retail Hardwaremen of California was suggested. This was to establish in this city for the interests of the retailers, an office, with a permanent secretary, stenographer and all the conveniences for keeping well informed and for the dissemination of information among members of the association for their common good. The audience of Hardwaremen from all parts of the State applauded when President Bennett said:

"The matter of funds to carry on the work during the coming year is a hard problem. We think that the plan adopted this year, when a few shouldered the expense of paying for an organ-

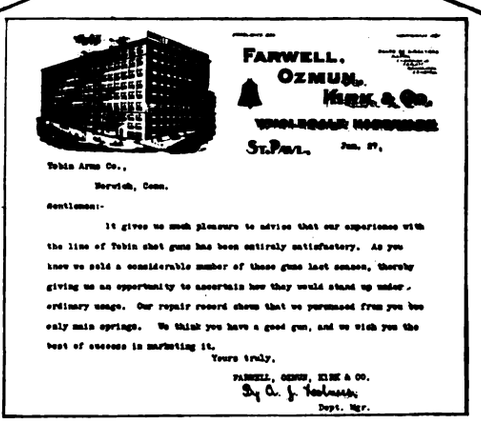
Guns, Ammunition, Fishing Tackle, Cutlery,
AND SPORTING GOODS GENERALLY.
Agent for THE OLD TOWN CANOES.
NO. 37 MAIDEN LANE.
Albany, N. Y. JAN 31 1906

Tobin Arms Mfg Co Norwich Conn

Dear Sirs I have been handling your guns for a year and they have proved very satisfactory to the dealer and customer. Your light weight guns are very attractive to the field shooter. Your single gun is very satisfying to those who admire fine workmanship and quality. I consider your guns fine producing guns at a reasonable price. I have used one of your Trap guns for the past three months at the Trap and it has given all right every way. Yours Truly H. H. Valentine

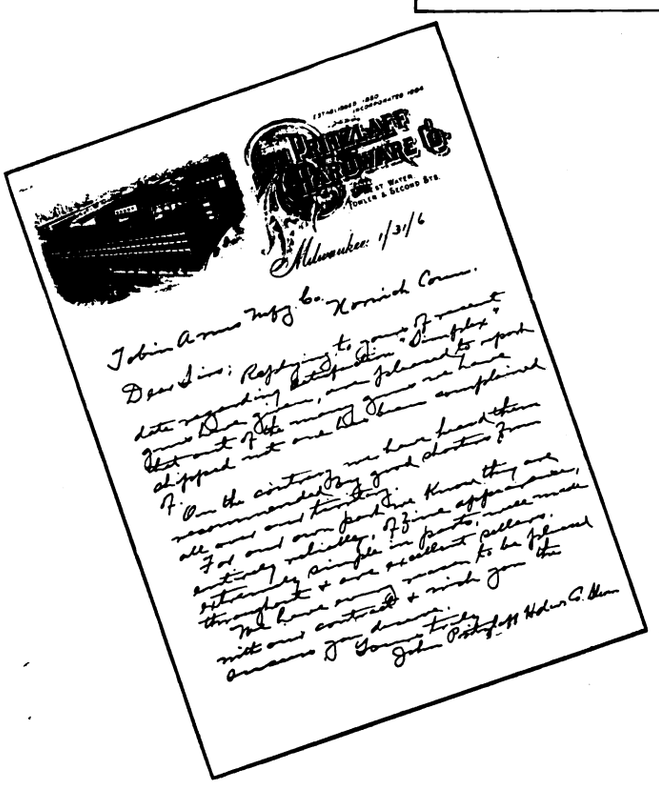


Standard Accident and Liability Department
Guarantee Fidelity Bonds
Steam Boiler Insurance Company
Hartford, Conn.
Hartford, Conn. Mch. 8, 1906.

Tobin Arms Mfg. Co.,
Norwich, Conn.

Gentlemen: The special gun which you made for me is received, and am much pleased with the workmanship and finish. It far excells any gun I have seen at one-third more than the price I paid. The action and balance of the gun is perfect. I have tested it on several occasions with some of the best guns on the market, and find I can outshoot most of them and the penetration is far greater than any gun I ever used. If you continue to make your guns in the way you have made this one, you will certainly achieve the highest art in making a good shot gun.

Very truly yours,
M. O'Borne



FARWELL, OZMUN, KIRK & CO.
WHOLESALE HARDWARE
ST. PAUL, Jan. 27,

Tobin Arms Co.,
Norwich, Conn.

Gentlemen:-

It gives us much pleasure to advise that our experience with the line of Tobin shot guns has been entirely satisfactory. As you know we sold a considerable number of these guns last season, thereby giving us an opportunity to ascertain how they would stand up under ordinary usage. Our repair record shows that we purchased from you but only main springs. We think you have a good gun, and we wish you the best of success in marketing it.

Yours truly,
FARWELL, OZMUN, KIRK & CO.
By A. J. Tenbrook

HARDWARE, SHEET METALS, CUTLERY
TINWARE, GUNS, SPORTING GOODS
POWER, OILS AND VEHICLES
ARCHIBOLD, KANSAS 1/24/06

Tobin Arms Mfg. Co.,
Norwich, Conn.

Gentlemen:-

Your favor of the 15th received and noted. We intend to push your gun again this year and with the year, experience and the added reputation acquired we are sure we will sell a great many more than last year.

During the last few days we have had a large number of customers in the house from all parts of our territory and without exception everyone of them who had bought Tobin guns had nothing but praise for it. one man in particular, said of his own accord that the Tobin gun was the best gun that he had sold last year, and that there was one owned by a number of their gun club, who shot it in competition with all the well known American guns, and that he made such a good score that there was some talk of having him out, or making him shoot some other gun, so he got the birds too far away from the trap.

If this is a source of considerable satisfaction to us to be able to tell everyone that we had not had to order a single repair or part for your guns and never heard of a gun after it had been sold.

Yours truly
Bush, Mize & Silliman Hdw. Co.

Mr. Dealer, Does This Mean Anything to You?

Simplex Guns are both profitable to you and satisfactory to your customer. Every one you sell will sell another.

Compare Quality, Simplicity, Profit and Satisfaction with any other line. Send for catalogue.

J. H. SMITH ON HIS TRAVELS.

HAVANA, CUBA, March 1, 1906.

Editor HARDWARE:—

I am having a new experience and a most enjoyable one. Havana is a city so different from any I have ever seen before; it is hard to give a clear idea of what it is like. The dwellings in the old part of the city in the business part look more like prisons than residences. The main entrance is closed with doors from 2½ to 3 inches thick and 12 to 16 feet high; with smaller secondary doors cut in the main doors. The windows (no glass) are protected with heavy iron bars of fancy design, but the majority are plain round iron bars. The streets all over the old part of the city are from 12 to 18 feet wide, including the sidewalks. On many of the streets the sidewalks are only wide enough for one person to walk on. You are expected to keep on the right side of the street which gives you the right of way and anyone coming the wrong way must step out in the street and let you pass. A good fat fellow would have to walk sidewise with his bay window to the street, a dangerous thing to do as it would be liable to come in contact with the passing vehicles. On a number of streets traffic must all go down one street and up another. Street cars are so close to the houses you could reach from the car window and tickle a Senorita under the chin if she was ticklish. The sleeping and cooking apartments are in the rear of the store rooms. The better houses have a wide hall or court and the rooms open into the court. Many of them are open and have pretty flower beds and plants. Very few buildings are over two stories high, while most of the residences are but one story. The ceilings are from 16 to 20 feet high; and in the finest residences as well as the cheaper ones the ceilings are not plastered; the joists and wood floor above are not covered or decorated in any way.

The walls are mostly of stone and heavy, and plastered outside and in. The floors are all tile or cement; no base boards are used; the roofs are half round earthen tile, so the houses are delightfully cool and airy. You must sleep under mosquito netting if you don't want to waken a sieve. Fleas are plenty and busy, but they don't mind little things of that kind here. This is the land of the roosters' delight, and they crow the live long night. Dogs are as numerous here as on Third Street, Columbus. I visited four Hardware stores, and three of them would be classed as curiosity shops in the States. I was introduced to one dealer who showed me through the store and I think I never saw a second hand or what we term a "junk store" that looked worse. The building was formerly a convent and 200 years old. The building looked younger than the goods—stocks and dies. Carpenter tools, wire rat traps, etc., were red with rust and could not be sold at any price north. Most of the goods are German and English. I notice some Disston, Stanley and Eagle Lock Company's goods in most of the stores. Goods are jumbled in the shelves and under counters promiscuously. My escort was a son of his father; at any rate, he said he was, and he explained that his father had done business so many years in the old Spanish way that he could not see the necessity of changing his methods. The son deplored the condition of things but said he could not prevail on his father to adopt modern methods. He was five years in Philadelphia, but that city would not put the right hustle in a young man.

Now, if he had been in Columbus five years he would have changed methods in spite of his father. The next place I visited I found the proprietor and clerks eating what they call here breakfast. It was 11 o'clock (10:30 our time). Two others besides myself stood waiting for them to see what we wanted (and the other two were laboring men), but not a move did they make until they finished their meal. Mind you, the table was not more than 25 feet from the front, and not over 10 feet from the counter; and in plain view of customers. I thought if I had a store across the street I would be taking the business while they were taking the cake. The two I have described were wholesale stores. I next visited a retail store. They had finished breakfast and one of the clerks was removing the table cloth. This store is in the heart of the city on a prominent corner, and the table was not more than 12 feet from the front and in plain view of people passing by. This is the custom here. If we had a little of the Cuban indolence in the north we no doubt would live longer, but instead we hustle so much we hardly take time for lunch. In one store (retail) goods were suspended from the ceiling like hams in smoke houses. American Steel & Wire Company's galvanized barb wire sells at $2.65 per reel of 95 pounds. It pays no duty. There is not much demand for it as fences are very scarce here. I visited a large sugar plantation and mill and was well repaid for the trip. We had a drive of three miles over the worst road that could happen after leaving the electric car line. They make a charge of $1.00 each, American money, for the privilege of going through the mill; they furnish no guide, and we did not find anyone around the mill that could talk English. We could easily follow the process from the crushing of the cane to the granulating of the raw sugar which is shipped in jute sacks to refineries. I counted 35 visitors while I was there; and decided I would rather have the income from visitors than the profit on the sugar. The soil is very rich to grow two crops each year as the growth is very rank. The country is not so different from some of the States; hills and valleys, but the tropical growth makes it very beautiful. The air is so good that I am inclined to take a few bottles home with me.

Teaming is all done by mules and oxen, and practically all the trucks are two wheeled. Cows are scarce but asses and goats, especially goats, are numerous. Most of the milk used is from goats and asses. The children often nurse from goats (have strong stomachs.) They say the asses' milk is the best for children as it is stronger; I believe them, especially as to strength. For some reason I haven't drank any milk since I landed. I want to know what kind of an animule it comes from. They have no sewage system in the city, but sink or rather drill and blast wells called cesspools to the sea level, and the sewage is run into these cesspools. The rock formation is very porous and the ebb and flow of the sea extends hundreds of feet from shore in the rocks and carries off the sewage. Each household furnishes its own cesspool and in the higher parts of the city it is expensive to dig the cesspools. There were no street cars prior to the occupation of the Island by the United States, but the city is now well supplied with modern electric street car service.

Sunday, the 25th, was the beginning of a six weeks' celebration in honor of the freedom of Cuba. I never saw a gayer procession than I saw on the Prado last Sunday. The turnouts, both carriages and horses, were fine; the procession kept going around Central Park and the Malecon, which are about a half mile apart—the Malecon at the north end and the park at the south end of the Prado. At least one hundred thousand people lined the streets and filled the center of the Prado which is a park the entire length with drives on each side. This will be repeated for five more Sundays, while enthusiasts may be seen in different parts of the city almost any day dressed in fancy costumes, marching around and having a jolly time. I saw the national game of Jai Alai (pronounced Hialia). Pool selling at a race course is not in it with Jai Alai. I saw common people in their shirt sleeves in a space of about ten feet bet at least a half peck of silver and gold. This of course was only a sample of what was going on all over the grand stand. I was told that as much as one hundred thousand dollars changes hands on one game sometimes. I have seen Morro Castle, Cabanas and other forts. It is most interesting to go through these old forts and have the different dungeons, moats, towers, etc., explained to you. Although Morro and Cabanas are more than 400 years old they show no signs of decay and would stand for centuries longer. I have been busy sight-seeing every day since I arrived a week ago. I have also become an expert in Spanish lace, linen, and drawnwork has been drawing money out of my pocket in good shape. For fear of tiring your many readers I will quit. I think after spending a month in Florida I will be ready to go home and take a rest. Yours truly,

J. H. SMITH.

THE SAN FRANCISCO TRADE.

(Continued from page 38.)

izer, ought not to be continued. Our plan would be to hire an efficient secretary, combining secretary and organizer, open an office in San Francisco, where all visiting Hardware dealers would be welcome to make a headquarters, to keep a stenographer who could attend to the correspondence of members, and so on."

The president reported that the membership during the last year had been increased and that the work of the organizer who was appointed last year had been efficient.

It is altogether certain that Louis H. Kohn, the Western Addition Hardware merchant on Polk street is on the crest of the wave of prosperity that Hardwaremen generally in San Francisco are enjoying. Within the last fortnight he has bought the business and lease of an adjoining store and added it to his already double-store plant. And this is not all. This last week he purchased the Cooper & Co. Hardware store, six blocks away, and is now moving this large stock to his enlarged place of business.

The other evening before the Churchmen's League, William R. Wheeler, manager of the Hardware house of Holbrook, Merrill & Stetson, was a speaker of the evening and supported the contention of President Roosevelt that the Interstate Commerce Commission should be given the power of amendatory legislation and the right to determine upon a just and reasonable rate, where a given rate has been challenged, and upon investigation found to be unreasonable.

A few nights ago the Parkinson Hardware Company store at Palo Alto was robbed of $150.

INDUSTRIAL PRESS ASSOCIATION.

POPULAR TALKS ON LAW

Copyrighted 1906, by William C. Sprague, President The Sprague Correspondence School of Law.

LANDLORD AND TENANT.

NO. II. THE RIGHT TO COLLECT RENT UNDER PARTICULAR CIRCUMSTANCES. NECESSITY OF DEMANDING RENT UNDER PARTICULAR CIRCUMSTANCES. PART ONE.

Whenever the ownership to land changes, the right to collect rent follows as a matter of course, but the new landlord must give a reasonable notice to the tenant of his right to the rent, otherwise, the tenant having paid the rent to the former landlord will not be compelled to pay it again.

Where the rent is payable monthly and a transfer of ownership is made during the month, the new owner (unless by special agreement), is entitled to rent from the first of the following month.

The question arises as to who has the right to the rent where the landlord dies during the rent paying period. There is no question but what if he dies after the rent is due but before it is paid, the executor or administrator is entitled to it as being personal property, but where the rent falls due after the death of the landlord, it is held that it goes to the heir as being part of the real estate. In some States, however, administrators are permitted to have possession of the real estate after the death of the owner. In these States the rent would go to the administrator.

It follows from the fact that the tenant is bound to pay the rent, even though the building be destroyed, that he is entitled to the exclusive use of it as well as the ground covered by the lease. If the landlord attempts to take possession, even for the purpose of repairing or rebuilding, without the tenant's consent, the tenant may consider himself evicted and not bound to pay the rent.

This brings us to the subject of eviction. Eviction in the law is the taking possession by the landlord, or by someone by his authority, or by someone who has a title superior to that of the landlord, of all or a part of the leased premises. It must be something more than a mere trespass. The act must be of a permanent character, or the conduct of the landlord must be persistent so as to deprive the tenant of the use of a part or all of the premises.

Acts of the landlord which will relieve the tenant from paying rent are such as show an intention on the part of the landlord that the tenant shall no longer hold possession. There must be something more than trespass, as said. In order that the acts constitute an eviction the lessee must abandon the premises. An eviction from part of the premises will relieve the tenant from the payment of the entire rent accruing after the eviction. If the eviction is by someone other than the landlord, and not acting under the landlord's authority, that is if it is by a stranger, the rent will be apportioned, the tenant being only liable for such part as still remains in his possession. Where the tenant is evicted by one who claims a title as against the title of the landlord, the tenant is not bound to pay rent until possession is restored to him.

Where the premises are taken by the city for public use, the tenant continues liable for the rent. He has a right to action against the city for damages, though it is held in Pennsylvania and Missouri that the liability for rent ceases.

The landlord has a right to sue for rent without demanding payment of it. Rent that is overdue is like any other debt. The debtor if he wants to avoid a suit must tender what he owes to his creditor, but where the landlord wants to recover possession of premises for non-payment of rent, he must make a demand of payment before he can proceed in an action compelling forfeiture of the lease, unless, of course, the demand is waived in the lease. The safest way is to make demand in writing. In most of the States this is required. It is not safe for the landlord to proceed without legal advice in the matter of demanding possession of the premises for non-payment of rent, inasmuch as the statutes in the various States have laid down requirements more or less specific that must be followed exactly. As a rule the landlord must make his demand on the very day the rent is due, in the most convenient and public place, on the premises, and at a convenient time. He must not demand more than is due. The tenant may save himself by tendering the rent at any time before midnight, for rent is not due until the last moment of the last day of the rent period.

(To be continued.)

CHICAGO FLEXIBLE SHAFT CO.'S NEW CATALOGUE.

The Chicago Flexible Shaft Co., La Salle Avenue and Ontario Street, Chicago, Ill., with branches in New York and London, have sent us copies of their catalogues devoted to the Horse Clipping, Sheep Shearing and Grooming Machines of their manufacture. These are very timely catalogues, as their large colored poster, which they are also distributing to the trade at this season, gives the advice: "Clip your Horses in the Spring." One of the above mentioned publications, devoted to Stewart's Reversible Grooming Machine, is dedicated to "A Horse—A Valuable Asset." The frontispiece contains a view of their immense factory, and scattered throughout its pages will be found pictures of historical characters mounted on their steeds, as well as a full description of these Grooming Machines, accompanied by testimonials from various sources. Different racing records are included, such as the American Derby, Suburban Handicap, etc. Their catalogue devoted to the Stewart Clipping Machines is another interesting one, containing interior views of stables with the Clippers in operation, illustrations of the Lightning Belt Clipper, Chicago Clipper Knife, the Improved Balance Arm Clipping Machine, Vertical Hanger Machine, Electric Clippers in operation, as well as some handsome colored pictures of the stable yard, where a Clipper is in use. A price list of parts is also given. Their catalogue of Sheep Shearing Machines is replete with descriptions and illustrations, and contains many valuable testimonials and reproductions of the many medals that have been awarded them. These catalogues should be sent for.

COMMEMORATING HIS 76TH BIRTHDAY.

John J. Snyder, Sr., one of the best known residents of Flatbush, Long Island, and senior member of the firm of John J. Snyder & Son, Hardware dealers, was presented by his employes with a handsome silver loving cup on March 17th, the occasion being the seventy-sixth anniversary of his birthday. The presentation was made by Leon J. Lipman on behalf of the other employes of the store, at the corner of Snyder and Bedford Avenues. The cup bears the following inscription: "Presented to sixth birthday."

IMPERIAL COMPOUND GARAGE PUMP.

Among the numerous specialties of a valuable character which are manufactured and marketed by the Imperial Brass Mfg. Co., 245-247 Jefferson Street, Chicago, Ill., the Imperial Compound Garage Pump here illustrated, is a popular addition. It is so constructed that the air is first compressed in the large cylinder,

IMPERIAL COMPOUND GARAGE PUMP.

the result being a large volume of air. This compressed air is then compressed in the small cylinder, resulting in immense pressure. As the pressure increases, the leverage increases. This pump is claimed to be far ahead of all other lever pumps, because while its capacity is large and its pressure high, it is still remarkably easy to operate. It is especially recommended for use where pressures of from 50 pounds up to 200 pounds is desired.

THE 1906 THOMAS AUTO-BI.

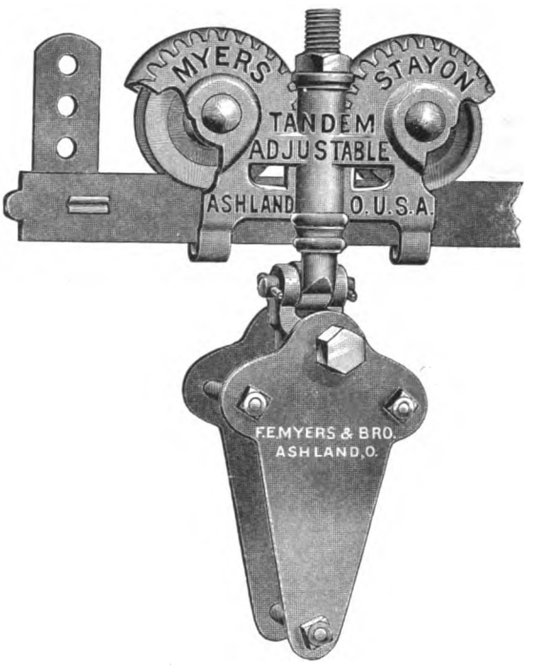
The Thomas is the Pioneer American motorcycle, and in the 1906 Model No. 44 machine made by the Thomas Auto-Bi Co., 1443 Niagara Street, Buffalo, N. Y., the manufacturers have used their years of experience in producing a machine different from anything heretofore on the market, a machine for the average buyer, who is not a mechanical expert, acquainted with the principles and construction of gasoline motors. This machine is so constructed that it can readily be taken apart, and all parts inspected and assembled even on the road, without removing engine from frame. Many improvements and new features are comprised in the model.

CONTROL.—The control of entire machine is accomplished by means of an adjustable grip on handle bar, working on a friction cone so that the grip will stay at whatever point it is placed, without attention of rider. There is absolutely no vibration in speed, due to turning sharp corners when machine is in motion.

TANKS.—The gasoline tank is a strong, cylindrical torpedo-shaped tank holding six quarts, in which the needle point is directly located, doing away with intermediate valves. The battery attached to gasoline tank is of triangular shape, holding three cells, and fitted with flexible connections. These cells which are of standard make are packed in pasteboard cylinders which prevent short circuiting.

MIXER.—The Thomas Buffalo Mixer is used, and is fastened directly to motor head.

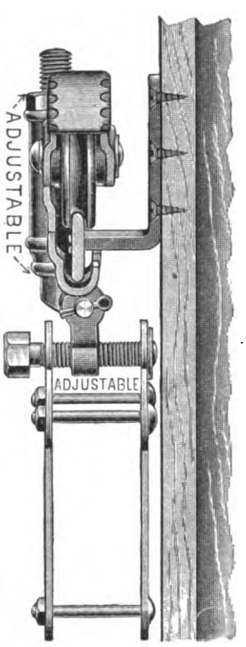
MOTOR.—One piece, cylinder and head. The bearings which are of phosphor bronze are extra large throughout. Adjustable connecting rod, also of phosphor bronze, and with the use of a hardened one-piece crank, makes them very durable. The crank case bolts directly, of which it is an integral part, and the lower case can be removed at any time for inspection. Timing gears can be inspected by removal of one nut. All valves are large and so located that they can be easily removed.



This machine is a three horse-power with 2⅞ inch bore and 3¼ inch stroke. The wheels have extra heavy spokes, wood rims and is fitted with 1¾ and 2 inch Goodrich, G. & J. or Dunlop tires. A Corbin Duplex motorcycle brake is used on rear hub.

SURETY COMPANY BONDS—INVALID LAW.

The Supreme Court of Ohio held, in the case of State ex rel. McKell vs. Robins, that a statute requiring all bonds given for the faithful performance of official or fiduciary duties, or the faithful keeping, applying or accounting for funds or property to be executed by a surety company, was unconstitutional.



THE MYERS ADJUSTABLE TANDEM STAYON FLEXIBLE DOOR HANGER.

F. E. Myers & Bro., Ashland, Ohio, are placing on the market a new improved Door Hanger, which we illustrate herewith, which combines all the patented features of their original Stayon

THE MEYERS ADJUSTABLE TANDEM STAYON FLEXI LE DOOR HANGER.

Flexible Hanger as well as the special features to which we call attention. It is made with steel roller bearings, and can be adjusted perpendicularly so as to locate the door at any point above the ground desired, or laterally, so as to adjust the door to or from the building, and will also adjust itself to any thickness of door. The perpendicular and lateral adjustments

SIDE VIEW OF HANGER.

are made with an ordinary wrench, and at the will of the user. In Fig. 1 is presented a face view of the Hanger, showing the manner in which the wheels are most completely covered, the bracing of the frame and the Stayon feature. Fig. 2 represents an edge view of the Hanger, showing the cross bolt by means of which the door can be adjusted to or from the building; also its adjustability for different thicknesses of doors.

♣

Father (of large family)—My dear, isn't it about time you were thinking of getting married?

Daughter—Heavens! I haven't thought of anything else for years.

HARDWARE DEALERS RECORD

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Bradshaw, Nebr.—The C. L. Smith Co. has been incorporated with a capital of $25,000, to do a Hardware business.

Denver, Colo.—Albert Herrod Hardware Company has been incorporated by Albert Herrod, P. L. O'Neill and P. H. Balfe. Capital, $10,000.

Des Moines, Iowa.—The J. W. Watson Company has been incorporated with a capital of $10,000, to do a Hardware business.

Enola, Neb.—The Hume-Robertson-Wycoff Co. will engage in the Hardware business.

Florala, Ala.—The Lake Hardware and Furniture Company has been incorporated. Capital, $15,000. Incorporators, J. W. Barns, J. A. Hembey, C. M. Powers, J. D. Bailey.

Fond du Lac, Wis.—Rusch & Hurth Hardware Co. has been incorporated. Capital stock, $10,000. Incorporators, R. C. Lovell, Frank Callahan and W. J. Steiner.

Gillespie, Ill.—F. E. Schmidt Hardware Company has been incorporated; capital, $3,400. Incorporators, G. W. Schmidt, Jr., F. E. Schmidt and A. A. Schmidt.

Hackensack, N. J.—Romaine Hardware Co., 241 Main Street, have opened a new Hardware store, putting in a stock of Hardware and tools and supplies for mills, builders, mechanics, etc. They desire catalogues.

Jersey City, N. J.—The Sterling Supply & Equipment Company has been incorporated to deal in heavy Hardware. Capital, $10,000: Incorporators—H. O. Coughlan, Thomas F. Barrett and John R. Turner.

Kearney, Neb.—F. G. Keens is opening a new stock of Hardware, etc.

Kearney, Neb.—J. C. Wright will open a Hardware store.

Lake Elizabeth, Minn.—N. J. Johnson will engage in the Hardware business.

Los Angeles, Cal.—Brown & Matthews, Spring & Franklin Streets.

Morrisonville, Ill.—Morrisonville Hardware and Stove Company has been incorporated; capital, $10,000. Incorporators: Harry E. Wadsworth, John R. Easle, Charles A. Wyckoff.

Newark, N. J.—The Banister & Pollard Company has been incorporated to deal in Hardware. Capital stock, $125,000. Incorporators, William J. Banister, J. Frederick Pollard and Robert W. Brown. Registered office, 206 Market Street.

Seattle, Wash.—C. W. Boynton Hardware Company has been incorporated with a capital stock of $30,000. C. W. Boynton, H. N. Hyland and S. L. Boynton are the incorporators.

Williamstown, Mass.—Mark and Charles Spooner and John Poland have formed a partnership and will open a Hardware store on Spring Street.

Union, N. J.—A. Schneider Hardware Company has been incorporated to deal in Hardware, household goods and furniture; capital, $11,000. Incorporators, Albertina and Emil Schneider and Albert Lenly.

Changes and Improvements.

Albuquerque, N. M.—E. J. Post & Company have sold their wholesale and retail business to the McIntosh Hardware Co.

Belpre, Kan.—King & Sprigg have been succeeded in the Hardware and implement business by Etling & Sprague.

Blanco, Tex.—Johnson & Massey have sold their Hardware business to Thomas L. Durham and John W. Lindman.

Bluff City, Kan.—F. Baird & Co. have been succeeded in the Hardware and implement business by F. Baird.

Cedar Rapids, Iowa.—The Cedar Rapids Hardware Co. has sold its business to the Cadd-Boynton Hardware Co.

Cedarville, Kan.—G. W. Bandt has sold his Hardware business to V. J. Bottomly.

Delhart, Texas.—J. J. Myers & Co. have purchased the retail business of the Delhart Hardware Co.

Douglas, Neb.—A. N. Mathers & Company have purchased the Hardware and harness business of F. E. Kruse.

Dwight, Neb.—J. Ably has sold his Hardware and implement business to L. C. Robler & Co.

Erie, Kan.—B. F. Volts has purchased the Hardware store of E. L. Holley.

Exeter, Neb.—William F. Dickinson has purchased the business of the Leader Hardware & Furniture Co.

Fort Smith, Ark.—W. A. Willis has purchased the Hardware business of P. A. McLaughlin.

Gage, Okla.—G. Haden has purchased the Hardware business of E. Learnard.

Gilmer, Tex.—Chandler Bros. have succeeded to the Hardware and furniture business of Chandler, Mathis & Co.

Heldey, Neb.—A. D. Moody has sold his Hardware business to Cecil Bosley.

Henderson, Neb.—The Henderson Hardware Co. has succeeded to the business of A. C. Neufield.

Holdrege, Neb.—A. C. Roach has purchased the Hardware and furniture store of Jackson & Son.

Hooker, Okla.—McGregor & Cox have succeeded to the Hardware business of Williams & McGregor.

Kansas City, Mo.—The Kinney Hardware & Manufacturing Co. has been incorporated, and succeeds to the Hardware business of John J. Kinney.

Kildare, Okla.—P. A. Hoefer is removing his Hardware stock to Newkirk.

Kirkville, Iowa.—J. W. Glass has succeeded to the Hardware business of Glass & Co.

Lexington, Okla.—J. E. Brown has purchased the Hardware business of J. S. Little.

Manassa, Colo.—J. M. Jensen and H. Ruffaker have purchased the Hardware store of Mrs. William Christian.

McPherson, Kan.—Poe & Company have sold their Hardware store to Gunn & Co.

Milan, Mo.—George Roth has sold his Hardware and furniture business to Knight & McNealy.

Mt. Union, Iowa.—H. R. Williams has been succeeded in the Hardware business by H. R. Williams & Co.

Mt. Vernon, Iowa.—M. A. McCarthy has purchased the Hardware business of B. F. Robinson & Co.

Mulhall, Okla.—J. C. Elliot & Co. have sold their business to the Beaver Valley Hardware & Implement Co.

Naponee, Neb.—Collins & Co. have purchased the Hardware business of R. T. Croley.

Okmulgee, I. T.—The dissolution is reported of the Hardware and furniture firm of York, McCracken & Co.

Overton, Neb.—Maddox & Franscouer have been succeeded in the Hardware business by A. O. Franscouer.

Page, Neb.—E. E. Hunter has sold his business to the Townsend Hardware Co.

Sabetha, Kan.—Selden Miner, Jr., has purchased the Hardware business of A. N. McCleary.

Severance, Kan.—W. C. Gunn has purchased the Hardware store of Gregg & Gregg.

Silver Creek, Neb.—F. Buchanan has purchased the Hardware business of Gray & Magner.

Silver Creek, Neb.—Gray & Magner have sold their Hardware business to F. Buchanan.

Simpson, Kan.—Johnson & Krenkel have been succeeded in the Hardware and implement business by Johnson, Krenkel & Chapman.

Skidmore, Mo.—Jordan, Thomas & Company have purchased the Hardware and furniture business of G. A. Wolfe.

Springview, Neb.—C. S. Pettit has succeeded to the Hardware business of Allen & Pettit.

Unionville Center, Ohio.—N. T. Henders has purchased the Hardware stock of A. E. Wetzel of this place. Mr. Henders was formerly in the employ of T. W. Bodell, of Harrod, Ohio.

Wann, I. T.—Charles Osborn has succeeded to the Hardware business of Osborn & Warner.

Wilson, Kan.—A. T. Frinzel has purchased the Hardware store of O. B. Coffe.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Anderson, Ind.—The Anderson Scale Computing Company have filed articles of incorporation. The capital stock is $50,000 and the directors are John H. Osborne, George A. Lambert and B. O. Barnes. Mr. Osborne is president and general manager of the company, which will make self-computing weighing scales and cheese cutters.

Chicago, Ill.—Acute Tool & Novelty Company has been incorporated with a capital of $2,500, manufacturing. Incorporators, Ferd W. Brettcher, B. Schmidt, M. A. Doherty.

Grand Rapids, Mich.—Articles of association have been filed by the Caloric Fireless Cookstove Company. The purpose of the corporation is to manufacture, buy and sell this new invention in this city. The capital stock is given as $25,000. The incorporators are Albert S. Hicks, Albert T. Thoits, John G. Gronberg, William B. Collins, Arthur W. Dean and Edgar M. Metheany.

Jersey City, N. J.—Eastern Supply Co. has been incorporated for the purpose of manufacturing building materials, plumbers', painters' supplies, Hardware, etc. Capital, $125,000. Incorporators, H. J. Moore, N. H. Raymond, W. L. Webb, Jersey City.

Marion, Ind.—Marion Range and Stove Works has been incorporated with a capital stock of $100,000; directors, Robert J. Spencer, J. Wood Wilson, S. Dallas McClain, John Prior, Mark L. Swayze, Harry L. Gable, Charles C. Jamieson, Will J. Swanger and William H. Charles.

New York, N. Y.—D. S. Thompson Manufacturing Co. has been incorporated to deal in machinery; capital, $100,000. President, G. M. Jackson, New City, and treasurer, D. S. Thompson, Livermore Falls.

New York, N. Y.—Kampfe Bros. has been incorporated to manufacture safety razors, razor strops, etc.; capital, $84,000. Incorporators, Frederick Kampfe, Richard Kampfe and Otto Kampfe, all of Brooklyn.

Orange, N. J.—The Elastic Nut & Bolt Company has been incorporated with a capital of $125,000; Wisconsin headquarters to be in Milwaukee; William D. Sargent, president, and Percival Manchester, secretary and treasurer.

Ossining, N. Y.—Oldenbusch Metal Spinning Machine Company has been incorporated to manufacture machines, etc. Capital, $100,000. Incorporators: Ernest Oldenbusch, No. 158 Park Side Avenue, Nelson H. Stewart, No. 94 Seventh Avenue, both of Brooklyn; William W. Shaw, No. 15 Wall Street, New York.

Portland, Ore.—Articles of incorporation have been filed for the Bloomer Safe & Lock Company, which proposes to engage in the buying and selling of safes, vaults and desks. The incorporators are Thomas C. Bloomer, G. F. Bloomer and L. B. McDaniel, all of Portland. The capital stock is $5,000.

Rochester, N. Y.—Reversible Sad Iron Co. has been incorporated to manufacture sad irons, etc. Capital, $10,000. Incorporators: J. A. Evarts, R. H. Morgan, W. E. Hazard, Rochester.

Syracuse, N. Y.—Miller Combination Tool Co. has been incorporated to manufacture tools, machinery, etc.; capital, $10,000. Incorporators, L. Elsohn, Auburn; L. L. Silverman, W. Joel, D. Grady, Syracuse.

Union, N. J.—The Perfect Metallic Washtub Cover Company has been incorporated with a capital of $25,000. Incorporators, John Conway, Fred Grube and Thomas McClelland.

West Medford, Mass.—Tudor Manufacturing Co. has been incorporated to deal in machinery, tools, etc.; capital, $500,000. President, C. C. Marvel, West Medford; treasurer, E. B. Page, Boston; clerk, C. C. Marvel, West Medford.

Changes and Improvements.

Adrian, Mich.—The Adrian Pulley Co. has leased the old Gilliland factory and their machinery has been shipped from Three Rivers.

Albany, N. Y.—Burdick & Son, manufacturers of stove specialties, dies, tin boxes, etc., at Hamilton and Mosher Streets, will, in a short time enlarge the plant by building a big four-story addition on the lots adjoining on the south. The necessary land has been purchased and the work of building the addition will be begun as soon as possible.

Baltimore, Md.—J. Henry Miller has been awarded the contract on the large addition to be erected by the S. R. Sexton Stove and Manufacturing Company. The building will have a floor space of about 150 by 150 feet.

Bellaire, Ohio.—A. L. Houston has been awarded the contract for erecting a large addition to the present plant of the Bellaire Stove Company. The new addition will be a two-story brick structure, 80x100 feet, and will be located west of the main building and foundry. It will be occupied by the offices and finishing department of the works, but the major part of the room will be used for storage purposes.

Belleville, Ill.—The Quality Stove and Range Company has certified to an increase of capital stock from $10,000 to $20,000.

Elbridge, N. Y.—Walter E. Johnson of the firm of Johnson & Robedee has sold his interest in the Elbridge Tool and Machine Company to his partner, William L. Robedee.

Ensley, Ala.—T. C. Thompson & Bro., who are the contractors rebuilding the nail mills of the Southern Steel Company which were destroyed by fire a few weeks ago, are pushing the work. The plant is being put up with structural iron, and cement flooring will be put down, making the buildings fireproof. Machinery has been ordered and will be placed upon arrival. It is intended to have the plant ready for operation by May 1.

Kansas City, Mo.—The Kansas Moline Plow Company have taken out a permit for the foundation for a seven-story warehouse from 959 to 967 Mulberry Street in the West bottoms. The foundation will cost $10,000. The building will have a ground area of 100x192 feet.

La Crosse, Wis.—Having outgrown its present quarters the Western Hammock Company of 1260 Horicon Street, is preparing to erect a new factory in the Spring. The building will be of brick or cement block, two stories with basement, and fitted with all modern conveniences.

Philadelphia, Pa.—Henderson & Co. will build a four-story storage house, 95x73 feet, on the west side of Philip Street, north of Dauphin, for the Abraham Cox Stove Company, to cost $40,000.

Port Huron, Mich.—The air tool department of the Lee Manufacturing Company will be enlarged within the next month. This has been decided upon by the stockholders in order to take care of the increasing business. By the changes, the output of the institution will be greatly increased, and a large number of additional men will be employed.

Richmond, Va.—President F. Sitterding, of the Sitterding-Carneal-Davis Company, has announced that the company has decided to increase its capital stock $50,000 and the entire amount of the increase was to be expended in building and equipping a large and entirely modern wire screen factory for manufacturing of all kinds, sizes and descriptions of wire screens. Work on the big plant will start immediately, and it is proposed to have the plant completed as soon as possible. Over 100 experienced hands will be employed by the plant, at Lombard and Leigh Streets, between the Seaboard Air Line and the Atlantic Coast Line tracks, where the plant will have easy connections for Southern shipment. The company is composed of Fritz Sitterding, Creed Davis, William Carneal, Fritz Will and Robert Perkins.

South Columbus, Ohio.—Negotiations have been completed by which a syndicate of local business men will take over an interest in the Capital Lock Nut and Washer Company, now erecting a plant in South Columbus, and will take an active interest in the affairs of the company. The present company is organized under Colorado laws, and T. H. Ryan, a leading official of the Colorado Fuel and Iron Company, is president. Other prominent Denver men are also identified with the company. The company will make a patent lock nut for bolts and also manufacture the ordinary nut washers and bolts. The plant is well on the way to completion and it is expected to begin operations about May 1.

St. Louis, Mo.—Woodhouse Hardware Manufacturing Company has filed a statement to show that it has made an increase in its capital stock from $10,000 to $65,000, all the increase paid.

Taunton, Mass.—The Weir Stove Company are just completing an addition to their works in the rear of the office. The addition which will be built to the foundry as soon as the barn is removed will be an unusually large one.

Unionville, Conn.—The Upson Nut Company has sold to J. Broadbent & Son the property known as the clip shop.

Winsted, Conn.—The Empire Knife Co. has filed a certificate of an increase in its capital stock from $40,000 to $80,000.

Wrightsville, Pa.—The National Novelty Company has purchased the Wrightsville Hardware Company's plant, York County. The company owns large works at New Brighton and other points. The Wrightsville works employs 275 men. The plant, including machinery, appliances, ground and buildings, is estimated to be worth $200,000.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Boston, Mass.—E. H. Corson, first a pioneer cyclist and later a pioneer motorcyclist, has finally interested capital in the several useful motorcycle specialties he has originated and has incorporated "The Motorcycle Specialty Co., E. H. Corson, manager." The company is capitalized at $10,000 It will succeed the Indian Motorcycle Co., under which style Corson has been doing business, and will continue to occupy the premises at 258 Columbus avenue.

Chicago, Ill.—Johnny Gun Company has been incorporated with a capital of $2,500, to manufacture novelties. Incorporators, Irving C. Woodward, L. Harrison Sherwin, George I. Haight.

McKeesport, Pa.—A new industry is to be started in McKeesport within a short time on the site of the present plant of the Firth-Sterling projectile works, which is to be moved to Washington, D. C. The new concern will employ 450 skilled men. A new chip steel for tools will be manufactured by a secret process. The material will also be used for the manufacture of firearms. The process is controlled by the Firth-Sterling Company and the product is made only in their plant in England. Work will commence about August 1, after which the new mill will be completed.

Meridian, Miss.—The Meridian Auto & Cycle Co., has been incorporated with $10,000 capital. Theodore Sturges, R. G. Mynton and others are the incorporators.

Miami, Fla.—Rousseu & Umstead, new store.

Milwaukee, Wis.—The Seaman Manufacturing Co. has just closed a contract with the Republic Rubber Co., of Youngstown, Ohio, to manufacture the Par golf ball, invented by A. D. Seaman. The contract with the Republic Rubber Co. is for the life of the patent. Mr. Seaman will personally superintend the placing of the machinery and manufacture of the balls for the first six months of the contract.

Ottawa, Ont.—Hurd & McBride will open a sporting goods store at 191 Sparks Street. They will carry sporting goods of all kinds, bicycle sundries, etc.

Rochester, N. Y.—The Rochester Motorcycle Club has been formally organized, with these officers: President, A. D. Fisk; vice-president, F. L. Hunt; secretary, Thomas Dransfield, Jr.; treasurer, Herman B. Brown. Thirty-six riders were enrolled as members.

Changes and Improvements.

Athol, Mass.—Carl N. Richardson has bought a half interest in the bicycle and automobile business of John Manly.

Brooklyn, N. Y.—Frank O. Erricson, the Brooklyn agent for Reading Standard bicycles and Thoroughbred motorcycles, has enlarged. He has taken the store next door, now occupying Nos. 444-446 Dean Street.

Cheyenne, Wyo.—L. P. House sold out to Frank V. Wright.

Elmira, N. Y.—The manufactory of the Reliance Motor Cycle, conducted in Addison now by W. H. Ives, will move here. The idea is to be located in Elmira next Fall and to market the motorcycle for the season of 1907 from this city. The company will erect a building of its own and continue operations independently on a large scale.

Lake Geneva, Wis.—George Hoeg is enlarging his store.

New York, N. Y.—F. A. Baker & Co., who handle Pierce bicycles and Indian and Curtiss motorcycles and do a distributing business in this district, have leased the store floor and basement of 37 Warren Street, to which they will remove on April 1st. At present they are occupying the same street.

Fires.

Penquannock, N. H.—Alfred Simpkins' store has been damaged by fire; loss, $500.

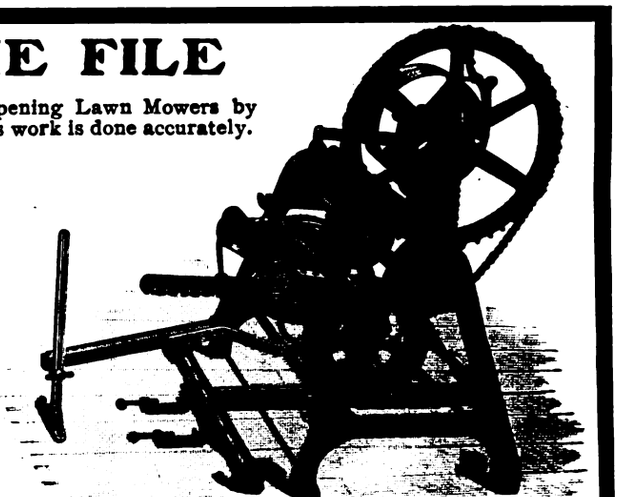
is the only oil for lubricating, cleaning, polishing, and preventing rust, and the only oil that sells itself—it is advertised everywhere—it is so good people always want more. Ask your jobber.

G. W. COLE COMPANY, 145 Broadway, New York City.

THE MAN BEHIND THE FILE

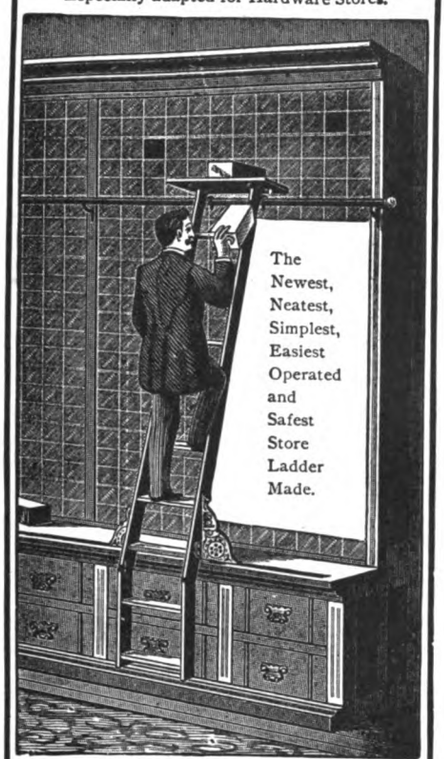
Is also behind the age if he still persists in the drudgery of sharpening Lawn Mowers by hand. It is mighty tedious labor, and he never can be sure that his work is done accurately. But if he will purchase an



IDEAL LAWN MOWER GRINDER

his work becomes almost play; his effort will have produced a cutting surface mathematically exact on every blade, and he will have saved time enough in the grinding over the old manner, to sharpen four lawn mowers. He can, moreover, sustain his old rate and in many cases the Grinders have paid for themselves within a fortnight. The Grinders are made for either hand or power grinding. The latter is equipped with tight and loose pulleys, and can be operated by hand if desired.

The greatest satisfaction and the most money for the least effort—that's the key to the 1906 model of the IDEAL LAWN-MOWER GRINDER.



Send for particulars.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made.. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.
